from Lower Silesia, analysis of (TRAUBE), 1886, A., 212.
from St. Paul Island, solubility of (JANNASCH), 1884, A., 971.
rock of the coasts of Labrador (COHEN), 1885, A., 644.
preparation of (MEUNIER), 1891, A., 22.
Labrador-porphyries of the Vosges (OSANN), 1888, A., 569.
Laccaic acid (SCHMIDT), 1887, A., 734.
Lac-dye, composition of (SCHMIDT), 1887, A., 734.
Lacmoid (*lakmoid*) (TRAUB and HOCK), 1885, A., 148; (HARTLEY), 1888, A., 295; (FOERSTER), 1891, A., 241.
as a reagent for alkalis (DRAPER), 1885, A., 931.
and other indicators (THOMSON), 1885, A., 1157.
Lacquer (*urushi*), chemistry of (YÔSHIDA), 1883, T., 472.
diastatic matter of, and its action on urushic acid (YÔSHIDA), 1883, T., 483.
Lactalbumin (SEBELIEN), 1885, A., 1000; (HALLIBURTON), 1891, A., 340.
estimation of, in condensed milk (FABER), 1890, A., 92.
Lactam (V. BAEYER and OECONOMIDES), 1883, A., 202.
formation in the fatty series (ANSCHÜTZ), 1890, A., 774.
Lactamidobenzoic acid (PELLIZZARI), 1886, A., 548.
Lactamine (ENGEL), 1884, A., 725.
Lactanilide (LEIPEN), 1888, A., 580.
Lactarius piperatus, constituents of (BISSINGER), 1884, A., 480; (CHODAT and CHUIT), 1890, A., 80.
fats obtained from (GÉRARD), 1891, A., 606.
Lactarius piperatus, sugars in (BOURQUELOT), 1891, A., 103.
Lacterius vellereus, fats obtained from (GÉRARD), 1891, A., 606.
Lactates (MEYER), 1886, A., 1009.
Lactation, influence of pilocarpine and atropine on (HAMMERBACHER), 1884, A., 1396.
Lactic acid (*inactive ethylidenelactic acid; α-hydroxypropionic acid*), presence of, in blood (BERLINERBLAU), 1888, A., 974.
presence of, in pale and red muscle (GLEISS), 1889, A., 177.
presence of, in urine (GAUBE), 1890, A., 188.
preparation of (JACQUEMIN), 1891, A., 1454.
formation of, from levulose (SOROKIN), 1886, A., 141.
formation of, from molasses, from raffinose, and from cane sugar (BEYTHIEN, PARCUS and TOLLENS), 1890, A., 583, 582.
formation of, from sugars (CUISINIER and KILIANI), 1883, A., 42.
formation of, in organs with impeded circulation and in hydrocyanic acid poisoning (ZILLESSEN), 1891, A., 1126.
formation of, in the organism (BERLINERBLAU), 1888, A., 974; (ARAKI), 1891, A., 1125, 1392; 1892, A., 517, 1113.
action of the bacillus of malignant œdema on (KERRY and FRAENKEL), 1890, A., 1454; 1892, A., 91.
changes in, in the muscle during work (MONARI), 1890, A., 185.
resolution of, into its optically active components (PURDIE and WALKER), 1892, T., 754; P., 132.
resolution of, by *Penicillium glaucum* (LINOSSIER), 1892, A., 297.
oxidation of (ARISTOFF), 1885, A., 752.
pyrogenic decomposition of (HANRIOT), 1886, A., 224.
compounds of (LEIPEN), 1888, A., 580.
aluminium and barium salts of (MEYER), 1886, A., 1009.
ammonium salt of, action of heat on, in presence of ammonia gas (ENGEL), 1884, A., 725.
detection and estimation of (PALM), 1887, A., 307.
detection and estimation of, in wines (MACH and PORTELE), 1890, A., 1345.
estimation of small quantities of (WINDISCH), 1888, A., 199.

Lactic acid, chloro-, decomposition products of the sodium salts of (REISSE), 1890, A., 1097.
  *tri*chloro-, preparation of glyoxal derivatives from (PINNER), 1884, A., 1298.
  thio-, and its salts (LOVÉN), 1884, A., 1298.
    preparation of (BÖTTINGER), 1885, A., 752.
    phenyl-derivatives of (BAUMANN), 1885, A., 514.
  Paralactic acid (*dextrorotatory*) (*sarcolactic acid*) (LEWKOWITSCH), 1884, A., 296.
    presence of, in animals (HIRSCHLER), 1887, A., 167.
    presence of, in blood (BERLINERBLAU), 1888, A., 974; (SALOMON), 1889, A., 64.
    presence of, in the urine of cold-blooded animals after extirpation of the liver (NEBELTHAU), 1888, A., 1323.
    formation of, during the artificial circulation of blood through the liver (WISSOKOWITSCH), 1888, A., 860.
    formation of, during the fermentation of sugar (NENCKI and SIEBER), 1890, A., 78.
    formation of, during muscular activity and its fate in the organism (MARCEUSE), 1887, A., 508.
    formation of, in muscles (WERTHER; BÖHM), 1891, A., 348.
    formation of, in the organism (BERLINERBLAU), 1888, A., 974.
    of the thymus and thyroid (MOSCATELLI), 1888, A., 860.
    in the urine of soldiers after a forced march (COLASANTI and MOSCATELLI), 1888, A., 1321.
Lactic acid (*lævoratatory*) (SCHARDINGER), 1891, A., 666.
β-Lactic acid. See Hydracrylic acid.
Lactic ferment occurring in malt wort (LINDNER), 1888, A., 622.
  in milk (HUEPPE), 1885, A., 1170.
Lactic fermentation. See Fermentation.
Lactim (v. BAEYER and OECONOMIDES), 1883, A., 202.
Lactobionic acid (FISCHER and MEYER), 1889, A., 485.
Lacto*iso*citric acid (FITTIG and MILLER), 1890, A., 587.
Lactocrite (FABER), 1887, A., 1144; (NILSON), 1892, A., 550.
Lactoglobulin (SEBELIEN), 1885, A., 1000.
Lactone, double, obtained in the preparation of diphthalylethane (ROSER), 1885, A., 267.
Lactone formation in the case of hydroxy acids, velocity of (HJELT), 1891, A., 822.
Lactone ring, resolution of, by alcohol and hydro-acids (BREDT), 1886, A., 531.
Lactones (FITTIG), 1884, A., 744; 1888, A., 251; 1890, A., 583; 1892, A., 812, 956.
  conversion of ketonic acids into (ROSER), 1885, A., 165; (THORNE), 1885, A., 1200.
  conversion of lactonic acids into (ERDMANN), 1885, A., 963.
  conversion of unsaturated acids into the isomeric (FITTIG), 1883, A., 730.
  derived from allylmalonic, diallylmalonic and diallylacetic acids (HJELT), 1883, A., 456.
  derived from glycines (ABENIUS), 1888, A., 825; 1890, A., 245.
  action of ammonia on (FITTIG), 1890, A., 879.
  action of ethylic oxalate on (WISLICENUS), 1888, A., 1194.
  action of phenylhydrazine on (WISLICENUS), 1887, A., 489.
  action of sodium and sodium ethoxide on (FITTIG), 1890, A., 866.
  action of water on (FITTIG), 1883, A., 730.
  condensation-products of (FITTIG), 1885, A., 375.
  combinations of, with ethereal salts (WISLICENUS), 1887, A., 952.
β-Lactone of the quinoline series (EINHORN and LEHNKERING), 1888, A., 1208.
β-Lactones, aromatic, substituted (BASLER), 1884, A., 603, 1172.
Lactonic acids (FITTIG), 1888, A., 251; 1890, A., 583; 1892, A., 812, 956.
  action of sodium and sodium ethoxide on the ethereal salts of (FITTIG), 1890, A., 866.
  conversion of, into lactones (ERDMANN), 1885, A., 963.
  reciprocal transformations of hydroxy-acids and (HENRY), 1892, A., 1303.
Lactose (*milk-sugar*) and its derivatives. See under Carbohydrates.
Lactosecarboxylic acid (FISCHER), 1890, A., 599.
Lactosin (MEYER), 1884, A., 980.
Lactotoluidides, *o*- and *p*- (LEIPEN), 1888, A., 580.
Lactotoxine (FIRTH), 1887, A., 389.

Lactucerin (HESSE), 1886, A., 1020; 1888, A., 722; (KASSNER), 1887, A., 605.

Lactucerols, *α*- and *β*- (HESSE), 1886, A., 1021.

Lactucol (KASSNER), 1887, A., 606.

Lactylcarbamide. See Methylhydantoin.

Lævulinic acid. See Levulinic acid.

Lævulose. See Levulose under Carbohydrates.

Lake deposits of Kolsnaren, Viren, and Högsjön, Södermanland, Sweden (CRONQUIST), 1883, A., 448.

"**Lakes**," coloured, formation of (VIGNON), 1891, A., 807.

Lakmoid. See Lacmoid.

Lallemantia iberica, oil of (RICHTER), 1888, A., 83.

Laminaria, sugar-like compound from (BAUER), 1889, A., 687.

"**Lamprophyry**" (PÖHLMANN), 1884, A., 1273.

Lamps, electric, preparation of carbons for, from furfuraldehyde or fucusaldehyde (SMITH), 1885, A., 1267.
  incandescent. See Incandescent lamps.

Lanarkite from Leadhills (COLLIE), 1889, T., 92.
  See also Lead sulphate.

Land. See Agricultural Chemistry.

Langbanite (FLINK), 1887, A., 782.
  place of, in the mineral system (BÄCKSTRÖM), 1891, A., 1436.

Langite from Klausen, Tyrol (v. FOULLON), 1888, A., 429.

Lanolin (BRAUN), 1884, A., 784; (LIEBREICH), 1891, A., 97.
  See also Cholesterol.

Lansfordite (GENTH), 1888, A., 793; (GENTH and PENFIELD), 1890, A., 571.

Lanthana. See Lanthanum oxide.

Lanthanum, atomic weight of (CLEVE), 1883, A., 553; (BRAUNER), 1891, A., 881.
  extraction of, from cerite (ARCHE), 1884, A., 557.
  phosphoresence of (BETTENDORFF), 1891, A., 985.

Lanthanum oxide (*lanthana*) (BETTENDORFF), 1890, A., 852.
  phosphorescent, sharp line spectrum of (CROOKES), 1887, A., 1070.
  action of magnesium on (WINKLER), 1890, A., 693.
  salts, molecular refraction and dispersion of, in solution (GLADSTONE), 1891, T., 595.
  metaphosphate (JOHNSON), 1889, A., 756.

Lanthanum phosphates (OUVRARD), 1888, A., 1037.
  sulphate, phosphorescence of (CROOKES), 1887, A., 1067.
  sulphides of (DIDIER), 1885, A., 955.

Lapachol (*hydroxyamylenenaphthaquinone; lapachic acid*) (PATERNÒ), 1883, A., 210.
  occurrence of, in Bethabarra wood (GREENE and HOOKER), 1889, A., 794.
  constitution of (PATERNÒ), 1883, A., 214; (HOOKER and GREENE), 1889, A., 999; (HOOKER), 1892, T., 611.
  action of concentrated acids and of reducing agents on (PATERNÒ), 1883, A., 212.
  derivatives of (PATERNÒ), 1883, A., 210; (PATERNÒ and MINUNNI), 1890, A., 1310; (HOOKER), 1891, A., 1239; (PATERNÒ and CABERTI), 1891, A., 1494.
  acetyl-derivatives of (PATERNÒ), 1883, A., 211.
  bromo- (PATERNÒ), 1883, A., 211; (HOOKER), 1892, T., 638; P., 125.

Lapacholoxime (PATERNÒ and MINUNNI), 1890, A., 1310.

β-**Lapachone** (PATERNÒ), 1883, A., 213.
  constitution of (HOOKER and GREENE), 1889, A., 1000.
  condensation of, with thiophen (PATERNÒ and CABERTI), 1891, A., 1494.

β-**Lapachones**, bromo- (HOOKER), 1892, T., 638; P., 125.

Lapachones, *α*- and *β*- (HOOKER), 1892, T., 635, 636.

*iso***Lapachone** and *β*-**lapachoneoxime** (PATERNÒ and MINUNNI), 1890, A., 1310.

"**Lapidolyd**" (BELLMER), 1884, A., 1087.

Larch fungus, constituents of (JAHNS), 1884, A., 353.

Lard, adulteration of (AMBÜHL), 1889, A., 659; (GLADDING), 1890, A., 93; (WILEY), 1891, A., 1560.
  adulteration of, with cocoa-nut oil (ALLEN), 1889, A., 320.
  analysis of (MUTER and DE KONINGH), 1891, A., 130.
  detection of beef stearin in (PATTINSON), 1890, A., 428.
  detection of cotton-seed oil in (BISHOP and INGÉ), 1889, A., 194; (ALLEN; HEHNER), 1889, A., 319; (WILLIAMS; JONES), 1889, A., 320; (AMBÜHL), 1889, A., 659; (PATTINSON), 1890, A., 428.
  detection of vegetable oils in (WELMANS), 1892, A., 1133.

- **Lard,** estimation of beef fat in (Wilson), 1889, A., 659.
  - estimation of cotton-seed oil in (Wilson), 1889, A., 659; (Bockairy), 1890, A., 307.
- **Lard-cream** (Willard), 1884, A., 536.
- **Lard-oil,** specific gravity and refractive index of (Long), 1889, A., 86.
  - iodine number of, by Hübl's method (Haines), 1892, A., 664.
- **Laserpitine,** and its derivatives (Külz), 1884, A., 182.
- *Lasia,* hydrocyanic acid in the fruit of (Greshoff), 1891, A., 338.
- **Latent heat.** See Thermochemistry.
- **Latex,** proteid substance in (Green), 1886, A., 828.
  - of *Ficus Carica* (Mussi), 1892, A., 653.
- *Lathyrus,* analyses of (Nilson), 1892, A., 522.
- **Laubanite,** a zeolite (Traube), 1887, A., 903.
- **Laubenheimer's reaction** (Odernheimer), 1884, A., 1038.
- **Laudanine** (Hesse), 1884, A., 616.
- **Laumontite** (Cross and Hillebrand), 1883, A., 957.
  - from Monte Catini (Bechi), 1883, A., 442.
  - from Striegau (Traube), 1887, A., 903.
- **Laurel,** leaves and berries of, essential oil from (Wallach), 1889, A., 1072.
  - oil of (Brühl and Müller), 1892, A., 722.
- **Laurel-nut oil** (Hooper), 1889, A., 541.
- **Laurene** (1:2-*dimethyl*-4-*ethylbenzene*) (Brühl), 1888, A., 377.
  - an isomeride of (Renard), 1884, A., 173.
  - Fittig's (Armstrong and Miller), 1884, A., 43.
- **Laurenes** (Uhlhorn), 1890, A., 1248.
- **Lauric acid** (*dodecoic acid*), descent of the series from myristic acid to (Lutz), 1886, A., 685.
  - heat of combustion of (Stohmann and Rodatz), 1885, A., 1176.
  - heats of combustion and formation of (Stohmann and Langbein), 1891, A., 11.
  - specific and latent heats of (Stohmann and Wilsing), 1885, A., 1177.
  - action of bromine on (Krafft and Beddies), 1892, A., 696.
  - bromo- (Auwers and Bernhardi), 1891, A., 1190.
- **Laurone** and **lauroneoxime,** preparation of (Kipping), 1890, T., 981, 983.
- **Lauronolic acid** (Woringer), 1885, A., 669.
- **Laurotetanine,** the active constituent of certain Lauraceæ (Greshoff), 1891, A., 337.
- *Laurus Persea,* a sugar from (Müntz and Marcano), 1884, A., 1285.
- **Lauryl chloride** (Krafft and Bürger), 1884, A., 1125.
- **Lautarite** (Dietze), 1892, A., 124.
- **Lauth's violet** (Bernthsen), 1883, A., 916; 1884, A., 595, 1156; 1885, A., 259.
- **Lautite,** from Lauta, Saxony (Weisbach), 1883, A., 432.
- **Lava current** from Etna, chemical composition of various layers of (Ricciardi), 1883, A., 36.
- **Lavas,** recent Vesuvian (Freda), 1890, A., 573.
- *Lavatera arborea* (v. T.), 1884, A., 100.
- **Lavender,** oil of (Semmler and Tiemann), 1892, A., 868; (Bertram and Walbaum), 1892, A., 1235; (Schimmel), 1892, A., 1347.
- **Lavendol** (Semmler and Tiemann), 1892, A., 868.
- **Lavenite** (Brögger), 1886, A., 34.
- **Law** of Avogadro (Krebs), 1885, A., 13; (Schall), 1887, A., 698.
  - of Boyle applied to salts in solution (Adie), 1891, T., 351.
    - deviations of oxygen from, at low pressures (Bohr), 1886, A., 591.
    - relation of gases to, at high temperature (Puschl), 1888, A., 547.
  - of chemical combination (de Landero and Prieto), 1887, A., 99.
  - of cooling (Rivière), 1883, A., 144.
  - of diffusion of liquids (Vernon), 1891, A., 383.
  - of emanation of light from incandescent substances (Möller), 1885, A., 623.
  - of freezing of solvents (Raoult), 1883, A., 278.
  - of heat of solution (Ostwald), 1888, A., 1020.
  - of van't Hoff, applicability of Planck's proof to the (Arrhenius), 1892, A., 935.
  - of isomorphism, modification of the usual statement of (Klein), 1883, A., 147.
  - of Joule, validity of, for electrolytes (Jahn), 1885, A., 1029; 1888, A., 10.
  - of molecular volumes and of boiling-points (Guldberg), 1890, A., 1043.
  - of smallest volumes (Müller-Erzbach), 1884, A., 12.
  - of Stokes, of fluorescence (Hagenbach), 1883, A., 537.

Law of thermal constants (TOMMASI), 1883, A., 143; 1884, A., 883; 1885, A., 8; 1886, A., 408.
of thermo-chemical moduli or constants of substitution (BERTHELOT), 1884, A., 702.
of thermodynamical coincidence, and its application to the theory of solution (NATANSON), 1892, A., 557.
of thermodynamics, second, and its application to chemical phenomena (LE CHATELIER), 1892, A., 3.
of volumes (HUNT), 1887, A., 99.
of volumes, Gay-Lussac's (LEDUC), 1892, A., 1271.
periodic. See Periodic law.

Laws of Berthollet (BERTHELOT), 1883, A., 10; (COLSON), 1890, A., 1367.
of Bouty and Faraday (WURTZ), 1884, A., 882.
of Mariotte and of Gay-Lussac, relation of gases to the (PUSCHL), 1888, A., 16, 18.
thermochemical (BECKER), 1886, A., 498; (BOLTZMANN), 1887, A., 1072.

Layers, formation of, in mixtures of alcohol, water and salts (TRAUBE and NEUBERG), 1888, A., 783.
formation of, in solutions of salts in mixtures of water and organic liquids (LINEBARGER), 1892, A., 1146.
metallic, thin, optical properties of (VOIGT), 1885, A., 1026.

Lazerin (*lazerol*) (KÜLZ), 1884, A., 183.

Lead, native, from the Andaman Islands (MALLET), 1885, A., 1185.
in Idaho (BLAKE), 1884, A., 563.
from Pajsberg, Sweden (IGELSTRÖM), 1890, A., 111; (HAMBERG), 1890, A., 337.
molecular weight of (RAMSAY), 1889, T., 531, 533.
(metal) extraction of, from ores occurring in the Upper Hartz (ANON.), 1883, A., 891.
extraction of, from residues obtained in the manufacture of zinc (PROST), 1888, A., 915.
slags and their analysis (ILES), 1888, A., 416.
waste, assay of (STAHL), 1891, A., 365.
electrolytic refining of (FISCHER), 1884, A., 934.
electrolytic crystallisation of (LEHMANN), 1890, A., 437.
dimorphism of (LEHMANN), 1890, A., 437.
specific heat of (NACCARI), 1888, A., 1236.

Lead (metal), occlusion of hydrogen by (SHIELDS), 1892, A., 942.
action of nitric acid on (VELEY), 1892, A., 410; (MONTEMARTINI), 1892, A., 1403.
action of nitric oxide on (SABATIER and SENDERENS), 1892, A., 1151.
action of nitrosyl chloride on (SUDBOROUGH), 1891, T., 658.
action of petroleum on (FOX), 1888, A., 1249.
action of concentrated sulphuric acid on (PITKIN), 1885, A., 460.
action of certain vegetable acids on (HALL), 1883, A., 1038.
action of water on (ALLEN), 1883, A., 128; (MÜLLER), 1888, A., 225.
co-operation of water in the slow oxidation of (TRAUBE), 1885, A., 1105.
spongy, reducing action of (GLADSTONE and TRIBE), 1883, T., 347.
reduction with (STOLBA), 1888, A., 756.
desilvering of (HAMPE), 1883, A., 134.
effect of, on the freezing point of cadmium (HEYCOCK and NEVILLE), 1892, T., 903.
effect of, on the freezing point of sodium (HEYCOCK and NEVILLE), 1889, T., 675.
effect of, on the freezing-point of tin (HEYCOCK and NEVILLE), 1890, T., 381.
effect of various metals on the freezing-point of (HEYCOCK and NEVILLE), 1890, P., 160.
lowering of the freezing-point of, when alloyed with other metals (HEYCOCK and NEVILLE), 1892, T., 888, 904; P., 145.
physiological effect of, on ruminants (ELLENBERGER and HOFMEISTER), 1885, A., 74.
distribution of, in the brain in cases of lead poisoning (BLYTH), 1887, P., 71.
distribution and elimination of (LEHMANN), 1883, A., 1163.

Lead alloys, action of concentrated sulphuric acid on (PITKIN), 1885, A., 460.
with cadmium (LAURIE), 1889, T., 679; P., 147.
with copper and tin (FRENCH), 1890, A., 335.
with gold, analysis of (HEYCOCK and NEVILLE), 1892, T., 912.
with potassium and with sodium (JOANNIS), 1892, A., 773.

- **Lead alloys,** with thallium, analysis of (Heycock and Neville), 1892, T., 914.
    - with tin (Laurie), 1889, T., 677; P., 147.
        - specific heat of (Spring), 1886, A., 961.
        - melting points of (Weld), 1891, A., 644.
        - specific gravity and composition of (Kleinstück), 1889, A., 1051.
    - with tin and zinc (Wright and Thompson), 1890, A., 336; 1891, A., 267.
    - with zinc (Laurie), 1889, T., 678; P., 147.
    - with zinc and silver (Wright and Thompson), 1891, A., 267.
- **Lead salts,** retention of, by filter paper (O'Shea), 1886, P., 206.
    - double (Berthelot), 1883, A., 275; (André), 1883, A., 717, 903.
- **Lead** antimonate (Beilstein and v. Bläse), 1889, A., 1124; (Ebel), 1890, A., 216.
    - magnesium bromide (Otto and Drewes), 1892, A., 566.
    - potassium bromide (Herty), 1892, A., 779.
    - oxybromide (André), 1883, A., 903.
    - oxybromides, heats of formation of (André), 1884, A., 384.
    - calcium salt, basic (Klinger), 1883, A., 904.
    - carbonate, preparation of (Kubel), 1887, A., 446.
        - See also Cerussite.
    - carbonate, basic (*white lead*), manufacture of (anon.), 1884, A., 1232.
        - composition of (Bourgeois), 1889, A., 21.
    - chloride, action of carbonic oxide on (Bloxam), 1886, A., 17.
        - solubility of, in solutions of mercuric chloride (Formánek), 1887, A., 772.
        - solubility of, influence of hydrochloric acid on the (Engel), 1890, A., 109.
    - double chlorides of ammonium and (André), 1883, A., 717.
    - magnesium chloride (Otto and Drewes), 1891, A., 151.
    - *tetra*chloride (Nikoliukin), 1886, A., 123; (Friedrich), 1890, A., 699.
    - oxychloride (André), 1883, A., 717, 903; 1887, A., 446.
    - oxychlorides, heat of formation of (André), 1884, A., 384.
    - calcium and strontium oxychlorides (André), 1887, A., 446.
- **Lead** chromate (Lachaud and Lepierre), 1892, A., 567.
        - combustion with (de Roode), 1890, A., 926.
        - basic (Lachaud and Lepierre), 1892, A., 567.
        - See also Crocoite.
    - chromates, double (Lachaud and Lepierre), 1890, A., 1065.
    - halogen salts of, action of ammonia on the (Wood and Borden), 1885, A., 1114.
    - double halogen salts of (Herty), 1892, A., 779.
    - imidosulphonates (Divers and Haga), 1892, T., 969.
    - periodates (Kimmins), 1889, T., 149.
    - potassium iodide, equilibrium of, with its aqueous solution (Schreinemakers), 1892, A., 560.
    - potassium iodides (Herty), 1892, A., 779.
    - double iodides of potassium and, heat of formation of (Berthelot), 1883, A., 275.
    - brom- and chlorobrom-iodides (Grissom and Thorp), 1888, A., 916.
    - oxyiodide (Gröger), 1892, A., 1280.
    - nitrate, action of phosphorus oxychloride on (Williams), 1886, T., 224.
    - nitrates, basic (Smolka), 1885, A., 725; (Wakeman and Wells), 1887, A., 1080.
    - nitride (Curtius), 1892, A., 112.
    - copper potassium nitrite (van Lessen), 1891, A., 1157.
    - oxides (Kassner), 1890, A., 699.
    - *mono*oxide (*litharge*), yellow and red (Geuther), 1884, A., 824.
        - process for preparing (anon.), 1883, A., 891.
        - action of, on barium, strontium, calcium and magnesium chlorides (André), 1887, A., 446.
        - action of magnesium on (Winkler), 1891, A., 802.
        - hydrated (Luedeking), 1891, A., 644.
        - compound of, with raffinose (Beythien and Tollens), 1890, A., 580.
        - compounds of, with silver oxide (Aston), 1891, T., 1093; P., 133.
    - *di*oxide, preparation of (Fehrmann), 1883, A., 157.
        - electrical conductivity of (Shields), 1892, A., 672.
        - influence of, on the decomposition of potassium chlorate (Fowler and Grant), 1890, T., 279.

- **Lead** *di*oxide, hydrated, dehydration of, by heat (Carnelley and Walker), 1888, T., 70, 85.
    - analysis of (Opificius), 1889, A., 187.
    - examination of (Ebell), 1886, A., 742.
  - triplumbic *tetr*oxide (*red lead*), process for preparing (Anon.), 1883, A., 891.
  - See also Minium.
  - phosphates (Ouvrard), 1890, A., 1056.
  - phosphite, hydrogen phosphite, nitrophosphite and pyrophosphite (Amat), 1890, A., 945.
  - selenate (Michel), 1888, A., 650.
  - silicate, artificial, from Bonne Terre, Missouri (Wheeler), 1887, A., 109.
    - artificial, crystallised (Dana and Penfield), 1886, A., 317.
  - sulphate, crystalline (Klobb), 1892, A., 1399.
    - phosphorescence of (Crookes), 1887, A., 1068.
    - analysis of (Benedikt), 1892, A., 1522.
    - See also Anglesite and Lanarkite.
  - aluminium sulphate (Bailey), 1888, A., 110.
  - nitrososulphate, existence of (Divers and Haga), 1885, T., 364; P., 45.
  - persulphate (Marshall), 1891, T., 782.
  - sulphide, preparation of (Doelter), 1886, A., 208.
    - synthesis of, by means of thiocarbamide and the deposition of, as a specular film (Reynolds), 1884, T., 162.
    - precipitated, composition of (Antony and Lucchesi), 1890, A., 1217.
    - action of ferric chloride on (Gabba), 1889, A., 947.
    - analysis of (Jannasch and Aschoff), 1892, A., 662; (Jannasch and Bickes), 1892, A., 663; (Benedikt), 1892, A., 1522.
    - estimation of sulphur in (Jannasch and Aschoff), 1892, A., 658.
    - See also Galena.
  - bromo- and chloro-sulphides (Parmentier), 1892, A., 685.
  - silver thiobismuthite (Foster), 1886, A., 515.
  - *di*thionate, optical phenomena of (Wyruboff), 1886, A., 958.
  - *tri*thionate (Fogh), 1890, A., 700.
  - thiosulphate and its decomposition by heat (Fogh), 1890, A., 700.
- **Lead** sodium thiosulphate (Vortmann and Padberg), 1890, A., 12; (Fogh), 1890, A., 700.
- **Lead organic compounds:**—
  - aromatic compounds (Polis), 1887, A., 572; 1888, A., 283; 1889, A., 400.
  - chlorocyanide (Grissom and Thorp), 1888, A., 916.
  - ferricyanide compounds (Rammelsberg), 1889, A., 950.
  - bromo-, chloro- and iodo-thiocyanates (Grissom and Thorp), 1888, A., 916.
- **Lead ores,** assay of, by the cyanide process (Warwick), 1891, A., 863, 962; (Cooper), 1891, A., 962.
- **Lead, detection, estimation and separation**—
  - detection of bismuth in (Guyard), 1884, A., 640.
  - detection of, in the body in cases of poisoning (Lehmann), 1883, A., 687.
  - detection of, in presence of iron (Deros), 1884, A., 367.
  - detection, electrolytic, of (Kohn), 1892, A., 541.
  - microchemical test for (v. Haushofer), 1887, A., 301.
  - assaying in the wet way (Roessler), 1885, A., 596.
  - estimation of (Baumann), 1892, A., 539; (Medicus), 1892, A., 1522.
  - estimation of, as lead *di*oxide by means of the electric current (Tenney), 1884, A., 777.
  - estimation of, by phosphomolybdic acid (Beuf), 1891, A., 113.
  - estimation of, in alloys (Wachsmuth), 1887, A., 304.
  - estimation of, in presence of iron (Deros), 1884, A., 367.
  - estimation of, in tin (Perron), 1890, A., 665.
  - estimation of, in tin-lead alloys (Schwartz), 1888, A., 992; (Winkler), 1889, A., 309.
  - estimation of, in tinplate (Carles), 1884, A., 1078.
  - estimation, electrolytic, of (Brand), 1890, A., 295.
  - estimation, electrolytic, of, as amalgam (Vortmann), 1891, A., 1553.
  - estimation, volumetric, of (Schindler), 1888, A., 757; (Namias), 1892, A., 1375.
  - estimation, volumetric, of, in the presence of tin (Yvon), 1889, A., 549.
  - separation of bismuth from (Lemme), 1890, A., 421; (Remmler), 1892, A., 385.

Lead, separation of bismuth and, by means of bromine vapour (Jannasch and Etz), 1892, A., 540, 754.
separation of copper from (Classen), 1888, A., 529.
separation of copper from, by refining, in Freiberg (anon.), 1883, A., 400.
separation of gold, silver, copper and, from sulphides, by air blast (anon.), 1883, A., 400.
separation of, from mercury and palladium (Rosenbladt), 1887, A., 302.
separation of silver and (Benedikt and Gans), 1892, A., 1522.
separation of silver, zinc and, in galena and blende (Aubin), 1892, A., 1378.
separation of tin, bismuth, cadmium and (Jannasch and Etz), 1892, A., 754.
Lead chamber deposit from Japanese sulphuric acid (Divers and Shimosé), 1884, A., 392.
Lead flux, estimation of small quantities of silver in (Heppe), 1891, A., 1292.
Lead pipes, action of water on (Reichardt), 1888, A., 344, 544; (Carnelley and Frew), 1888, A., 555.
Lead precipitate, influence of, on polarisation (Sachs and de Barbieri), 1885, A. 694.
Lead works, Mechernich, crystalline sulphides from (Brand), 1890, A., 338.
Leadhillite from Leadhills (Collie), 1889, T., 91.
Leaf-green, observations on (Hartley), 1891, T., 106; P., 161.
Leather, vegetable (Bauer, Brouard and Ancel), 1885, A., 851.
detection of grape sugar in (Kohnstein), 1886, A., 745.
estimation of nitrogen in (Danguy), 1885, A., 930.
Leaves. See Agricultural Chemistry.
Lecithin (*protagon*) (Danilewsky), 1884, A., 1388; (Baumstark), 1885, A., 920; (Gibson), 1888, A., 1214.
in plants (Heckel and Schlagdenhauffen), 1886, A., 1064.
in the liver (Heffter), 1891, A., 1275.
in red blood corpuscles (Manasse), 1890, A., 1017.
preparation of, from plant seeds (Schulze and Likiernik), 1891, A., 413.
Lecithin (*protagon*), synthesis of (Hundeshagen), 1884, A., 280.
fate of, in the body (Hasebroek), 1889, A., 173.
estimation of, in the seeds of plants (Schulze and Steiger), 1889, A., 645.
Lecithins, estimation of, in vegetable organisms (Maxwell), 1891, A., 511.
rôle of, in normal germination (Maxwell), 1891, A., 489.
Leclanché cell, and the reactions of manganese oxides with ammonium chloride (Divers), 1883, A., 272.
Lecture apparatus (Valentini), 1885, A., 215.
for making sulphuric anhydride (Hodgkinson and Lowndes), 1888, A., 647.
Lecture experiments (Divers), 1883, T., 447; (v. Hofmann), 1883, A., 280; (Schwarz), 1883, A., 292; (Ladenburg), 1883, A., 1048; (Rosenfeld), 1884, A., 258; (Meyer), 1884, A., 552; (Rüdorff), 1885, A., 869; (Müller), 1886, A., 976.
with hydriodic acid (Austen), 1889, A., 754.
with nitric acid (Austen), 1889, A., 672.
with nitrogen chloride (Meyer), 1888, A., 343.
conversion of carbon *di*oxide into carbon *mon*oxide (Lepsius), 1890, A., 1048.
conversion of oxygen into carbon *mon*oxide (Lepsius), 1890, A., 1048.
conversion of steam into water gas (Lepsius), 1890, A., 1049.
conversion of sulphurous anhydride into carbon *mon*oxide (Lepsius), 1890, A., 1049.
formation of acetylene (Cazeneuve), 1884, A., 419.
formation of chromammonium compounds (Kraut), 1886, A., 849.
formation and decomposition of sulphurous anhydride (Lepsius), 1890, A., 1049.
preparation of ferrates (Bloxam), 1886, A., 848.
preparation of potassium ferrate (Mermet), 1887, A., 769.
preparation of silicon hydride (Mermet), 1887, A., 769.
synthesis of ammonia (Valentini), 1887, A., 442.
composition of hydrochloric acid and other gases (Alessi), 1889, A., 567.

Lecture experiments, composition, volumetric, of certain gaseous compounds (Hawkridge), 1889, A., 336.
  composition, volumetric, of nitrous and nitric oxides (Keiser), 1886, A., 660.
  on spectrum analysis (Cleminshaw), 1885, A., 1035.
  action of the electric arc on gases (Lepsius), 1890, A., 1047.
  electrolysis of ammonia (Irving), 1886, A., 848.
  electrolysis of hydrochloric acid (Rosenfeld), 1886, A., 848; 1887, A., 633.
  delicate thermometer for (Young), 1888, A., 410.
  the evolution and absorption of heat (Franchimont), 1883, A., 454.
  combustion of air in coal gas (Craig), 1888, A., 1244.
  combustion of hydrogen in nitric acid (Hodgkinson and Lowndes), 1888, A., 1244.
  combustion of magnesium in water vapour (Moody), 1891, P., 20.
  combustion of oxygen in ammonia (Hodgkinson and Lowndes), 1888, A., 1244.
  explosion (Oettel), 1888, A., 910.
  to illustrate the phenomena of coal dust explosions (Thorpe), 1892, T., 414; P., 53.
  on flame (Anschütz and Kekulé), 1885, A., 1035.
  continuous flame of nitric oxide and carbon *di*sulphide (Valentini), 1887, A., 442.
  decomposition of carbon *di*sulphide by shock (Thorpe), 1889, T., 220; P., 33.
  effusion of gases (Freer), 1892, A., 1150.
  dissociation of ammonium chloride (R. and G. F. R. Blochmann), 1891, A., 1415.
  dissociation of phosphonium bromide (Newth), 1892, A., 401.
  demonstration of Avogadro's law (Schall), 1887, A., 698.
  demonstration of Dulong and Petit's law (Schall), 1887, A., 634.
  demonstration of Raoult's law (Ciamician), 1889, A., 336.
  demonstration of valency (Lepsius), 1888, A., 410; 1890, A., 1050.
  coefficient of expansion of a gas (Schiff), 1887, A., 1013.
  diffusion of gases (Biltz), 1892, A., 562.

Lecture experiments, occlusion of hydrogen by palladium (Schiff), 1885, A., 1035; (Wilm), 1892, A., 563.
  burning sulphur in oxygen (Noyes), 1892, A., 679.
  combination of electrolytic gas (Meyer), 1892, A., 562.
  combination of nitric oxide and oxygen (Austen), 1889, A., 754.
Ledum camphor (Hjelt and Collan), 1883, A., 346.
Ledum palustre, camphor from the ethereal oil of (Rizza), 1888, A., 845.
Leech, medicinal, action of a secretion obtained from (Haycraft), 1885, A., 571.
  extract, effect of, on blood (Dickinson), 1891, A., 482.
Leidenfrost's experiment reversed, a lecture experiment (v. Hofmann), 1883, A., 281.
Legumin (Ritthausen), 1883, A., 675.
Leguminosæ. See Agricultural Chemistry.
Leguminous seeds, composition of (Waage), 1887, A., 991.
Leken, the paraffin from ozokerite (Beilstein and Wiegand), 1883, A., 1073.
Lemon grass oil (Dodge), 1891, A., 286.
Lemon-juice, production of ether by the action of *Aspergillus glaucus* on (Phipson), 1884, A., 855.
  concentrated, estimation of free and precipitable acid in (Grosjean), 1883, T., 333.
  estimation of citric acid in (Williams), 1890, A., 88.
Lemon oil. See Oil.
Lemons, Californian, analyses of (Colby and Dyer), 1892, A., 1511.
  essence of, and detection of oil of turpentine in (Oliveri), 1891, A., 1496.
Lepiden. See Tetraphenylfurfuran.
"*iso*Lepiden," reduction of (Japp and Klingemann), 1889, P., 139; 1890, T., 691.
Lepidine. See 4′-Methylquinoline.
Lepidium sativum, influence of salt on the quantity of starch contained in the vegetating organs of (Lesage), 1891, A., 1133.
Lepidolite (*lithia mica*), extraction of lithium from (Anon.), 1889, A., 344.
  See also Mica.
Lepidolites of Maine (Clarke), 1887, A., 347.

- **Lepidomelane** from Baltimore and Maine (Clarke), 1886, A., 678; 1888, A., 118.
  - See also Mica.

Levonic acid, and its salts (Wiederhold), 1885, A., 653.
Levosin, a carbohydrate from cereals (Tanret), 1891, A., 661.
Levulinic acid (*β-acetylpropionic acid*) (Wolff), 1885, A., 1123; (Michael), 1891, A., 1337.
  preparation of (Rischbieth), 1887, A., 799.
  formation of, as a test for carbohydrates (Wehmer and Tollens), 1886, A., 532; 1888, A., 535.
  constitution of (Michael), 1888, A., 134.
  magnetic rotation of (Perkin), 1892, T., 800.
  action of acetic anhydride on (Magnanini), 1888, A., 819.
  condensation of, with aldehydes (Erdmann), 1892, A., 147.
  action of bromine on (Hell and Kehrer), 1884, A., 1297.
  condensation of, with furfuraldehyde (Kehrer), 1892, A., 442.
  action of iodic acid on (Angeli and Chiussi), 1892, A., 1179.
  derivatives of (Wolff), 1885, A., 1123; (Michael), 1891, A., 1337.
  oxime of (Thal), 1892, A., 1074.
  phenylhydrazone (Bender), 1888, A., 1188.
  p-nitrophenylhydrazone (Fischer and Ach), 1890, A., 41.
  salts of (Block and Tollens), 1887, A., 800.
  reactions for (Seliwanoff), 1887, A., 459.
Levulinic acid, *α*-bromo- and *αβ-di*bromo- (Wolff), 1891, A., 1187.
  β-bromo- (Wolff), 1887, A., 464.
  *ββ-di*bromo- (Wolff), 1891, A., 417.
  chloro- and *di*chloro- (Seissl), 1889, A., 489.
Levulinic anhydride phenylhydrazone (Ach), 1890, A., 70.
  p-nitrophenylhydrazone (Fischer and Ach), 1890, A., 41.
Levulinic oxime (Dollfus), 1892, A., 1202.
  phenylhydrazide, hydrazone of (Bredt), 1890, A., 864; (Volhard), 1892, A., 436.
  phenylhydrazoneazobenzene (Volhard), 1892, A., 436.
Levulose and its derivatives. See Carbohydrates.
Levulosecarboxylic acid, preparation of (Kiliani and Düll), 1890, A., 596.
  derivatives of (Düll), 1891, A., 547.
  lactone of (Kiliani), 1886, A., 869.
Levulo*di*thiodiglycollic acid (Bongartz), 1888, A., 479.
Leyden batteries, electric discharge of (Dvořák), 1883, A., 763.
Licarene (Morin), 1888, A., 1308.
Licareol and **licareone** (Barbier), 1892, A., 1236.
Licari kanali, essential oil of (Barbier), 1892, A., 1236.
Licaryl methyl and **ethyl ethers** (Barbier), 1892, A., 1236.
Lichenin (Hönig and Schubert), 1888, A., 127.
Lichenin sugar (Bauer), 1886, A., 869.
Lichens, assimilation by (Jumelle), 1891, A., 1132.
  exchange of gases between, and the atmosphere (Bonnier and Mangin), 1885, A., 580.
Lichen-starch (Hönig and Schubert), 1888, A., 127.
Lichenstearic acid, preparation of (Hilger and Buchner), 1890, A., 600.
Liebig memorial statue at Munich (v. Pettenkofer; v. Baeyer and Zimmermann), 1884, A., 880.
Liebig's condenser, a modified form of (Shenstone), 1883, T., 123.
Liebig's extract of **meat**, physiological action of (Lehmann), 1886, A., 89.
Liebigite, so-called, from Joachimsthal (Schrauf), 1883, A., 955.
Lievrite. See Ilvaite.
Life, test for (Kretzschmar), 1883, A., 489.
Ligamentum nuchæ, action of digestive fluids on (Ewald), 1889, A., 912.
Light, electric. See Electric Light under Electrochemistry.
  emitted by comets (Berthelot), 1886, A., 261.
  monochromatic, production of (Fleischl v. Marxow), 1890, A., 549.
    simple burner for (Noack), 1886, A., 14.
    for the determination of the magnetic rotary polarisation of compounds (Perkin), 1884, T., 424.
  white, production of, by mixing the colours of the spectrum (Stroumbo), 1887, A., 1.
  law of emanation of, from incandescent substances (Möller), 1885, A., 623.
  change in colour in felspar, due to the action of (Erdmann), 1883, A., 438; 1886, A., 27.

Light, phosphorescence of minerals under the influence of (BECQUEREL), 1891, A., 776.
  ultra-violet, influence of, on the electric discharge (HERTZ), 1888, A., 13.
  influence of, on the electrical resistances of metals (BOSTWICK), 1885, A., 469.
  influence of, on the electrical conductivity of selenium (KALISCHER), 1888, A., 99.
  electromotive force produced by the action of, on selenium (KALISCHER), 1887, A., 693; 1889, A., 3; (v. ULJANIN), 1888, A., 883; 1889, A., 202; (RIGHI), 1889, A., 555.
  sensitiveness of selenium and sulphur cells to (BIDWELL), 1886, A., 2.
  influence of, on the heat conductivity of selenium (BELLATI and LUSSANA), 1888, A., 98.
  resistance to, of dyes fixed in tissues (JOFFRE), 1889, A., 12.
  dessicator for substances sensitive to (LIEBERMANN), 1888, A., 1155.
  influence of, on the development of bacteria (JAMIESON), 1884, A., 475.
  influence of, on the growth of yeast (KEY), 1886, A., 387.
  variation with temperature of the velocity of, in metals (KUNDT), 1889, A., 719.
  velocity of, in carbon *di*sulphide (GOUY), 1886, A., 957.
  velocity of, in quartz (EXNER), 1886, A., 653.
  absolute unit of (VIOLLE), 1885, A., 622.
  a unit for the measurement of (V. SIEMENS), 1885, A., 1.
  measurement of the quantity of, that enters water (REGNARD), 1891, A., 2.
  See also Photochemistry.
Lighting, artificial, influence of, on the atmosphere of dwellings (FISCHER), 1884, A., 122.
Lignic acids (LANGE), 1890, A., 228.
Lignification, chemistry of (CROSS and BEVAN), 1883, T., 18; 1889, T., 199; P., 30.
  technical aspects of (CROSS), 1883, A., 694.
Lignin (LANGE), 1889, A., 1235; 1890, A., 228; (LINDSEY and TOLLENS), 1892, A., 802.
  quantitative reaction for (BENEDIKT and BAMBERGER), 1890, A., 1474.
Lignite tar (HEUSLER), 1892, A., 1075.
Lignocellulose, action of, with ferric ferricyanide (ISAAC), 1892, A., 1421.
Lignocelluloses (CROSS and BEVAN), 1892, A., 693.
  constitution of (CROSS and BEVAN), 1892, A., 129.
  action of nitric acid on (CROSS and BEVAN), 1891, P., 61.
Lignoceric acid, occurrence of, in earth nut oil (KREILING), 1888, A., 578.
Lignose (*wood-cellulose*), manufacture of (ANON.), 1884, A., 1451.
  constitution of (CROSS and BEVAN), 1883, T., 20.
Liliaceæ, presence of salicylic acid in certain genera of the (GRIFFITHS), 1889, P., 122.
Lily of the valley (*Convallaria majalis*) (LANGLEBERT), 1885, A., 271.
Limburgite, analysis of (DOELTER), 1883, A., 722.
Lime, process for rendering cement and, less subject to atmospheric influences (PUSCHER), 1883, A., 398, 530.
  "chloride of." See Calcium hypochlorite and Bleaching powder.
  gas-. See Gas-lime.
  milk of. See Calcium hydroxide.
  osmose process, Dubrunfaut's (DE PUYDT), 1884, A., 941.
  raffinose (BEYTHIEN and TOLLENS), 1890, A., 580.
  saccharate, influence of chlorides of the alkalis and alkaline earths on the precipitation of, from warm solutions (DEGENER), 1883, A., 692.
  "waste" from sugar factories as manure (STROHMER), 1884, A., 925; (HOLDEFLEISS and STROHMER), 1886, A., 647.
  water. See Calcium hydroxide.
  See also Calcium oxide.
"Lime of Theil," action of water on (LANDRIN), 1883, A., 830.
Lime-dialogite (WEIBULL), 1884, A., 410.
Lime juice, estimations of free and precipitable acid in (GROSJEAN), 1883, T., 333.
Lime leaves (*Citrus Limetta*), essential oil of (WATTS), 1886, T., 316; P., 158.
"Lime *di*phosphate" (HASENCLEVER), 1885, A., 615.
Lime-seed, oil of (MUELLER), 1892, A., 92.
Limestone from the "Montagnola Senese" (FUNARO), 1890, A., 712.

Limestone, granular, of Stainz in Styria (Hussak), 1887, A., 780.
  older, of the secondary series, origin of iron, manganese, and zinc minerals in (Dieulafait), 1885, A., 644.
  erosion of (Ewing), 1885, A., 358.
  See also Calcium carbonate.
Limettin (Tilden and Beck), 1890, T., 323; (Tilden), 1892, T., 344; P., 33.
  action of hydrating agents on (Tilden), 1892, T., 351.
  action of hydriodic acid on (Tilden), 1892, T., 350.
  oxidation of (Tilden), 1892, T., 346, 349.
  *di*bromo-, *tri*chloro-, and nitro- (Tilden), 1892, T., 348, 349, 350.
Limonene (*citrene, hesperidene*) and its derivatives. See Terpenes.
Limonetrol (Wagner), 1890, A., 1314.
Limonite (Welch), 1885, A., 1116.
  from South Africa, composition of (Roscoe), 1885, A., 132.
  in Texas (Penrose), 1892, A., 1405.
  See also Ferric hydroxide under Iron.
Limonite-pseudomorphs after iron pyrites (Smith), 1886, A., 992; (Meem), 1887, A., 116.
Linaloe oil (Semmler), 1891, A., 540.

    - lines, order of reversibility of (Liveing and Dewar), 1883, A., 839.
    - magnetic rotation of (Perkin), 1890, P., 142.
    - effect of, on the freezing-point of sodium (Heycock and Neville), 1889, T., 675.
- **Lithium salts**, molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 595.
  - phosphorescence of, in vacua (Brooks), 1891, A., 249.
  - action of (Hager), 1885, A., 441.
  - poisoning of plants by (Gaunersdorfer), 1887, A., 991.
  - physiological action of (Richet), 1886, A., 88, 385; (Blake), 1886, A., 385.
- **Lithium** antimonate (Beilstein and v. Bläse), 1889, A., 1124.
  - arsenate, normal, crystalline, preparation of (de Schulten), 1890, A., 10.
  - bromate (Potilizin), 1892, A., 1275.
  - bromide, anhydrous, heat of solution of (Bodisco), 1889, A., 1098.
  - stannibromide (Leteur), 1892, A., 121.
  - carbonate (Flückiger), 1887, A., 1000.
    - preparation of, from lepidolite (Thompson), 1883, A., 1086.
    - solubility of (Bewad), 1885, A., 634; (Draper), 1887, A., 699.
    - detection of sodium in (Symons), 1890, A., 547.
  - chlorate and perchlorate, decomposition of, by heat (Potilizin), 1889, A., 338, 339.
  - chloride, boiling-points of solutions of (Skinner), 1892, T., 341.
  - copper chloride (Chassevant), 1892, A., 118.
  - double chlorides of, with metals of the magnesium group (Chassevant), 1892, A., 1275.
  - oxychloride (Kraut), 1883, A., 17; 1884, A., 16; (Lunge), 1884, A., 820.
  - lead chromates (Lachaud and Lepierre), 1890, A., 1065.
  - chromiodate (Berg), 1887, A., 777.
  - halogen salts, molecular refraction of (Wegner), 1890, A., 549.
  - hydroxide, formation of hydrates of, from alcoholic solutions (Göttig), 1888, A., 106.
- **Lithium** hypochlorite (Kraut), 1883, A., 17.
  - hypophosphate (Rammelsberg), 1892, A., 403.
  - iodide, anhydrous, heat of solution of Bodisco), 1889, A. 329.
  - molybdate, combination of, with tartaric acid (Gernez), 1889, A., 860.
    - rotatory power of compounds of malic acid with (Gernez), 1890, A., 744.
  - nitride (Ouvrard), 1892, A., 565.
  - oxide (*lithia*) (Beketoff), 1888, A., 1244.
    - heat of formation of (Beketoff), 1884, A., 1247; (Muller), 1889, A., 811.
    - reduction of, by magnesium (Winkler), 1890, A., 331.
  - phosphate, normal crystalline, preparation of (de Schulten), 1890, A., 10.
  - phosphates (Rammelsberg), 1883, A., 424; (Ouvrard), 1890, A., 1055.
  - silicates (Hautefeuille and Margottet), 1883, A., 559.
  - sulphate, solubility of (Etard), 1888, A., 645.
    - anhydrous, heat of solution of (Pickering), 1885, T., 98; 1886, T., 309.
    - monohydrated, heat of solution of (Pickering), 1886, T., 310.
  - tungstates (Feit), 1888, A., 344.
  - vanadates (Ditte), 1887, A., 705.
  - zirconate (Ouvrard), 1891, A., 1431.
- **Lithium, estimation**:—
  - estimation of sodium and, in mixtures of their carbonates (Holdermann), 1887, A., 864.
  - estimation of, as fluoride (Carnot), 1888, A., 1342.
  - estimation of, in iron and slags (Warren), 1888, A., 1256.
  - estimation of, in mineral waters (Carnot), 1888, A., 1342; (Waller), 1891, A., 1292.
  - estimation, quantitative, of (Göttig), 1888, A., 106.
  - estimation, spectroscopic, of (Bell), 1885, A., 1012; (Hofmann), 1886, A., 178.
  - estimation, indirect, of alkalis in presence of (Kraut), 1888, A., 195.
- **Lithomarge** from New South Wales (Liversidge), 1886, A., 774.
- **Litmin** (Hartley), 1888, A., 295.
- **Litmus** as an indicator (Thomson), 1883, A., 682, 824; 1884, A., 691, 869.

Litmus, purification of (Foerster), 1889, A., 1086.
tincture of, decolouration of, in closed vessels (Dubois), 1889, A., 67.
action of acids on (Marsh), 1890, A., 792.
decolouration and recolouration of, by light (Bellamy), 1889, A., 199.

Litmus paper, neutral (Mays), 1891, A., 1549.

Litre, the true or Mohr's, for volumetric analysis (Fresenius), 1891, A., 1548.

Litsea chrysocoma, alkaloid from (Greshoff), 1891, A., 337.

Litter. See Agricultural Chemistry.

Liver, composition of, under varying conditions (Weiske), 1887, A., 855.
so-called, of *Helix pomatia* (Levy), 1891, A., 235.
of *Patella vulgata* (Griffiths), 1888, A., 178.
cephalopod, pancreatic functions of (Griffiths), 1885, A., 829.
diastatic ferment of (Kaufmann), 1890, A., 185.
disease, nature of the effusions in (Halliburton), 1890, A., 1174.
excretion of urea in diseases of the (Mörner and Sjöquist), 1891, A., 758.
carbohydrates in human (Kratschmer), 1885, A., 679.
cystin and xanthine in the horse's (Drechsel), 1892, A., 516.
formation of glycogen in (Hergenhahn), 1890, A., 1334; (Nebelthau), 1891, A., 1526.
importance of ammonia in the formation of glycogen in (Röhmann), 1887, A., 68.
influence of alkalis on the glycogen of (Dufourt), 1891, A., 758.
influence of arsenic and antimony on the glycogenic function and fatty degeneration of the (Chittenden and Blake), 1889, A., 537.
influence of starvation on the glycogen of (Aldehoff), 1889, A., 427.
hæmoglobin in blood passing to and from (v. Middendorff), 1889, A., 1023.
iron in the (Delépine), 1890, A., 1177.
jecorin in the (Drechsel), 1886, A., 636.
production of lactic acid during the artificial circulation of blood through the (Wissokowitsch), 1888, A., 860.
lactic acid in the urine of cold-blooded animals after extirpation of (Nebelthau), 1888, A., 1323.

Liver, lecithin in the (Heffter), 1891, A., 1275.
conversion of peptone by the (Seegen), 1886, A., 382.
peptone the source of sugar in (Seegen), 1883, A., 818; 1888, A., 172.
post mortem formation of sugar in the (Seegen), 1888, A., 172; (Girard), 1889, A., 176.
power of the, to form sugar from fat (Seegen), 1887, A., 67.
of new-born dogs, estimation of glycogen in (Demant), 1887, A., 167.
estimation of iron in the (v. Zaleski), 1886, A., 1054; (Krüger, Meyer and Pernoù), 1891, A., 848; (Bunge), 1892, A., 1503.
of young animals, estimation of iron in (Lapicque), 1890, A., 185.

Liver-cells, crystals in the nuclei of (Grandis), 1891, A., 587.
proteids of (Halliburton), 1890, A., 1014.

Live-weight, influence of various salts on (Weiske), 1892, A., 647.

Loam, heavy, fertility of, increased by lime (Johnstone), 1892, A., 523.

Lobelia, alkaloids of (Dragendorff and v. Rosen), 1887, A., 854.

Lobeline (Paschkis and Smita), 1890, A., 1169.

Locust-bean, the shells of, as a condiment (Voelcker), 1884, A., 631.

Löllingite from St. Andreasberg (Loczka), 1886, A., 513.
and other minerals from Colorado (Hillebrand), 1884, A., 826.

Loganetin and **loganin** (Dunstan and Short), 1885, A., 396.

Logwood extract, action of chlorine on (Macfarlane and Clarkson), 1890, A., 905.
extracts, testing (Palmer), 1889, A., 1091.

Lokanic and **lokaonic acids** (Kayser), 1886, A., 255.

Lokao (*Chinese-green*) and **lokaose** (Kayser), 1886, A., 254, 255.

"**Longrain**" and measure of the foliation in schistose rocks by means of their thermic properties, study of (Jannettaz), 1883, A., 300.

Long-wool, composition of (Chludsinsky), 1886, A., 105.

Lophin. See Triphenylglyoxaline.

Lotus corniculatus and *L. uliginosus*, composition of (Nilson), 1892, A., 522.

Lubricating oil. See Oil.

Lucasite, a variety of vermiculite (Chatard), 1887, A., 349.

Lucerne. See Agricultural Chemistry.

Ludwigite (Whitfield), 1888, A., 347.
Lugano eruptive district (Harada), 1883, A., 167.
Lungs, influence of oxygen on the separation of carbonic anhydride in the (Werigo), 1892, A., 1369.
Lupanine, the alkaloid of the blue lupine (Hagen), 1886, A., 163; (Siebert), 1892, A., 223.
Lupeol (Likiernik), 1891, A., 551, 1446.
Lupeose. See β-Galactan under Carbohydrates.
Lupetidine. See 2:6-Dimethylhexahydropyridine.
α-Lupetidylalkine. See Hydroxypropylpiperidine.
Lupines. See Agricultural Chemistry.
Lupinidine. See Alkaloids.
Lupiniin (Baumert), 1888, A., 1222.
Lupinindine (Baumert), 1884, A., 1387.
Lupinine. See Alkaloids.
Lupinus albus, alkaloids of (Soldaini), 1892, A., 892.
  vanillin in the seeds of (Campani and Grimaldi), 1888, A., 983.
Lupinus angustifolius an alkaloid (*lupanine*) from the seed of (Hagen), 1886, A., 163; (Siebert), 1892, A., 223.
Lupinus luteus, base from (Schulze and Steiger), 1886, A., 725.
  carbohydrate from the seed of (Steiger), 1886, A., 608.
  composition of the seeds of (Schulze, Steiger and Maxwell), 1891, A., 1541.
  the liquid alkaloid from (Baumert), 1884, A., 1387.
  non-nitrogenous reserve substances of the seeds of (Schulze and Steiger), 1890, A., 284.
Lupulic acid (Bungener), 1886, A., 809.
Lupulin (Stockbridge), 1890, A., 657.
  volatile fatty acids present in commercial (Ossipoff), 1886, A., 1007.
  estimation of, in hops (Reinitzer), 1890, A., 431.
Lussatite, a form of silica (Mallard), 1890, A., 569.
Lustre, metallic (Spring), 1889, A., 206.
Lutecite (Michel-Lévy and Munier-Chalmas), 1890, A., 712.
Lutein (MacMunn), 1884, A., 196.
Luteo- and **roseo-salts**, relation between (Jörgensen), 1884, A., 1093.
Luteo-chromium, -cobalt and **-rhodium salts.** See under Chromium, cobalt and rhodium.
Lutidine [b.p. 173°] (Scichilone and Magnanimi), 1883, A., 99.
  behaviour of, with metallic salts (Oechsner de Coninck), 1885, A., 671.
  See also Dimethylpyridine.
β-Lutidine. See 4-Ethylpyridine.
  hexahydride. See Ethylpiperidine.
ψ-Lutidinecarbostyril (Collie), 1887, A., 502.
Lutidinic acid. See Pyridine-2:4-dicarboxylic acid.
Lutidone. See 2:6-Dimethylpyridone.
ψ-Lutidostyril (2:4-*dimethylpyridone*) and its derivatives (Hantzsch), 1885, A., 397.
ψ-Lutidostyril-mono- and -di-carboxylic acids (Nieme and v. Pechmann), 1891, A., 676.
α-Lutidylalkine. See Hydroxypropylpyridine.
Lutidylquinoline. See Dimethylpyridylquinoline.
Luting for conduct-pipes (anon.), 1883, A., 536.
Luzonite from the Argentine (Klockmann), 1891, A., 1435.
Lycaconine and **lycaconitine** (Dragendorff and Spohn), 1885, A., 403.
Lycium barbarum, alkaloids of (Schütte), 1892, A., 232.
Lycoctonic acid and **lycoctonine** (Dragendorff and Spohn), 1885, A., 403.
Lycopersicum esculentum, composition of the fruit of (Briosi and Gigli), 1891, A., 955; (Passerini), 1891, A., 956.
Lycopodium, acids from (Langer), 1889, A., 1059.
  spores, constituents of (Langer), 1889, A., 741.
Lycopodium Saururus, alkaloids from (Arata and Canzoneri), 1892, A., 894.
Lymph, effect of peptone on the clotting of (Shore), 1891, A., 481.
  human (Munk and Rosenstein), 1891, A., 755, 849.
Lysatine and **lysatinine** (Drechsel), 1891, A., 95.
Lysine (Drechsel and Krüger), 1892, A., 1500.

M.

Macassar oil (Thümmel and Kwasnick), 1891, A., 1133.
Mace oil (Wallach), 1889, A., 1072; (Semmler), 1890, A., 1150.
Macleaya cordata, alkaloid of (Eijkman), 1885, A., 404.

Macleyine (EIJKMAN), 1885, A., 404.
Maclura aurantiaca, composition of the leaves of (PIZZI), 1891, A., 490, 954.
Macropiper methysticum (*Kawa-kawa*), substance from the root of (DAVIDOFF), 1888, A., 1207.
Madder, Caucasian, examination of (BERGAMI), 1887, A., 1061.
Madder colours (WURTZ), 1883, A., 598.
Magdala red and **magenta**. See under Colouring Matters.
Magmas, fused, action of, on various minerals (DOELTER and HUSSAK), 1884, A., 401.
Magnesia. See Magnesium oxide.
"**Magnesia alba**" (KRAUT), 1883, A., 153.
Magnesia industry (SCHLŒSING), 1885, A., 1166.
Magnesia-knebelite from Dalecarlia (IGELSTRÖM), 1890, A., 1075.
Magnesia-mica, artificial (VOGT), 1888, A., 1260; (v. CHRUSTSCHOFF), 1890, A., 343.
Magnesium, presence of, in calcium and sodium phosphates (SCHLAGDENHAUFFEN), 1890, A., 664.
  atomic weight of (MARIGNAC), 1884, A., 815; (BURTON and VORCE), 1890, A., 850.
  molecular weight of (RAMSAY), 1889, A., 531, 533.
  (metal), preparation of (WALTER), 1884, A., 1231; (v. PÜTTNER), 1885, A., 1112.
    production, electrolytic, of (GROTH), 1885, A., 940; (FISCHER), 1885, A., 942.
    burnt, ammonia in (ASLANOGLOU), 1890, A., 1209.
    spectrum of (HARTLEY), 1883, T., 392; (LIVEING and DEWAR), 1883, A., 2; 1889, A., 89; (AMES), 1891, A., 1.
      mathematical analysis of the (GRÜNWALD), 1888, A., 389, 882.
    heats of combination of bromine and iodine with (BEKETOFF), 1892, A., 762.
    melting point of (MEYER), 1887, A., 445.
    combustion of, in water vapour (MOODY), 1891, P., 20.
    action of alkaline carbonates and *di*carbonates on (BALLÓ), 1883, A., 574.
    action of ammonia on (WARREN), 1889, A., 345; (MERZ), 1892, A., 409.
Magnesium (metal), action of bromine on (GAUTIER and CHARPY), 1892, A., 118.
    action of, on chlorides (SEUBERT and SCHMIDT), 1892, A., 776.
    action of chlorine on (COWPER), 1883, T., 154; (GAUTIER and CHARPY), 1892, A., 118.
    action of ethylic and methylic iodides on (LÖHR), 1891, A., 683.
    action of hydrogen peroxide and of water saturated with carbonic anhydride on (GIORGIS), 1892, A., 17.
    action of nitric acid on (MONTEMARTINI), 1892, A., 1403.
    action of nitrosyl chloride on (SUDBOROUGH), 1891, T., 656.
    action of propylic iodide on (LÖHR), 1891, A., 684.
    as a reagent (WARREN), 1890, A., 195.
    reduction of oxygen compounds by (WINKLER), 1890, A., 331, 451, 693, 1372; 1891, A., 801, 1155.
    platinised, as a reducing agent (BALLÓ), 1883, A., 1053.
    use of, in primary batteries (HEIM), 1888, A., 1002.
    use of, for Bengal lights (ANON.), 1885, A., 1172.
    effect of, on the freezing point of tin (HEYCOCK and NEVILLE), 1890, T., 381.
    lowering of the freezing point of lead by (HEYCOCK and NEVILLE), 1892, T., 904.
Magnesium halogen compounds (CROSS and BEVAN), 1888, P., 91.
  compounds of, with hydrocarbon radicles, experiments on the existence of (MASSON and WILSMORE), 1891, P., 16.
  salts, magnetic rotation of (PERKIN), 1890, P., 142.
    molecular refraction and dispersion of, in solution (GLADSTONE), 1891, T., 595.
    and ammonia, thermochemistry of reactions between (BERTHELOT), 1887, A., 96.
  acetate, basic ("*sinidor*") (ANON.), 1883, A., 396.
  arsenate (DE SCHULTEN), 1885, A., 724.
  ammonium arsenate (BLAREZ), 1887, A., 204.
  potassium and sodium arsenates (LEFÈVRE), 1890, A., 562, 563.
  orthoborate [$Mg_3B_2O_6$] (LE CHATELIER), 1892, A., 404.

Magnesium boride (Winkler), 1890, A., 693.
  bromide and ammonium bromide (Lerch), 1884, A., 262, 263.
  lead bromide (Otto and Drewes), 1892, A., 566.
  manganese bromide (Saunders), 1892, A., 781.
  potassium bromide (Lerch), 1884, A., 262; (Feit), 1889, A., 827.
  stannibromide (Leteur), 1892, A., 121.
  carbonate, solubility of, in carbonic acid (Engel), 1885, A., 484.
    and its combination with potassium hydrogen carbonate (Engel), 1886, A., 121.
    and potassium hydrogen carbonates, limit to the combination of (Engel), 1885, A., 872.
  hydrocarbonate (Engel), 1885, A., 724.
  chloride, anhydrous (Hempel), 1888, A., 554.
    solubility of, in water at 0° (Engel), 1887, A., 771.
    decomposition of, in solution (Foussereau), 1886, A., 975.
    solutions, boiling points of (Skinner), 1892, T., 341.
    solutions, electrolysis of (Cross and Bevan), 1888, P., 91.
    manufacture of chlorine from (Dewar), 1888, A., 411.
  lead chloride (Otto and Drewes), 1891, A., 151.
  manganese chloride (Saunders), 1892, A., 781.
  sodium chromate (Stanley), 1887, A., 111.
  chromiodate (Berg), 1890, A., 1378.
  chromites, basic (Viard), 1891, A., 987.
  mercury bromo- and iodo-cyanides (Varet), 1891, A., 1442.
  hydride (Winkler), 1891, A., 1156.
  hydrosulphide solution and its use in chemico-legal cases as a source of hydrogen sulphide (Divers and Shimidzu), 1884, T., 699.
  hydroxide, crystallised, formation of (de Schulten), 1885, A., 1183.
  iodide and potassium iodide (Lerch), 1884, A., 262.
  molybdate, rotatory power of compounds of malic acid with (Gernez), 1890, A., 744.
    combination of, with tartaric acid (Gernez), 1889, A., 859.
  *per*molybdate (Péchard), 1892, A., 1160.

Magnesium nitride (Winkler), 1890, A., 451; (Merz), 1892, A., 409.
  suboxide (Gore), 1885, A., 123.
  oxide (*magnesia*), containing rare earths (Johnson), 1886, A., 980.
    crystalline (Brügelmann), 1890, A., 850.
    effects of the presence of, in Portland cement (Lechartier), 1886, A., 770.
    fluorescence of (Lecoq de Boisbaudran), 1887, A., 409.
    phosphorescence of (Crookes), 1887, A., 1068.
    action of hydrogen peroxide on (Kuriloff), 1892, A., 1278.
    action of magnesium and hydrogen on (Winkler), 1891, A., 1156.
    dissociation of, by means of metallic magnesium (Morse and White), 1891, A., 643.
    saturation of arsenic acid by (Blarez), 1887, A., 204.
    See also Periclase.
  peroxide (Gibson and Morrison), 1886, A., 305.
  hypophosphate (Rammelsberg), 1892, A., 404.
  phosphate, crystallised (de Schulten), 1885, A., 724.
  ammonium phosphate (Gawalowski), 1886, A., 204; (Berthelot), 1887, A., 202.
    crystals of, in urine (Weiske), 1883, A., 609.
    solubility of, in alcohol (Wakeman), 1888, A., 1131.
    estimation of nitrogen in (Maissen and Rossi), 1890, A., 291.
  potassium and sodium phosphates (Ouvrard), 1888, A., 1035.
  selenites (Boutzoureanu), 1891, A., 262.
  silicates, action of sea-water on (Johnstone), 1890, A., 451.
  silicide (Winkler), 1890, A., 1372.
    preparation of (Gattermann), 1889, A., 342.
  sulphate (Bailey), 1887, T., 682.
    anhydrous, monohydrated, and heptahydrated, heats of solution of (Pickering), 1885, T., 100; 1886, T., 291.
    solubility of (Etard), 1888, A., 645.
    See also Epsomite.
  ammonium sulphate, form of crystals of, after expulsion of the ammonia (Warington), 1888, P., 65.
  copper potassium sulphate (Roy), 1887, P., 53.

Magnesium iron sulphate, native (BLAAS), 1884, A., 269.
  potassium sulphate. See Potassium magnesium sulphate.
  sulphite (HARTOG), 1887, A., 886.
    use of, in sugar factories (BERGREEN and LICHT), 1884, A., 939.
  ammonium sulphite (HARTOG), 1887, A., 887.
  ammonium and potassium thiosulphates (FOCK and KLÜSS), 1890, A., 564.

  sulphite (Gorgeu), 1883, A., 558.
  double sulphites of, with the alkalis (Gorgeu), 1883, A., 718.
  thiosulphate (Vortmann and Padberg), 1890, A., 12; (Fock and Klüss), 1890, A., 564.
  sodium thiosulphate (Vortmann and Padberg), 1890, A., 12.
  *para*tungstate (Gonzalez), 1887, A., 895.

Manganese compounds analogous to ferro- and ferri-cyanide of potassium, preparation of (Christensen), 1885, A., 737.
  ammonium ferrocyanide (Blum), 1891, A., 1293.

Manganese, detection, estimation and **separation**:—
  microchemical test for (v. Haushofer), 1887, A., 300.
  detection of (Klein), 1889, A., 653.

Manganese, detection, estimation and **separation**:—
  detection of, in commercial zinc-dross and in calamine (Guyard), 1884, A., 640.
  detection of, in presence of zinc by electrolysis (Guyard), 1884, A., 368.
  precipitation of, with bromine (Wolff), 1884, A., 640; (Holthof), 1885, A., 690.
  precipitation of, as ammonium manganous phosphate (McKenna), 1891, A., 1138.
  precipitation of, as peroxide (Alt), 1890, A., 419.
  estimation of (anon.), 1885, A., 1264; (Diehl), 1886, A., 101; (Barlow), 1886, A., 393; (Atkinson), 1887, A., 399; (Meineke), 1887, A., 1139; (Schneider), 1888, A., 873.
  estimation of, as sulphide (Meineke), 1888, A., 1132.
  estimation of, by the chlorate method (v. Reis), 1892, A., 1132.
  estimation of, by means of hydrogen peroxide (Carnot), 1889, A., 443.
  estimation of, with potassium permanganate (Jolles) 1889, A., 798.
  estimation of small quantities of, by Chatard's method (Thorpe and Hambly), 1888, T., 182.
  estimation of, in foods (Stein), 1889, A., 188.
  estimation of, in ferromanganese, spiegeleisen, etc. (Bloxam), 1885, A., 84; (Kalmann and Smolka), 1885, A., 690.
  estimation of, in cast iron or spiegeleisen (Bloxam), 1885, A., 84.
  estimation of small quantities of, in iron rich in silicon (Reinhardt), 1888, A., 1132.
  estimation of, in iron ores (anon.), 1883, A., 883; (Zulkowski), 1884, A., 116.
  estimation of, in iron and steel (Schöffel and Donath), 1884, A., 116; (Troilius), 1885, A., 597; (Babbitt), 1887, A., 619; (Morgan), 1887, A., 1140; (Weissmann), 1888, A., 992; (Blum), 1891, A., 963; (Rürup), 1892, A., 916; (Rubricius), 1892, A., 1030, 1524.
  estimation of, in pig iron, effect of silica on (Deane), 1887, A., 183.
  estimation of, in its ores and alloys (J. and H. S. Pattinson), 1892, A., 536.
  estimation of, in ores, slags, etc. (Myhlertz), 1891, A., 366; (Norris), 1892, A., 385.

Manganese, estimation and separation:—
estimation of, in soils (VAN BEMMELEN), 1890, A., 833.
estimation of zinc in the presence of (NEUMANN), 1888, A., 549.
estimation, colorimetric, of (LEDEBUR), 1883, A., 242; (OSMOND), 1885, A., 690.
estimation, electrolytic, of (MOORE), 1886, A., 921; (BRAND), 1890, A., 294; (SMITH), 1890, A., 1029.
estimation, volumetric, of (MACKINTOSH), 1884, A., 220; (STONE), 1884, A., 499; (SCHLAGDENHAUFFEN), 1885, A., 442; (RAIMOND), 1885, A., 840; (SCHÖFFEL and DONATH), 1887, A., 399; (MEINEKE), 1887, A., 531; (VORTMANN), 1890, A., 1470; (MOORE), 1891, A., 962; (BLUM), 1891, A., 1293.
estimation, volumetric, of, by means of potassium chlorate (HAMPE), 1886, A., 101; (v. REIS), 1892, A., 1132.
estimation, volumetric, of, influence of organic matter and iron on (MACKINTOSH), 1885, A., 85.
separation of, from calcium and iron (RÜRUP), 1892, A., 916.
separation of, from much lime, error in (BLUM), 1889, A., 1087.
separation of, from iron (BLUM), 1887, A., 183; (MEINEKE), 1889, A., 441; (CAMPBELL), 1892, A., 193.
separation of, from iron and nickel (CARNOT), 1886, A., 650.
separation of nickel and cobalt from (JANNASCH and FRANZEK), 1892, A., 240.
separation of, from the sesquioxide group and phosphoric acid (MEINEKE), 1889, A., 309.
separation of, from zinc (BAYLEY), 1888, A., 388; (JANNASCH and MACGREGORY), 1891, A., 963; (DONATH), 1892, A., 384; (JANNASCH and NIEDERHOFHEIM), 1892, A., 537.
separation of, from zinc, aluminium, iron, nickel, and cobalt (MOORE), 1888, A., 631.

Manganese-apatite (WEIBULL), 1887, A., 781.
from Saxony (v. SANDBERGER), 1886, A., 432.

Manganese-blende. See Alabandite.

Manganese-epidote. See Piedmontite.

Manganese-garnet. See Spessartite.

Manganese-hedenbergite (GORGEU), 1884, A., 410.

Manganese-hisingerite, analysis of (WEIBULL), 1886, A., 34.

Manganese-iron-olivine, artificial crystals of (LASPEYRES), 1884, A., 410.

Manganese minerals from Vester-Silfberg in Dalarne (WEIBULL), 1884, A., 409.
from Wermland (IGELSTRÖM), 1886, A., 34.
origin of (DIEULAFAIT), 1885, A., 644, 1119.

Manganese-ochre from Upsala (DE GEER), 1883, A., 429.

Manganese-ores (SCHUBERT), 1883, A., 36.
from Dillenburg (SCHNEIDER), 1888, A., 1260; 1890, A., 459.
in Ekaterinoslav (KOZOWSKI), 1891, A., 648.
of Transcaucasia (KOZOWSKI), 1891, A., 647.
analyses of (v. LILL and SCHNEIDER), 1884, A., 24.
estimation of cobalt in (MOORE), 1892, A., 917.

Manganese-spar from Arzberg (v. (SANDBERGER), 1892, A., 1406.
from Scharfenberg (ZINKEISEN), 1892, A., 1406.
See also Manganese silicate.

Manganese-steel (GAUTIER), 1885, A., 307.

Manganese-zinc-serpentine from Franklin, New Jersey (KÖNIG), 1887, A., 646; 1888, A., 565.

Manganiferous spring waters (MASON), 1890, A., 854.

Manganite from Oberstein (BRAUNS), 1886, A., 675.
pseudomorph of (GORGEU), 1888, A., 792.
See also Manganese hydroxide.

Manganocalcite (WEIBULL), 1886, A., 33; (DES CLOIZEAUX), 1886, A., 320.

Mangano-magnesian magnetite (CHESTER), 1891, A., 274.

Manganopectolite from Arkansas (WILLIAMS), 1891, A., 407.

Manganophyllite from Harstigen Mine, Sweden (HAMBERG), 1892, A., 1411.
from Långban (FLINK), 1889, A., 221.

Manganostibiite, a mineral from Wermland (IGELSTRÖM), 1886, A., 25.

Manganotantalite from the Ural (ARZRUNI), 1888, A., 234.

Manganous oxide. See Manganese *mono*xide.

Mangel wurzel. See Agricultural Chemistry.

Mangostin and *iso***mangostin** (LIECHTI), 1892, A., 205, 206.

  heat of neutralisation of (BERTHELOT), 1886, A., 8; (GAL and WERNER), 1887, A., 206.
  heat of solution of (BERTHELOT), 1886, A., 8.
  action of hydroxylamine on (MEYER), 1884, A., 993; (ODERNHEIMER), 1884, A., 1302.
  action of phosphoric chloride on (HILSEBEIN), 1885, A., 1202.
  derivatives of (MENNEL), 1883, A., 656.
  derivatives of, containing nitrogen, and their conversion into pyridine (OST), 1883, A., 791.
  nitrogenous derivatives of (OST), 1885, A., 48.
Meconine (WEGSCHEIDER), 1883, A., 996.
  action of potassium cyanide on (BOWMAN), 1887, A., 586.
ψ-Meconine and its derivatives (SALOMON), 1887, A., 585; (PERKIN), 1890, T., 1072.
Meconineacetic acid and *o*-nitro- (LIEBERMANN and KLEEMANN), 1887, A., 47, 48.
ψ-Meconinic acid (PERKIN), 1890, T., 1073.
Mecylene, *per*chloro- (OST), 1883, A., 796.
Medicago, analyses of different varieties of (NILSON), 1892, A., 522.
Medicagol (ETARD), 1892, A., 746.

Medullic acid (Mohr), 1890, A., 652.
Meerschaum (Damour), 1886, A., 316.
Meionite, artificial production of (Bourgeois), 1883, A., 561; 1884, A., 564.
  Vesuvian, formula of (Kenngott), 1892, A., 417.
Melam compounds (Klason), 1886, A., 524.
Melamine (*cyanuramide*), formation of (Smolka and Friedreich), 1889, A., 951; (Rathke), 1890, A., 1082.
  constitution of (v. Hofmann), 1886, A., 41; (Rathke), 1886, A., 217.
  derivatives (v. Hofmann), 1886, A., 38; (Klason), 1886, A., 522.
    constitution of (v. Hofmann), 1886, A., 41; 1887, A., 650.
*iso*Melamines, alkyl, derived from the alkyl cyanamides (v. Hofmann), 1886, A., 41.
Melampyrum pratense, assimilation of (Koch), 1888, A., 739.
Melanin (Mörner), 1887, A., 168; (Miura), 1887, A., 855; (Brandl and Pfeiffer), 1890, A., 805.
  artificial (Pouchet), 1891, A., 1123.
  as a precursor of hæmoglobin (Delépine), 1891, A., 480.
Melanins, animal (Nencki and Sieber), 1888, A., 976; (Abel), 1890, A., 1452.
Melanite from the Kaiserstuhl (Soltmann), 1891, A., 651.
  from Lantigné, Rhône (Lacroix), 1883, A., 438.
Melanophlogite (Spezia), 1884, A., 1104; (Friedel), 1891, A., 648.
ψ-Melanose (Neumann), 1888, A., 864.
Melanothallite (*melanotallo*) from Vesuvius (Scacchi), 1886, A., 600.
Melanurenic acid. See Ammelide.
Melanuria, urine in (v. Jaksch), 1889, A., 637.
Melaphyres of the Little Carpathians (Stein), 1883, A., 447.
  of Lower Silesia (Coleman), 1883, A., 563.
"**Meldometer**" (Joly), 1892, A., 414.
Melem (Klason), 1886, A., 324.
  and its decomposition by alkalis (Klason), 1886, A., 524.
Melezitose (Alechin), 1890, A., 733.
  and its acetyl and phenylhydrazine derivatives (Alechin), 1886, A., 683.
Melibiose (Scheibler and Mittelmeier), 1889, A., 953; 1890, A., 226, 1085.
Melibiosephenylhydrazine (Scheibler and Mittelmeier), 1890, A., 1085.
Melibiotite (Scheibler and Mittelmeier), 1890, A., 227.
Melicitose, thermochemistry of (Stohmann and Langbein), 1892, A., 764.
Melidoacetic acid, derivatives of (Krüger), 1891, A., 162.
Melilite (Stelzner), 1883, A., 719.
  artificial production of (Bourgeois), 1884, A., 564.
  formation of, during the burning of Portland cement (Bodländer), 1892, A., 416.
  composition of (Vogt), 1892, A., 1410.
  basalts (Stelzner), 1883, A., 719.
Melilite-bearing rock from Canada (Adams), 1892, A., 1058.
Melilotic acid. See Hydrocoumaric acid.
Melilotus alba and *M. officinalis*, composition of (Nilson), 1892, A., 522.
Melilotus leucantha (Munro), 1886, A., 828.
Melinointrisulphonic acid, and its salts (Trzciński), 1884, A., 590, 1185.
Meliphane (*melinophane*) (Brögger), 1890, A., 1079.
Melisse oil, German (Semmler), 1891, A., 540.
Melissic acid (Stürcke), 1884, A., 1281.
Melissylmellisate (Kissling), 1884, A., 173.
Melitose or **melitriose.** See Raffinose under Carbohydrates.
Mellite, artificial production of (Friedel and Balsohn), 1883, A., 427.
  specific heat of (Bartoli and Stracciati), 1884, A., 1244.
Mellitic acid (Bartoli and Papasogli), 1883, A., 593.
  thermochemistry of (Berthelot), 1886, A., 8; (Gal and Werner), 1887, A., 206; (Stohmann, Kleber and Langbein), 1889, A., 1096.
  action of aniline and of methylamine on (Hötte), 1885, A., 1220.
Mellityl acetate, alcohol and **chloride** (Jacobsen), 1889, A., 875.
Mellogen, analyses of (Bartoli and Papasogli), 1883, A., 592.
  incomplete oxidation of (Bartoli and Papasogli), 1886, A., 469.
Mellone, action of alkalis on (Klason), 1886, A., 524.
Melodinus laevigatus, alkaloid from (Greshoff), 1891, A., 336.
Melon-juice, alcohol from (Levat), 1884, A., 233.

Melon seeds, presence of cholesterol and a soluble carbohydrate in (Forti), 1891, A., 357.
Melting point, depression of, by phenol (Juillard and Curchod), 1892, A., 556.
and their relation to the solubility of hydrated salts (Tilden), 1884, T., 266.
and boiling point as related to chemical composition (Mills), 1885, A., 329.
of minerals, determination of (Joly), 1892, A., 414.
of mixtures (Miolati), 1892, A., 1139.
of nitrates (Maumené), 1884, A., 384.
of organic compounds (Landolt), 1890, A., 1; (Reissert), 1890, A., 1204.
of salts (Maumené), 1884, A., 3.
of haloid salts in relation to the contraction occurring during their formation from their elements (Müller-Erzbach), 1884, A., 709.
of substances in contact (Lehmann), 1885, A., 330.
of certain inorganic substances (Carnelley and O'Shea), 1884, T., 409.
apparatus for estimating (Roth), 1886, A., 1070; (Christomanos), 1890, A., 939.
calculation of (Groshans), 1886, A., 411.
determination of (Loviton), 1886, A., 417.
determination of errors in (Crafts), 1883, A., 844.
Membranes, living, osmotic experiments with (de Vries), 1888, A., 1153.
living and dead, osmosis with (Reid), 1890, A., 207, 277, 1176.
precipitated, electrical behaviour of (Oberbeck), 1891, A., 517.
electrical conductivity of (Tammann), 1891, A., 140.
permeability of (Tammann), 1892, A., 1383.
vegetable, permeability of, for air (Lietzmann), 1888, A., 1023.
Men, healthy, proteid requirement of (Studemund), 1891, A., 1272.
influence of saline materials on gaseous metabolism in (Loewy), 1889, A., 533.
Menaccanite from Lancaster Co., Pa. (Smith), 1885, A., 960.
Meneghinite and jordanite, isomorphism of (Schmidt), 1885, A., 639.
Menilite (Damour), 1886, A., 775.
Meniscus angle and capillary constants (Traube), 1887, A., 101.
Mentha Pulegium, oil of (Beckmann; Pleissner), 1891, A., 936.
Menthene, menthol and **menthone.** See Terpenes.
Menthodicarboxylic acid (Brühl), 1892, A., 202.
Menthonaphthene (Berkenheim), 1892, A., 866.
Menthyl ethyl ether (Brühl), 1892, A., 200, 348.
Menthylamine (Wallach), 1892, A., 500; (Andres and Andréeff), 1892, A., 723.
Menthylic benzoate and carbonate (Arth), 1886, A., 893.
chloride (Arth), 1884, A., 167.
phenylamidoformate (Leuckart), 1887, A., 376.
Menthylurethane (Arth), 1886, A., 892.
Menthylxanthic acid (Bamberger), 1890, A., 517.
Menyanthes trifoliata, constituents of (Lendrich), 1892, A., 1262.
Menyanthin and **menyanthole** (Lendrich), 1892, A., 1262.
Mercaptals (*thioacetals*) (Baumann), 1885, A., 748.
Mercaptan. See Ethyl mercaptan.
Mercaptans (Stadler), 1884, A., 1328.
aromatic (Leuckart), 1890, A., 603.
synthesis of (Lustig), 1891, A., 1350.
amido- (Jacobson), 1887, A., 961; 1888, A., 1306.
compounds of, with aldehydes and ketones (Fasbender), 1887, A., 462.
compounds of, with aldehydes, ketones and ketonic acids (Baumann), 1885, A., 748.
reagents for (Denigès), 1889, A., 655.
Mercaptoles (Baumann), 1885, A., 749.
$\mu\beta$-**Mercaptomethylthiazoline.** See Sulphydromethylthiazoline.
μ-**Mercaptopenthiazoline.** See Sulphydropenthiazoline.
Mercaptophthalimide. See Sulphydroethylphthalimide.
β-**Mercaptopropylphthalimide.** See Sulphydropropylphthalimide.
μ-**Mercaptothiazoline.** See Sulphydrothiazoline.

Mercapturic acid, formation of, in the organism, and its detection in the urine (BAUMANN), 1884, A., 1395.
Mercapturic acids, oxidation of (BAUMANN), 1885, A., 514.
  oxidation products of (KÖNIG), 1892, A., 1090.
Mercurial trough (LADENBURG), 1883, A., 1048.
Mercury, native, occurrence of, in the alluvium in Louisiana (WILKINSON), 1885, A., 876.
    from Servia (SCHAFARZIK), 1885, A., 730.
  occurrence of, in tapeworms (OELKERS), 1890, A., 396.
  relations of, to other metals (COUSINS), 1887, A., 1080.
  (metal), purification of (MICHAELIS), 1885, A., 322; (CRAFTS), 1889, A., 17.
    purification of, by distillation in a vacuum (CLARK), 1885, A., 350.
    impurities in, sensitive test for (GORE), 1890, A., 827.
    impure, electric conductivity of (MICHAELIS), 1885, A., 322.
    solid, electrical conductivity of (WEBER), 1889, A., 557; (GRUNMACH), 1890, A., 98.
      electrical conductivity of, at low temperatures (CAILLETET and BOUTY), 1885, A., 855.
      electric conductivity and temperature coefficient of (WEBER), 1885, A., 1028.
    electrical resistance of (KOHLRAUSCH), 1889, A., 201; (GRUNMACH), 1889, A., 202.
    development of E.M.F. between an electrolyte and (PASCHEN), 1891, A., 374.
    estimation of potential differences between electrolytes and (BLONDLOT and BICHAT), 1888, A., 1005.
    polarised, surface tension of, in different electrolytes (PASCHEN), 1890, A., 552, 1036.
    specific heat of (HEILBORN), 1891, A., 632.
    variation in the specific heat of, with temperature (MILTHALER), 1889, A., 750.
    expansion of (MENDELÉEFF), 1884, T., 132.
    expansion of, between 0° and 39° (AYRTON and PERRY), 1887, A., 317.
    vapour-density of, at a white heat (BILTZ and MEYER), 1889, A., 674.
Mercury (metal), vapour pressures of (RAMSAY and YOUNG), 1885, T., 656; P., 115; 1886, T., 37; (YOUNG), 1891, T., 629; P., 120.
    vapour pressure of, at ordinary temperatures (MCLEOD), 1884, A., 385; (VAN DER PLAATS), 1886, A., 963.
    volatility of (BERTHELOT), 1885, A., 953.
    vapour, conductivity of, for heat (BERGET), 1888, A., 1237; (SCHLEIERMACHER), 1889, A., 559.
      absorption of, by platinum black, etc. (IHMORI), 1886, A., 766.
    action of chlorine on (COWPER), 1883, T., 155.
    action of hydrogen chloride, bromide and iodide on, in presence of oxygen (BAILEY and FOWLER), 1888, T., 759, 760; P., 79.
    action of nitric acid on (MONTEMARTINI), 1892, A., 1403.
    action of nitric acid on, conditions of (VELEY), 1891, A., 525.
    action of nitric peroxide on (DIVERS and SHIMIDZU), 1885, T., 631; P., 93.
    action of nitrosyl chloride on (SUDBOROUGH), 1891, T., 659.
    action of silicon on (WARREN), 1889, A., 1125.
    spontaneous oxidation of (MACALUSO), 1884, A., 263.
    adhesion of, to glass in presence of halogens (SHENSTONE), 1892, T., 452; P., 70.
    effect of, on the freezing point of sodium (HEYCOCK and NEVILLE), 1889, T., 672.
    effect of, on the freezing point of tin (HEYCOCK and NEVILLE), 1890, T., 383; P., 38.
    lowering of the freezing points of bismuth, cadmium and lead by (HEYCOCK and NEVILLE), 1892, T., 897, 903, 910; P., 145.
Mercury alloys (*amalgams*) (LE BLANC), 1890, A., 1204; (SCHUMANN), 1891, A., 986.
  change of property of, by repeated fusion (GORE), 1891, A., 80.
  electric conductivity of (WEBER), 1885, A., 211; 1887, A., 757.
  electromotive force of (LINDECK), 1889, A., 2.
  with tin (mirror alloy), composition of (HARRISON), 1887, A., 447.
  with tin and lead, melting point of (WELD), 1891, A., 644.

Mercurammonium compounds (RAMMELSBERG), 1889, A., 347; (PESCI), 1891, A., 268; 1892, A., 685; (BALESTRA), 1892, A., 276.
reaction for (PESCI), 1890, A., 1211.
bromide (PESCI), 1890, A., 1212.
chloride mercurichromate (JÄGER and KRÜSS), 1889, A., 1120.
chlorides (ANDRÉ), 1889, A., 570, 827; 1891, A., 986.
chromates (HENSGEN), 1887, A., 218.
hydroxide, hydrate of (RAMMELSBERG), 1889, A., 347.
iodides, nitrates and sulphates (PESCI), 1891, A., 270, 268, 269.
Mercuricobaltammonium salts (VORTMANN and MORGULIS), 1890, A., 13; (VORTMANN and BORSBACH), 1890, A., 1377.
Mercury compounds, heat of formation of (THOMSEN), 1888, A., 1011; (NERNST), 1888, A., 1012.
action of the haloid compounds of the alkalis on (DITTE), 1890, A., 1059.
haloid salts of, crystallised (SIEVERS), 1888, A., 419.
action of, with zinc haloid salts (VARET), 1890, A., 224.
salts, action of sodium thiosulphate on (VORTMANN), 1889, A., 1108.
Mercury arsenates (HAACK), 1891, A., 400.
thioarsenate (PREIS), 1890, A., 1053.
calcium chloride, basic (KLINGER), 1883, A., 904.
*di*chloride. See Mercuric chloride.
barium, calcium and strontium oxychlorides (ANDRÉ), 1887, A., 447.
hydrosulphides (LINDER and PICTON), 1890, P., 51; 1891, P., 176; 1892, T., 123.
imidosulphonates and their constitution (DIVERS and HAGA), 1892, T., 976.
barium imidosulphonate (DIVERS and HAGA), 1892, T., 977.
dihydrogen imidosulphonates (DIVERS and HAGA), 1892, T., 977.
potassium imidosulphonates (DIVERS and HAGA), 1892, T., 976.
sodium imidosulphonates (DIVERS and HAGA), 1892, T., 980.
barium iodide (ROHRBACH), 1883, A., 1060.
phosphide (GRANGER), 1892, A., 1398.
Mercury sulphate, basic (ATHANASESCU), 1886, A., 982.
oxysulphides (POLECK), 1890, A., 109.
sulphites (DIVERS and SHIMIDZU), 1886, T., 533; P., 139.
constitution of (DIVERS and SHIMIDZU), 1886, T., 574.
reduction of, with sulphurous acid (DIVERS and SHIMIDZU), 1886, T., 575.
Mercuric acids, halogen (NEUMANN), 1889, A., 1049.
Mercuric salts, action of acetylenic hydrocarbons on (KUTSCHEROFF), 1883, A., 172; 1884, A., 572, 719.
antimonate (BEILSTEIN and v. BLÄSE), 1889, A., 1124.
bromide, crystallised (SIEVERS), 1888, A., 419.
oxybromides, heat of formation of (ANDRÉ), 1884, A., 707.
chloride (*mercury dichloride; corrosive sublimate*), crystallised (SIEVERS), 1888, A., 419.
behaviour of, with hydrogen ammonium carbonate (THÜMMEL), 1887, A., 774.
solubility of, in various organic liquids (ETARD), 1892, A., 558.
solution, stability of (MEYER), 1887, A., 774; 1888, A., 228.
boiling points of solutions of (SKINNER), 1892, T., 340; P., 28.
specific gravity of aqueous and alcoholic solutions of (SCHRÖDER), 1886, A., 412.
compounds of, with chromates (JÄGER and KRÜSS), 1889, A., 1120.
antiseptic properties of (CHIBRET), 1888, A., 1327.
poisoning by (FALKENBERG), 1891, A., 853.
detection of, in toxicological cases (LECCO), 1886, A., 743.
estimation, volumetric, of (KASSNER), 1889, A., 78.
ammonium chloride (*white precipitate*) (RAMMELSBERG), 1889, A., 347.
solubility of, in solution of ammonia containing ammonium carbonate (JOHNSON), 1889, A., 755.
oxychloride (ANDRÉ), 1887, A., 447.
crystalline (VOLHARD), 1890, A. 565.

- **Mercuric** oxychlorides (Thümmel), 1889, A., 1050.
    - thermochemistry of (André), 1884, A., 884.

  - nitride (Curtius), 1892, A., 112.
  - oxide (Bruns and v. der Pfordten), 1888, A., 1037.
    - action of sulphur on (Senderens), 1892, A., 770.
  - sulphate (Buchner), 1886, A., 852.
    - preparation of (Divers and Shimidzu), 1885, T., 639; P., 93.
  - sulphite, anhydrous (Divers and Shimidzu), 1886, T., 566; P., 140.
  - hypochlorosulphite (Gilpin), 1892, A., 780.
- **Mercury organic compounds**:—
- **Mercurammonium cyanides** (Varet), 1890, A., 223.
- **Mercury** compounds, aromatic (Michaelis and Rabinerson), 1890, A., 1269.
    - of acetylene (Plimpton), 1892, P., 110.
  - salts, compounds of pyridine with (Groos), 1890, A., 643.

Mercury anisoil oxide and salts (MICHAELIS and RABINERSON), 1890, A., 1270.
 dianisoil (MICHAELIS and RABINERSON), 1890, A., 1269.
 diethyl, oxidation of, with potassium permanganate (SEIDEL), 1884, A., 1135.
 dimethylaniline (SCHENK and MICHAELIS), 1888, A., 834.
 dimethylaniline salts (MICHAELIS and RABINERSON), 1890, A., 1269.
 dipentamethylphenyl (JACOBSEN), 1889, A. 876.,
 diphenyl and ditolyl, action of potassium permanganate on (OTTO), 1884, A., 1135.
 di-*o*-xylene (JACOBSEN), 1885, A., 144.
 dixylyl (WELLER), 1887, A., 824.
 phenylamine and its derivatives (PESCI), 1892, A., 1448.
 propylphenyl (MEYER), 1886, A., 945.
Mercuric cyanide, boiling-points of solutions of (SKINNER), 1892, T., 340; P., 27.
 action of aluminium and of nickel, etc. on, dissolved in water and in organic solvents (VARET), 1892, A., 797.
 action of ammonia on (VARET), 1891, A., 1441; 1892, A., 575.
 action of copper salts on (VARET), 1889, A., 359; 1890, A., 464.
 action of, on silver nitrate, in presence of ammonia (BLOXAM), 1884, A., 168.
 antiseptic properties of (CHIBRET), 1888, A., 1327.
 ammoniacal derivatives of (VARET), 1891, A., 655.
 combination of, with cadmium salts (VARET), 1891, A., 161.
 combinations of, with lithium salts (VARET), 1891, A., 28.
 compounds of, with metallic chlorides, action of ammonia on (VARET), 1890, A., 351.
 detection of, in toxicological investigations (VITALI), 1890, A., 198.
 cadmium cyanide (DUNSTAN), 1892, T., 687; P., 51.
 zinc cyanide (DUNSTAN), 1890, A., 855; 1892, T., 666; P., 51.
 barium chlorocyanide, action of ammonia on (VARET), 1891, A., 1442.
 cadmium iodocyanide, action of ammonia on (VARET), 1891, A., 1441.
 magnesium bromo- and iodo-cyanides (VARET), 1891, A., 1442.
Mercuric oxycyanide, antiseptic properties of (CHIBRET), 1888, A., 1327.
 thiocyanate, double salts of, with other thiocyanates (BEHRENS), 1892, A., 10.
 chlorothiocyanate (MCMURTRY), 1888, P., 116; 1889, T., 50.
Mercury, detection, estimation, and separation:—
 blowpipe test for (CHARLTON), 1890, A., 1343.
 microchemical test for (v. HAUSHOFER), 1887, A., 300.
 detection of (KROUPA), 1886, A., 921; (KLEIN), 1889, A., 651.
 detection of, in animal tissues (PASCHKIS), 1883, A., 1169.
 detection of, in corpses (SEYDA), 1891, A., 120.
 detection of, in minerals (JOHNSTONE), 1889, A., 797.
 detection of, in organic liquids (ALMÉN), 1887, A., 302; (BRUGNATELLI), 1890, A., 926; (BÖHM), 1891, A., 351.
 detection of, in toxicological investigations (LEHMANN), 1883, A., 687; (LECCO), 1886, A., 743; 1891, A., 864.
 detection of, in urine (ALT), 1888, A., 630.
 detection, electrolytic, of (ZIEGELER), 1888, A., 1344; (WOLFF), 1889, A., 441.
 estimation of (FEIT), 1889, A., 927; (VOLHARD), 1890, A., 565.
 estimation of, in animal tissues (LUDWIG and ZILLNER), 1891, A., 962.
 estimation of, in corpses (SEYDA), 1891, A., 120.
 estimation of, in organic mixtures (BÖHM), 1891, A., 351.
 estimation of, in urine (BRASSE), 1888, A., 196.
 estimation, electrolytic, of (CLASSEN and LUDWIG), 1886, A., 493; (DE LA ESCOSURA), 1886, A., 650; (SMITH and KNERR), 1886, A., 923; (BRAND), 1890, A., 294; (VORTMANN), 1891, A., 1553.
 estimation, electrolytic, of metals as alloys of (VORTMANN), 1891, A., 1553; (GIBBS), 1892, A., 753.
 estimation, volumetric, of (KROUPA), 1884, A., 695; (CARNOT), 1889, A., 1246; (JONES), 1892, T., 364; P., 46; (NAMIAS), 1892, A., 663.
 estimation, volumetric, of, by Haswell's method (v. JÜPTNER), 1883, A., 242.

Mercury, separation:—
separation of, from arsenic, phosphoric and nitric acids and from chlorine and sodium (HAACK), 1892, A., 530.
separation of, from palladium, lead, copper and bismuth (ROSENBLADT), 1887, A., 302.
separation, electrolytic, of (SMITH and MACCAULEY), 1892, A., 239; (KOHN), 1892, A., 541; (SMITH and WALLACE), 1892, A., 920.
separation, electrolytic, of, from arsenic, molybdenum, palladium and tungsten (SMITH and FRANKEL), 1890, A., 1029.
separation, electrolytic, of, from cobalt, nickel and zinc (SMITH and FRANKEL), 1890, A., 664.
separation, electrolytic, of, from copper (SMITH and FRANKEL), 1889, A., 797; (SMITH and MACCAULEY), 1892, A., 239.
separation, electrolytic, of, from osmium (SMITH and WALLACE), 1892, A., 920.
Mercury unit, Siemens', reproduction of (STRECKER), 1885, A., 1027, 1099.
Merino fleeces, composition of (CHLUDSINSKY), 1886, A., 105.
Mesaconanilic acid (REISSERT), 1889, A., 1174; (ANSCHÜTZ and REUTER; SCHARFENBERG), 1890, A., 368.
Mesaconic acid (*oxytetric acid*) (GORBOFF), 1888, A., 1179.
and its homologues (WALDEN), 1891, A., 1187.
molecular weight of (PATERNÒ and NASINI), 1888, A., 1059.
synthesis of, from ethylic propanetricarboxylate (BISCHOFF), 1890, A., 1101.
real nature of (WALDEN), 1891, A., 1188.
constitution of (KANONNIKOFF), 1886, A., 335; (ANSCHÜTZ), 1887, A., 917.
molecular refraction of (KNOPS), 1888, A., 938; 1889, A., 198.
heat of combustion of (LUGININ), 1888, A., 893.
heat of neutralisation and of solution of (GAL and WERNER), 1887, A., 205.
conversion of, into its isomerides by soda (DELISLE), 1892, A., 297.
"*Mesembryanthemum crystallinum*" (*ice plant*) (MANGON), 1883, A., 499; (HECKEL), 1883, A., 680.
Mesidic acid. See Uvitic acid.
Mesidine, nitration of (NÖLTING and STOECKLIN), 1891, A., 693.
nitramine from (KLOBBIE), 1888, A., 466.
Mesitene lactone (ANSCHÜTZ, BENDIX and KERP), 1891, A., 172.
Mesitol, bromo- (SCHRAMM), 1886, A., 451.
Mesitonic acid (*di-α-methyl-β-acetylpropionic acid*), constitution of (ANSCHÜTZ and GILLET), 1888, A., 1272.
Mesityl methyl ketone (CLAUS), 1890, A., 981; (DITTRICH and MEYER), 1891, A., 1224.
Mesitylacetic acid (DITTRICH and MEYER), 1891, A., 1224.
nitro-, and its salts (WISPEK), 1883, A., 1096.
*di*nitro- (DITTRICH and MEYER), 1891, A., 1224.
Mesitylene, presence of, in different mineral oils (ENGLER), 1885, A., 1209.
preparation of (VARENNE), 1884, A., 588.
action of bromine on (COLSON), 1883, A., 734; (SCHRAMM), 1886, A., 451.
derivatives of (ROBINET), 1883, A., 577; (WISPEK), 1883, A., 1095; (FEITH), 1892, A., 329.
benzoyl-derivatives of, formation of (LOUÏSE), 1884, A., 1000.
Mesitylene, *di*bromo-, from coal-tar oil (SÜSSENGUTH), 1883, A., 469.
bromo*di*nitro- (SÜSSENGUTH), 1883, A., 470.
*tri*chloro- (FRIEDEL and CRAFTS), 1887, A., 1101.
fluoro- (TÖHL), 1892, A., 968.
iodo- (TÖHL), 1892, A., 967.
nitro-, oxidation of (EMERSON), 1887, A., 132.
Mesitylenic acid (3:5-*dimethylbenzoic acid*), thermochemistry of (STOHMANN, KLEBER and LANGBEIN), 1889, A., 1096.
bromo-, preparation of, from bromomesitylene (SÜSSENGUTH), 1883, A., 469.
*di*bromo-, and its salts (SÜSSENGUTH), 1883, A., 470.
Mesitylenic diacetate (ROBINET and COLSON), 1883, A., 1095.
methylnitramide, *di*nitro- (KLOBBIE), 1888, A., 467.
Mesitylglycollic acid and chloralide (FEITH), 1892, A., 329.
Mesitylglyoxylic acid (CLAUS), 1890, A., 981; (DITTRICH and MEYER), 1891, A., 1224.
salts of (FEITH), 1892, A., 329.
*di*nitro- (DITTRICH and MEYER), 1891, A., 1224.
Mesitylic acetate (ROBINET), 1883, A., 577; (WISPEK), 1883, A., 1095.

Mesitylic alcohol, bromo- (Schramm), 1886, A., 451.
  bromide (Wispek), 1883, A., 1095.
    bromo- (Schramm), 1886, A., 451.
  oxide. See Methyl *iso*butenyl ketone.
Mesitylphthalide (Gresly), 1886, A., 1029.
Mesitylpyrroline (Dennstedt), 1890, A., 999.
Mesoanthramine. See under Anthramine.
Mesocamphoric acid. See under Camphoric acid.
Mesolite from Co. Antrim (Hyland), 1891, A., 1169.
  from Colorado (Cross and Hillebrand), 1883, A., 165, 957.
  from Pennsylvania (Sadler), 1883, A., 441.
Mesotartaric acid. See Tartaric acid, inactive.
Mesoxaldehyde, symmetrical bisphenylhydrazone of (Bamberger), 1892, A., 162.
Mesoxalaldehyde-*αωω*-phenylmethylhydrazonedioxime (v. Pechmann and Wehsarg), 1889, A., 48.
Mesoxalic acid, salts of (Przybytek), 1884, A., 1124.
  phenylhydrazone (Fischer), 1884, A., 1151; (Elbers), 1885, A., 535.
Mesoxalylcarbamide. See Alloxan.
Mesoxanilide (Nef), 1892, A., 1439.
  alcoholate and imidochloride (Nef), 1892, A., 1439.
  hydrate (Nef), 1892, A., 1440.
Mesoxanilidephenylhydrazone (Nef), 1892, A., 1439.
Mesoxatoluidide hydrate (Nef), 1892, A., 1441.
Messelite (Muthmann), 1890, A., 218.
Metabolism, the output of chlorides in its relation to (Kast), 1888, A., 513.
  influence of antimonious oxide on (Chittenden and Blake), 1888, A., 80.
  and "neutral sulphur" (Rudenko), 1891, A., 1523.
  of acetanilide in the human body (Mörner), 1889, A., 289.
  of five children of ages varying from 5 to 15 years (Camerer), 1885, A., 409.
  of furfuraldehyde in fowls (Jaffé and Cohn), 1889, A., 289.
  of iron (Socin), 1891, A., 478.
  in man, influence of ethylic alcohol on (Keller), 1889, A., 288.
  of pigs fed on corn cockle (Kornauth and Arche), 1892, A., 1018.
Metabolism, animal, acetanilide and acetotoluidide in relation to (Jaffé and Hilbert), 1888, A., 735.
    behaviour of tyrosine ethylic ether in (Cohn), 1890, A., 187.
  gaseous, influence of glycerol and fatty acids on (Munk), 1891, A., 345.
    influence of some organic and inorganic substances on (Chittenden and Cummins), 1888, A., 77.
    in man, influence of saline materials on (Loewy), 1889, A., 533.
  proteid, and muscular work (Argutinsky), 1891, A., 350; (Krummacher), 1891, A., 479; (Noël-Paton), 1891, A., 596; (Munk), 1891, A., 847.
    in man (Hirschfeld), 1889, A., 174.
    influence of alcohol on (Chittenden, Norris and Smith), 1891, A., 1272.
    influence of carbohydrates on (Lusk), 1891, A., 846.
    influence of phenylacetic acid on (Salkowski and Kotoff), 1888, A., 513.
    influence of sulphonal on (Hahn), 1891, A., 1523.
    influence of urethane, paracetaldehyde, antipyrin and antifebrin on (Chittenden), 1889, A., 534.
  estimation of the products of, in fæces (Stutzer), 1886, A., 377; (Pfeiffer), 1886, A., 571.
  estimation of nitrogen in products of (Pfeiffer), 1886, A., 1053.
Metacetone, non-existence of (Fischer and Laycock), 1889, A., 487.
Metacinnabarite (Penfield), 1886, A., 314.
  from California (Melville), 1891, A., 273.
Metahemipinic acid. See under Hemipinic acid.
Metal, Dutch, action of chlorine on (Cowper), 1883, T., 154.
  old, to obtain ammonia in the process of recovering tin or zinc from (Anon.), 1885, A., 940.
  white, polychrome varnish for (Puscher), 1883, A., 896.
Metalbumin. See under Albumin.
Metaldehyde. See Metacetaldehyde under Aldehyde.
Metallamines, action of hydrogen sulphide on (Smith and Keller), 1891, A., 272.

Metalliferous vein formation at Sulphur Bank (LE CONTE and RISING), 1883, A., 1070.
Metalloquinolides (BORSBACH), 1890, A., 643.
Metallurgy, improvements in (ANON.), 1884, A., 514, 1084, 1230; 1885, A., 707, 940, 1271; 1886, A., 109; (MÜLLER), 1885, A., 1167.
  application of electricity in (FISCHER), 1883, A., 398; 1884, A., 785, 933; (SCHUCHT), 1884, A., 541; (ANON.), 1884, A., 1229; 1885, A., 940.
Metalonchidite (v. SANDBERGER), 1888, A., 561.
Metals, ancient Chaldean (BERTHELOT), 1887, A., 443.
  determination of the atomicity of, by means of cryoscopy (RAOULT), 1886, A., 197.
  scale of hardness of (ANON.), 1883, A., 890.
  certain properties of, considered in relation to the periodic law (ROBERTS-AUSTEN), 1889, A., 105; 1891, A., 1161.
  molecular condition of, when alloyed with each other (HEYCOCK and NEVILLE), 1890, T., 686; P., 158.
  demonstrating the valency of (LEPSIUS), 1888, A., 410.
  electrolytic extraction of (BLAS and MIEST), 1883, A., 134; (ANON.), 1884, A., 1230; (FISCHER), 1884, A., 934; 1885, A., 941.
  purification of, by electrolysis (ANON.), 1885, A., 941.
  molecular weights of (RAMSAY), 1889, T., 521; P., 39; (v. TÜRIN), 1890, A., 1046; (MEYER), 1891, A., 984.
  molecular weights of, in solution (HEYCOCK and NEVILLE), 1890, T., 376, 656; P., 38, 158.
  refraction and dispersion in (DU BOIS and RUBENS), 1891, A., 373.
  refractive indices of (KUNDT), 1888, A., 997.
  spectra of (TROWBRIDGE and SABINE), 1889, A., 1.
  spectral lines of, developed by exploding gases (LIVEING and DEWAR), 1885, A., 317, 465.
  spectroscopic examination of vapours evolved on heating, at atmospheric pressure (PARRY), 1884, A., 801; 1885, A., 318.
  alkali, spectra of (KAYSER and RUNGE), 1891, A., 137.
  variation with temperature of the velocity of light in (KUNDT), 1889, A., 749.
Metals, transparency of (WIEN), 1888, A., 1230.
  contact difference of potential of (PASCHEN), 1891, A., 139.
  effects of various positive, on the change of potential of a voltaic couple (GORE), 1889, A., 201.
  electrical behaviour of, in salt solutions (PELLAT), 1892, A., 393.
  electrical conductivity of solid mercury and other, at low temperatures (CAILLETET and BOUTY), 1885, A., 855.
  electrical resistance of (LE CHATELIER), 1891, A., 4.
  influence of light on the electrical resistances of (BOSTWICK), 1885, A., 469.
  electrical volatility of (DUDLEY), 1892, A., 1037.
  electromotive force of, in cyanide solutions (THOMPSON), 1888, A., 392.
  electromotive force between, at high temperatures (ANDREWS), 1885, A., 1175.
  electromotive force of, in a series of electrolytes (MAGNANINI), 1891, A., 3.
  electrolytic polarisation by (PILTSCHIKOFF), 1889, A., 663.
  apparatus for the electrolysis of (LEVOIR), 1889, A., 548.
  specific heats of (NACCARI), 1888, A., 1236.
  relations of heat to voltaic and thermoelectric action of, in electrolytes (GORE), 1885, A., 325.
  heavy, affinity of, for sulphur (SCHÜRMANN), 1889, A., 468.
  divalent, freezing point of solutions of salts of (RAOULT), 1884, A., 808.
    affinity of certain, for sulphuric acid (FINK), 1887, A., 885.
  specific gravity of, in the liquid state (ROBERTS-AUSTEN and WRIGHTSON), 1884, A., 708.
  transportation of solids in a vacuum by the vapours of (MORSE and WHITE), 1892, A., 1386.
  volume-change of, on fusion (NIES and WINKELMANN), 1883, A., 545; (WIEDEMANN), 1884, A., 7.
  molecular changes in, as shown by their electrical conductivity (LE CHATELIER), 1891, A., 1308.
  masses of, dissemination of sulphur and phosphorus in (WARREN), 1889, A., 13.
  absorption of hydrogen by (THOMA), 1889, A., 568.

Metals, action of, on mixtures of acetylene and air (Bellamy), 1885, A., 951.
action of acids on (Armstrong), 1886, P., 189; 1889, P., 66; (Veley), 1889, T., 361; P., 65; (Montemartini), 1892, A., 1402.
action of anhydrous ammoniacal ammonium nitrate on (Arth), 1885, A., 1039.
action of carbon *di*sulphide on (Cavazzi), 1888, A., 106.
action of dry chlorine on (Cowper), 1883, T., 153.
velocity of action between halogens and (Stschükareff), 1891, A., 1149.
action of dry hydrogen sulphide on (Lorenz), 1891, A., 990.
action of nitric oxide on (Sabatier and Senderens), 1892, A., 1151.
action of nitric peroxide on (Sabatier and Senderens), 1892, A., 1390.
action of nitrogen on (Warren), 1887, A., 702.
action of nitrosyl chloride on (Sudborough), 1891, T., 655.
action of, on oils (Livache), 1883, A., 756.
action of pyrosulphuric acid on (Divers and Shimidzu), 1885, T., 636; P., 92.
action of, on salts dissolved in organic liquids (Varet), 1892, A., 797.
action of, on sulphuric acid (Veley), 1888, A., 104; (Ditte), 1891, A., 260.
comparative poisonous action of, on bacteria (Richet), 1884, A., 351.
lowering of the freezing point of sodium by the addition of other (Heycock and Neville), 1889, T., 666.
direct combination of bromine with (Gautier and Charpy), 1892, A., 118.
direct combination of chlorine with (Gautier and Charpy), 1892, A., 118; (Kreusler), 1892, A., 401.
and their salts, contact potential of (Pellat), 1889, A., 661.
salts of heavy, acid character of the (Lachowicz), 1889, A., 569.
nitro- (Sabatier and Senderens), 1892, A., 1390.

Metals, detection, estimation and separation:—
detection of, not precipitated by hydrogen sulphide, in the precipitate produced by ammonia (Bloxam), 1885, A., 1264.

Metals, estimation and separation:—
estimation of oxygen in (Müller), 1885, A., 1167.
estimation of, by means of sodium pyrophosphate (Vortmann), 1888, A., 755.
estimation, electrolytic, of, apparatus for (Levoir), 1889, A., 548.
estimation, electrolytic, of, as amalgams (Vortmann), 1891, A., 1553; (Gibbs), 1892, A., 753.
estimation, qualitative, of, without hydrogen sulphide (Eyster), 1885, A., 1012.
estimation, volumetric, of heavy (Vitali), 1892, A., 1521.
separation of, precipitated by hydrochloric acid (Barnes), 1885, A., 597.
separation of, by oxalic acid (Luckow), 1886, A., 922; 1887, A., 529.
separation of, by means of sodium pyrophosphate (Vortmann), 1888, A., 755.
separation, electrolytic, of (Freudenberg), 1892, A., 1521.

Metameric bodies, comparative effect of, on the growth of *Nicotiana longiflora* (Reynolds), 1883, A., 495.

Metamorphic rocks. See Rocks.

Metamorphism produced by pressure (Judd), 1890, T., 410; P., 35.
of massive crystalline rocks (Dana), 1883, A., 562.

Metapectic acid (Herzfeld), 1892, A., 291.

Metaphosphates and **metaphosphoric acid.** See under Phosphorus.

Metasaccharic acid. See *l*-Mannosaccharic acid.

Metastannic acid. See under Tin.

Metastasis in leaves (v. Sachs), 1885, A., 831.

Metatartaric acid in factory liquors (Grosjean), 1883, T., 336.

Metatungstic acid. See under Tungsten.

Metaxin (Schwartz), 1888, A., 983.

Meteoric dust (Tacchini), 1884, A., 165.

Methylcaffeidine (Wernecke), 1888, A., 69.

Methylcaffuric acid (Schmidt and Schilling), 1885, A., 995.

Methylcamphor (Minguin), 1891, A., 1500; 1892, A., 1343.

Methylcarbamide, nitroso- (v. Brüning), 1888, A., 936.

Methylcarbamido-. See Methyluramido-.

Methylcarbazacridine (Bizzarri), 1892, A., 343.

Methylcarbodinicotinic acid. See Picolinetricarboxylic acid.

Methylcarbophenyllutidyliumdehydride (Hantzsch), 1885, A., 398.

Methylcarbostyril, amido-, and nitro- (Feer and Koenigs), 1885, A., 1235.

1-**Methylcarbostyril** (*o-tolucarbostyril*), 3′-4′-*di*chloro- (Rügheimer and Hoffmann), 1886, A., 160.

3-**Methylcarbostyril** (*p-tolucarbostyril*), 3′:4′-*di*chloro-, and 3′:4′-*di*chloronitro- (Rügheimer and Hoffmann), 1886, A., 160.

4′-**Methylcarbostyril,** and derivatives (Knorr), 1884, A., 334, 1198; 1887, A., 159; (anon.), 1884, A., 757; (Fischer and Wittmack), 1884, A., 1052.
  reduction of (Knorr and Klotz), 1887, A., 278.
  nitroso- (Fischer and Wittmack), 1884, A., 1052.

Methyl-ψ-carbostyril and its derivatives (Friedländer and Müller), 1887, A., 977.

Methylcarboxyphenylacetic acid (Béhal and Auger), 1890, A., 389.

Methylcarvoxime (Goldschmidt and Zürrer), 1885, A., 1058.

Methylchlorallylcarbinol (Garzarolli-Thurnlackh), 1884, A., 1118.

2′-**Methyl*tri*chlorethylidenequinoline** (Einhorn), 1886, A., 264.

Methyl*tri*chlorobromazimidobenzene (Zincke and Arzberger), 1889, A., 502.

Methylchloroform. See *tri*Chlorethane.

Methylchrysoidine (Nölting and Stricker), 1886, A., 544.

Methyl*apo*cinchenic acid (Comstock and Koenigs), 1885, A., 1249.

Methyl*apo*cinchenine and its hydrochloride (Comstock and Koenigs), 1885, A., 1248.

Methylcinchonamine (Hesse), 1885, A., 66.

1′-**Methylcinchoninic acid** (v. Miller), 1891, A., 1097.

3′-**Methylcinchoninic acid** (v. Miller), 1890, A., 1325.

Methylcinnamene. See Tolylacetylene.

α-**Methylcinnamic acid.** See Phenylcrotonic acid.

Methylcinnamic acids. See Tolylacrylic acids.

Methylcinnamoyldextroecgonine (Deckers and Einhorn), 1891, A., 475.

Methylcinnolinecarboxylic acid (Widman), 1884, A., 1022.

Methylcitraconic acid (Fittig and Fränkel), 1890, A., 585; (Bischoff), 1891, A., 1221.

Methylcocaine (Liebermann and Giesel), 1890, A., 647, 803; (Einhorn and Marquardt), 1890, A., 913; (Giesel), 1890, A., 1011.

Methylcodeine and its derivatives (Grimaux), 1883, A., 359; (Hesse), 1884, A., 614.

Methylcolchicine (Johanny and Zeisel), 1889, A., 282.

Methylconiine (Passon), 1891, A., 1118.

Methylcopellidine. See Tetramethylpiperidine.

Methylcoumaraldehyde (*methoxycinnamaldehyde*), nitro- (v. Miller and Kinkelin), 1889, A., 990.

Methyl-*o*-coumaric acid derivatives (Schnell), 1884, A., 1165; 1887, A., 140.
  m-amido- (Schnell), 1884, A., 1165; 1887, A., 140.
  3-nitro- (v. Miller and Kinkelin), 1889, A., 989.
  5-nitro- (Schnell), 1884, A., 1165; 1887, A., 140.

Methyl-*m*-coumaric acid (*methoxycinnamic acid*) (Tiemann and Ludwig), 1883, A., 189.
  6-nitro- (Eichengrün and Einhorn), 1890, A., 1127; 1891, A., 1101.

Methyl-*p*-coumaric acid (VALENTINI), 1885, A., 264; (MAGNANIMI), 1886, A., 467.
  *di*bromide and its derivatives (EIGEL), 1887, A., 1110.
  3-nitro- (EINHORN and GRABFIELD), 1888, A., 478.
β-Methylcoumarilamide (HANTZSCH), 1886, A., 1014.
β-Methylcoumarilic acid (HANTZSCH), 1886, A., 707.
α-Methylcoumarin, thio- (ALDRINGEN), 1890, A., 624.
β-Methylcoumarin, and its derivatives (V. PECHMANN and DUISBERG), 1884, A., 67.
β-Methylcoumarone (HANTZSCH), 1886, A., 707.
α-Methylcoumaroxime (ALDRINGEN), 1890, A., 624; 1892, A., 330.
  acetate (ALDRINGEN), 1890, A., 624.
Methyl-*o*-coumarylic alcohol (HARRIES), 1892, A., 169.
β-Methylcrotonanilide, derivatives of (BRÜHL), 1892, A., 1106.
Methylcrotonic acid. See Tiglic acid.
Methylcumazonic acid, and its derivatives (WIDMAN), 1884, A., 303.
Methyl-ψ-cumidine (V. HOFMANN), 1883, A., 324.
Methylcuminaldoxime (GOLDSCHMIDT), 1890, A., 1262.
o-Methylcyanacetophenone (HALLER), 1889, A., 874.
Methylcyanethine (V. MEYER), 1883, A., 352.
Methylcyanobutine hydriodide (TRÖGER), 1888, A., 802.
Methylcyanocamphor (HALLER), 1891, A., 1499.
Methylcytisine (V. BUCHKA and MAGALHAËS), 1891, A., 750.
β-Methyldaphnetin (V. PECHMANN and COHEN), 1885, A., 56.
Methyldehydrohexone (PERKIN), 1887, T., 723.
Methyldehydrohexone-mono- and -dicarboxylic acids (PERKIN), 1887, T., 715, 717, 744, 747.
Methyldehydropentone and methyldehydropentonecarboxylic acid (MARSHALL and PERKIN), 1890, P., 138; 1891, T., 878, 880.
Methyldeoxybenzoin (MEYER and OELKERS), 1888, A., 703.
Methyldeoxybenzoins, isomeric (STRASSMANN), 1889, A., 883.
Methyldeoxybenzoincarboxylamide (HEILMANN), 1890, A., 625; 1891, A., 201.
***m*-Methyldeoxybenzoin-*o*-carboxylic acid** (HEILMANN), 1890, A., 625.

Methylenediphenylic oxide (Richter), 1884, A., 324.

Methylenediphthalimide (Neumann), 1890, A., 890.

Methylenedipiperidine (Eschweiler), 1890, A., 955; (Kraut, Eschweiler and Grossmann), 1890, A., 1092.

Methylenedipyrogallol (Caro), 1892, A., 856.

Methylenediquinoil. See Methylenequinolylquinoline.

Methylene-diresorcinol and **-diresorcylic acid** (Caro), 1892, A., 856.

Methylenedisalicylic acid (Caro), 1892, A., 855.

  condensation of, with β-resorcylic acid, with gallic acid, and with phenol (Caro), 1892, A., 856.

Methylenedisulphonic acid. See Methanedisulphonic acid.
Methylenedi-*o*- and -*p*-toluidines (Grünhagen), 1890, A., 888.
Methylenedi-*α*-toluoylamide (Thiesing), 1892, A., 467.
Methylenedi-*o*- and *p*-toluoylamides (Thiesing), 1892, A., 467.
Methylene-ethylamine (Kolotoff), 1886, A., 139.
Methylene group, replacement of the hydrogen atoms in (Wallach), 1891, A., 189.
Methylene*di*-*o*-, -*m*- and -*p*-nitranilines (Pulvermacher), 1892, A., 1450.
Methylene*di*nitrodibenzamide (Thiesing), 1892, A., 467.
Methylenephthalethimidine (Mertens), 1887, A., 51.
Methylenephthalide (Gabriel), 1885, A., 1228.
and its bromide and oxide (Gabriel), 1885, A., 164.
bromo- (Gabriel), 1885, A., 165.
nitro- (Zincke and Latten), 1892, A., 1231.
Methylenephthalomethimidine (Gabriel), 1885, A., 1228.
Methylenephthalphenimidine (Mertens), 1887, A., 52.
Methylenequinolylquinoline (*methylenediquinoil*) **hydrochloride** (Rhoussopoulos), 1883, A., 1150.
Methylene-red and -violet (Bernthsen), 1886, A., 54.
Methylenethiocarbamide (v. Hemmelmayr), 1891, A., 1339.
Methylene*di*thiodiacetamide (Pulvermacher), 1892, A., 580.
Methylene-white. See Leucomethylene-blue under Colouring matters.
Methylenic *di*bromide (*dibromomethane*) (Henry), 1884, A., 718.
bromiodide (*bromiodomethane*) (Henry), 1886, A., 44.
*di*chloride (*dichloromethane*), preparation of (Greene), 1885, A., 38.
action of benzylamine on (Kempff), 1890, A., 887.
action of, on methylbenzenes in presence of aluminium chloride (Friedel and Crafts), 1887, A., 1102.
action of water and ammonia on (André), 1886, A., 861.
physiological action of, compared with that of chloroform (Regnauld and Villejean), 1885, A., 285, 926.
substitution derivatives of (Höland), 1887, A., 905.
Methylenic *di*chloride (*dichloromethane*), *mono*- and *di*iodo- (Höland), 1887, A., 905.
chloriodide (Sakurai), 1885, T., 198; P., 20.
chlorobromide (*chlorobromomethane*) (Henry), 1886, A., 43.
chlorofluoride (Collie), 1889, T., 112; P., 16.
cyanide. See Malonodinitrile.
ethylenic *di*sulphide, μ-imido-, salts of (Miolati), 1891, A., 894.
*di*fluoride (Chabrié), 1890, A., 1053.
antiseptic action of (Chabrié), 1891, A., 353.
*di*iodide (*diiodomethane*), formation of, from iodoform (Cazeneuve), 1884, A., 896.
refractive power of, at different temperatures (Perkin), 1891, P., 116; 1892, T., 296.
molecular refraction and dispersion of (Gladstone), 1891, T., 295.
action of aniline on (Bischoff and Nastvogel), 1890, A., 1164.
action of ethylic malonate on (Tanatar), 1891, A., 175; 1892, A., 1304.
action of silver nitrite on (Russanoff), 1892, A., 1415.
action of sodium ethoxide on (Mulder), 1889, A., 363.
action of sodium phenylsulphinate on (Michael and Palmer), 1885, A., 536.
oxysulphide (Bartoli and Papasogli), 1884, A., 170.
phenylimidophenylthiocarbamate (Foerster), 1888, A., 947.
propylenic *di*sulphide, μ-imido- (Miolati), 1891, A., 895.
Methylenitan. See Carbohydrates.
Methylennyl-. See Methylnonyl-.
Methylerythrohydroxyanthraquinone (Birukoff), 1887, A., 964.
Methylethenyltolylenediamine and its methiodide (Niementowski), 1887, A., 937, 938.
Methylethylacetal (Rübencamp), 1885, A., 136.
*tri*chloro- (Magnanimi), 1887, A., 28.
Methylethylacetates, solubility of (Sedlitzky), 1888, A., 250.
Methylethylacetic acid, zinc salt of (Schmidt), 1886, A., 867.
Methylethylacetoximic acid (Schramm), 1883, A., 573.

Methylethylacetylene (*pentinene*), conversion of, into propylacetylene (FAWORSKY), 1888, A., 1168.

β-Methyl-α-ethylacetylpropionic acid, distillation of (THORNE), 1885, A., 1200.

α-Methyl-β-ethylacraldehyde (*hexenoic aldehyde*) (LIEBEN and ZEISEL), 1883, A., 570; (SOLONINA), 1888, A., 806.
  action of ammonia on (HOPPE), 1889, A., 120.
  action of sulphuric acid on (LUDWIG), 1892, A., 951.
  action of sulphurous acid on (LUDWIG), 1889, A., 121.
  oxidation of (LIEBEN and ZEISEL), 1883, A., 570.
  derivatives of (LIEBEN and ZEISEL), 1883, A., 570.

Methylethylacrylic acid. See Hexenoic acid.

Methylethylamido*iso*-oxazole. See Methylethyl*iso*-oxazole.

Methylethylamine (SKRAUP and WIEGMANN), 1889, A., 1018; (HINSBERG), 1892, A., 64.

Methylethylaniline and its derivatives (CLAUS and HOWITZ), 1884, A., 1005; (CLAUS and HIRZEL), 1887, A., 135.

o-**Methylethylbenzene** (*ethyltoluene*), preparation of (CLAUS and MANN), 1885, A., 888.
  oxidation of (CLAUS and MANN), 1885, A., 888; (CLAUS and PIESZCZEK), 1887, A., 240.
  bromo- (CLAUS and PIESZCZEK), 1887, A., 240.
  mono- and *di*-nitro- (CLAUS and PIESZCZEK), 1887, A., 240.

p-**Methylethylbenzene** (ANSCHÜTZ and ROMIG), 1885, A., 769.
  *m-di*amido- (ERRERA and BALDRACCO), 1892, A., 606.

o-**Methylethylbenzene-β-sulphonic acid and chloride** (CLAUS and PIESZCZEK), 1887, A., 240.

Methylethylbromaniline (CLAUS and HOWITZ), 1884, A., 1006.

Methylethylbromoxazolone. See Methylethyloxazolone.

Methylethylcarbincarbinol (LIEBEN and ZEISEL), 1886, A., 784.

Methylethylcarboxyglutaric acid (BISCHOFF), 1891, A., 829.

3-**Methyl-2′-ethylcinchoninic acid** (v. MILLER), 1890, A., 1326.

1:3-**Methylethyl-*m*-diazine** and *di*-chloronitro- (PINNER), 1889, A., 1007.

Methylethyldicarboxyglutaric acids (BISCHOFF), 1891, A., 829.

1-**Methylethyldihydronaphthaquinone** (BÉHAL and AUGER), 1890, A., 388.

Methylethyldihydropentene methyl ketone (MARSHALL and PERKIN), 1890, T., 251.

4-**Methyl-3-ethyldihydropyridine** (*β-dihydrocollidine*) (OECHSNER DE CONINCK), 1884, A., 1047.

1′:3′-**Methylethyldihydroquinoline** (FISCHER and STECHE), 1888, A., 299.

1-**Methyl-2-ethylenetetrahydropyridine.** See Tropidine.

Methylethylene-ψ-thiocarbamide (GABRIEL), 1889, A., 849.

Methylethylenetolylaminedimethyltolylammonium iodide (HÜBNER, TÖLLE and ATHENSTÄDT), 1884, A., 1318.

as-**Methylethylethylene.** See γ-Amylene.

Methylethylglutaric acids, *p*- and *meso*- (BISCHOFF), 1891, A., 829.

1:2-**Methylethylglyoxaline** (*oxalmethylpropyline*), synthesis of (RADZISZEWSKI), 1883, A., 729.

2:1-**Methylethylglyoxaline** (*oxalethylethyline*) (RADZISZEWSKI), 1883, A., 729.
  (*oxalethyline*), properties of (WALLACH), 1883, A., 910.
  chloro-, and its derivatives (WALLACH), 1883, A., 49.

Methylethylglyoxime (SCHRAMM) 1883, A., 590.
  diacetyl-derivative of (SCHRAMM), 1884, A., 52.
  peroxide (SCHOLL), 1891, A., 316.

Methylethylhexahydropyridine. See Methylethylpiperidine.

Methylethylhexamethylene, formation of (KIPPING and PERKIN), 1889, P., 143.
  α-iodo- (KIPPING and PERKIN), 1890, T., 23.

2′-**Methylethylideneindole** (FISCHER), 1888, A., 284.

3′:2′-**Methylethylindazine** and 3′:1′-**methylethyl*iso*indazine** (FISCHER and TAFEL), 1885, A., 541, 542.

2′:1′-**Methylethylindole** (FISCHER and STECHE), 1887, A., 976.

2′:3′-**Methylethylindole** (FISCHER), 1886, A., 805; 1887, A., 149.

p-**Methyl-1′-ethylindole** (*ethyl-p-tolindole*) and *p*-**methyl-1′-ethylindole-2′-carboxylic acid** (HEGEL), 1886, A., 552.

Methylethylketol (v. PECHMANN and DAHL), 1890, A., 1235.

Methylethylketole. See 2′:1′-Methylethylindole.

Methylethylmaleic acid (Fittig and Parker), 1892, A., 814.

Methylethylmaleic anhydride (Bischoff), 1891, A., 291; (Michael and Tissot), 1891, A., 1456.

Methylethylmalic acid (Michael and Tissot), 1891, A., 1455.

Methylethylmalonic acid (Otto and Beckurts), 1885, A., 754; (Otto and Rössing), 1888, A., 45.
  thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1097.

Methylethylnitrouracil (Lehmann), 1890, A., 32.

Methylethyl*iso*-oxazole, amido- (Burns), 1891, A., 889; (Hanriot), 1891, A., 1108; 1892, A., 79.

Methylethyloxazolone, bromo- (Hanriot), 1891, A., 1108; 1892, A., 79.

1:2-Methylethylpentamethylene (Marshall and Perkin), 1889, P., 143; 1890, T., 250.

Methylethyl-*p*-phenylenediamine (*p-amidoethyl-o-toluidine*) (Weinberg), 1892, A., 1078.

2-Methyl-4-ethylpiperidine (*copellidine*) (Schultz), 1888, A., 64.

2-Methyl-5-ethylpiperidine (*aldehyde-collidine hexahydride; copellidine*), and its derivatives (Dürkopf), 1884, A., 1054; 1885, A., 817.

2-Methyl-6-ethylpiperidine (Schultz), 1888, A., 64.

4-Methyl-3-ethylpiperidine (*β-collidine hexahydride*) (Oechsner de Coninck), 1884, A., 1048.
  physiological action of (Bochefontaine and Oechsner de Coninck), 1885, A., 681.

2:5-Methylethylpiperidylalkine. See 5-Hydroxyethyl-2-ethylpiperidine.

ββ-Methylethylpropionic acid (*hexoic acid*) (van Romburgh), 1887, A., 228; 1888, A., 447.

Methylethylpropyl*iso*butylammonium chloride, optical isomerides of (Le Bel), 1891, A., 1002.

Methylethylpropylcarbinol (*tert.-heptylic alcohol*) (Sokoloff), 1888, A., 1170.

Methylethyl*iso*propyl-*m*-diazine, amido- (v. Meyer), 1889, A., 578.

α-Methylethylpropylene (*hexylene*) (Wislicenus), 1883, A., 967.

Methylethylpropylic alcohol (*hexylic alcohol*) from essence of chamomile (van Romburgh), 1887, A., 228.

2-Methyl-4-ethylpyridine (*ethylpicoline*) (Schultz), 1888, A., 64.

2-Methyl-5-ethylpyridine (*aldehyde-collidine*) (Dürkopf), 1886, A., 257.
  constitution of (Dürkopf), 1886, A., 257; (Dürkopf and Schlaugk), 1887, A., 737; 1888, A., 499.
  reduction and oxidation-products of (Dürkopf), 1885, A., 817.

2-Methyl-6-ethylpyridine (*ethylpicoline*) (Schultz), 1888, A., 64.

4-Methyl-3-ethylpyridine (*β-collidine*) (Hantzsch), 1883, A., 83; (Oechsner de Coninck), 1883, A., 739.
  physiological action of (Marcus and Oechsner de Coninck), 1883, A., 104.
  hydrate of (Oechsner de Coninck), 1883, A., 220.

6-Methyl-4-ethylpyridine (*α-collidine*) (Weidel and Pick), 1885, A., 557.

Methylethylpyridines (*collidines*), preparation of (Mai and Aschoff), 1892, A., 725.

Methylethylpyridylalkine. See 2-Hydroxyethyl-5-ethylpyridine.

2-Methyl-1-ethylpyrrolidone-2-carbothioxylamide and **-2-carboxylamide** (Kühling), 1890, A., 793.

2-Methyl-1-ethylpyrrolidone-2-carboxylic acid (Kühling), 1890, A., 793.

Methylethylquinol and its derivatives (Fiala), 1884, A., 1138; 1886, A., 454; (Nölting and Werner), 1891, A., 209.

3′-Methyl-2′-ethylquinoline and its salts (Doebner and v. Miller), 1884, A., 1376; (Harz), 1886, A., 262; (Eliasberg and Friedländer), 1892, A., 1107.

3′-Methyl-2′-ethylquinoline-1-carboxylic acid (v. Miller), 1890, A., 1326.

3-Methyl-2′-ethylquinoline-3′-carboxylic acid (Harz), 1886, A., 261.

***as*-Methylethylsuccinic acid** (Bischoff), 1891, A., 829; (Hell), 1891, A., 1018.

***s*-Methylethylsuccinic acid** (Young), 1883, T., 180; (Bischoff and Walden), 1889, A., 959; (Bischoff and Mintz), 1890, A., 743.

Methylethylsuccinic acids (Bitschichin and Zelinsky), 1890, A., 741.

2′-Methyl-1′-ethyltetrahydroquinoline (Möller), 1888, A., 298.

α-Methyl-μ-ethylthiazole (Hubacher), 1891, A., 220.

μ-Methyl-α-ethylthiazole (Hantzsch), 1890, A., 1238; (Rubleff), 1891, A. 223.

m-**Methyl-*p*-ethyltoluene** (Claus), 1892, A., 985.

Methylethyltriphenyl*di*thiobiuret (Billeter and Strohl), 1888, A., 365.

Methylethyluracil (Behrend; Hoffmann), 1890, A., 31.

β-**Methyl-α-ethylvalerolactone** (Young), 1883, T., 172, 178; A., 456.

Methyleugenol, glycol from (Wagner), 1892, A., 310.

Methyl*iso*eugenol, glycol from (Wagner), 1892, A., 311.
  *di*bromide (Ciamician and Silber), 1890, A., 967.
  nitrosite of (Angeli), 1892, A., 447.

Methylfenchylamine (Wallach and Griepenkerl), 1892, A., 1239.

Methylflavolinium hydroxide. See 2′-Phenyl-1′:4′-dimethylquinolinium hydroxide.

Methylformanilide (Pinner), 1883, A., 1090; (Norton and Livermore), 1887, A., 1038; (Barbier and Vignon), 1888, A., 689; (Pictet), 1890, A., 758.
  m-nitro- (Comstock and Wheeler), 1892, A., 706.

Methyl*iso*formanilide (Comstock), 1890, A., 1258; (Comstock and Kleeberg), 1890, A., 1414.
  m-nitro- (Comstock and Wheeler), 1892, A., 706.

Methylformimide hydrochloride (Pinner), 1883, A., 1089.

Methyl*iso*formo-α-naphthalide (Comstock and Wheeler), 1892, A., 705.

Methylformo-*p*-toluidide (Bamberger and Wulz), 1891, A., 1202.

Methyl*iso*formo-*o*- and -*p*-toluidides (Comstock and Clapp), 1892, A., 707, 708.

Methyl-fumaramic acid and **-fumarimide** (Giustiniani), 1892, A., 821.

Methylfurfuraldehyde (Hill), 1889, A., 695; (Maquenne), 1890, A., 33.

Methylfurfurancarboxyacetic acid. See Methronic acid.

Methylfurfurine (Bieler and Tollens), 1890, A., 1105.

α-**Methylglutaric acid** (*butanedicarboxylic acid*) (Kiliani), 1883, A., 962.
  thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1097.

β-**Methylglutaric acid** (*butanedicarboxylic acid; ethylidenediacetic acid*) (Komnenos), 1884, A., 422; (Auwers, Köbner and v. Meyenburg), 1892, A., 41.

β-**Methylglutaric acid** (*butanedicarboxylic acid; ethylidenediacetic acid*), *di*bromo- (Auwers and Bernhardi), 1891, A., 1191.

α-**Methylglyceric acid** and its salts (Melikoff), 1885, A., 651.

β-**Methyl*iso*glyceric acid** (Melikoff and Petrenko-Kritschenko), 1892, A., 296.

β-**Methylglycidamide,** *tri*chloro- (Levy, Witte and Curchod), 1890, A., 234.

β-**Methylglycidic acid** and its salts (*propyleneoxycarboxylic acid*) (Melikoff), 1884, A., 1301; 1885, A., 650.
  additive product of methylamine and (Fielinsky), 1885, A., 752.

β-**Methyl*iso*glycidic acid** (Melikoff and Petrenko-Kritschenko), 1892, A., 296.

γ-**Methylglycidic acid.** See Butylglycidic acid.

Methylglycocine. See Sarcosine.

Methylglyoxalbisphenylhydrazone (v. Pechmann and Wehsarg), 1887, A., 1104; 1889, A., 47.

Methylglyoxal-*αω*-hydrazoxime (v. Pechmann and Wehsarg), 1889, A., 47.

1-**Methylglyoxaline** (*oxalmethyline*) (Wallach), 1883, A., 50; (Wohl and Marckwald), 1889, A., 867.
  formula of (Japp), 1883, T., 198.
  action of ethylic chloracetate on (Rung and Behrend), 1892, A., 1493.
  mercaptan and methylic sulphide (Wohl and Marckwald), 1889, A., 866.

2-**Methylglyoxaline** (*glyoxalethyline; p-oxalmethyline*) (Wallach), 1883, A., 50, 911; (Radziszewski), 1883, A., 308.
  synthesis of (Japp), 1883, T., 17; 198; (Radziszewski), 1883, A., 728.
  *tri*bromo- (Wallach), 1883, A., 911.

2-**Methylglyoxaline-4:5-dicarboxylic acid** (Maquenne), 1890, A., 1439.

Methylglyoxal-*αω*-methylphenylhydrazoxime (v. Pechmann and Wehsarg), 1889, A., 48.

Methylglyoxalosotetrazone (v. Pechmann), 1888, A., 1288.

Methylglyoxime (Scholl), 1891, A., 287.
  action of nitric peroxide on (Scholl), 1891, A., 316.
  diacetyl-derivative of (Schramm), 1884, A., 52.

Methyl*syn*glyoximecarboxylic acid (Hantzsch), 1892, A., 1176.

Methylglyoximecarboxylic acids, dissociation constants of (Hantzsch and Miolati), 1892, A., 1268.

Methylguanicil (Curatolo), 1891, A., 539.

Methylguvacine (Jahns), 1892, A., 740.

Methylheptonic acid and lactone (Fischer), 1890, A., 599.

Methylheptose (Fischer), 1890, A., 599.

Methylhesperidin (Will), 1885, A., 906.

Methylhexadecylbenzenes (*hexadecyltoluenes*), *o*-, *m*- and *p*- (Krafft and Göttig), 1889, A., 129.

p-**Methylhexadecylbenzene**, amido- (Krafft and Göttig), 1889, A., 130.

p-**Methylhexadecylbenzenesulphonic acid**, sodium salt of (Krafft and Göttig), 1889, A., 130.

p-**Methylhexadecylphenetoil and methylhexadecylphenol** (Krafft and Göttig), 1889, A., 130.

α-**Methylhexahydroanthracene** (Graebe and Juillard), 1888, A., 156.

1-**Methylhexahydronicotinic acid** (Jahns), 1892, A., 740.

Methylhexamethylene methyl ketone (Freer and Perkin), 1888, T., 213.

Methylhexamethylene-mono- and **-dicarboxylic acids** (Freer and Perkin), 1888, T., 207.

o-**Methylhexamethylenemethylcarbinol** (Kipping and Perkin), 1889, P., 144.

Methylhexane. See Heptane.

Methylhexylcarbinyl cyanide (Freund and Schönfeld), 1892, A., 132.

Methylhexyldiphenolmethane (Dianin), 1889, A., 1187.

β-**Methylhexylethylene** (Freund and Schönfeld), 1892, A., 133.

1:2-**Methylhexylglyoxaline** (*oxalmethyl-œnanthyline*) (Karcy), 1887, A., 911.

Methylhexylhydroxypyrotartaric acids α- and β-, salts of (Fittig and Feist), 1890, A., 593; (Fittig and Riechelmann), 1890, A., 593, 594.

Methylhexylparaconic acids, α- and β- (Fittig and Riechelmann), 1890, A., 593, 594.

α-**Methylhomo-*o*-phthalimide** and *-o*-**phthalonitrile** (Gabriel), 1887, A., 1112.

α-**Methylhomopiperidic acid** (Aschan), 1891, A., 1246.

α-**Methylhomoterephthalic acid** (Errera), 1891, A., 1021.

Methylhydantoin (*lactylcarbamide*) (Franchimont and Klobbie), 1889, A., 1143.
  nitro- (Franchimont and Klobbie), 1888, A., 1180; 1889, A., 125, 1143.

γ-**Methylhydantoin** (Guareschi), 1892, A., 828.

Methyl-hydrastallylamide and **-hydrast*iso*amylamide** (Freund and Heim), 1891, A., 92, 93.

Methylhydrast-amide and **-imide** and its methiodide (Freund and Heim), 1891, A., 92.

Methylhydrast*iso*amylimide (Freund and Heim), 1891, A., 93.

Methylhydrasteine (Freund and Rosenberg), 1890, A., 533.

Methylhydrastine (Freund and Rosenberg), 1890, A., 532; (Schmidt), 1890, A., 1167.
  alcoholate and hydroxide (Schmidt), 1890, A., 1168.
  methiodide (Freund and Rosenberg), 1890, A., 533; (Schmidt), 1890, A., 1168.

Methylhydrasto-methyl- and **-ethylamides** (Freund and Heim), 1891, A., 93.

Methylhydratropaldehyde. See Tolylpropaldehyde.

Methylhydrazidobenzenesulphonic acid (Pfülf), 1887, A., 934.

Methylhydrazine (v. Brüning), 1888, A., 936; 1890, A., 23.
  action of, on dialdehydes and diketones (Kohlrausch), 1890, A., 24.

Methylhydrazomethylenecarboxylic acid, ammonium salt of (Curtius and Lang), 1892, A., 452.

γ-**Methylhydrindene**-β-**carboxylic acid** (Roser), 1887, A., 836; 1888, A., 1303.

o-**Methylhydrindone** and its phenylhydrazone (Young), 1892, A., 1221.

Methylhydrindones, *m*- and *p*- (v. Miller and Rohde), 1890, A., 1140.

β-**Methylhydrindone** and its phenylhydrazone (v. Miller and Rohde), 1890, A., 1139.
  m-chloro- (v. Miller and Rohde), 1890, A., 1140.

Methylhydroacridine (Bernthsen and Bender), 1883, A., 1134.

Methylhydroberberine (Giacosa and Soave), 1890, A., 920; (Gaze), 1890, A., 1012.

Methylhydrobergaptic acid (Pomeranz), 1892, A., 72.
Methylhydrocarbostyril, 2-amido- (Edeleanu), 1888, T., 560; P., 55.
Methylhydrocinnamaldehydes, *α*- and *p*- (v. Miller and Rohde), 1890, A., 979.
α-**Methylhydrocinnamic acid.** See Phenyl*iso*butyric acid.
p-**Methylhydrocinnamic acid** (Kröber), 1890, A., 969; (v. Miller and Rohde), 1890, A., 1140.
Methylhydrocinnamic acids, *o*- and *m*-. See Tolylpropionic acids.
Methylhydrocotoin (Ciamician and Silber), 1891, A., 578.
  action of phosphoric chloride on (Bartolotti), 1892, A., 1314.
Methylhydro-*m*-coumaric acid (Tiemann and Ludwig), 1883, A., 189.
Methylhydro-*p*-coumaric acid, *di*nitro- (Stoehr), 1884, A., 1350.
Methylhydrohydrastinine and its derivatives (Freund and Dormeyer), 1891, A., 1519.
  bromo- (Freund and Dormeyer), 1892, A., 223.
Methylhydroquinaldine. See Dimethyltetrahydroquinoline.
β-**Methylhydroxylamine** (Dittrich), 1891, A., 317; (Hoffmann and Meyer), 1892, A., 291; (Kirpal), 1892, A., 1067.
Methylic alcohol, occurrence of, in the products of the dry distillation of colophony (Kelbe and Lwoff), 1883, A., 738.
  from plants (Maquenne), 1886, A., 274.
  purification of (Regnauld and Villejean), 1884, A., 1279.
  physical properties of (Dittmar and Fawsitt), 1889, A., 578.
  thermochemistry of (Stohmann, Kleber and Langbein), 1890, A., 101.
  specific heats of solutions of (Timoféeff), 1891, A., 1406.
  vapour pressures of (Richardson), 1886, T., 762, 768, 771, 773; (Schmidt), 1892, A., 397.
  decomposition of, by the silent discharge (Maquenne), 1884, A., 542.
  action of *Bacterium aceti* on (Brown), 1886, T., 177; P., 136.
  action of metallic alkyl oxides on mixtures of ethereal salts and (Purdie), 1887, T., 629.
  combination of, with barium oxide (de Forcrand), 1886, A., 781, 861.
Methylic alcohol, compound of, with copper sulphate (de Forcrand), 1886, A., 524.
  compound of, with potash (Göttig), 1888, A., 933.
  compounds of, with sodium hydroxide (Göttig), 1888, A., 437.
  estimation of acetone in (Hintz), 1888, A., 759; (Messinger), 1889, A., 313; (Vignon), 1890, A., 837.
  estimation of, in presence of ethylic alcohol (de Poncy), 1885, A., 298; (van de Vyvere), 1885, A., 600; (Hehner), 1887, A., 1142.
  estimation of, in wood spirit (Habermann), 1889, A., 84.
  See also Wood-naphtha and Wood-spirit.
Methylic salts of abnormal structure (Wegscheider), 1892, A., 1208.
    of normal fatty acids, boiling points and specific volumes of (Gartenmeister), 1886, A., 966.
  acetamidoformate (Klobbie), 1891, A., 292.
  acetate, action of acids on (Ostwald), 1884, A., 581.
    action of, on *iso*amylic and *iso*butylic alcohols (Purdie and Marshall), 1888, T., 394, 395; P., 25.
    influence of normal salts on the hydrolysis of (Trey), 1887, A., 102.
  acetoacetate, action of aldehyde-ammonia on (Hantzsch), 1883, A., 1082.
  acetoneoxalate and acetophenoneoxalate, magnetic rotation of (Perkin), 1892, T., 822, 833, 853, 863; P., 100.
  acetylcarbamate (Franchimont and Klobbie), 1889, A., 1144.
  acetylenedicarboxylodiazoacetate (Buchner), 1889, A., 694.
  acrylate, action of methylic alcohol on (Purdie and Marshall), 1891, T., 474; P., 82.
  acrylates, three, refractive indices of (Kahlbaum), 1885, A., 1173.
  allylic sulphide (Obermeyer), 1888, A., 124.
  amidoacetate and its hydrochloride (Curtius and Goebel), 1888, A., 576.
  o-amidobenzoate, action of ammonia on derivatives of (Zacharias), 1891, A., 912.
  m-amidocumate (Abenius), 1890, A., 269.

Methylic β-amidoethylcrotonate and "amidomethylacetoacetate" (Conrad and Epstein), 1888, A., 253.
- amidoformate, action of nitrous acid on (Klobbie), 1891, A., 292.
- α-amidopropionate hydrochloride (Curtius and Lang), 1892, A., 453.
- *di*amidopyromellitate (Nef), 1890, A., 987.
- amidosulphobenzoate (Hentschel), 1885, A., 792.
- amidoterephthalate (Ahrens), 1886, A., 802.
- ammonium sulphate (Krafft and Bourgeois), 1892, A., 700.
- amylic sulphide (Obermeyer), 1888, A., 124.
- anacardate (Ruhemann and Skinner), 1887, T., 665; P., 102.
- anhydroberberilate (Perkin), 1890, T., 1039; P., 120.
- anisate, thermochemistry of (Stohmann, Kleber and Langbein), 1890, A., 101.
- anisylimidoanisylthiocarbamate and anisyl*di*thiocarbamate (Foerster), 1888, A., 944, 945.
- anthracene-γ-carboxylate (Behla), 1887, A., 594.
- apionylglyoxylate (Garelli), 1892, A., 328.
- azimethylenedicarboxylate (Curtius and Lang), 1892, A., 452.
- azinsuccinate (Curtius and Koch), 1885, A., 886.
- benzeneazocamphocarboxylate (Haller), 1892, A. 1344.
- benzeneazocyanacetate (Haller), 1888, A., 824.
- benzeneazo*di*nitrophenylacetate (Meyer), 1888, A., 693.
- benzenesulphonate (Krafft and Roos), 1892 A., 1220.
- benzilate (Klinger and Standke), 1889, A., 885.
- benzoylcocaylhydroxyacetate (Einhorn), 1889, A., 420.
- benzoylcyanacetate (Barthe), 1888, A., 951.
- benzylidenedibenzoylacetate (Buchner and Curtius), 1885, A., 1238.
- benzyl-*p*-nitrobenzoylacetate (Perkin and Bellenot), 1886, T., 446; P., 193.
- *m*-bromacetamidocumate (Abenius), 1890, A., 270.
- *di*bromacetylcarbopyrrolate (Ciamician and Silber), 1888, A., 62.
- *di*bromanisate (Balbiano), 1883, A., 1125.

Methylic β-bromhydromuconate (v. Baeyer and Rupe), 1890, A., 876.
- *p*-bromobenzenesulphonate (Krafft and Roos), 1892, A., 1220.
- *di*bromomaleate (Pum), 1888, A., 1058.
- bromophenoxynicotinate (v. Pechmann), 1885, A., 176.
- bromo*iso*propylphenylic oxide, oxidation of (Peratoner), 1887, A., 472.
- *di*bromopyrroline-2:5-dicarboxylate (Ciamician and Silber), 1888, A., 61.
- bromosalicylate (Peratoner), 1887, A., 486.
- bromo-*p*-terephthalate (Fileti), 1887, A., 52.
- bromotetramethylenecarboxylate (Perkin and Sinclair), 1891, P., 191; 1892, T., 43.
- bromundecylenate (Noerdlinger), 1890, A., 1237.
- β-*iso*butoxyquartenylate (Enke), 1890, A., 865.
- *iso*butylpropiopropionate (Pingel), 1888, A., 819.
- butyrylcarbamate (Franchimont and Klobbie), 1889, A., 1144.
- camphocarboxylates (Minguin), 1892, A., 1343; (Haller), 1892, A., 1344.
- camphorate (Haller), 1892, A., 1346.
- carbamate. See Methylurethane.
- carbanilate, derivatives of (Hentschel), 1887, A., 143.
- carbonate, action of potassium ethoxide on (Lossen and Köhler), 1891, A., 1014.
- carboxymethylacetoacetate (Claisen), 1892, A., 1070.
- *m*-chloracetamidocumate (Abenius), 1890, A., 270.
- chloranilate (Kehrmann), 1890, A., 136.
- ω-chlorethylpiperonylcarboxylate (Perkin), 1890, T., 1032; P., 117.
- chloride (*chloromethane*), inhalation of (Regnauld and Villejean), 1885, A., 926.
    - action of, on *o*-*di*chlorobenzene in presence of aluminium chloride (Friedel and Crafts), 1887, A., 1101.
    - hydrate of (de Forcrand and Villard), 1888, A., 897.
- chlorimidocarbonate (Sandmeyer), 1886, A., 611.

Methylic *p*-chlorobenzenesulphonate (Krafft and Roos), 1892, A., 1220.
- chloro*di*bromopropylcarbinylic chloride (v. Garzarolli-Thurnlackh), 1884, A., 1118.
- chlorocarbonate, preparation of (Klepl), 1883, A., 311.
- chloroformate, preparation of (Hentschel), 1885, A., 883.
- chlorofumarate (Kauder), 1885, A., 652.
- *tetra*chloro-α-hydroxyhydrindenecarboxylate (Zincke and Arnst), 1892, A., 858.
- β-chlorophthalate (Graebe and Rée), 1886, T., 529; P., 212.
- *tetra*chlorophthalate, crystalline form of (Soret), 1886, A., 620.
- β-chloroquartenylate (Enke), 1890, A., 865.
- *p*-*di*chloroterephthalate (Levy and Andreocci), 1888, A., 1091; (Levy and Curchod), 1889, A., 1179.
- chlorothioformate (Rathke), 1888, A., 1169.
- chloroxalate (Anschütz), 1890, A., 236.
- cineolate (Wallach), 1890, A., 1314.
- cinnamate, thermochemistry of (Stohmann, Kleber and Langbein), 1890, A., 101.
- *allo*cinnamate (Liebermann), 1891, A., 833.
- citraconate, magnetic rotatory power of (Perkin), 1888, T., 583, 592.
- citrate, thermochemistry of (Stohmann, Kleber and Langbein), 1890, A., 101.
- collidinedicarboxylate. See Methylic 2:4:6-trimethylpyridinedicarboxylate.
- coumalanilidate (v. Pechmann and Welsh), 1885, A., 175.
- coumalinate (v. Pechmann), 1884, A., 1124.
- coumalmethamate (v. Pechmann), 1885, T., 154.
- cresolcarboxylate (Wende), 1887, A., 45.
- crotonate, action of methylic alcohol on (Purdie and Marshall), 1891, T., 476; P., 82.
- cumylamidocrotonate (Conrad and Limpach), 1888, A., 504.
- *di*cyanacetate (Haller), 1890, A., 1395.
- α-cyanacetoacetate (Haller and Held), 1888, A., 579.
- γ-cyanacetoacetate (Haller and Held), 1891, A., 171.

Methylic cyanide (*carbin cyanide*) (Freund and Schönfeld), 1892, A., 132.
  - polymeride of (Holtzwart), 1889, A., 113, 683.
- cyanomalonate (Haller), 1889, A., 859.
- cyanosuccinate (Barthe), 1891, A., 42.
- cyanotricarballylate (Barthe), 1891, A., 43.

Methylpropylpinacoline (Szymanski), 1886, A., 784.

Methylpropylpyridine (3:5-*dimethyl*-2-*ethylpyridine*) (Waage), 1884, A., 172; (Dürkopf and Göttsch), 1890, A., 795, 1002.

Methylpropylquinol (Fiala), 1884, A., 1138.

5:2-**Methylpropylquinone** and its oxime, 6-iodo- (Kehrmann), 1889, A., 993.

Methylpropylthiocarbamide (Hecht), 1890, A., 476.

Methylpropylthiocarbanilide (Billeter and Strohl), 1888, A., 364.

Methylprotocotoin (Ciamician and Silber), 1892, A., 63.

  action of phosphoric chloride on (Bartolotti), 1892, A., 1314.

Methylpurin, derivatives of (Fischer), 1884, A., 996.

3-**Methylpyrazolone** (Curtius and Jay), 1889, A., 393.

2-**Methylpyridine.** See α-Picoline.

3-Methylpyridine. See β-Picoline.

4-Methylpyridine. See *p*-Picoline.

2-Methylpyridine-4-carboxylic acid (*α-picoline-4-carboxylic acid*) (Böttinger), 1884, A., 758.

2-Methylpyridine-5-carboxylic acid (Dürkopf), 1885, A., 817.

4-Methylpyridine-2-carboxylic acid (Bachér), 1889, A., 163.

4-Methylpyridine-3-carboxylic acid (*homonicotinic acid*) (Oechsner de Coninck), 1883, A., 739; 1885, A., 671.

3-Methylpyridinedicarboxylic acid [COOH = 5:6 or 2:5] (Dürkopf and Schlaugk), 1888, A., 608; (Dürkopf and Göttsch), 1890, A., 1002.

2-Methylpyridine-3:5-dicarboxylic acid (*methyldinicotinic acid*) (Weber), 1887, A., 1117.

2-Methylpyridine-4:6-dicarboxylic acid (*uvitonic acid*) (Altar), 1887, A., 379.
formation of, from pyruvic acid (Böttinger), 1884, A., 759.

1-Methyl-α-pyridone (*oxymethylpyridine*) (v. Pechmann and Baltzer), 1892, A., 209.

1-Methyl-γ-pyridone and its derivatives (Haitinger and Lieben), 1885, A., 966.

1-Methyl-4-pyridone-6-carboxylic acid, 2:3:5-*tri*chloro- (Zincke and Fuchs), 1892, A., 450.

Methylpyrocatechol (*homopyrocatechol*) (Béhal and Desvignes), 1892, A., 1312.
and its nitro-derivatives (Cousin), 1892, A., 1443.

Methylpyromucic acid (Hill), 1889, A., 695; (Hill and Hendrixson), 1890, A., 601.

Methylpyrrodiazole (Andreocci), 1892, A., 636.

1-Methylpyrrolidine (Ciamician and Magnaghi), 1885, A., 1243.

2-Methylpyrrolidine (Tafel), 1887, A., 463; (Tafel and Neugebauer), 1889, A., 1015.

3-Methylpyrrolidine (Tafel), 1887, A., 463; (Oldach), 1887, A., 735.

2-Methylpyrrolidone (Tafel), 1887, A., 463; 1889, A., 961.

2-Methylpyrrolidone-2-carbonitrile (Kühling), 1889, A., 1212.

2-Methylpyrrolidone-2-carboxylamide (Kühling), 1890, A., 793.

1-Methylpyrroline (Ciamician and Dennstedt), 1885, A., 378.
action of nascent hydrogen on (Ciamician and Magnaghi), 1885, A., 809.

1-Methylpyrroline, *tetra*bromo- (de Varda), 1889, A., 57.

2-Methylpyrroline (Dennstedt and Lehne), 1889, A., 1209.
action of acetic anhydride on (Ciamician and Silber), 1886, A., 719.
action of methylic iodide on (Ciamician and Anderlini), 1889, A., 728.
action of phthalic anhydride on (Dennstedt and Zimmermann), 1886, A., 1044.

3-Methylpyrroline (Dennstedt and Lehne), 1889, A., 1209.
action of acetic anhydride on (Ciamician and Silber), 1886, A., 719; 1887, A., 843.
action of phthalic anhydride on (Dennstedt and Zimmermann), 1886, A., 1044.

Methylpyrrolinebisazobenzene (Fischer and Hepp), 1886, A., 1041.

1-Methylpyrrolineketonedicarboxylic acid (Zanetti), 1890, A., 1431.

Methylpyrryl methyl ketone [b.p. 201°] (*ψ-acetylmethylpyrroline*) (Ciamician and Dennstedt), 1885, A., 378.

Methylpyrryl methyl ketone [b.p. 240°] (Ciamician and Silber), 1886, A., 719.
3:4-*di*bromo- (Ciamician and Silber), 1888, A., 62.

2-Methylpyrryl styryl ketone (Dennstedt and Lehne), 1889, A., 1209.

1-Methylpyrrylalloxan (Ciamician and Silber), 1886, A., 897.

Methylpyrrylcarbinol (Dennstedt and Zimmermann), 1886, A., 1042.

1-Methylpyrrylglyoxylic acid (de Varda), 1889, A., 57.
constitution of, and its *tri*bromo-derivative (de Varda), 1890, A., 389, 390.

Methylquercetin (Herzig), 1888, A., 1309.

Methylquinaldine. See Dimethylquinoline.

4′-Methylquinaldone. See 4′-Oxy-1′:2′-dimethylquinoline.

2′-Methylquinazoline (Bischler), 1891, A., 745.

Methylquinidine (Claus), 1892, A., 1250.

Methylquinine, preparation of (Lippmann), 1892, A., 222.

Methylquinol. See Toluquinol.

1-Methylquinoline (*-o-toluquinoline*), derivatives of (Herzfeld), 1884, A., 1198, 1199.
4-amido- [m.p. 143°] (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.

1-**Methylquinoline** (*o-toluquinoline*), 3-bromo-, and its derivatives (Alt), 1889, A., 1214.
  4-chloro-, and some of its salts (Gattermann and Kaiser), 1886, A., 79.
  2′:3′:4′-*tri*chloro- (Rügheimer and Hoffmann), 1886, A., 160.
  iodo- (La Coste), 1885, A., 815.
  2-nitro- (Nölting and Trautmann), 1891, A., 327.
  3-nitro- (Lellmann and Ziemssen), 1891, A., 1257.
  4-nitro- (Nölting and Trautmann), 1892, A., 728.
2-**Methylquinoline** (*m-toluquinoline*) (Magnanini), 1890, A., 1322.
3-**Methylquinoline** (*p-toluquinoline*), derivatives of (Herzfeld), 1884, A., 1199.
  amido- [m.p. 132°] (Fourneaux), 1885, A., 400.
  1-amido- [m.p. 62°] (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.
  4-amido- [m.p. 145°] (Nölting and Trautmann), 1891, A., 325; 1892, A., 727.
  2′:3′:4′-*tri*chloro- (Rügheimer and Hoffmann), 1884, A., 1023.
    preparation and derivatives of (Rügheimer and Hoffmann), 1886, A., 159.
  4-chloro-1-amido- (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.
  1-nitro- (Fourneaux), 1885, A., 400; (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.
  4-nitro- (Nölting and Trautmann), 1891, A., 325, 327; 1892, A., 727.
1′-**Methylquinoline,** 4′-bromo-4-nitro- (Claus and Decker), 1889, A., 728.
2′-**Methylquinoline** (*quinaldine*) (Fischer and Kuzel), 1883, A., 588; (Doebner and v. Miller), 1883, A., 602; (Wallach and Wüsten), 1883, A., 1097; (anon.), 1884, A., 756.
  formation of (Schultz), 1884, A., 1373.
  synthesis of (v. Miller), 1891, A., 1101; 1892, A., 1245.
  preparation of (Friedländer and Göhring), 1883, A., 1148; (Drewsen), 1883, A., 1149; (Doebner and v. Miller), 1884, A., 183; (Schultz), 1884, A., 337; (anon.), 1884, A., 757; 1885, A., 106.
  conversion of 2′-methylindole into (Magnanini), 1888, A., 957.
  condensation of, with aldehydes (v. Miller), 1887, A., 975.
2′-**Methylquinoline** (*qninaldine*), condensation of *m*-nitrobenzaldehyde with (Wartanian), 1891, A., 329.
  condensation of, with *p*-nitrobenzaldehyde (Bulach), 1889, A., 527.
  action of sulphur on (v. Miller), 1888, A., 966.
  combination of, with formamide (Cleve), 1887, A., 381.
  bases (Doebner and v. Miller), 1884, A., 183, 1373.
  bye-products of (Doebner and v. Miller), 1886, A., 370.
  derivatives of (anon.), 1884, A., 756.
  alkylic iodides (Möller), 1888, A., 298.
  homologues of (Doebner and v. Miller), 1884, A., 1375.
  methiodide (Doebner and v. Miller), 1884, A., 184.
  oxide (*methylquinolinium hydroxide*) (Bernthsen and Hess), 1885, A., 559.
  salts of (Doebner and v. Miller), 1883, A., 602.
2′-**Methylquinoline,** 2-amido- (Gerdeissen), 1889, A., 520.
  derivatives of (Doebner and v. Miller), 1884, A., 1373.
  3′-amido- and 3′:4′-*di*amido- and their hydrochlorides (Conrad and Limpach), 1888, A., 1111.
  bromo- (Magnanini), 1887, A., 1113; 1890, A., 1322.
  3′-chloro- (Knorr and Antrick), 1885, A., 274; (Magnanini), 1887, A., 1113; 1890, A., 1322.
    synthesis of (Busch and Koenigs), 1892, A., 505.
  4′-chloro- (Conrad and Limpach), 1887, A., 680; (Conrad and Eckhardt), 1889, A., 520.
  *di*chloro- (Gnehm), 1884, A., 1028.
  *tri*chloro- and 4′-chloro-3′-nitro- (Conrad and Limpach), 1888, A., 1111.
  1- and 2-nitro-, and their salts (Doebner and v. Miller), 1884, A., 1373.
  3′:4′-nitramido- (Conrad and Limpach), 1888, A., 1111.
  thio- (Roos), 1888, A., 500; (Conrad and Limpach), 1888, A., 1109.
3′-**Methylquinoline**, preparation of (v. Miller), 1891, A., 1095.
4′-**Methylquinoline** (*lepidine; cincholepidine*) (Krakau), 1886, A., 162; (Knorr), 1887, A., 159.
  synthesis of (Beyer), 1886, A., 630.
  colouring matters from (Hoogewerff and van Dorp), 1885, A., 673.

4′-Methylquinoline (*lepidine; cincholepidine*), derivatives (Heymann and Koenigs), 1888, A., 852.
  formation of, from quinenine and cinchenine (Koenigs), 1890, A., 1433.
4′-Methylquinoline, 2′-amido- (Klotz), 1888, A., 1113; (Ephraim), 1892, A., 1488.
  3-amido- (Busch and Koenigs), 1890, A., 1437.
  bromo- (Magnanini), 1887, A., 1113; 1890, A., 1322.
  2′-chloro- (Knorr), 1887, A., 159.
  3′-chloro- (Magnanini), 1887, A., 1113; 1890, A., 1322.
  1-nitro- (Busch and Koenigs), 1890, A., 1435.
  2′-thio- (Roos), 1888, A., 500.
2-Methylquinoline quinoneoximes (Nölting and Trautmann), 1891, A., 326; 1892, A., 727, 728, 729.
2′-Methyl*iso*quinoline (Krauss), 1891, A., 86.
4′-Methyl*iso*quinoline (Le Blanc), 1888, A., 1114.
  1′:3′-*di*chloro- (Gabriel), 1887, A., 1112.
Methylquinolines (Doebner and v. Miller), 1885, A., 1079.
  substituted in the pyridine-ring (Rügheimer and Hoffmann), 1886, A., 159.
  oxidation of (v. Miller), 1891, A., 1095.
  derivatives of (Nölting and Trautmann), 1892, A., 726.
2′-Methylquinoline-3-acrylic acid (v. Miller and Kinkelin), 1886, A., 265.
2′-Methylquinolineacrylic acids (*quinaldineacrylic acids*) [m.ps. 246° and 184°] (Eckhardt), 1889, A., 521.
2′-Methylquinoline-2-aldehyde (*quinaldinealdehyde*) (Eckhardt), 1889, A., 522.
2′-Methylquinoline-3-aldehyde (v. Miller and Kinkelin), 1886, A., 265.
1-Methylquinoline-4-carboxylic acid (Lellmann and Alt), 1887, A., 502.
2′-Methylquinoline-1-, -2- and -3-carboxylic acids and their salts (Doebner and v. Miller), 1884, A., 1200.
2′-Methylquinoline-3′-carboxylic acid and its ethylic salt (Friedländer and Göhring), 1883, A., 1149.
2′-Methylquinoline-4′-carboxylic acid (*aniluvitonic acid*) and its derivatives (Böttinger), 1884, A., 320; (Beyer), 1886, A., 630.
  constitution of (Küsel), 1886, A., 1027.
2′-Methylquinoline-4′-carboxylic acid (*aniluvitonic acid*), oxidation of (Böttinger), 1891, A., 1092.
3′-Methylquinoline-2′-carboxylic acid (Doebner and v. Miller), 1884, A., 1376.
2′-Methylquinoline-3:4′-dicarboxylic acid (v. Miller), 1890, A., 1325.
1-Methylquinoline-3-sulphonic acid (Herzfeld), 1884, A., 1198; (Lellmann and Ziemssen), 1891, A., 1257.
1-Methylquinoline-4-sulphonic acid (Herzfeld), 1884, A., 1199.
3-Methylquinoline-1-sulphonic acid (Fischer and Wittmack), 1884, A., 1052; (Herzfeld), 1884, A., 1199.
2′-Methylquinoline-1-sulphonic acid (Doebner and v. Miller), 1884, A., 1373.
  preparation of (Anon.), 1885, A., 945.
2′-Methylquinoline-2-sulphonic acid, constitution of (Richard), 1891, A., 329.
2′-Methylquinoline-2- or -4-sulphonic acid (Doebner and v. Miller), 1884, A., 1373.
2′-Methylquinoline-3-sulphonic acid (Doebner and v. Miller), 1884, A., 1373.
  preparation of (Anon.), 1885, A., 945.
2′-Methylquinoline-3′-sulphonic acid, preparation of (Anon.), 1885, A., 945.
2′-Methylquinoline-4′-sulphonic acid (Herzfeld), 1884, A., 1199.
4′-Methylquinoline-1(?)-sulphonic acid (Weidel and Hazura), 1885, A., 562.
4′-Methylquinoline-3-sulphonic acid (Busch and Koenigs), 1890, A., 1434.
Methylquinolinesulphonic acids, 1- and 3- (Lellmann and Ziemssen), 1891, A., 1257.
1′-Methyl-2′-quinolone, bromo- and 4-nitro- derivatives of (Decker), 1892, A., 879.
2′-Methylquinolyl benzoate (Conrad and Limpach), 1888, A., 1109.
  ethylic sulphide and mercaptan (Roos), 1888, A., 501, 500.
  phenyl ketone (Geigy and Koenigs), 1885, A., 1236.
4′-Methylquinolyl ethylic sulphide, mercaptan and *di***sulphide** (Roos), 1888, A., 501, 500.
2′-Methylquinolyl-3-ethylene-2′-quinoline (Bulach), 1889, A., 528; (Wartanian), 1891, A., 330.
Methylquinone. See Toluquinone.
***p*-Methylquinophthalone** (Jacobsen and Reimer), 1884, A., 335.
1-Methylquinoxaline (*toluquinoxaline*) (Hinsberg), 1884, A., 1053.

2-**Methylquinoxaline**, derivatives of (NIEMENTOWSKI), 1889, A., 1065.
3-**Methylquinoxaline-2′:3′-dicarboxylic acid** (HINSBERG), 1885, A., 910.
Methylresorcinol. See Orcinol.
Methylrosindone (FISCHER and HEPP), 1890, A., 909.

2-Methyl-Δ^2-tetrahydropyridine (Lipp), 1887, A., 277; 1892, A., 1243.

Methyltetrahydropyridylacetylene (Eichengrün and Einhorn), 1891, A., 67.

Methyltetrahydropyridylethylene, ω-bromo-(Eichengrün and Einhorn), 1891, A., 66.

Methyltetrahydropyridyl-β-hydroxypropionic acid. See Ecgonine.

1-Methyltetrahydroquinoline, and 3-amido- (Bamberger and Wulz), 1891, A., 1253, 1254.
  3-bromo- (Alt), 1889, A., 1214.

2′- and **3-Methyltetrahydroquinoline** and 1-amido- (Bamberger and Wulz), 1891, A., 1254, 1255, 1256.

1′Methyltetrahydroquinoline (*kairoline*) and its derivatives (Hoffmann and Koenigs), 1883, A., 1144; (Feer and Koenigs), 1885, A., 1245.
  physiological properties of (Filehne), 1884, A., 474.

2′Methyltetrahydroquinoline and its derivatives (Doebner and v. Miller), 1884, A., 183; (Möller), 1888, A., 297.
  condensation of, with *p*-nitrobenzaldehyde (v. Miller and Plöchl), 1891, A., 1102.

4′-Methyltetrahydroquinoline (Knorr and Klotz), 1887, A., 278.

1-Methyltetrahydroquinoline-3-azobenzenesulphonic acid (Bamberger and Wulz), 1891, A., 1254.

3-Methyltetrahydroquinoline-1-azobenzenesulphonic acid (Bamberger and Wulz), 1891, A., 1255.

1′Methyltetrahydroquinoline-2-carboxylic acid (*kairoline-2-carboxylic acid*) (Fischer and Körner), 1884, A., 1197.

1-Methyltetrahydroquinoline-3-sulphonic acid (Lellmann and Ziemssen), 1891, A., 1257.

Methyltetrahydroquinolinesulphonic acids, 1- and 3- (Lellmann and Ziemssen), 1891, A., 1257.

β-Methyltetramethylenediamine (Oldach), 1887, A., 735.

Methyltetramethylenic *di***bromide** and action of sodium on (Colman and Perkin), 1888, T., 190, 201.

Methylthalline, and its salts (Skraup), 1886, A., 80.

Methylthebain sulphate, physiological activity of (Stockman and Dott), 1891, A., 762.

Methylthialdine (Marckwald), 1886, A., 1005.

α-Methylthiazole (Hantzsch and Arapides), 1888, A., 573; (Popp), 1889, A., 725.

μ-Methylthiazole (Hantzsch), 1888, A., 574; 1889, A., 724.

Methylthiazole, *meso*amido-. See Thiocyanopropimine.

α-Methylthiazole-β-carboxylic acid, bromo-, chloro- and iodo- (Wohmann), 1891, A., 226.

μ-Methylthiazole-β-carboxylic acid (Rubleff), 1891, A., 224.

μ-Methylthiazoledicarboxylic acid (Rubleff), 1891, A., 224.

Methylthiazolehydroxamic oxide (Zürcher), 1889, A., 725.

meso-**Methylthiazoline** (Gabriel), 1891, A., 817.

n-**Methylthiazoline**, μ-imido- (Näf), 1891, A., 1515.

n-**Methylthiazolinehydrazine** (Näf), 1891, A., 1516.

Methylthiazylacetic acid (Steude), 1891, A., 743.

Methylthiazylamine and α-methylthiazylaniline (Traumann), 1889, A., 414, 415.

2:5-Methylthienyl methyl ketone (*methylacetothienone*) and its derivatives (Demuth), 1886, A., 228, 871.
  nitro- and hydroxylamine-derivatives (Demuth), 1886, A., 228.

Methylthienylglyoxylic acids, αα- and αβ- (Rufi), 1887, A., 804.

α-Methyl-*mono*- and *di*-**thiobiurets** (Hecht), 1892, A., 703.

Methylthiocarbamide, polymeric (v. Hofmann), 1892, A., 798.

Methylthiocarbamide-allylic and -benzylic cyanides (Hecht), 1890, A., 1104.

Methylthiocarbamide-methylic and -propylic cyanides (Hecht), 1890, A., 1103.

Methylthiocarbimide, compound of, with aldehydeammonia (Dixon), 1892, T., 517.

α-**Methylthiocoumarin** (Aldringen), 1892, A., 329.

Methylthioformaldine (Wohl), 1887, A., 27.

Methylthiohydantoin (Andreasch), 1886, A., 227; (Marckwald, Neumark and Stelzner), 1892, A., 151.
  oxime of (Andreasch), 1886, A., 227.

Methylthiophen, thio- (*thienyl methyl thioether*). See Methoxythiophen, thio-.

α-**Methylthiophen** (*thiotolen*) (Meyer), 1884, A., 586; 1885, A., 887; (Meyer and Kreis), 1884, A., 1132; (Egli), 1885, A., 766; (Kues and Paal), 1886, A., 537.
  mercuric chloride (Volhard), 1892, A., 829.
  *di*bromo- (Meyer), 1884, A., 586; (Meyer and Kreis), 1884, A., 1132.
  *tri*bromo- [m.p. 74°] (Meyer and Kreis), 1884, A., 1132.
    oxidation of (Ciamician and Angeli), 1892, A., 302.

β-**Methylthiophen** (Meyer and Kreis), 1884, A., 1131; (Egli), 1885, A., 766.
  method of obtaining (Schulze), 1885, A. 251.
  synthesis of (Volhard and Erdmann), 1885, A., 763.
  mercuric chloride (Volhard), 1892, A., 829.
  *di*bromo- (Gerlach), 1892, A., 830.
  *tri*bromo- [m.p. 34°] (Erdmann and Volhard), 1885, A., 763.
    oxidation of (Ciamician and Angeli), 1892, A., 302.
  γ-*tri*bromo-, action of nitric acid on (Muhlert), 1886, A., 229.

Methylthiophen*syn*aldoxime (Goldschmidt and Zanoli), 1892, A., 1435.

2-**Methylthiophen-5-carboxylic acid** (*β-thiotolenic acid*) (Levi), 1886, A., 539.
  and its silver salt (Paal), 1885, A., 1206.

3-**Methylthiophen-5-carboxylic acid** (Zelinsky), 1887, A., 921.

4-**Methylthiophen-5-carboxylic acid** (*γ-thiotolenic acid*) (Demuth), 1886, A., 538; (Levi), 1886, A., 540; (Gerlach), 1892, A., 830.

β-**Methylthiophensulphonic acid** and its salts (Muhlert), 1886, A., 787.

Methylthiophthalimidine (Day and Gabriel), 1890, A., 1250.

Methylthiosinamine. See Methylallylthiocarbamide.

Microcosmic salt (*sodium ammonium hydrogen phosphate*), action of, on various oxides (Wallroth), 1883, A., 850.

Microlite (Hintze), 1885, A., 732.
from Forst, Tyrol (Oebbeke), 1886, A., 518.

Microphone, superiority of carbon over metals in (Bidwell), 1883, A. 842.

Micro-organism. See Microbes.

- **Microscopic objects**, influence of the composition of the glass of slides and cover glasses on the durability of (WEBER), 1892, A., 1276.
- **Microzymæ** the cause of the decomposition of hydrogen peroxide by animal tissues (BÉCHAMP), 1883, A., 103.
  - origin of vibrioles and, in air, water, soil, etc (BÉCHAMP), 1885, A., 417.
- **Milarite** (RINNE), 1885, A., 1187; (TREADWELL), 1892, A., 1056.
- **Mildew** in vines. See Agricultural Chemistry.
- **Milk**, elephant's (DOREMUS), 1891, A., 98.
  - fossil (STORCH), 1888, A., 1223.
  - human, albuminoids of (BIEDERT), 1885, A., 922; 1887, A., 388.
    - zymase of (BÉCHAMP), 1883, A., 926.
    - composition and method of analysis of (LEEDS), 1885, A., 282.
    - is alcohol eliminated with (KLINGEMANN), 1892, A., 365.
    - analyses of (v. STRUVE), 1884, A., 1396; (SZILASI), 1892, A., 517.
    - separation of casein from albumin in (HOPPE-SEYLER), 1885, A., 845.
  - of the porpoise, composition of (PURDIE), 1885, A., 1253.
  - of the bottle-nosed whale (FRANKLAND and HAMBLY), 1890, A., 812.
  - See also Agricultural Chemistry.
- **Milk of lime.** See Calcium hydroxide.
- **Milk-sugar** and its derivatives. See Lactose under Carbohydrates.
- **Millerite**, occurrence of, in St. Louis (LEONHARD), 1886, A., 125.
- **Millet**, analysis of (VOELCKER), 1884, A., 630.
- **Millet oil** and its decomposition products (KASSNER), 1888, A., 673.
- *Millettia atropurpurea*, poisonous glucoside from (GRESHOFF), 1891, A., 335.
- **Mimetite** (*mimetesite*) containing lime from Puy-de-Dôme, analysis of (DAMOUR), 1886, A., 210.
  - colourless, from the Richmond Mine, Nevada (MASSIE), 1883, A., 163.
  - preparation of (MICHEL), 1889, A., 21.
  - pseudomorphous, after anglesite (GENTH), 1888, A., 563.
- **Mimetites**, bromo- (DITTE), 1883, A., 783.
- **Mineral** from Krems in Austria (DRASCHE), 1888, A., 233.
  - from Val Godemas (LODIN), 1885, A., 230.
  - allied to orthite, analysis of (SEAMON), 1883, A., 164.
- **Minerals**, in Amelia Co., Virginia (FONTAINE), 1883, A., 959.
  - from America (CLARKE and CHATARD), 1885, A., 492.
  - from Berks Co., Pa. (BRUNNER and SMITH) 1884, A., 663.
  - Bohemian (ERBEN), 1887, A., 644.
  - from Brazil (KENNGOTT), 1884, A., 564.
  - in Britain (HEDDLE), 1886, A., 432.
  - from Carintha (BRUNLECHNER), 1888, A., 233.
  - from the mica-diorite of Christianberg, Bohemia (STARKL), 1886, A., 32.
  - from Colorado (CROSS and HILLEBRAND), 1883, A., 164, 956, 1065; 1884, A., 21; (HILLEBRAND), 1884, A., 826; 1885, A., 878.
  - from Corsica (RUPPRECHT), 1891, A., 1440.
  - from the Douglashall salt mine (OCHSENIUS), 1889, A., 838.
  - from the French Creek mines (EYERMAN), 1890, A., 113.
  - from Fritz Island, Pennsylvania (SADLER), 1883, A., 441.
  - Hungarian (LOCZKA), 1892, A., 1054.
  - Italian, chemical and microscopical researches on (COSSA), 1883, A., 446.
    - chemico-mineralogical studies on (FUNARO and BUSATTI), 1884, A., 270.
  - Japanese (WADA), 1885, A., 221.
  - found in the granite hills of Königshain, in Oberlausitz (WOITSCHACH), 1883, A., 446.
  - from Leadhills (COLLIE), 1888, P., 121; 1889, T., 91.
  - from Lehigh Co. (SMITH), 1884, A., 661.
  - from the chrome iron ore deposit of Maryland (GILL), 1892, A., 1057.
  - found near Massa in the Apuanian Alps (D'ACHIARDI), 1883, A., 428.
  - of the Miage Glacier, M. Blanc (BRUN), 1883, A., 31.
  - of the pegmatite vein at Moss (BRÖGGER), 1886, A., 27.
  - North Carolina (HIDDEN), 1883, A., 163, 1063.
  - Norwegian, two (BRÖGGER), 1886, A., 34.
  - from Oberwiesenthal (SAUER), 1886, A., 601.
  - from the metamorphic rocks of Ouro Preto, Brazil (GORCEIX), 1885, A., 30.
  - of the Pacific coast (LINDGREN), 1889, A., 472.

Minerals from the environs of Pontgibaud (Gonnard), 1885, A., 220.
of Port Henry, New York (Kemp), 1891, A., 158.
from the eruptive rocks of the cretaceous formations of Silesia and Moravia (Rohrbach), 1886, A., 928.
from Upper Silesia (Kosmann), 1883, A., 955.
from the Sjö Mine, Sweden (Igelström), 1887, A., 902.
in the sodalite syenite of South Greenland (Lorenzen), 1883, A., 960.
of the syenite-pegmatite veins of the South Norwegian augite and nepheline-syenites (Brögger), 1890, A., 1077.
from Switzerland (Seligmann), 1886, A., 126.
Transylvanian, analyses of (Koch), 1885, A., 735.
from Tuscany (Busatti), 1887, A., 19.
from the Tyrol (v. Zepharovich), 1884, A., 1098; (Cathrein), 1889, A., 23; (v. Foullon), 1890, A., 339.
of Vester-Silfberg (Weibull), 1886, A., 33.
from Vesuvius (Scacchi), 1887, A., 17.
from Vulture and Melfi (Ricciardi), 1887, A., 1087.
of the oölitic iron ore of the Windgällen (Schmidt), 1886, A., 780.
natural classification of (Hunt), 1892, A., 415.
ill-determined (Heddle), 1886, A., 130.
isomorphous, which are not chemically analogous (Rammelsberg), 1884, A., 1096.
from a chromite deposit (Arzruni), 1885, A., 31.
of the cryolite-group (Brandl), 1883, A., 29.
of the cryolite group recently found in Colorado (Cross and Hillebrand), 1884, A., 21.
of the cryolite-group from Greenland (Krenner), 1885, A., 27.
iron, manganese, and zinc, origin of, in the older limestones of the secondary series (Dieulafait), 1885, A., 644.
influence of fluorine in the synthesis of (Meunier), 1891, A., 21.
the double refraction of, determination of (Michel-Lévy), 1885, A., 621.
phosphorescence of, under the influence of light and heat (Becquerel), 1891, A., 776.

Minerals, thermoelectric properties of (Hankel), 1883, A., 540.
specific gravity of (Gisevius), 1883, A., 1031.
melting point of, determination of (Joly), 1892, A., 414.
coefficient of cubic dilatation of, determination of (Thoulet), 1885, A., 218.
solubility of (Doelter), 1890, A., 1070.
solubility of, in sea water (Thoulet), 1889, A., 682.
absolute hardness of (Pfaff), 1886, A., 20.
action of fused magmas on (Doelter and Hussak), 1884, A., 401.
subsequent alteration of, by the action of water (Kloos), 1884, A., 1273.
grinding mill for (Zulkowski), 1888, A., 85.
analysis of (Bayley), 1886, T., 735; P., 228.
analysis, microscopic, of (Behrens), 1886, A., 917.
application of citric acid to the examination of (Bolton), 1883, A., 857.
detection of antimony in (Johnstone), 1889, A., 444.
detection of minute quantities of iron in (Johnstone), 1889, A., 797.
detection of mercury in (Johnstone), 1889, A., 797.
estimation of graphite in (Mackintosh), 1885, A., 689.
estimation of water in (Chatard), 1891, A., 766.
separation, mechanical, of (v. Pebal), 1883, A., 158; (Goldschmidt), 1883, A., 159; (Büttgenbach), 1883, A., 858; (Gisevius), 1883, A., 1031.
solution suitable for the separation of (Rohrbach), 1884, A., 145.
Mineral acids. See Acids.
Mineral-analysis, microchemical (Streng), 1885, A., 294; (Behrens), 1891, A., 766.
Mineral-condensation, coefficient of, in chemistry (Hunt), 1891, A., 258.
Mineral-fuel. See Coal and Fuel.
Mineralogical-chemical theories (Goldschmidt), 1890, A., 219.
Mineralogical notes (v. Zepharovich), 1885, A., 641; (Primics), 1885, A., 733; (Raffelt), 1886, A., 31; (Genth), 1887, A., 342; (Flink), 1888, A., 232; (Kunz), 1889, A., 24; (v. Nordenskiöld), 1889, A., 220; (Penfield and Sperry), 1889, A., 356; (Hillebrand), 1891, A., 1435.

Mineralogical-studies, synthetical (Doelter and Hussak), 1884, A., 565.
Mineral oils. See Petroleum.
Mineral-spring and **water.** See Water.
Mineral-veins (v. Sandberger), 1888, A., 237.
Mineral-wax (Dollfus and Meunier), 1888, A., 115.

Morrenia brachystephana, constituents of (ARATA and GELZER), 1891, A., 1122.

Morrenine (Arata and Gelzer), 1891, A., 1122.
Morrenole (Arata and Gelzer), 1891, A., 1088.
Morrhuic acid (*3-hydroxypyridyl-2-butyric acid*) (Gautier and Mourgues), 1889, A., 170.
Morrhuine (Gautier and Mourgues), 1888, A., 1315; 1889, A., 63.
Mortar, ancient, from a Roman wall in London (Spiller), 1889, A., 16.
Mortars, hydraulic, chemical reactions in the setting of (Le Chatelier), 1885, A., 306.
Mortuary vault, antiseptic experiments in a (Cameron), 1884, A., 878.
Mosandrite (Brögger), 1890, A., 1078.
Mosandrium (Lecoq de Boisbaudran), 1886, A., 507.
Moss as cattle litter (Fleischer), 1884, A., 105.
Motors, living, and the theory of heat (Lezé), 1890, A., 807.
Moulds, occurrence of nuclein in (Stutzer), 1883, A., 1166.
  abnormal secretion of nitrogenous substances by (Gayon and Dubourg), 1886, A., 733.
  condition of potassium in (Berthelot and André), 1888, A., 190.
  sulphur and phosphorus in (Berthelot and André), 1888, A., 384.
Mountain ash berries, tannic acid in (Vincent and Delachanal), 1887, A., 950.
Movements, molecular (Krüss), 1886, A., 14.
Mucic acid (Ruhemann and Blackman), 1890, T., 370; P., 38; (Ruhemann and Elliott), 1890, T., 931; P., 139; (Ruhemann), 1890, T., 937; P., 139; (Ruhemann and Dufton), 1891, T., 750; P., 123.
  preparation of, from milk-sugar and lactose (Kent and Tollens), 1884, A., 980.
  constitution of (Ruhemann and Dufton), 1891, T., 753.
  action of hydrogen phosphide on (Heermann), 1892, A., 875.
  action of phosphorus *penta*chloride on (Ruhemann and Dufton), 1890, P., 151; 1891, T., 26.
  reduction of (Fischer and Hertz), 1892, A., 824.
  derivatives of (Maquenne), 1888, A., 676; (Ruhemann and Blackman), 1890, T., 370; P., 38.
  aldehyde-acid from (Fischer), 1890, A., 599.
Mucic acid, antimony derivatives of (Klein), 1884, A., 424.
  lactone, reduction of (Fischer and Hertz), 1892, A., 825.
  Allomucic acid and so-called **paramucic acid** (*mucic acid, lactone-acid of*) (Fischer), 1891, A., 1193.
Mucic diphenylhydrazide (Bülow), 1887, A., 138.
Mucin of bile (Paijkull), 1888, A., 169.
  of the submaxillary gland (Hammarsten), 1888, A., 167.
  in myxœdema (Halliburton), 1892, A., 1117.
  obtained from tendons of the ox (Loebisch), 1886, A., 166.
  in urine (Citron), 1887, A., 390.
ψ-Mucin (Hammarsten), 1883, A., 874.
Mucin-albumose (Hammarsten), 1891, A., 1127.
Mucin-group (Hammarsten), 1885, A., 677.
Mucobromic acid, action of alkalis on (Hill), 1884, A., 731.
  action of potassium nitrite on (Hill and Sanger), 1883, A., 47.
Mucohydroxy-bromic and **-chloric acids** (Hill and Palmer), 1888, A., 451, 452.
Mucoid (Hammarsten), 1891, A., 1127.
Mucoid-substance in ascitic fluid (Hammarsten), 1891, A., 1127.
Muconamic acid, β-*di*chloro- (Ruhemann and Elliott), 1890, T., 934.
Muconic acid (Ruhemann and Blackman), 1890, T., 375; (v. Baeyer and Rupe), 1890, A., 877; (Ruhemann and Dufton), 1891, T., 750; P., 123.
  action of bromine on (Ruhemann and Dufton), 1891, T., 750.
  α-*di*chloro-, reduction products of (v. Baeyer and Rupe), 1890, A., 875.
  β-*di*chloro- and its amide (Ruhemann and Elliott), 1890, T., 932.
*iso***Muconic acid** (Ruhemann and Blackman), 1890, T., 373.
Mucous fermentation (Kramer), 1890, A., 76.
Mud from the Baku mud volcanoes (Sjögren), 1890, A., 115.
  from the mouth of the Eider, analysis of (anon.), 1883, A., 117.
  analyses of (Mayer), 1891, A., 958.
  chalk, use of, in the production of crude soda (Scheurer-Kestner), 1884, A., 644.
  marine (Fleischer), 1884, A., 106.
    of the alluvia of the Zuider See (van Bemmelen), 1890, A., 822.
    composition of (Buchanan), 1891, A., 995.

Mud, marine, manganese in (Irvine and Gilson), 1891, A., 995.
  sulphur in, and its bearing on its mode of formation (Buchanan), 1891, A., 994.
  manuring with (Enckhausen), 1884, A., 867.
Mules, digestion in (Sanson), 1889, A., 533.
Multirotation. See Photochemistry.
Murexide, spectrum of (Hartley), 1887, T., 199.
Murexoin (Brunn), 1888, A., 452.
Muriatic acid. See Hydrogen chloride under Chlorine.
Mursinskite (v. Kokscharoff), 1888, A., 116.
Muscarine (Berlinerblau), 1884, A., 1056.
Muscle, heat of combustion of (Berthelot and André), 1890, A., 938.
  heat developed by the activity of (Chauveau and Kaufmann), 1887, A., 1059.
  inorganic constituents of (Bunge), 1885, A., 573.
  nutrition of (Brinck), 1891, A., 1273.
  glycogen in (Hergenhahn), 1890, A., 1334.
  source of the glycogen of the (Schmelz), 1889, A., 429.
  with an artificial circulation, formation of glycogen in (Külz), 1890, A., 1335.
  glycogen in, after section of its nerve and its tendon (Krauss), 1889, A., 64.
  effect of muscular work on the glycogen of the (Manché), 1889, A., 428.
  influence of starvation on the glycogen of (Aldehoff), 1889, A., 427.
  changes of the glycogen, sugar and lactic acid of the, while performing work (Monari), 1890, A., 185.
  formation of lactic acid in (Werther), 1891, A., 348.
  presence of lactic acid in pale and red (Gleiss), 1889, A., 177.
  amount of urea in (Gréhant and Quinquaud), 1889, A., 914.
  change of chemical composition of, by fatigue (Monari), 1888, A., 174.
  action of caffeine and theine on voluntary (Brunton and Cash), 1887, A., 985; 1888, A., 1217.
  action of calcium, barium, and potassium salts on (Brunton and Cash), 1883, A., 875.
  unstriated, of various animals, action of potassium and sodium salts on (Flöel), 1885, A., 578.
Muscle, influence of ptomaine hydrochloride on (Guareschi and Mosso), 1884, A., 618.
  frog, Nasse's experiments on the excitability of, in salt solutions (Tammann), 1892, A., 515.
Muscle-fibres, sarcolemma of, action of digestive fluids on (Ewald), 1889, A., 913.
Muscle-pigments (Levy), 1889, A., 633; (Hoppe-Seyler), 1889, A., 1231.
Muscle-plasma (Halliburton), 1887, A., 984.
Muscovite from Alexander Co., N. Carolina (Clarke), 1888, A., 117.
  from Bamle, Norway (Schlaepfer), 1891, A., 531.
  from Forst, Tyrol (Oebbeke), 1886, A., 518.
  from South Africa (Cohen), 1887, A., 561.
  from Syra (v. Foullon and Goldschmidt), 1890, A., 344.
  See also Mica.
Muscular activity and the chemical effect of respiration, relation between (Hanriot and Richet) 1887, A., 1058.
  formation of lactic acid during (Marceuse), 1887, A., 508.
  work, effect of increased, on the decomposition of albumin (Hirschfeld), 1891, A., 1524.
    influence of, on proteid metabolism (Argutinsky), 1891, A., 350; (Krummacher), 1891, A., 479; (Noël-Paton), 1891, A., 596; (Munk), 1891, A., 847.
    influence of, on the elimination of creatinine (Moitessier), 1892, A., 364.
    influence of, on the exhalation of carbonic anhydride (Grandis), 1890, A., 1334.
    influence of, on the output of urea (Bleibtreu), 1891, A., 350.
Mushrooms, sugars in (Bourquelot), 1889, A., 740; 1891, A., 103; (Ferry), 1891, A., 954.
  cooked, composition of (Williams), 1892, T., 227.
  edible, nutritive value of (Mörner), 1886, A., 1053.
    poisonous principle of (Dupetit), 1883, A., 611; 1884, A., 204.
  See also Agricultural Chemistry and Fungi.
Musk, artificial (Baur), 1890, A., 1401; 1891, A., 1464.
Mussel shells, manurial value of (Mayer), 1889, A., 1085.

- **Mussoenda coffee** (Dunstan), 1890, A., 285.
- **Must,** specific influence of acetic acid on the fermentation of, and the composition of the wine produced (Barth), 1885, A., 942.
  - influence of temperature on the fermentation of (Müller), 1884, A., 647.
  - absence of nitric acid in (Pollak), 1889, A., 541.
  - estimation of dry substance in (Ulbricht), 1884, A., 1432.
- **Mustard,** analysis of (Leeds and Everhart), 1884, A., 878.
  - oil. See Allylthiocarbimide.
  - white, composition of, during growth (Troschke), 1886, A., 913.
    - as fodder (Brümmer), 1884, A., 864.
    - ethereal oil of (Salkowski), 1889, A., 1173.
- **Mutton dripping,** examination of (Kingzett), 1885, A., 446.
- *Mycoderma aceti,* occurrence of cellulose in (Romegialli), 1886, A., 732.
  - best cultivating liquid for (Romegialli), 1886, A., 732.
- **Mydaleine** (Beckurts), 1887, A., 386.
- **Myelin** (Gad and Heymans), 1891, A., 846.

- **Myohæmatin** (MacMunn), 1886, A., 568; 1887, A., 983; 1889, A., 1024; 1890, A., 652; (Copeman), 1891, A., 478.
- *Myoporum platycarpum,* resin of (Maiden), 1889, T., 665; P., 127.
- **Myosin** (Kühne and Chittenden), 1889, A., 423; (Chittenden and Cummins), 1889, A., 530.
  - basicity of (Danilewsky), 1884, A., 1388.
  - digestion of (Chittenden and Goodwin), 1891, A., 950.
  - metallic compounds of (Chittenden and Whitehouse), 1888, A., 75.
- **Myosinogen** (Halliburton), 1887, A., 984.
- **Myosinoses** (Kühne and Chittenden), 1889, A., 423.
- **Myosin-peptone** (Chittenden and Goodwin), 1891, A., 950.
- **Myostroine** (Danilewsky), 1884, A., 1388.
- **Myricyl alcohol** from Carnaüba wax (Stürcke), 1884, A., 1281.
- **Myristamide,** action of brominated potash on (Reimer), 1885, A., 1197.
- **Myristic acid** (Semmler), 1892, A., 311.
  - in ox gall (Lassar-Cohn), 1892, A., 1114, 1503.
  - descent of the series from, to lauric acid (Lutz), 1886, A., 685.
  - heats of combustion and formation of (Stohmann and Langbein), 1891, A., 11.
  - heat of combustion and the specific and latent heats of (Stohmann and Rodatz), 1885, A., 1176; (Stohmann and Wilsing), 1885, A., 1177.
  - action of bromine on (Krafft and Beddies), 1892, A., 696.
  - oxidation of (Noerdlinger), 1886, A., 867.
  - amido- and bromo- (Hell and Twerdomedoff), 1889, A., 956.
- **Myristic aldehyde** (Krafft and Mai), 1889, A., 1017; (Krafft), 1890, A., 1234.
  - isomeric ($C_{14}H_{28}O$) (Perkin), 1883, T., 68, 71, 73, 76.
- *Myristica surinamensis,* aleurone grains in the seed of (Tschirch), 1887, A., 1061.
  - fat of the fruit of (Reimer and Will), 1885, A., 1197.
- **Myristicin** and its derivatives (Semmler), 1890, A., 1150; 1892, A., 311.
  - *di*bromo- (Semmler), 1890, A., 1150.
- **Myristicinaldehyde** (Semmler), 1892, A., 311.
- **Myristicol** (Brühl), 1888, A., 494.
- **Myristotridecylcarbamide** (Lutz), 1886, A., 685.
- **Myristoxime** (Spiegler), 1884, A., 1115.
- **Myristyl chloride** (Krafft and Bürger), 1884, A., 1125.
- **Myrobalans,** tannin of (Zölffel), 1891, A., 918.
- **Myronic acid,** occurrence of, and estimation of the corresponding mustard oil in the seeds of Cruciferæ and in oil-cakes (Dircks), 1883, A., 245.
  - potassium salt of (Birkenwald), 1891, A., 818.
- **Myrrh** (Koehler), 1890, A., 1317.
- *Myrrhis odorata,* glycyrrhizin in (Schroeder), 1886, A., 172.
- **Myrtle,** essence of (Bartolotti), 1891, A., 1384.

Myrtle, oil of (Jahns), 1889, A., 616.

Myrtus Jambosa, crystalline substance (*jambosin*) from (Gerrard), 1885, A., 396.

Mytilotoxine (Gautier), 1886, A., 634; (Brieger), 1888, A., 1317.

Mytilus Edulis, blood of (Griffiths), 1892, A., 648.
  poison of (Salkowski), 1886, A., 568.

Myxœdema (anon.), 1889, A., 179.
  mucin in (Halliburton), 1892, A., 1117.

N.

Nacrite, pseudomorph of, after fluorspar (Geinitz), 1883, A., 1069.

Nagyagite from Nagyág (Sipöcz), 1886; A., 312; (Hankó), 1890, A., 711.

Nandina domestica, active constituents of (Eijkman), 1885, A., 565.

Nandinine (Eijkman), 1885, A., 565.

Napelline (Dunstan and Umney), 1892, T., 391; P., 43.

Naphtha district, the Transcaspian (Sjögren), 1890, A., 115.

α-Naphthabenzein (Doebner), 1890, A., 902.

Naphthabenzylic alcohol. See Naphthylcarbinol.

Naphthacinnamene. See Naphthylethylene.

α-Naphthacinnamic acid. See α-Naphthylacrylic acid.

β-Naphthacoumaric acid and **β-naphthacoumarin** (Kauffmann), 1883, A., 1136.

β-Naphthacridine (Reed), 1886, A., 1037; 1887, A., 682.

Naphthaglycollic acid. See Naphthylglycollic acid.

Naphtha-γ-hydroxyquinaldine. See 4′-Hydroxy-2′-methylnaphthaquinoline.

α-Naphthaldehyde (Bamberger and Lodter), 1888, A., 375.
  condensation products of (Brandis), 1889, A., 1199.

β-Naphthaldehyde (Schulze), 1884, A., 1184; (Bamberger and Boekmann), 1887, A., 675.

Naphthaldehydic acid (Graebe and Gfeller), 1892, A., 864.

α-Naphthaldoxime (Brandis), 1889, A., 1200.

Naphthalene, source of (Liebermann), 1883, A., 534.
  purification of, by means of soap solutions (Link), 1886, A., 713.

Naphthalene, constitution of (Armstrong), 1890, P., 102; (Bamberger), 1890, A., 1301, 1304; (Claus), 1890, A., 1424; 1891, A., 44; (Ciamician), 1892, A., 69.
  spectrum of (Hartley), 1885, T., 697.
  heat of combustion of (Berthelot and Recoura; Berthelot and Luginin), 1887, A., 762; (Stohmann, Kleber and Langbein), 1889, A., 1042.
  heat of formation of (Stohmann, Kleber and Langbein), 1889, A., 1042.
  molecular volume of (Groshans), 1889, A., 336.
  as an insecticide (Fischer), 1885, A., 454.
  action of heat on mixtures of, with ethylene (Ferko), 1887, A., 572.
  action of chloroform on, in presence of aluminium chloride (Hönig and Berger), 1883, A., 68.
  action of methylic chloride on (Bischoff), 1890, A., 1145.
  reduction of (Bamberger and Kitschelt), 1890, A., 1146.
  solidification of different mixtures of stearic acid and (Courtonne), 1883, A., 176.
  behaviour of urine after the ingestion of (Edlefsen), 1888, A., 1322.
  derivatives, constitution of (Brühl), 1887, A., 1005.
    comparative influence exerted by the radicles Cl, OH, and NH_2 in, on the formation of sulphonic acids (Armstrong and Wynne), 1890, P., 133.
    conversion of, into substituted phthalides (Guareschi), 1886, A., 807.
    hydrogenation of (Bamberger), 1890, A., 1299.
    formation of sulphones on sulphonating (Heller), 1889, P., 121.
  disubstituted derivatives from the isomeric chlorophenylparaconic acids (Erdmann and Kirchhoff), 1889, A., 150; (Armstrong and Wynne), 1887, P., 7.
  αα-disubstituted derivatives, constitution of (Erdmann), 1889, A., 156.
  α-haloid compounds, action of aluminium chloride on (Roux), 1886, A., 806.
  β-monohaloid derivatives of, sulphonic acids derived from (Armstrong and Wynne), 1887, P., 22.

Naphthalene, heteronucleal αβ- and ββ-di-derivatives of, constitution of (Armstrong and Wynne), 1889, P., 34, 48.
tri-derivatives of, constitution of (Armstrong and Wynne), 1890, P., 11, 15, 16, 125, 126, 127, 128, 131; 1891, P., 27.
homonucleal tri-derivatives of (Meldola and Desch), 1892, T., 765; P., 141.
bromine derivatives of, constitution of (Meldola), 1883, T., 1; 1885, T., 497; 1886, P., 172; (Armstrong and Rossiter), 1891, P., 187; (Meldola and Desch), 1892, T., 766.
chlorides of, action of alkalis on (Armstrong and Wynne), 1890, P., 85.
iodine derivatives of (Meldola), 1885, T., 518.
picrate, molecular weight of (Paternò and Nasini), 1890, A., 725.
a sulphoxide of (Ekstrand), 1885, A., 170.
*di*thiocyanate (Ebert and Kleiner), 1891, A., 460.

Naphthalene, amido-. See Naphthylamine.
*di*amido-. See Naphthylenediamine.
1-bromo-, optical properties of (Walter), 1891, A., 776.
vapour pressures of (Ramsay and Young), 1885, T., 650, 656.
action of bromine on (Armstrong and Rossiter), 1891, P., 184.
2-bromo- (Canzoneri), 1883, A., 67; (Roux), 1886, A., 807.
preparation of (Oddo), 1891, A., 553.
action of bromine on (Armstrong and Rossiter), 1891, P., 184.
action of chlorosulphonic acid on (Armstrong and Wynne), 1887, P., 22.
*di*bromo- [m.p. 74°], constitution of (Meldola), 1886, P., 173.
1:1′-*di*bromo- (Armstrong and Rossiter), 1891, P., 182.
1:2-*di*bromo-, constitution of (Meldola), 1883, T., 5, 6.
1:2(?)-*di*bromo-, from β-naphthol (Canzoneri), 1883, A., 67.
1:2′-*di*bromo-, and its sulphochloride (Armstrong and Rossiter), 1891, P., 182.
1:3-*di*bromo- (Guareschi), 1884, A., 842.
and its sulphochlorides (Armstrong and Rossiter), 1891, P., 182, 187.

Naphthalene, 1:3′-*di*bromo- (Claus and Philipson), 1891, A., 461.
and its sulphochloride (Armstrong and Rossiter), 1891, P., 182.
1:4-*di*bromo- (Guareschi), 1884, A., 842.
and its sulphochloride (Armstrong and Rossiter), 1891, P., 182, 187.
constitution of (Meldola), 1883, T., 1.
*tetra*bromide (Guareschi), 1884, A., 842.
1:4′-*di*bromo- (Meldola), 1883, T., 1; (Guareschi), 1884, A., 842; (Stallard), 1886, T., 189; P., 139.
and its sulphochloride (Armstrong and Rossiter), 1891, P., 182.
2:3-*di*bromo- (Armstrong and Rossiter), 1891, P., 182.
4:2′- or 3′-*di*bromo- [m.p. 74°] (Meldola), 1885, T., 513; P., 71.
non-existence of (Armstrong and Rossiter), 1891, P., 187.
1:2:3′-*tri*bromo- (Claus and Philipson), 1891, A., 461.
1:2:4-*tri*bromo- (Prager), 1885, A., 1239; (Meldola), 1886, P., 173.
constitution of (Meldola), 1883, T., 4.
1:3:2′ or 3′-*tri*bromo-, derived from *di*bromonaphthylamines (Meldola), 1885, T., 513; P., 71.
1:2-, 1:3- and 1:4-bromiodo- (Meldola), 1885, T., 523; P., 73.
4:1:2-bromiodonitro- (Meldola and Desch), 1892, T., 767; P., 141.
bromonitro- [m.p. 122·5°] (Guareschi), 1884, A., 842; (Meldola), 1885, T., 506; P., 72.
2:4- and 4:1-bromonitro- (Meldola), 1885, T., 506; P., 72.

β-Naphthaquinoneditoluidide (Meldola), 1884, T., 159; (Bromme), 1888, A., 491.
α-Naphthaquinone-ethylanilide (Elsbach), 1883, A., 70.
β-Naphthaquinonehydrazone-benzoic and -sulphanilic acids, action of diazobenzene chloride on (Nölting and Grandmougin), 1891, A., 1075.
Naphthaquinoneimide, amido-, and its bromine derivatives (Kronfeld), 1884, A., 1037.
Naphthaquinoneoxime (*nitrosonaphthol*), action of hydrogen sulphites on (Spiegel), 1885, A., 987.
1:2-**Naphthaquinoneoxime** and its derivatives (Goldschmidt), 1884, A., 735; (v. Ilinski), 1885, A., 169; (Hoffmann), 1885, A., 545; (Goldschmidt and Schmid), 1885, A., 775.
preparation of (Henriques and v. Ilinski), 1885, A., 801.
action of alcoholic potash on (v. Ilinski), 1884, A., 1035.
action of amines and of bromine on (Brömme), 1884, A., 491, 490.
action of ammonia on (v. Ilinski), 1884, A., 1035.
1:2-**Naphthaquinoneoxime**, action of hydroxylamine hydrochloride on (Goldschmidt), 1884, A., 735, 1137; (Goldschmidt and Schmid), 1884, A., 1359.
action of sulphurous anhydride on (Schmidt), 1890, A., 1305.
2:1-**Naphthaquinoneoxime** (Goldschmidt and Schmid), 1885, A., 775.
preparation of (Henriques and v. Ilinski), 1885, A., 801.
action of alcoholic potash on (v. Ilinski), 1884, A., 1035.
action of amines and of bromine on (Brömme), 1888, A., 491, 490.
action of ammonia on (v. Ilinski), 1884, A., 1035.
action of hydroxylamine hydrochloride on (Goldschmidt), 1884, A., 1137; (Goldschmidt and Schmid), 1884, A., 1359.
action of sulphurous anhydride on (Schmidt), 1890, A., 1305.
action of, on animals (Gibbs and Reichert), 1891, A., 1393.
compounds of nickel and cobalt with (v. Ilinski and v. Knorre), 1885, A., 840.
use of, in quantitative analysis (v. Knorre), 1887, A., 530.
3-chloro- (Zincke and Schmunk) 1890, A., 1146.
3:4-*di*chloro- (Zincke and Schmunk), 1890, A., 1147.
1:4-**Naphthaquinoneoxime** and its derivatives (Goldschmidt and Schmid) 1884, A., 1327; (v. Ilinski), 1885 A., 169; (Hoffmann), 1885, A., 545.
preparation of (Henriques and v. Ilinski), 1885, A., 801.
action of amines and of bromine on (Brömme), 1888, A., 491, 490.
1:2-**Naphthaquinone*di*oxime** (Goldschmidt and Schmid), 1884, A., 1359; (Kehrmann and Messinger), 1890, A., 1403.
α-ethyl ether (v. Ilinski), 1886, A., 474.
α- and β-methyl ethers (Koreff), 1886, A., 363.
phenylhydrazide of (Polonowsky), 1888, A., 366.
1:4-**Naphthaquinone*di*oxime** (Nietzki and Guitermann), 1888, A., 471.
Naphthaquinonephenazine (Leicester), 1890, A., 1446.
α-Naphthaquinonephenylhydrazide. See Benzeneazo-α-naphthol under Azo-.

β-Naphthaquinonephenylhydrazide (Zincke), 1883, A., 1135; (Zincke and Bindewald), 1885, A., 391.
α-Naphthaquinone-3′-sulphonic acid, 2:3-*di*chloro- (Claus and van der Cloet), 1888, A., 602.
β-Naphthaquinone-2′-, -3′-, and -4′-sulphonic acids (Witt), 1892, A., 196.
α-Naphthaquinonetolazine (Leicester), 1890, A., 1447.
α-Naphthaquinone-*o*- and -*p*-toluidides, β-chloro- (Claus and Mueller), 1886, A., 247.
β-Naphthaquinonetoluidide and action of nitrous acid on (Zincke and Brauns), 1883, A., 209.
  ethers of (Zincke and Brauns), 1883, A., 209.
  nitro- (Brauns), 1884, A., 1038.
β-Naphthaquinone-*o*- and -*p*-tolylhydrazides, and their derivatives (Zincke and Rathgen), 1887, A., 55.
1:2-Naphthaquinoxaline (Hinsberg), 1890, A., 972.
Naphtharesorcinol, azo-colours from (v. Kostanecki), 1890, A., 260.
  *di*amido-, hydrochloride (Kehrmann and Weichardt), 1889, A., 1198.
  chloronitroso- and *mono*- and *di*-nitroso- (v. Kostanecki), 1889, A., 887.
Naphthase, Laurent's (Witt), 1887, A., 153.
Naphthastyril and its derivatives (Ekstrand), 1886, A., 715; 1889, A., 52.
  amido- (Ekstrand), 1887, A., 373.
  *di*bromo- and *di*chloro- (Ekstrand), 1886, A., 715.
  4′-chloro- (Ekstrand), 1889, A., 153.
Naphthastyrilmethylquinoxaline (Ekstrand), 1889, A., 53.
Naphthastyrilquinone (Ekstrand), 1889, A., 53.
Naphthasultones (Erdmann), 1889, A., 157.
Naphthasultonsulphonic acids, [ε-] and [δ-] (Bernthsen), 1890, A., 387; 1891, A., 215.
αβ-Naphthazine (Japp and Burton), 1887, T., 99; (Witt), 1887, A., 153.
  preparation of (Fischer and Hepp), 1890, A., 614.
s-ββ-Naphthazine (Matthes), 1890, A., 993.
Naphthenes (Markownikoff and Ogloblin), 1884, A., 1276.
  and their derivatives (Markownikoff), 1892, A., 1182, 1311.
  and polymethylenes (Markownikoff), 1892, A., 1310.
β-Naphthenylamidethoxime (Richter), 1890, A., 62.
αβ-Naphthenylamidinedimethoxybenzenyl-*o*-carboxylic acid (Bistrzycki and Cybulski), 1892, A., 1249.
"**β-Naphthenylamidoxime,** *di*cyano-" (Nordenskiöld), 1890, A., 1121.
Naphthenylamidoximes, α- and β-, and their derivatives (Ekstrand), 1887, A., 373; (Richter), 1887, A., 374; 1890, A., 62.
β-Naphthenylamidoxime-ethylidene (Richter), 1890, A., 62.
Naphthenylazoxime-. See Azo-.
Naphthenylcarbonylimidoximes, α- and β- (Richter), 1890, A., 63, 62.
β-Naphthenylethylenediamine (Forssell), 1892, A., 1248.
α-Naphtheurhodole (Kehrmann), 1890, A., 1266.
  modifications of (Kehrmann and Messinger), 1891, A., 1214.
Naphthidine (*diamidodinaphthyl*) and its derivatives (Nietzki and Goll), 1886, A., 245; (Julius), 1887, A., 56.
Naphthilbenzil. See Naphthylimidobenzil.
Naphthimidine (Pinner), 1892, A., 983.
α-Naphthindole (Schlieper), 1887, A., 964.
β-Naphthindole (Schlieper), 1887, A., 153; (Ince), 1890, A., 57.
  derivatives of (Steche), 1888, A., 284.
α-Naphthindolecarboxylic acid (Schlieper), 1887, A., 963.
β-Naphthindolecarboxylic acid (Schlieper), 1887, A., 154.
Naphthionamide. See Naphthylaminesulphonamide.
Naphthionic acid. See α-Naphthylamine-4-sulphonic acid.
Naphthisatins, α- and β- (Hinsberg), 1888, A., 373, 372.
Naphthoic acid, *tri*chloro- (Scherler), 1892, A., 493.
α-Naphthoic acid (*naphthalene-α-carboxylic acid*) (Graeff), 1884, A., 81.
  derivatives of (Boessneck), 1883, A., 807; (Ekstrand), 1889, A., 152.
  4′-amido-, derivatives of (Ekstrand), 1889, A., 152.
  4′-bromo- (Ekstrand), 1886, A., 715; 1889, A., 52.
  4′:1′-bromonitro- (Ekstrand), 1886, A., 715.
  1′-chloro- (Ekstrand), 1889, A., 52.
  2-chloro- (Rabe), 1889, A., 514.
  4′-chloro- (Ekstrand), 1884, A., 1361; 1886, A., 156; 1889, A., 52.
  1′:4′-*di*chloro- (Ekstrand), 1889, A., 52.

α-Naphthoic acid (*naphthalene-α-carboxylic acid*), *tri*chloro- [m.p. 163—164°] (Ekstrand), 1889, A., 52.
  4′:1′-chloramido- (Ekstrand), 1889, A., 153.
  1′-chloronitro- and 1′:4′-dichloronitro- (Ekstrand), 1886, A., 156; 1889, A., 53.
  1′:4′-*di*imido- (Ekstrand), 1889, A., 152.
  nitro- [m.p. 255°] (Graeff), 1884, A., 81.
  1′-nitro-, and its derivatives (Ekstrand), 1885, A., 548; 1886, A., 155; 1889, A., 52.
  4′-nitro-, and its derivatives (Graeff), 1884, A., 81; (Ekstrand), 1885, A., 548; 1886, A., 155.
  *di*nitro- [m.p. 215°] (Ekstrand), 1886, A., 948.
  1′:4′-*di*nitro- (Ekstrand), 1887, A., 373.
  4:4′-*di*nitro-, and its salts (Ekstrand), 1884, A., 1360; 1889, A., 152.
  *tri*nitro- [m.p. 283°] (Ekstrand), 1886, A., 715; 1889, A., 152.
    [m.ps. 236° and 293°] (Ekstrand), 1886, A., 948.
  nitramido- (Ekstrand), 1886, A., 948.
β-Naphthoic acid (Graeff), 1884, A., 81; (Schulze), 1884, A., 1185.
  amido- [m.p. 211°] (Ekstrand), 1891, A., 932.
  *di*amido- [m.ps. 202° and 230°] (Ekstrand), 1891, A., 78, 79.
  1:3′-*di*bromo- (Claus and Philipson), 1891, A., 462.
  chloro- [m.p. 263°] derivatives of (Ekstrand), 1891, A., 932.
  1-chloro- (Wolffenstein), 1888, A., 714.
  1′:4′-*di*chloro- (Ekstrand), 1884, A., 1361.
  nitro- [m.ps. 226° and 248°] and their salts (Ekstrand), 1884, A., 1360.
    [m.p. 279°] and its derivatives (Ekstrand), 1885, A., 904; 1891, A., 932.
    [m.ps. 288° and 293°] and their derivatives (Graeff), 1884, A., 81; (Ekstrand), 1885, A., 904; 1891, A., 78, 79.
  *di*nitro- [m.ps. 226° and 248°] (Ekstrand), 1884, A., 1361; 1891, A., 78.
  nitramido- [m.p. 235°] (Ekstrand), 1891, A., 79.
Naphthoic acids, α- and **β-** (Graeff), 1884, A., 81; (Ekstrand), 1884, A., 1360; 1886, A., 715, 948; 1887, A., 373, 840; 1889, A., 52, 152; 1891, A., 77, 932.
Naphthoic acids, α- and β-, thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096.
  hydrogenation of (v. Sowinski), 1891, A., 1380.
  amides of (Leone), 1884, A., 1362.
α-Naphthoic *tri***chloride,** β-chloro- (Rabe), 1889, A., 514.
β-Naphthoic *tri***chloride,** α-chloro- (Wolffenstein), 1888, A., 714; 1889, A., 615.
α-Naphthoic cyanide and its derivatives (Boessneck), 1883, A., 595.
Naphthol as an antiseptic medicine (Bouchard), 1888, A., 183.
  passage of, into the urine (Desesquelle), 1891, A., 98.
  as a reagent for free chlorine and bromine (Hager), 1886, A., 97.
  and sulphuric acid as a reagent for nitric and nitrous acids and free chlorine (Hager), 1886, A., 99.
  detection of, in the fluids and organs of the animal body (Lustgarten), 1883, A., 243.
  homologues of, preparation of (anon.), 1883, A., 253.
  oxime of. See Hydroxynaphthaquinoneimide.
  amidothio- (Ekbom), 1890, A., 995.
  chloro*tri*nitro- [m.p. 156°] (Cleve), 1890, A., 627.
  *di*imido- (Kronfeld), 1884, A., 1037.
  nitroso-. See Naphthaquinoneoxime.
α-Naphthol, synthesis of (Fittig and Erdmann), 1883, A., 595; 1885, A., 545.
  antiseptic properties of (Maximovitch), 1888, A., 621, 978.
  action of bromine on (Blümlein), 1885, A., 162.
  action of *di*chlorether on (Wislicenus and Zwanziger), 1888, A., 376.
  action of chlorine on (Zincke), 1887, A., 960; (Cleve), 1888, A., 596.
  keto-derivatives of (Witt), 1888, A., 486.
  picrates of (Marchetti), 1883, A., 344.
  *tri*sulphide (Onufrowicz), 1891, A., 322.
α-Naphthol, 2- and 4-amido- (Grandmougin and Michel), 1892, A., 861.
  4-amido-, sulphonic acid from (Seidel), 1892, A., 721.
  *di*amido-, action of bromine on (Zincke and Gerland), 1887, A., 838; 1888, A., 290.
  2:4-*di*amido-, derivatives of (Meerson), 1888, A., 713.

α-**Naphthol**, *o*-azo-compounds of (Nölting and Grandmougin), 1891, A., 1074.
  2:4-*di*bromo-, preparation of (Meldola and Hughes), 1890, T., 395; P., 57.
    action of, on amines (Meldola), 1883, A., 536; 1884, T., 156.
    action of nitric acid on (Meldola and Hughes), 1890, T., 396, 808.
  3:4-*di*bromo-, constitution of (Meldola), 1884, T., 161.
  *penta*bromo- (Blümlein), 1885, A., 163.
  4:2-bromonitro-, and some of its salts (Meldola), 1885, T., 501; P., 71.
  2-chloro- (Cleve), 1888, A., 597.
  2′-, 3′- and 4′-chloro- (Erdmann and Kirchhoff), 1889, A., 150.
  1′-2′-, 1′-4′-, 2′:3- and 2′:3′- or 1′:2′-*di*chloro- (Schwechten), 1890, A., 620.
  2:3-*di*chloro- (Claus and Knyrim), 1886, A., 156.
  2:4-*di*chloro- (Cleve), 1888, A., 596; (Zincke), 1888, A., 709.
  2′:4′-*di*chloro- (Erdmann), 1889, A., 265; (Schwechten), 1890, A., 620.
  2:3:4-*tri*chloro- (Zincke), 1888, A., 709.
  4:2-iodonitro- (Meldola), 1885, T., 524.
  2-nitro- (Lellmann), 1884, A., 752; (Grandmougin and Michel), 1892, A., 861.
    constitution of (Worms), 1883, A., 69.
  2′-nitro- (Gaess), 1892, A., 1229.
  *di*nitro-. See Manchester yellow.
  2:4-2′:4′-*tetra*nitro-, and its salts (Merz and Weith), 1883, A., 344.
  thio-, and its derivatives (Krafft and Schönherr), 1889, A., 715; (Krafft and Bourgeois), 1891, A., 76.
β-**Naphthol**, crystalline form of (Leiveh), 1886, A., 543.
  action of *di*chlorether on (Wislicenus and Zwanziger), 1888, A., 377.
  action of chlorine on (Zincke), 1887, A., 960; 1889, A., 886; (Cleve), 1888, A., 596; (Zincke and Kegel), 1889, A., 265.
  action of halogens on (Armstrong and Rossiter), 1889, P., 71.
  oxidation of (Ehrlich), 1889, A., 1001.
  oxidation of, to *o*-carboxycinnamic acid (Ehrlich and Benedikt), 1888, A., 1306.
β-**Naphthol**, antiseptic properties of (Maximovitch), 1888, A., 621, 978.
  condensation-product of, with benzaldehyde (Trzciński), 1884, A., 1185.
  benzoyl-derivative of (Koenigs and Carl), 1892, A., 447.
  derivatives of, nitration of (Armstrong and Rossiter), 1891, P., 89.
  picrate of (Marchetti), 1883, A., 344.
  sulphides (Onufrowicz), 1889, A., 404; 1891, A., 320.
β-**Naphthol**, 1-amido- (Grandmougin and Michel), 1892, A., 862.
    identification of (Meldola and Morgan), 1889, T., 120.
    and its hydrochloride, preparation of, from nitroso-β-naphthol (Groves), 1884, T., 293.
    sulphate (Groves), 1884, T., 297.
  1′- and 4′-amido (Friedländer and Szymanski), 1892, A., 1233.
  *di*amido-, hydrochloride (Loewe), 1890, A., 1424.
  1′-amidothio- (Cleve), 1889, A., 155.
  1-bromo- (Armstrong and Rossiter), 1889, P., 71; 1891, P., 88.
    acetyl- and nitroso-derivatives of (Canzoneri), 1883, A., 68.
  1:3′-*di*bromo- (Armstrong and Rossiter), 1889, P., 71; 1891, P., 88.
    action of nitric acid and oxidising agents on (Armstrong and Rossiter), 1891, P., 34.
  1:3:3′-*tri*bromo- (Armstrong and Rossiter), 1891, P., 34, 87.
    action of nitric acid and oxidising agents on (Armstrong and Rossiter), 1891, P., 34.
  1:3:4:3′-*tetra*bromo- (Armstrong and Rossiter), 1891, P., 33, 88.
  *penta*bromo-, and the action of bromine on (Flessa), 1884, A., 1185.
  chloro-, action of nitric acid and oxidising agents on (Armstrong and Rossiter), 1891, P., 34.
  1-chloro- (Schall), 1883, A., 1109; (Cleve), 1888, A., 597; (Armstrong and Rossiter), 1889, P., 72.
  1′-chloro- (Claus and Volz), 1886, A., 246.
  1:3-*di*chloro- (Zincke and Kegel), 1889, A., 266; (Armstrong and Wynne), 1890, P., 76.
  1′:3′-*di*chloro- (Claus and Schmidt), 1887, A., 270.
  1:4-*di*chloro- (Zincke and Kegel), 1889, A., 266; (Armstrong and Rossiter), 1891, P., 32.

β-Naphthol, 1:3:4-*tri*chloro- (Zincke and Kegel), 1889, A., 267.
  1:4:4′-*tri*chloro- (Armstrong and Rossiter), 1891, P., 32.
  1:3′-chlorobromo- (Armstrong and Rossiter), 1889, P., 72; 1891, P., 33.
  chloronitro- (Gaess), 1892, A., 1229.
  iodo- [m.p. 88°(?)] (Ostermayer), 1885, A., 672.
  1-iodo- (Meldola), 1885, T., 525.
  nitro-, action of ammonia on the ethers of (Wittkampf), 1884, A., 1036.
  1′-nitro- (Friedländer and Szymanski), 1892, A., 1234; (Gaess), 1892, A., 1341.
  2′-nitro- (Gaess), 1892, A., 1229.
  3′-nitro- (Gaess), 1892, A., 1341.
  4′-nitro- (Friedländer and Szymanski), 1892, A., 1233.
  dinitro-, and its derivatives (Graebe and Drews), 1884, A., 1035.
    constitution of (Loewe), 1890, A., 1424.
  thio-, and its derivatives (Krafft and Schönherr), 1889, A., 715; (Krafft and Bourgeois), 1891, A., 76.
  2:2′-*di*thio- (Grosjean), 1890, A., 1306.
Naphthols, α- and β-, reagents for (Yvon), 1890, A., 927.
  action of diazo-*p*-nitrobenzene on (Meldola), 1885, T., 661.
  action of iodine on, in alkaline solution (Messinger and Vortmann), 1889, A., 1151.
  action of nitrogen iodide on (Lepetit), 1890, A., 1402.
  behaviour of, in the system (Lesnik and Nencki), 1886, A., 822.
  derivatives obtained from, by the action of aromatic monamines (Friedländer), 1884, A., 79.
Naphtholactone and bromo- (Ekstrand), 1886, A., 716.
  chloro- and nitro- (Ekstrand), 1889, A., 153.
Naphtholazo-. See under Azo-.
α-Naphthol-blue. See Indophenol.
Naphtholcamphorides, α- and β- (Léger), 1890, A., 1427.
Naphtholcarboxylic acid. See Hydroxynaphthoic acid.
α-Naphthol-2:4-(?)disulphonic acid (Claus and Mielcke), 1886, A., 716.
α-Naphthol-3:1′-disulphonic acid [ε-] (Bernthsen), 1890, A., 387.
  2-amido- (Bernthsen), 1891, A., 215.
α-Naphthol-2:2′- and -2:4-disulphonic acids (Bender), 1889, A., 718.
β-Naphtholdisulphonic acid, action of tetrazodiphenyl on (Schultz), 1884, A., 1036.
β-Naphthol-1′:3′-disulphonic acid [β- or G.-] (Claus and Schmidt), 1887, A., 269.
  1-amido- (Witt), 1889, A., 273.
β-Naphthol-3:3′-disulphonic acid [α- or R.-], constitution of (Pfitzinger and Duisberg), 1889, A., 515.
  1-amido- (Witt), 1889, A., 273.
Naphthol-green, preparation of (Gans), 1885, A., 312.
  physiological action of (Weyl), 1888, A., 1122.
α-Naphtholmaleinfluorescein (Burckhardt), 1886, A., 51.
Naphtholphthalein anhydride (Meyer), 1891, A., 1029.
α-Naphtholsulphonamidosulphonic acid [ε-] (Bernthsen), 1890, A., 387.
α-Naphtholsulphonamidosulphonic acid [δ-] (Bernthsen), 1891, A., 215.
α-Naphtholsulphonic acid, amido- (Schmidt), 1892, A., 476.
α-Naphthol-1′-sulphonic acid (Erdmann), 1889, A., 157.
  4-amido- (Reverdin and De la Harpe), 1892, A., 996.
α-Naphthol-2-sulphonic acid (Bender), 1889, A., 717; (Cleve), 1892, A., 345.
  4-amido- (Seidel), 1892, A., 721; (Reverdin and de la Harpe), 1892, A., 996.
α-Naphthol-2-[?]sulphonic acid and its salts (Claus and Knyrim), 1886, A., 156.
α-Naphthol-2′-sulphonic acid (Bender), 1889, A., 717.
α-Naphthol-4-sulphonic acid (Erdmann), 1889, A., 157; (Bender), 1889, A., 717; (Witt and Kaufmann), 1892, A., 194.
  2-amido- (Reverdin and De la Harpe), 1892, A., 996.
  2-nitroso- (Witt and Kaufmann), 1892, A., 195.
    metallic salts of (Hoffmann), 1892, A., 346.
α-Naphthol-4′-sulphonic acid (Erdmann), 1889, A., 157.
  2-amido- (Reverdin and De la Harpe), 1892, A., 996.
β-Naphtholsulphonic acid (Claus and Volz), 1886, A., 246.
  amido- (Schmidt), 1892, A., 476.
  iodo- (Ostermayer), 1885, A., 673.

β-Naphthol-1′-sulphonic acid [α-] (Witt), 1889, A., 275; (Nietzki and Zübelen), 1889, A., 515.
  preparation of (anon.), 1884, A., 238.
  constitution of (Armstrong), 1889, P., 8; (Armstrong and Wynne), 1889, P., 53; (Pfitzinger and Duisberg), 1889, A., 515.
  calcium salt of, physiological action of (Stackler), 1892, A., 1116.
  1-amido- (Witt), 1889, A., 271; (Reverdin and De la Harpe), 1892, A., 996.
  *di*amido- (Nietzki and Zübelen), 1889, A., 515.
β-Naphthol-2′-sulphonic acid [δ-, or F.-] (Bayer and Duisberg), 1887, A., 733; (Weinberg), 1888, A., 160.
  constitution of (Armstrong and Wynne), 1889, P., 53.
  1-amido- (Witt), 1889, A., 272; (Reverdin and De la Harpe), 1892, A., 996.
β-Naphthol-3′-sulphonic acid, constitution of [β-] (Armstrong and Wynne), 1889, P., 53.
  action of bromine on (Armstrong and Streatfeild), 1886, P., 232.
  1-amido- (Witt), 1889, A., 272; (Reverdin and De la Harpe), 1892, A., 996.
  1-bromo-, derivatives of (Armstrong and Rossiter), 1889, P., 72.
  1-chloro- and its derivatives (Armstrong and Rossiter), 1889, P., 72; 1891, P., 33.
  1-nitroso-, metallic salts of (Hoffmann), 1892, A., 346.
β-Naphthol-4′-sulphonic acid [γ-] (Claus), 1889, A., 714.
  constitution of (Armstrong and Wynne), 1889, P., 53.
  1-amido- (Witt), 1892, A., 272; (Reverdin and De la Harpe), 1892, A., 996.
α-Naphthol-2:4-2′-trisulphonic acid (Claus and Mielcke), 1886, A., 716; (Bender), 1889, A., 718.
β-Naphthol-3:3′-1′-trisulphonic acid (Levinstein), 1883, A., 737; (Limpach), 1883, A., 1136.
Naphthol-violet, action of aromatic bases on (Hirsch and Kalckhoff), 1891, A., 77.
  See also Oxazine dyes.
Naphthol-yellow, S., constitution of (Armstrong and Wynne), 1890, P., 16.
  physiological action of (Weyl), 1888, A., 1122.
α-Naphthonitrile (*α-cyanonaphthalene*) (Boessneck), 1883, A., 807.
  behaviour of, with sulphonating agents (Armstrong), 1889, P., 122.
  hydrolysis of (Leone), 1884, A., 1362.
  4′-chloro- (Ekstrand), 1884, A., 1361.
  4′-nitro- (Graeff), 1884, A., 80.
β-Naphthonitrile (*β-cyanonaphthalene*), action of sodium on alcoholic (Bamberger and Boekmann), 1887, A., 840.
  behaviour of, with sulphonating agents (Armstrong), 1889, P., 122.
  hydrolysis of (Leone), 1884, A., 1362.
  1:3′-*di*bromo- (Claus and Philipson), 1891, A., 462.
  mono- and *di*-chloro-, and derivatives (Ekstrand), 1891, A., 932.
  nitro- (Graeff), 1884, A., 80.
α-Naphthonitrilesulphonic acid (*α-cyanonaphthalenesulphonic acid*) (Dutt), 1883, A., 1001; (Armstrong and Williamson), 1887, P., 43.
Naphthoxanthones (Bener), 1892, A., 1100.
Naphthoxindoles, α- and β- (Hinsberg), 1888, A., 373, 372.
Naphthoylacetamide (Pinner), 1892, A., 983.
Naphthoylformic acid. See Naphthylglyoxylic acid.
Naphthoylhydroxamic acids, α- and β- (Ekstrand), 1887, A., 840.
Naphthoylnaphastyrils, α- and β- (Ekstrand), 1889, A., 53.
α-Naphthoyl-α-naphthenylamidoxime (Ekstrand), 1887, A., 373.
β-Naphththiamide (Bamberger and Boekmann), 1887, A., 675.
Naphthyl benzyl ketone (Päpcke), 1888, A., 702.
Naphthyl ethyl ether. See Ethoxynaphthalene.
  amido-. See Ethoxynaphthylamine.
α-Naphthyl glycidyl ether (Lindemann), 1891, A., 1199.
Naphthyl mercaptans, α- and β-, amido- (v. Hofmann), 1887, A., 839.
α-Naphthyl methyl ketone and its derivatives (Pampel and Schmidt), 1887, A., 252; (Claus and Feist), 1887, A., 271.
β-Naphthyl methyl ketone (Müller and v. Pechmann), 1890, A., 52; (Schweitzer), 1891, A., 729.
Naphthyl methyl ketones (Roux), 1888, A., 1306; (Claus and Tersteegen), 1891, A., 214.

Naphthyl methyl ketones, action of phosphoric chloride on (LEROY), 1892, A., 495.

α-Naphthyl phenyl ketone and its derivatives (VINCENT and ROUX), 1884, A., 609; (ELBS), 1887, A., 943; (ROSPENDOWSKI), 1886, A., 625; (ELBS and STEINIKE), 1886, A., 947; (KEGEL), 1888, A., 1307.
  boiling point of (SCHWELTZER), 1891, A., 1240.
  sodium derivative of (BECKMANN and PAUL), 1892, A., 170.

β-Naphthyl phenyl ketone (VINCENT and ROUX), 1884, A., 609; (ROSPENDOWSKI), 1886, A., 625; (KEGEL), 1888, A., 1307.

α-Naphthylacetamide and **α-naphthylacetonitrile** (BOESSNECK), 1883, A., 808.

α-Naphthylacetic acid (BOESSNECK), 1883, A., 808.

β-Naphthylacetic acid (CLAUS and TERSTEEGEN), 1891, A., 215; (SCHWEITZER), 1891, A., 730.

Naphthylacetylenes, α- and β-, and their derivatives (LEROY), 1892, A., 495, 496.

α-Naphthylacrylic acid (*α-naphthacinnamic acid*) (BRANDIS), 1889, A., 1200.

β-Naphthylalkylamines, reduction of (BAMBERGER and MÜLLER), 1889, A., 888.

Naphthyl-β-allylsemithiocarbazide (AVENARIUS), 1891, A., 550.

α-Naphthylamidoacetic acid (*naphthylglycocine*) (BISCHOFF and NASTVOGEL), 1889, A., 1015; (JOLLES), 1889, A., 1199; (FORTE), 1890, A., 900.
  calcium salt of (MAUTHNER and SUIDA), 1891, A., 39.

β-Naphthylamidoacetic acid (JOLLES), 1889, A., 1199.

Naphthylamidoacetic acids, derivatives of (JOLLES), 1889, A., 1199; (BISCHOFF and HAUSDÖRFER), 1890, A., 1309; 1892, A., 1341.

α-Naphthylamidoacetic naphthylamide (BISCHOFF and HAUSDÖRFER), 1892, A., 1341.

β-Naphthylamidoacetic naphthylamine (JOLLES), 1889, A., 1199.

α-Naphthylamidoacetyl-α-naphthylamineacetic acid (BISCHOFF and HAUSDÖRFER), 1892, A., 1341.

Naphthylamidobenzoic acids, *m*-amido- and *m*-nitro-, *p*-α- and β- (HEIDENSLEBEN), 1891, A., 307.

Naphthylamidobiazolones, α- and β- (FREUND), 1892, A., 510, 508.

Naphthylamidobutyric acids, α- and β- (BISCHOFF and MINTZ), 1892, A., 1338.

Naphthylamido*iso*butyric acids, derivatives of (BISCHOFF and MINTZ), 1892, A., 1342.

α-Naphthylamidocyanuric chloride (FRIES), 1886, T., 314.

β-Naphthylamidocyanuric chloride (FRIES), 1886, T., 740.

Naphthylamidoethylphthalimides, α- and β- (NEWMAN), 1891, A., 1208.

Naphthylamidopropionic acids, α- and β- (BISCHOFF and HAUSDÖRFER), 1892, A., 1337.

Naphthylamidosuccinic acids, α- and β- (HELL and POLIAKOFF), 1892, A., 860.

Naphthylamidosuccinic dinaphthylamide (HELL and POLIAKOFF), 1892, A., 860.

α-Naphthylamido-ψ-thiobiazolone (HELL and POLIAKOFF), 1892, A., 510.

Naphthylamidothiobiazolones, α- and β- (FREUND), 1892, A., 511, 508.

Naphthylamine (*amidonaphthalene*), chloro*tri*nitro- [m.p. 252°] (CLEVE), 1890, A., 626.

α-Naphthylamine, manufacture of (WITT), 1887, A., 1048.
  refractive power of, at different temperatures (PERKIN), 1892, T., 303.
  action of picric chloride on (TURPIN), 1891, T., 716.
  citraconate (MORAWSKI and GLÄSER), 1888, A., 1096.
  citrate (HECHT), 1887, A., 154.
  hydrochloride, action of fuming sulphuric acid on (MAUZELIUS), 1888, A., 375.
  phenate (DYSON), 1883, T., 468.
  picrate (SMOLKA), 1886, A., 454.
  platinothiocyanate (GUARESCHI), 1892, A., 287.

α-Naphthylamine, 3′-bromo- (MELDOLA), 1885, T., 508; P., 72.
  4-bromo- (GUARESCHI), 1884, A., 843; (MELDOLA), 1885, T., 508; P., 72.
  4′(?)-bromo- (GUARESCHI), 1884, A., 843.
  2:4-*di*bromo- (MELDOLA), 1885, T., 510; P., 72.
  4:2-bromonitro- (MELDOLA), 1885, T., 500; P., 71; (ARMSTRONG and ROSSITER), 1891, P., 186; (MELDOLA and DESCH), 1892, T., 765.
  2-chloro- and 2:4-*di*chloro- (CLEVE), 1887, A., 495.

α-**Naphthylamine**, 1′:4′-*di*chloro- (Schwechten), 1890, A., 620.
  2′:4′-*di*chloro- (Erdmann), 1889, A., 265; (Schwechten), 1890, A., 620.
  2-nitro-, and its derivatives (Lellmann), 1884, A., 751; (Lellmann and Remy), 1886, A., 624.
  2:4-*di*nitro- (Witt), 1886, A., 947.
    preparation of (Meldola), 1887, A., 152.
  2:4:1′:4′- and 2:4:2′:4′-*tetra*nitro- (Merz and Weith), 1883, A., 344.
  2-nitroso- (Harden), 1890, A., 630.
β-**Naphthylamine**, action of diazo-compounds on (Lawson), 1885, A., 802, 1238.
  action of quinonedichlorimide on (Nietzki and Otto), 1888, A., 843.
  nitration of (Friedländer and Szymanski), 1892, A., 1232.
  products of the sulphonation of, at 100°—105° (Green), 1889, T., 35.
  compounds from diazophenols and (Sachs), 1886, A., 235.
  constitution of the compounds obtained from diazo-salts and (Zincke), 1886, A., 244.
  derivatives of (Maschke), 1887, A., 838.
  the isomeric sulphonic acids of (Green), 1889, T., 33.
  citraconates (Morawski and Gläser), 1888, A., 1096.
  citrates (Hecht), 1887, A., 154.
  platinothiocyanate (Guareschi), 1892, A., 287.
β-**Naphthylamine**, *di*amido-, hydrochlorides of (Loewe), 1890, A., 1424.
  1-bromo- (Meldola), 1885, T., 508; P., 72; (Lellmann and Schmidt), 1888, A., 289.
  4-bromo- (Meldola), 1885, T., 508; P., 72.
    non-existence of (Armstrong and Rossiter), 1891, P., 187; (Meldola and Desch), 1892, T., 766.
  1:3′-*di*bromo- (Lawson), 1885, A., 1239; (Armstrong and Rossiter), 1891, P., 32; (Claus and Philipson), 1891, A., 461.
  1:4-*di*bromo- (Meldola), 1885, T., 497; P., 72; 1886, P., 173; (Armstrong and Rossiter), 1891, P., 186.
  *tri*bromo- (Claus and Philipson), 1891, A., 462.
β-**Naphthylamine**, 4:1-bromiodo- (Meldola and Desch), 1892, T., 767; P. 141.
  1-chloro- (Cleve), 1887, A., 961.
  1′:4′-*di*chloro- (Claus and Philipson), 1891, A., 462.
  1:4-chlorobromo- (Meldola and Desch), 1892, T., 768.
  1:3′-chlorobromo- (Armstrong and Rossiter), 1891, P., 33.
  1′- and 4′-nitro- (Friedländer and Szymanski), 1892, A., 1234, 1233.
  *di*nitro- [m.p. 238°—242°] (Graebe and Drews), 1884, A., 1036.
  1′:4′-*di*nitro- (Onufrowicz), 1891, A., 321.
  *tri*nitro- [m.p. 240—266°] (Staedel), 1883, A., 863.
  nitroso- (v. Ilinski), 1884, A., 1035; (Harden), 1890, A., 630.
Naphthylamines, primary and secondary (Benz), 1883, A., 594.
  action of *di*brom-α-naphthol on (Meldola), 1884, T., 160.
  action of *p*-diazobenzenesulphonic acid on (Griess), 1883, A., 182.
  action of diazo-*p*-nitrobenzene on (Meldola), 1883, T., 430.
  action of, on ethylic bromosuccinate (Hell and Poliakoff), 1892, A., 860.
  action of *m*-nitrodiazobenzene on (Meldola), 1884, T., 114, 116.
  action of nascent nitrous acid on (Deninger), 1890, A., 39.
  compounds of, with metallic salts (Lachowicz and Bandrowski), 1888, A., 1281.
  bromo-, identity of supposed isomerides (Armstrong and Rossiter), 1891, P., 188; (Meldola and Desch), 1892, T., 766.
Naphthylaminealloxan (Pellizzari), 1888, A., 142, 681.
α-**Naphthylaminebenzylidenesulphonic acid.** See α-Naphthyl-ω-imidotoluenesulphonic acid.
α-**Naphthylaminebisdiazobenzene** (Krohn), 1889, A., 152.
Naphthylaminebisazobenzenes, α- and β- (Nietzki and Diesterweg), 1888, A., 1082, 1083.
α-**Naphthylamine-3:1′-disulphonic acid** [ε-] (Armstrong and Wynne), 1890, P., 15; (Bernthsen), 1890, A., 386; (Schultz), 1890, A., 388.
α-**Naphthylamine-4:1′-disulphonic acid** (*Schöllkopf acid*) (Bernthsen), 1890, A., 386.
  constitution of (Armstrong and Wynne), 1890, P., 126.

α-Naphthylamine-4:2′-disulphonic acid (*Dahl No. III.*), constitution of (Armstrong and Wynne), 1890, P., 16.
α-Naphthylamine-4:3′-disulphonic acid (*Dahl No. II.*), constitution of (Armstrong and Wynne), 1890, P., 125.
β-Naphthylamine-1:3′-disulphonic acid (Forsling), 1889, A., 276.
  constitution of (Armstrong and Wynne), 1890, P., 130.
β-Naphthylamine-1′:3′-disulphonic acid (*Amido-G.-acid*) (Landshoff), 1885, A., 312.
  constitution of (Armstrong and Wynne), 1890, P., 12, 128.
β-Naphthylamine-3:2′-disulphonic acid (*Cassella's δ-acid*), constitution of (Armstrong and Wynne), 1890, P., 127.
β-Naphthylamine-3:3′-disulphonic acid (*Amido-R.-acid*), constitution of (Armstrong and Wynne), 1890, P., 12.
β-Naphthylamine-4:2′-disulphonic acid (*Andresen's acid*) (Schultz), 1890, A., 388; (Armstrong and Wynne), 1891, A., 27.
α-Naphthylaminephthalein (Vanni), 1886, A., 68.
α-Naphthylamine-3′-sulphonamide (*naphthionamide*) (Ekbom), 1891, A., 573.
α-Naphthylamine-4-sulphonamide (Cleve), 1890, A., 635.
α-Naphthylamine-4′-sulphonamide (Ekbom), 1890, A., 994.
Naphthylaminesulphonic acid, iodo- (Ostermayer), 1885, A., 673.
α-Naphthylaminesulphonic acid (δ-*Hirsch acid*) (Hirsch), 1888, A., 1200.
α-Naphthylamine-1′-sulphonic acid (Erdmann), 1889, A., 156.
α-Naphthylamine-2-sulphonic acid (Cleve), 1892, A., 345.
α-Naphthylamine-2′-sulphonic acid [δ-] (Cleve), 1889, A., 155.
  2-chloro- (Cleve), 1892, A., 1479.
α-Naphthylamine-3-sulphonic acid [γ-] (Cleve), 1886, A., 1037; 1889, A., 154.
α-Naphthylamine-4-sulphonic acid (*naphthionic acid*) (Witt), 1886, A., 364; (Erdmann), 1889, A., 156.
  constitution of (Witt), 1886, A., 889.
  nitration of (Nietzki and Zübelen), 1889, A., 513.
  sodium salt of, action of benzaldehyde on (Cahn and Lange), 1887, A., 962.
α-Naphthylamine-4-sulphonic acid, 4′-nitro- (Nietzki and Zübelen), 1889, A., 514.
α-Naphthylamine-4′-sulphonic acid (*naphthalidenesulphonic acid*) (Witt), 1886, A., 554; (Lange), 1888, A., 160; (Erdmann), 1889, A., 156.
  conversion of, into *di*chloronaphthalene (Erdmann), 1888, A., 290.
β-Naphthylamine-1′-sulphonic acid (*Badische-acid*) (Forsling), 1886, A., 890; 1887, A., 962.
  preparation of (anon.), 1884, A., 238.
  constitution of (Armstrong and Wynne), 1889, P., 50; (Immerheiser), 1889, A., 514; (Forsling), 1889, A., 718.
β-Naphthylamine-2′-sulphonic acid [δ-], and its derivatives Bayer) and Duisberg), 1887, A., 732; (Weinberg), 1888, A., 160.
  identity of the δ- and F. acids (Schultz), 1888, A., 290; (Erdmann), 1888, A., 491.
  1-chloro- (Armstrong and Wynne), 1889, P., 36, 48.
β-Naphthylamine-3′-sulphonic acid (*Brönner's acid*) (Landshoff), 1885, A., 312; (Forsling), 1887, A., 375.
  dye-stuffs from (Landshoff), 1883, A., 1135.
  acids formed by displacing NH_2 in, by halogens (Houlding), 1889, P., 74.
  action of fuming sulphuric acid on (Forsling), 1889, A., 275; (Armstrong and Wynne), 1890, P., 130.
  1-chloro- (Armstrong and Wynne), 1889, P., 36, 48.
β-Naphthylamine-4′-sulphonic acid (Forsling), 1887, A., 963.
  1-chloro- (Armstrong and Wynne) 1889, P., 36, 48.
β-Naphthylaminesulphonic acids, properties of the four (Green), 1889, T., 36.
  from β-naphtholsulphonic acids (Green), 1889, T., 37.
  constitution of (Armstrong and Wynne), 1889, P., 36, 48.
  conversion of the 2:1′- and 2:4′-acids into mixtures of the 2:2′- and 2:3′-acids (Weinberg), 1888, A., 290.
  the isomeric heteronucleal, the disulphonic acids obtained by sulphonating (Armstrong and Wynne), 1890, P., 128.

β-**Naphthylamine-3:1′:3′-trisulphonic acid** (Landshoff), 1885, A., 312.

α-**Naphthylaspartic acid** (Hell and Poliakoff), 1892, A., 860.

β-**Naphthylbenzoglycocyamine,** and its hydrochloride (Griess), 1883, A., 669.

β-**Naphthylbenzylamine** (Kohler), 1888, A., 50.

α-**Naphthylbenzylcarbamide** (Kühn and Riesenfeld), 1892, A., 312.

β-**Naphthylbenzylideneamine** (Claisen), 1887, A., 494.

Naphthylbenzylthiocarbamides, α- and β- (Dixon), 1891, T., 558, 559.

as-β-**Naphthylcarbamide** (Kühn and Landau), 1890, A., 634.

α-**Naphthylcarbinol** (*α-naphthabenzylic alcohol*) (Bamberger and Lodter), 1888, A., 375.

β-**Naphthylcarbinol** (Bamberger and Boekmann), 1887, A., 675.

Naphthylcarbinylamine. See Naphthylmethylamine.

α-**Naphthylcyanamide** (Tiemann), 1889, A., 1165; (Voltmer), 1891, A., 559.

α-**Naphthyldiethylamine** (Friedländer and Welmans), 1889, A., 151.

β-**Naphthyldiethylamine,** hydrogenation of (Bamberger and Williamson), 1889, A., 1000.

α-**Naphthyldiethylaminecarboxylic acid** (Friedländer and Welmans), 1889, A., 152.

α-**Naphthyldimethylamine** and its derivatives (Friedländer and Welmans), 1889, A., 150.

α-**Naphthyldimethylaminecarboxylic acid** (Friedländer and Welmans), 1889, A., 151.

Naphthyldimethylaminesulphonic acid (Friedländer and Welmans), 1889, A., 151.

Naphthyldimethylpropionic acid (Gucci and Grassi-Cristaldi), 1892, A., 871.

Naphthyl-2:5-dimethylpyrrolines, 1:α- and 1:β- (Knorr), 1887, A., 275.

1-β-**Naphthyl-2:5-dimethylpyrroline-3:4-dicarboxylic acid** (Knorr), 1885, A., 555.

1:α-**Naphthyl-2:5-dimethylpyrroline-3:4-dicarboxylic acid** (Knorr), 1887, A., 275.

Naphthyldiphenylamine (Herz), 1890, A., 1410.

Naphthyldiphenylamine-blue, constitution of (Häusdörfer), 1890, A., 1308.

β-**Naphthyldiphenylcarbamide** (Kym), 1890, A., 633.

Naphthyl-2:5-diphenylpyrrolines, 1:α- and 1:β- (Paal and Braikoff), 1890, A., 263, 264.

Naphthylene mercaptan (Ebert and Kleiner), 1891, A., 460.

"**Naphthylenes**" (Markownikoff and Ogloblin), 1884, A., 1276.

Naphthylene-αβ-benzenyldiamine (Koll), 1891, A., 1239.

Naphthylenediallylthiocarbamide (Lellmann), 1886, A., 625.

1:1′-**Naphthylenediamine** (*diamidonaphthalene*) (Hinsberg), 1889, A., 717.

1:2-**Naphthylenediamine** (Lawson), 1885, A., 1238.
  action of formic acid on (Fischer and Wreszinski), 1892, A., 1496.
  hydrogenation of (Bamberger and Schieffelin), 1889, A., 892.

1:3-**Naphthylenediamine** (Urban), 1887, A., 674.

1:4-**Naphthylenediamine** (Griess), 1883, A., 183; (Witt), 1887, A., 1048.
  hydrogenation of (Bamberger and Schieffelin), 1889, A., 892.

2:1′-**Naphthylenediamine** (Friedländer and Szymanski), 1892, A., 1234.

2:2′-**Naphthylenediamine,** preparation of (Bamberger and Schieffelin), 1889, A., 893.

2:4′-**Naphthylenediamine** (Friedländer and Szymanski), 1892, A., 1233.

Naphthylenediamines, substituted (Annaheim), 1887, A., 839.

1:2-**Naphthylenediamine-3:1′-disulphonic acid,** derivatives of (Bernthsen), 1891, A., 216.

1:2-**Naphthylenediamine-2′-, -3′- and -4′-sulphonic acids** (Witt), 1889, A., 274.

αβ-**Naphthylenedimethoxyphthalamidone** (Bistrzycki and Cybulski), 1892, A., 1249.

Naphthylenedinaphthylsulphoxide (Ekstrand), 1885, A., 170.

Naphthylenediphenyl*di*thiocarbamide (Bamberger and Schieffelin), 1889, A., 892.

1:2-**Naphthylene-ethenylamidine** and its salts (Prager), 1885, A., 1239; (Lellmann and Remy), 1886, A., 624.
  4-bromo- and bromonitro- (Prager), 1885, A., 1239.

ββ-**Naphthylene-ethenyldiamine** (Fischer and Hepp), 1887, A., 729.

Naphthylene-ethyldiamine (Kock), 1888, A., 469.

Naphthylene-ethyldiamine hydrochloride (Kock), 1888, A., 469; (Bamberger and Goldsmidt), 1891, A., 1239.

1:2-**Naphthylene-methenylamidine** and **-methylmethenylamidine** (Fischer and Wreszinski), 1892, A., 1496.
β-**Naphthylenetoluquinoxaline** (Hinsberg), 1885, A., 909.
amido- (Witt), 1886, T., 400.
Naphthylenic dihydrosulphides and **dithiocyanate** (Ebert and Kleiner), 1891, A., 460; (Braun and Ebert), 1892, A., 1471.
α-**Naphthylethenyldiphenyldiamine** (Boessneck), 1883, A., 808.
α-**Naphthylethylamine** (Bamberger and Goldschmidt), 1891, A., 1238.
β-nitroso- (Harden), 1890, A., 631.
p-nitroso- (Kock), 1888, A., 469.
β-**Naphthylethylamine** (Henriques), 1885, A., 168.
α-nitroso- (Fischer and Hepp), 1887, A., 1114; 1888, A., 461.
α-**Naphthylethylene** (*naphthacinnamene*) (Brandis), 1889, A., 1200.
chloro- (Leroy), 1892, A., 495.
β-**Naphthylethylene**, chloro- (Leroy), 1892, A., 495.
α-**Naphthylethylenediamine** (Newman), 1891, A., 1208.
β-**Naphthylethylhydrazine** (Hauff), 1890, A., 61.
β-**Naphthylethylidenehydrazine** (Schlieper), 1887, A., 153.
Naphthylethylxanthic acids, sulpho- α- and -β-, potassium salts of (Leuckart), 1890, A., 606.
Naphthylformamides, α- and β- (Tobias), 1883, A., 326.
Naphthylglycocine. See Naphthylamidoacetic acid.
β-**Naphthylglycollamide** (Schweitzer), 1891, A., 729.
α-**Naphthylglycollic acid** (*naphthaoxyacetic acid*) (Boessneck), 1883, A., 808; (Spica), 1887, A., 495; (Brandis), 1889, A., 1200; (Schweitzer), 1891, A., 730.
β-**Naphthylglycollic acid** (Spica), 1887, A., 495; (Claus and Tersteegen), 1891, A., 215; (Schweitzer), 1891, A., 729.
α-**Naphthylglycollic nitrile** (Brandis), 1889, A., 1200.
Naphthylglycuronic acids, α- and β- (Lesnik and Nencki), 1886, A., 823.
1-α-**Naphthylglyoxaline** and μ-mercaptan and μ-methylsulphide (Marckwald), 1892, A., 1331.
α-**Naphthylglyoxylamide** (Boessneck), 1883, A., 595.
α-**Naphthylglyoxylic acid** (*naphthoylformic acid*) (Boessneck), 1883, A., 595, 808; (Claus and Feist), 1887, A., 271.
β-**Naphthylglyoxylic acid** (Claus and Tersteegen), 1891, A., 214.
α-**Naphthylhydrazine** (Fischer), 1886, A., 554.
indoles from (Schlieper), 1887, A., 963.
β-**Naphthylhydrazine** (Fischer), 1886, A., 555; (Hauff), 1890, A., 61.
naphthylthiocarbizinate (Hauff), 1890, A., 61.
β-**Naphthylhydrazinelevulinic acid** (Steche), 1888, A., 284.
α-**Naphthylhydrazinepyruvic acid** (Schlieper), 1887, A., 963.
β-**Naphthylhydrazinepyruvic acid** (Schlieper), 1887, A., 153.
α-**Naphthylhydrazone**, thionyl- (Michaelis and Ruhl), 1892, A., 1324.
β-**Naphthylic** benzenesulphonate (Traube), 1891, A., 569.
benzoate and acetate, α-nitro-, reduction of (Böttcher), 1885, A., 659.
benzoate and acetate, α-nitro-, molecular transformations of (Böttcher), 1883, A., 1113.
Naphthylic benzylic oxides, α- and β- (Staedel), 1883, A., 586.
carbamates, α- and β- (Gattermann), 1888, A., 575.
carbonates, α- and β- (Löwenberg), 1886, A., 789.
β-**Naphthylic** cinnamate, decomposition of, by heat (Anschütz), 1885, T., 899; A., 1065.
Naphthylic cyanurates, α- and β- (Otto), 1887, A., 1034.
ethylic carbonate (Bender), 1887, A., 37.
o-oxalates, α- and β- (Staub and Smith), 1884, T., 303, 304.
phenylcarbamates, α- and β- (Snape), 1885, T., 776; (Leuckart and Schmidt), 1885, A., 1224.
sulphide, *di*nitro- (Ekstrand), 1885, A., 171.
*di*sulphides, sulpho- α- and -β-, potassium derivatives of (Leuckart), 1890, A., 606.
o-tolylcarbamate (Gattermann and Cantzler), 1892, A., 832.
Naphthylido-. See Naphthylamido-.
Naphthylimidazole. See Naphthylglyoxaline.
α-**Naphthylimidobenzil** (*naphthilbenzil*) (Bandrowski), 1889, A., 147.

β-**Naphthylimidobenzoin** (Voigt), 1886, A., 888.
β-**Naphthyl-**β-**imidobutyric acid**, synthesis of (Knorr), 1884, A., 1198.
Naphthylimidodiacetic acids, α- and β- (Bischoff and Hausdörfer), 1890, A., 1309.
α-**Naphthyl-**ω-**imidotoluenesulphonic acid** (Kafka), 1891, A., 720.
β-**Naphthylmelamine** (Fries), 1886, T., 740.
α-**Naphthylmethenyldiphenyldiamine** (Boessneck), 1883, A., 808.
β-**Naphthylmethylamine** (*naphthylcarbinylamine*) (Bamberger and Boekmann), 1887, A., 675.
Naphthylmethyl-biazolones and -ψ-**thiobiazolones**, α- and β- (Freund), 1892, A., 509, 508.
α-**Naphthylmethylic chloride** (Scherler), 1892, A., 494.
β-**Naphthylmethylic chloride** and **bromide** (Schulze), 1884, A., 1184.
1:β-**Naphthyl-3-methylpyrazolone** (*naphtha-oxymethylquinizine*) (Knorr), 1884, A., 1154.
1:α-**Naphthyl-3-methyl-5-pyrazolone-keto-4-**α-**naphthylhydrazone** (Sprague), 1891, T., 342.
β-**Naphthylmethylsulphone** (Otto and Rössing), 1892, A., 623.
α-**Naphthylmethylthiohydantoin** (Marckwald, Neumark and Stelzner), 1892, A., 150.
Naphthylnaphthylenebenzenylamidine (Ris), 1888, A., 58.
α-**Naphthylosazoneglyoxalcarboxylic acid** (Nastvogel), 1889, A., 238.
Naphthylphenyl-. See Phenylnaphthyl-.
α-**Naphthylphthalamic acid** and α-**naphthylphthalimide** (Piutti), 1886, A., 473, 472.
Naphthylpiperidines, α- and β- (Lellmann and Büttner), 1890, A., 1003.
α-**Naphthylpropionic acid** and β-bromo- and αβ-*di*bromo- (Brandis), 1889, A., 1200.
β-**Naphthylpropylene-**ψ-**semithiocarbazide** (Avenarius), 1891, A., 550.
α-**Naphthylpropylene-**ψ-**thiocarbamide** (Prager), 1890, A., 160.
Naphthylquinoline (Eliasberg and Friedländer), 1892, A., 1107.
Naphthylrosinduline and *iso***naphthylrosinduline** (Fischer and Hepp), 1890, A., 910.
α-**Naphthylsemicarbazide** (Pinner), 1888, A., 687.
β-**Naphthylsemicarbazide** (Pinner), 1888, A., 687; (Hauff), 1890, A., 61.
α-**Naphthylsemithiocarbazide** (Freund), 1892, A., 510.
β-**Naphthylsemithiocarbazide** (Hauff) 1890, A., 61.
Naphthylsuccinamic acids, α- and β- (Pellizzari and Matteucci), 1888, A., 1302, 1303.
Naphthylsuccinimides, α- and β- (Pellizzari and Matteucci), 1888, A., 1302, 1303.
β-**Naphthylsulphonamic acid**, ammonium salt of (Traube), 1891, A., 569.
Naphthylthiocarbamic acids, salts of (Losanitsch), 1892, A., 56.
α-**Naphthylthiocarbamide** (Marckwald), 1892, A., 1331.
α-**Naphthylthiocarbizine** (Freund), 1892, A., 510.
β-**Naphthylthiocarbizine** (Hauff), 1890, A., 61.
Narceine and **narcotine**. See Alkaloids.
Narceinic acid (Claus and Meixner), 1888, A., 612.
Naringenin (Will), 1885, A., 906.
Naringenic acid. See *p*-Coumaric acid.
Naringin and its derivatives (Will), 1885, A., 906; 1887, A., 497.
sugar from (Will), 1887, A., 715.
Natrolite (Schubert), 1883, A., 35; (Negri), 1891, A., 1438.
from Magnet Cove, Arkansas (Genth and Penfield), 1892, A., 793.
from Monte Baldo (Luzzatto), 1890, A., 114; 1892, A., 690.
of Montecatini (Mattirolo), 1891, A., 1438.
analysis of (Lindström), 1889, A. 219.
Natrophilite from Branchville (Brush and Dana), 1890, A., 1072.
Nectar (v. Planta), 1886, A., 575.
Neodymium (Auer von Welsbach), 1885, A., 1113.
oxide, emission spectrum of (Haitinger), 1892, A., 2.
Neossine (Green), 1886, A., 635.
Neotesite (Igelström), 1890, A., 1076.
Nepaulite, so-called (Mallet), 1886, A., 207.
Nephelinic tephrite of the Jamma Valley (Michel-Lévy), 1886, A., 433.
Nephelite (*nepheline*) from the Cape Verde Islands, analysis of (Doelter), 1883, A., 722.

Nephelite (*nepheline*) in the oligoclase of Dénise (Des Cloizeaux and Jannettaz), 1883, A., 1067.
preparation of (C. and G. Friedel), 1890, A., 1080; (Meunier), 1891, A., 22.
Nephelite-basalt from the Cape Verde Islands, analysis of (Doelter), 1883, A., 722.
near Tryberg in the Black Forest (Williams), 1883, A., 725.
from the Vogelsberg (Sommerlad), 1884, A., 275; 1885, A., 33.
Nephelite rocks in the United States (Wolff), 1885, A., 230.
from Ziegenhals, near Wohnfeld, analysis of (Sommerlad), 1884, A., 276.
Nephelite-syenite of the Kola Peninsula (Ramsay), 1891, A., 531.
from the Transvaal (Wülfing), 1888, A., 925.
Nephrite (v. Beck and v. Muschketoff), 1883, A., 1068; (Clarke and Merrill), 1890, A., 716.
from Alaska (Meyer), 1887, A., 222.
from Asia (Meyer), 1886, A., 210.
from Jordansmühl in Silesia (Traube), 1885, A., 361, 1189; (Kenngott), 1885, A., 1119.
from Siberia (Jannettaz and Michel), 1883, A., 436.
from Tasmania (Bodewig), 1885, A., 733.

silicate, hydrated, from North America (KÖNIG), 1890, A., 219.
orthosilicate (BOURGEOIS), 1889, A., 832.
sulphate, action of hydrogen sulphide on solutions of (BAUBIGNY), 1883, A., 24.
anhydrous (LEPIERRE and LACHAUD), 1892, A., 1283.
crystallised (KLOBB), 1892, A., 941.
basic (ATHANASESCU), 1886, A., 982.
ammonium sulphate (LEPIERRE and LACHAUD), 1892, A., 1283.
cobalt potassium sulphate (ROY), 1887, P., 53.
sulphide. See Millerite.
*sub*sulphide (GAUTIER and HALLOPEAU), 1889, A., 831.
iron sulphide (HUNT), 1888, A., 1254; (MACKINTOSH), 1889, A., 214.
sodium sulphide (BRUNNER), 1890, A., 215.
thiosulphate (FOCK and KLÜSS), 1890, A., 330.
Nickel organic compounds:—
Nickel carbide (v. PEBAL), 1886, A., 854.
carbonyl (MOND, LANGER and QUINCKE), 1890, T., 750.

Nickel carbonyl, properties of (Berthelot), 1891, A., 1428.
physical properties of (Mond and Nasini), 1891, A., 1322.
oxidation of (Berthelot), 1892, A., 279.
physiological action of (McKendrick and Snodgrass), 1891, A., 1130; (Hanriot and Richet), 1892, A., 365.
dextrosate (Chapman), 1891, T., 323.
oxydiamine nitrite (Soret and Robineau), 1890, A., 216.

Nickel, detection, estimation and separation:—
reactions (Terreil), 1892, A., 1132.
analysis of (Langbein), 1886, A., 1077; 1888, A., 531.
detection of (Hambly), 1892, A., 1525.
microchemical test for (v. Haushofer), 1887, A., 300.
detection of adulteration in, by the magnet (Warren), 1887, A., 531.
estimation of (Carnot), 1886, A., 580, 650; 1889, A., 678; (Bayley), 1888, A., 388; (Brand), 1890, A., 294; (Lecrenier), 1890, A., 297; (Hope), 1890, A., 1470; (Krauss), 1891, A., 1139.
estimation of, on nickeled iron (Köbrich), 1886, A., 836.
estimation of, in ores, mattes, slags, etc. (Moore), 1887, A., 303, 1141.
estimation, electrolytic, of (Brand), 1890, A., 294.
estimation, volumetric, of (Moore), 1889, A., 747, 1033.
estimation, volumetric, of cobalt in presence of (McCulloch), 1887, A., 1141.
separation of, from aluminium, cobalt, iron, manganese and zinc (Moore), 1888, A., 631.
separation, electrolytic, of, from cadmium (Smith and Wallace), 1892, A., 920.
separation of, from cadmium, copper, zinc, etc. (Carnot), 1886, A., 580, 650.
separation, electrolytic, of cadmium, of mercury, and of silver from (Smith and Frankel), 1890, A., 664.
separation of, from cobalt (Vortmann), 1883, A., 621; (Clark), 1884, A., 498; (v. Ilinski and v. Knorre), 1885, A., 840; (Rosenbladt), 1886, A., 492; (Gucci), 1886, A., 1077; (Mackintosh), 1887, A., 1141; (Fischer), 1889, A., 653; (Carnot), 1889, A., 747, 1116; (Krauss), 1891, A., 1139.

Nickel, separation:—
separation of, from cobalt in the form of nitrites (Baubigny), 1889, A., 188.
separation of cobalt and, from iron (Leroy), 1891, A., 1139.
separation of, from iron (Campbell), 1892, A., 103.
separation of, from manganese (Jannasch and Franzek), 1892, A., 240.
separation of, from zinc (Moore), 1885, A., 193; (Osborne), 1885, A., 595; (v. Berg), 1887, A., 182; (Bayley), 1888, A., 388; (Baubigny), 1889, A., 652; (Alt and Schulze), 1890, A., 418.
separation, electrolytic, of gold from (Smith and Muhr), 1891, A., 1396.

Nickel alkali-proof vessels (Dittmar), 1884, A., 1071.

Nickel coins, assay of (Roberts-Austen), 1886, A., 101.

Nickel-grains in river sand near Biella, Piedmont (Sella), 1891, A., 526.

Nickel ore, platiniferous, from Canada (Clarke and Catlett), 1889, A., 835.
from Gosenbach (Heusler), 1890, A., 711.
from Hungary (Sipöcz), 1886, A., 313.
from Nevada, specimens of (Newbury), 1885, A., 489.
from New Caledonia (Readman), 1886, A., 320; (Moore), 1891, A., 157.
from Oregon (Hood), 1885, A., 1190; (Clarke), 1888, A., 1045.

Nickel-plated iron vessels, action of organic acids on (Birnbaum), 1884, A., 520.

Nickel-pyrites (McCay), 1884, A., 1098.

Nickel regulus, peculiar formation in (Moore), 1887, A., 1081.

Nicotenylamidoxime and its benzyl ether (Michaelis), 1892, A., 206, 208.

Nicotenylazo-. See Azo-.

Nicotenylphenyluramidoxime (Michaelis), 1892, A., 208.

Nicotiana longiflora, comparative effect of two metameric bodies on the growth of (Reynolds), 1883, A., 495.

Nicotiana Tabacum, alkaloids of (Schütte), 1892, A., 232.

Nicotine. See Alkaloids.

Nicotinic acid (*pyridine-3-carboxylic acid*) (Hoogewerff and van Dorp), 1883, A., 90; (Oechsner de Coninck), 1883, A., 739; (Skraup and Cobenzl), 1883, A., 1013; (v. Pechmann and Welsh), 1885, T., 151.

action of sodium amalgam on (Weidel), 1891, A., 733.

methylbetaine of (Hantzsch) 1886, A., 369.

Nicotinic acid, 3-bromo- (Claus and Collischonn), 1887, A., 159; (Srpek), 1890, A., 177.

4-bromo- (Claus), 1892, A., 876.

6-chloro- (v. Pechmann and Welsh), 1885, T., 151; A., 175.

*di*chloro- (Seyfferth), 1887, A., 158.

*iso***Nicotinic acid** (*pyridine-4-carboxylic acid; pyrocinchomeronic acid*) (Weidel and Russo), 1883, A., 484; (Hantzsch), 1884, A., 1194; (Behrmann and v. Hofmann), 1885, A., 139.

from γ-*iso*propylpyridine (Ladenburg and Schrader), 1884, A., 1048.

action of sodium amalgam on (Weidel), 1891, A., 734.

copper salt of (Böttinger), 1884, A., 758.

2:6-*di*chloro- (Behrmann and v. Hofmann), 1885, A., 139.

Nigella damascena, damascenine from (Schneider), 1890, A., 1317.

Nile, fertilising properties of the water of the (Müntz), 1889, A., 646.

Niobate which has been improperly called euxenite from Mitchell Co., N. Carolina (Seamon), 1883, A., 32.

Niobic acid from fergusonite (Krüss and Nilson), 1887, A., 706.

Niobic anhydride. See Niobium *pent*oxide.

Niobium potassium fluoride, reduction of, with sodium (Krüss and Nilson), 1887, A., 706.

hydride and its molecular heat (Krüss and Nilson), 1887, A., 706.

*pent*oxide (*niobic anhydride*), crystallised (Knop), 1887, A., 642; (Mallard), 1888, A., 349.

molecular heat of (Krüss and Nilson), 1887, A., 706.

action of carbon *tetra*chloride on (Demarcay), 1887, A., 329.

colour reactions of (Lévy), 1887, A., 304.

combinations of potassium fluoride with (Petersen), 1890, A., 15.

Niobium, detection and **estimation** of:—

microscopical test for (v. Haushofer), 1890, A., 86.

estimation of (Osborne), 1886, A., 393.

Nipecotinic acid (*hexahydronicotinic acid*) and its derivatives (Ladenburg), 1891, A., 735; 1892, A., 1485, 1486.

*iso***Nipecotinic acid** (*hexahydroisonicotinic acid*) (Ladenburg and Karau; Ladenburg), 1892, A., 1486.

Nitracenaphthene (Quincke), 1887, A., 592; 1888, A., 843; (Jandrier), 1887, A., 964.

*di***Nitracenaphthene** (Quincke), 1888, A., 843.

m-**Nitracetaldehydephenylhydrazone** (Bischler and Brodsky), 1890, A., 150.

*eso***Nitr-*p*-acetamido*iso*butylbenzene** (Gelzer), 1888, A., 266.

*di***Nitr-*p*-acetamidostyrene** (Gabriel and Herzberg), 1883, A., 1123; (Herzberg), 1885, A., 662.

Nitr-*o*-acetamido-*p*-toluic acid (Niementowski), 1889, A., 1066.

p-**Nitracetanilide,** reduction of (Mixter), 1884, A., 665.

*di***Nitracetanilides,** 1:2:3-, 1:3:4- and 1:3:6- (Wender), 1890, A., 885.

*di***Nitracetanisidine** (Wender), 1890, A., 751.

Nitracetobenzylanilide. See Nitrobenzylacetanilide.

Nitracetocumidides, *mono-* and *di-* (Engel), 1885, A., 1215.

Nitracetomethylanilides, *m-* and *p-* (Meldola and Salmon), 1888, T., 777, 776.

γ-**Nitr-α-acetonaphthalide,** Liebermann's, bromination of (Meldola), 1885, T., 502.

*di***Nitr-β-acetonaphthalide** (Maschke), 1887, A., 839.

Nitr-α-acetonaphthalides, *o-* and *p-* (Lellmann), 1884, A., 751, 752; (Lellmann and Remy), 1886, A., 623.

bromination of (Meldola), 1885, T., 499.

action of bromine on a mixture of (Armstrong and Rossiter), 1891, P., 186.

Nitracetonylcarbamide (Franchimont and Klobbie), 1889, A., 125.

Nitracetophenone. See Acetophenone.

Nitracetophenonephenylhydrazone (Bischler and Brodsky), 1890, A., 151.

Nitracetotoluidide. See Acetotoluidide.
Nitraceto-*p*-xylidide (Nölting, Witt and Forel), 1886, A., 58; (Witt), 1889, A., 604.
Nitracetoxypropylbenzoic acid (Widman), 1884, A., 317.
Nitracetyl-ψ-cumidinesulphonic acid (Mayer), 1887, A., 659.
α-Nitr-β-acetylnaphthol, molecular transformation of (Böttcher), 1883, A., 1113.
o-**Nitracetylphenol** (Böttcher), 1883, A., 1113.
o-**Nitr-*p*-aldehydocinnamic acid** (Löw), 1886, A., 461.
α-Nitralizarin (Brasch), 1891, A., 1077.
*di***Nitrallylbenzene** (Edeleanu), 1887, A., 583.
*di***Nitramarine** and its salts (Claus and Witt), 1885, A., 1062.
*di***Nitramidoacetylphenol** (Schiff), 1886, A., 613.
Nitramidoanisoil (Scheidel), 1886, A., 1046.
*di***Nitr*di*amidoanisoil** (Nietzki and Kurtenacker), 1892, A., 596.
Nitramidoazo-compounds, reduction of (Meldola), 1883, T., 432.
*di***Nitr-*m*- and -*p*-amidoazobenzene** (*nitrobenzeneazonitraniline*) (Oddo), 1891, A., 554.
3:4-**Nitramidobenzamide** (Grohmann), 1891, A., 305; (Thieme), 1891, A., 916.
5:2-**Nitramidobenzamide** (Grohmann), 1892, A., 326.
1:3-*di*Nitr-2:4:6-*tri*amidobenzene (Palmer and Jackson), 1890, A., 247.
s-*tri***Nitr*tri*amidobenzene** (Jackson and Wing), 1888, A., 1276.
  reduction of (Palmer), 1892, A., 1198.
Nitramidobenzenesulphonic acid. See Anilinesulphonic acid, nitr-.
3:5-**Nitramidobenzoic acid,** action of potassium cyanate on (Griess), 1885, A., 54.
4:5-**Nitramidobenzoic acid** (Thieme), 1891, A., 916.
m-**Nitr-*p*-amidobenzophenone** (Schöpff), 1892, A., 336.
*tetra***Nitr*di*amidobenzophenone** (van Romburgh), 1889, A., 147.
m-**Nitramidobenzylidene-*m*-nitrobenzenylamidoxime** (Stieglitz), 1890, A., 256.
*eso***Nitramido*iso*butylbenzene** (Gelzer), 1888, A., 266; 1889, A., 43.
Nitramidocarvacrol benzoate (Mazzara), 1891, A., 47.
Nitr-*o*-amidocinnamic acids, α- and β- (Friedländer and Lazarus), 1885, A., 1139.
Nitramidocinnamide (v. Miller and Kinkelin), 1889, A., 990.
Nitr*di*amido-*m*-cresol (Nietzki and Ruppert), 1891, A., 309.
Nitramidodihydroxyquinone, potassium salt of (Nietzki and Benckiser), 1885, A., 779.
Nitr-*p*:*p*-*di*amidodiphenyl. See Nitrobenzidine.
m-*di***Nitr-*o*-*di*amidodiphenyl** (Täuber), 1892, A., 481.
*di***Nitramidodiphenylamine** (Nietzki and Ernst), 1890, A., 1114.
Nitr*di*amidoethenyl-α-naphthol hydrochloride (Meerson), 1888, A., 713.
3:4-**Nitramidomethoxybenzene** (Scheidel), 1886, A., 1046.
3′:4′-**Nitramido-2′-methylquinoline** (Conrad and Limpach), 1888, A., 1111.
Nitramido-α-naphthoic acid (Ekstrand), 1886, A., 948.
Nitramido-β-naphthoic acid [m.p. 235°] (Ekstrand), 1891, A., 79.
Nitr-*p*-amido-ω-nitrostyrene (Friedländer and Lazarus), 1885, A., 1139.
*tri***Nitramidophenetoil** (Köhler), 1884, A., 1161.
Nitramidophenol. See Phenol.
Nitramidophenyl*iso*butyric acid (Edeleanu), 1888, T., 560.
Nitramidophenylic carbonate (Löwenberg), 1886, A., 789.
Nitramidophenyl-α- and -β-naphthylamines (Heim), 1888, A., 488, 1096.
3:5-*di***Nitr-4-amido-β-phenylpropionic acid** (Stoehr), 1884, A., 1350.
*di***Nitramidophenyl-*p*-toluidine** (Ernst), 1891, A., 300.

Nitrethylenic glycol, magnetic rotatory power of (PERKIN), 1889, T., 684, 726.

*di***Nitrethylhydro-*p*-coumaric acid** (STOEHR), 1884, A., 1350.

Nitrethylic alcohol (DEMUTH and MEYER), 1889, A., 366; 1890, A., 857.
  sodium salt of (DEMUTH and MEYER), 1890, A., 858.

Nitrethylic chloride (DEMUTH and MEYER), 1890, A., 858.

*di***Nitrethylidenephthalide** (GABRIEL), 1886, A., 620.

*tri***Nitrethyl-α- and -β-naphthols** (STAEDEL), 1883, A., 863.

p-**Nitrethylphenylnitrosamine** (MELDOLA and STREATFEILD), 1886, T., 631.

m-**Nitrethyl-*p*-toluidine** (NÖLTING and STRICKER), 1886, A., 544; (NÖLTING and ABT), 1888, A., 274.

Nitric acid, anhydride, oxide and *per*oxide. See under Nitrogen.

Nitric organism. See Microbes.

Nitrides, action of hydroxyhydrocarbon derivatives on (VIDAL), 1891, A., 1003.

Nitrification in presence of copper and other metals (KAPPEL), 1883, A., 286.

Nitrification as applied to agriculture. See under Agricultural Chemistry.

Nitrile bases, formation of, from organic acids and amines (BERNTHSEN),1883, A., 1099.

Nitriles (MILLER), 1889, A., 254.
  aromatic (MEYER), 1889, A., 596; (ZINSSER), 1892, A., 344.
    formation of (MICHAEL and JEANPRÊTRE), 1892, A., 1094.
  dimolecular (V. MEYER), 1889, A., 577; (BURNS), 1892, A., 450.
  ketonic, action of aromatic amines on (BOUVEAULT), 1891, A., 51.
    action of hydroxylamine on (HANRIOT), 1892, A., 79.
  trimolecular (V. MEYER), 1889, A., 577.
  from aromatic amines (GASIOROWSKI and MERZ), 1884, A., 734.
  from aromatic formamides (GASIOROWSKI), 1885, A., 772.
  from phosphates of the aromatic series (KREYSLER), 1885, A., 1055.
  formation of, in oxidations with nitric acid (HELL and KITROSKY), 1891, A., 812.
  preparation of (KRÜSS), 1884, A., 1314.
  synthesis of (BOUVEAULT), 1891, A., 41.
  synthesis of unsaturated (FIQUET), 1892, A., 1340.
  refractive powers of (COSTA), 1892, A., 757.
  action of, on organic acids (COLBY and DODGE), 1891, A., 409.
  action of boron fluoride on (PATEIN), 1891, A., 1441.

Nitriles, action of hydroxylamine on (Tiemann), 1884, A., 734.
  action of sodium and alcohol on aromatic (Bamberger and Lodter), 1887, A., 719.
  action of sulphuric anhydride on (Eitner), 1892, A., 713.
  reduction of (Freund and Immerwahr), 1890, A., 1407; (Freund and Remse), 1890, A., 1422.
  conversion of primary amines into (v. Hofmann), 1884, A., 1288.
  conversion of, into imides (Pinner), 1883, A., 730, 1089.
  conversion of, into imido-ethers (Pinner), 1891, A., 59.
  conversion of phenols into (Merz), 1883, A., 802.
  additive products of, with hydrogen iodide (Biltz), 1892, A., 1449.
  polymerisation of (v. Meyer), 1889, A., 577; 1892, A., 576; (Wache), 1889, A., 684; (Schwarze), 1890, A., 1158.
  transformation of, in the organism (Giacosa), 1884, A., 1061.
Nitriles, chloro-, volatility of (Henry), 1885, A., 1044.
  Metanitriles (Staedel), 1883, A., 323; (Wallach), 1883, A., 577.
  Paranitriles (Möhlau), 1883, A., 342.
Nitrilotriphenylmethane. See Phenylacridine.
Nitrites and **hyponitrites.** See Nitrous and Hyponitrous acids under Nitrogen.
Nitrobarbituric acid (Ceresole), 1883, A., 913.

Nitro-*p*-dihydroxydiphenyl*tri*chlorethanes, *di-* and *tetra-* (Elbs and Hoermann), 1889, A., 998.
3-Nitro-2:4-dihydroxypyridine-5- or 6(?)-carboxylic acid (Bischoff), 1889, A., 519.
Nitro-2:5-dihydroxyquinone (Nietzki and Schmidt), 1889, A., 968.
2:5-*di*Nitro-3:6-dihydroxyquinone. See Nitranilic acid.
*di***Nitro-2:4-dihydroxytoluene** (*dinitrocresorcinol*) (v. Kostanecki), 1888, A., 264.
4-Nitro-3:6-dihydroxytoluquinone (*tolunitranilic acid*) (Kehrmann), 1888, A., 940; (Kehrmann and Brasch), 1889, A., 969.
m-**Nitro-*p*-dihydroxytriphenylmethane** (deVarda and Zenoni), 1891, A., 1346.
*di***Nitro-*p*-dihydroxytriphenylmethane** (Russanoff), 1891, A., 1235.
*tetra***Nitrodimethyl*di*amidobenzophenone** (van Romburgh), 1888, A., 1079, 1197.
*di***Nitrodimethylamidodiphenylamine** (*nitrodimethylphenylphenylenediamine*) (Lellmann and Mack), 1890, A., 1410.
*di***Nitrodimethylamidophenol** and its derivatives (Lippmann and Fleissner), 1886, A., 235.
Nitrodimethylamine, reduction of (Franchimont), 1885, A., 963.
Nitrodimethylaniline. See Dimethylaniline.
Nitrodimethyl-*o*-anisidines, *mono-* and *tri-* (Grimaux and Lefèvre), 1891, A., 1031.
*tetra***Nitrodimethylazobenzene** (Mertens), 1886, A., 1022.
Nitrodimethylbenzamide (van Romburgh), 1886, A., 546.
*tetra***Nitrodimethylbenzidine** (van Romburgh), 1887, A., 245.
Nitro-2:4-dimethylbenzoic acid (Ahrens), 1892, A., 1437.
3-Nitro-2:4-dimethylbenzoic acid (Claus), 1890, A., 980.
3:5-*di*Nitro-2:4-dimethylbenzoic acid (Claus), 1890, A., 981.
*di***Nitrodimethylmalonamide** (Franchimont), 1886, A., 449.
*tetra***Nitrodimethyl*di*nitro*di*amidobenzophenone** (van Romburgh), 1888, A., 1079, 1196.
*di***Nitrodimethyloxamide** (Franchimont), 1886, A., 448.
4-Nitrodimethyl-*o*-phenylenediamine (Heim), 1888, A., 1097.
2:4:6-(?)*tri*Nitrodimethyl-*m*-phenylenediamine (van Romburgh), 1888, A., 1185.
4-Nitro-1:3-dimethylquinoline (Nölting and Trautmann), 1891, A., 328; 1892, A., 729.
Nitrodimethyl-α-resorcylic acid (*nitrodimethoxybenzoic acid*) (Meyer), 1888, A., 148.
*di***Nitro-*s*-dimethylsulphonamide** (Franchimont and Klobbie), 1885, A., 969.
*di***Nitro-β-dinaphtholdisulphonic acid** (Julius), 1888, A., 161.
Nitrodinaphthyls, *mono-* and *di-* (Julius), 1887, A., 56.
*tetra***Nitro-ββ-dinaphthyl** (Staub and Smith), 1885, T., 105.
*di***Nitrodi-β-naphthyl ketone oxide** (Claus and Ruppel), 1890, A., 510.
Nitrodi-β-naphthylamines, *di-* and *tetra-* (Ris and Weber), 1884, A., 752; (Ris), 1888, A., 58.
*hexa***Nitrodi-β-naphthylamine** (Ris), 1888, A., 58.
*tetra***Nitrodi-α- and -β- naphthylcarbamides** (Perkin), 1892, T., 467.
Nitrodi-β-naphthylene oxides, *mono-* and *tetra-* (Hodgkinson and Limpach), 1891, T., 1100.
*di***Nitro-αβ-dinaphthylic sulphide** (Ekstrand), 1885, A., 171.
p-**Nitro-3:3′-diphenic acid** (*nitrodiphenylcarboxylic acid*) (Strasburger), 1884, A., 329.
3:3′-*di*Nitro-*p*-diphenol (Kunze), 1889, A., 262.
1:2-*di*Nitrodiphenyl (Täuber), 1891, A., 570.
1:3-*di*Nitrodiphenyl (Brunner and Witt). 1887, A., 673.
p-*di***Nitrodiphenylacetylene** (Elbs and Bauer), 1887, A., 152.
Nitrodiphenylamine. See Diphenylamine.
*di***Nitrodiphenylamine-*o*-carboxylic acid** and its derivatives (Jourdan), 1885, A., 988.
m-**Nitrodiphenylamine-*p*-carboxylic acid** (Schöpff), 1890, A., 374.
Nitrodiphenylbenzylidenemaleimidine (Cohn), 1892, A., 487.
*tri***Nitrodiphenylbenzylphosphine oxide** (Dörken), 1888, A., 833.
m-**Nitro-*s*-diphenylcarbamide** (Leuckart), 1890, A., 760.
p-**Nitro-*s*-diphenylcarbamide** (Goldschmidt and Molinari), 1888, A., 1285; (Leuckart), 1890, A., 760.
m-*di***Nitro-*s*-diphenylcarbamide** (Losanitsch), 1883, A., 583.

***p-di*Nitrodiphenyldibutinyl ketone** (Einhorn and Gehrenbeck), 1890, A., 162.
***m-di*Nitrodiphenyldisulphine** (Ekbom), 1891, A., 567.
***p-di*Nitro-*s*-diphenylethane**, preparation of (Roser), 1887, A., 836.
Nitro-*as*-diphenylethanes, *mono-* and *di-* (Anschütz and Romig), 1885, A., 768.
Nitrodiphenylformamidine *m-mono-* and *m-di-* (Comstock and Wheeler), 1892, A., 706, 707.
Nitrodiphenylguanidine *di*cyanide (Hirsch), 1888, A., 947.
***α-di*Nitro-*s*-diphenylhydrazine** (Willgerodt and Ferko), 1888, A., 829; (Willgerodt and Hermann), 1889, A., 1160; 1890, A., 1259.
***tri*Nitro-*s*-diphenylhydrazine** (Fischer), 1890, A., 40.
  conversion of, into nitroso*di*nitrazobenzene (Freund), 1889, A., 977.
***m*-Nitrodiphenylizindihydroxytartaric acid** (Bischler and Brodsky), 1890, A., 151.
Nitrodiphenylmethane. See Diphenylmethane.
***m*-Nitro-*s*-diphenylmethylcarbamide** (Lellmann and Benz), 1891, A., 1215.
Nitrodiphenylmethylcarbinol (Anschütz and Romig), 1885, A., 768.
Nitro-1:5-diphenyl-3-methylpyrazoles, *o-* and *p-* (Knorr and Jödicke), 1885, A., 1247, 1248.
***tri*Nitro-1:3-diphenyl-5-methylpyrazole** (Knorr and Laubmann), 1889, A., 409.
Nitro-1:5-diphenyl-3-methylpyrazole-4-carboxylic acids, *o-* and *p-* (Knorr and Jödicke), 1885, A., 1247, 1248.
Nitrodiphenyl-*αβ*-naphthatriazines, *o-*, *m-* and *p-* (Meldola and Forster), 1891, T., 681.
***o*-Nitrodiphenylnitrosamine** (Fischer), 1892, A., 332.
Nitrodiphenyloxalylguanidine (Hirsch), 1888, A., 947.
Nitrodiphenylparabanic acid (Hirsch), 1888, A., 947.
***di*Nitrodiphenylparabanic acid** (v. Stojentin), 1885, A., 1195.
***di*Nitrodiphenylphosphinic acid** (Dörken), 1888, A., 833.
***di*Nitrodiphenylphosphonic acid** (Rapp), 1884, A., 1337.
***p-di*Nitrodiphenylpiperazine** (Schmidt and Wichmann), 1892, A., 210.
***di*Nitro-2:3-diphenylpyrazine** (Mason), 1889, T., 101.
Nitrodiphenylquinols, *di-*, *tri-* and *tetra-* (Nietzki and Schündelen), 1892, A., 310.
Nitrodiphenylresorcinols, *tetra-*, *penta-* and *hexa-* (Nietzki and Schündelen), 1892, A., 310.
***m*-Nitrodiphenylsemithiocarbazide** (Bischler and Brodsky), 1890, A., 151.
***di*Nitrodiphenylsulphoxide** (Colby and McLoughlin), 1887, A., 372.
Nitrodiphenyltetrazine (Ruhemann), 1890, T., 51.
Nitro-*s*-diphenylthiocarbamides, *mono-* and *di-*, action of iodine on (Losanitsch), 1883, A., 582.
Nitrodiphenylthiocarbimides, *m-mono-* and *m-di-* (Steudemann), 1883, A., 801.
Nitrodiphthalyl (Graebe and Guye), 1886, A., 882.
Nitrodiphthalylethanes, *mono-* and *di-* (Gabriel), 1886, A., 620.
***di*Nitrodipiperonylideneacetone** (Haber), 1891, A., 705.
***di*Nitrodipropylaniline** (van Romburgh), 1889, A., 971.
***di*Nitro-*p*-dipropylbenzene** (Körner), 1883, A., 321.
***di*Nitrodiresorcinol** (Hazura), 1883, A., 1114.
***p*-Nitrodistyryl ketone** (v. Baeyer and Becker), 1883, A., 1120.
***di-o*-Nitrodistyrylvinyl ketone** (Diehl and Einhorn), 1885, A., 1222.
***di*Nitro-*o*-ditolyl**, preparation of (Täuber and Loewenherz), 1891, A., 1491.
***di*Nitroditolyl ketone** (Lange and Zufall), 1892, A., 1460.
***di*Nitroditolylethylenediamine** (Gattermann and Hager), 1884, A., 1142.
Nitro-*o*- and -*p*-ditolyltetrazines (Ruhemann), 1890, T., 54, 51.
Nitro-*p*-ditolylthiocarbamides, *o-* and *di-* (Steudemann), 1884, A., 308, 307.
Nitroethane. See Ethane.
Nitrofluorene (Hodgkinson), 1885, P., 37.
***p*-Nitrofluorene** (Strasburger), 1884, A., 754.
***m*-Nitroformanilide** (Comstock and Wheeler), 1892, A., 706.
***p*-Nitroformanilide** (Osborne and Mixter), 1887, A., 250.
Nitrofurfurylamine (Deutzmann), 1892, A., 43.
Nitrogen (Gautier), 1888, A., 1127.
  origin of combined terrestrial (Müntz and Aubin), 1884, A., 104.

- **Nitrogen**, accumulation of atmospheric, in cultivations of *Bacillus radicicola* (Beyerinck), 1892, A., 1019.
  - in blood (Jolyet and Sigalas), 1892, A., 1257.
  - in cow's milk (Nilson), 1890, A., 652.

  boiling point and specific gravity of (GEUTHER), 1888, A., 785.
  solidification of (BIRHANS), 1889, A., 1109.
  action of, on substances dissolved in carbon *di*sulphide (FRIEDBURG and MANDEL), 1890, A., 1401.
Nitrogen *pent*oxide (*nitric anhydride*) (MEYER), 1889, A., 341.
Nitrogen acids, formation of, in combustion (ILOSVAY), 1890, A., 447.
    Nitric acid, presence and behaviour of, in plants (SERNO), 1890, A., 1021.
      origin and fate of, in plants (FRANK), 1888, A., 979.
      amount of, in the rain water at Rothamsted (WARINGTON), 1889, T., 537; P., 102.
      absence of, in wine-must (POLLAK), 1889, A., 541.
      not formed in the organism of higher plants (KREUSLER), 1887, A., 686.
      or nitrous acid produced in dilute urine seeded with soil (WARINGTON), 1884, T., 646.

Nitric acid or nitrous acid produced in dilute urine with gypsum seeded with soil from various fields (Warington), 1887, T., 120.
formation of, by the evaporation of water in presence of water and soil and alkalis (Baumann), 1889, A., 183.
manufacture of (Volney), 1892, A., 941.
magnetic rotatory power of (Perkin), 1889, T., 680, 724; P., 130.
molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 593.
action of direct sunlight on a mixture of carbon *di*sulphide and, contained in sealed tubes (Tiffereau), 1885, A., 1110.
electrical conductivity of solutions of (Crompton), 1888, T., 121; (Bouty), 1888, A., 640.
electrical conductivity of concentrated (Bouty), 1888, A., 640.
molecular conductivity of fuming (Bouty), 1888, A., 545.
coefficient of diffusion of (Stefan), 1889, A., 1047.
colour of (Marchlewski), 1892, A., 113.
lecture experiments with (Austen), 1889, A., 672.
conditions of action of (Cross and Bevan), 1889, A., 1109.
effect of carbamide on the activity of (Cross and Bevan), 1889, A., 1109.
conditions of the reaction between copper and (Veley), 1890, A., 701.
action of nascent hydrogen and nascent oxygen on (Hall), 1892, A., 680.
chemical changes between lead and (Veley), 1892, A., 410.
action of, on metals (Veley), 1891, A., 525; (Montemartini), 1892, A., 1278, 1402.
action of phosphorus oxychloride on (Williams), 1886, T., 224.
action of stannous chloride on (Divers and Haga), 1885, T., 623; P., 94.
action of some specific micro-organisms on (Frankland), 1888, T., 373; P., 23.
reducing action of coke on (Lunge), 1885, A., 936.
nature of the reduction of, by metals (Divers), 1883, T., 455.

Nitric acid, reduction of, to ammonia by the galvanic current (Becker), 1892, A., 403.
combustion of hydrogen in (Hodgkinson and Lowndes), 1888, A., 1244.
stains, recognition of, on textures (Fleck), 1885, A., 595.
tables revised (Lunge and Rey), 1892, A., 13.

Nitric acid, detection, estimation and separation:—
detection of (Béhal), 1886, A., 392.
detection of small quantities of, in the air, water, soils, etc. (Grandval and Lajoux), 1885, A., 1093.
detection of, in presence of other acids capable of interfering with its reactions (Longi), 1884, A., 365.
detection of, in presence of nitrous acid (Warington), 1885, A., 593; (Piccini), 1886, A., 740.
detection of, in a mixture of alkaline salts (de Koninck), 1887, A., 297.
detection of, in well waters (Binder), 1888, A., 197.
detection of, in wine (Borgmann), 1888, A., 753; (Zecchini), 1891, A., 961; (Vitali), 1891, A., 1551.
some tests for (Bréal), 1887, A., 1138; (Walden), 1888, A., 321; (Lindo), 1888, A., 1337.
cinchonamine as a test for (Arnaud), 1891, A., 362.
diphenylamine and crystallised phenol as reagents for nitrites and (Hager), 1886, A., 99.
ferrous ammonium sulphate as a reagent for (Austen and Chamberlain), 1884, A., 493; (Rosa), 1886, A., 99.
naphthol and sulphuric acid as reagents for (Hager), 1886, A., 99.
resorcinol as a test for (Lindo), 1889, A., 75.
p-toluidine sulphate as a test for (Longi), 1884, A., 365.
testing for iodine and iodic acid in (Beckurts and Rougemont), 1886, A., 834.
testing for, in vegetable tissues (Arnaud and Padé), 1884, A., 1074.
estimation of (Böhmer), 1883, A., 508; (Longi), 1884, A., 366; (Wildt and Scheibe), 1884, A., 871; (Falières), 1884, A., 1074; (Curtman), 1886, A., 648; (Morse and Linn), 1887, A., 181; (Wilfarth), 1888, A., 1336.

Nitric acid, detection, estimation and separation:—
estimation of nitrous acid and, separately or together (LONGI), 1884, A., 366.
estimation of, apparatus for (KRATSCHMER), 1888, A., 193.
estimation of, by diphenylamine (MULLER), 1890, A., 415.
estimation of, by means of diphenylamine and potassium-stannous sulphate (MOULTON), 1885, A., 930.
estimation of, by electrolysis (VORTMANN), 1890, A., 1467.
estimation of, by Kjeldahl's method (SCOVELL), 1889, A., 308.
estimation of, by the phenolsulphonic acid method (BARTRAM), 1891, A., 1136.
estimation of, by reduction to ammonia (BOYER), 1890, A., 1025; (ULSCH), 1891, A., 617, 960.
estimation of, by the Schulze and Tiemann's method (SPIEGEL), 1890, A., 1025.
estimation of small quantities of, in the air, water, soils, etc. (GRANDVAL and LAJOUX), 1885, A., 1093.
estimation, iodometric, of (McGOWAN), 1891, T., 530; (DE KONINCK and NIHOUL), 1891, A., 618.
estimation of, in presence of nitrous acid (PICCINI), 1886, A., 740.
estimation of, in water (MAYRHOFER), 1885, A., 691; (HARVEY), 1887, A., 184; (SPIEGEL), 1887, A., 691; 1889, A., 438; (HOOKER), 1889, A., 312; (ORMANDY and COHEN), 1890, T., 811; P., 139; (RIDEAL), 1890, A., 831; (JOHNSON), 1890, A., 832; (HARROW), 1891, T., 320; P., 67; (ROSENFELD), 1891, A., 496; (HAZEN and CLARK), 1892, A., 243.
estimation of, in rain water (WARINGTON), 1889, T., 544; P., 120.
estimation, gasometric, of (GLASER), 1892, A., 1375.
estimation, volumetric, of (LONGI), 1884, A., 366; 1885, A., 595.
separation of, from mercury and phosphoric and arsenic acids (HAACK), 1892, A., 530.
Nitric anhydride. See Nitrogen *pent*oxide.
oxide. See Nitrogen *di*oxide.
*per*oxide. See Nitrogen *per*oxide.

Nitrates in the rain of tropical districts (MÜNTZ and MARCANO), 1889, A., 923.
formation of deposits of, in tropical regions (MÜNTZ and MARCANO), 1885, A., 1042; 1889, A., 680.
formation and destruction of nitrites and, in artificial solutions and in river and well waters (MUNRO), 1886, T., 632.
magnetic rotation of (PERKIN), 1890, P., 144.
ethereal, magnetic rotatory power of (PERKIN), 1889, T., 724, 862.
correspondence between the magnetic rotation and the refraction and dispersion of light by (GLADSTONE and PERKIN), 1889, T., 756.
molecular refraction of (LOEWENHERZ), 1890, A., 1201.
melting points of (MAUMENÉ), 1884, A., 384.
action of the copper iron couple on, in acid solution (ULSCH), 1892, A., 1518.
behaviour of, in Kjeldahl's method for the estimation of nitrogen (WARINGTON), 1885, A., 1261.
fermentation of (GAYON and DUPETIT), 1883, A., 230.
reduction of, by the cholera bacteria (PETRI), 1890, A., 76.
reduction of, by micro-organisms (SPRINGER), 1884, A., 350; (GAYON and DUPETIT), 1886, A., 823; (WARINGTON), 1888, T., 742; (DE BLASI and TRAVALI), 1890, A., 1453.
reduction of, to nitrites (GAYON and DUPETIT), 1883, A., 609.
catalytic formation of ammonia from (LOEW), 1890, A., 689.
basic (ANDRÉ), 1885, A., 634; (ROUSSEAU and TITE), 1892, A., 1157.
See also Agricultural Chemistry.
Nitrous acid (DRECHSEL), 1887, A., 698.
in the atmosphere (ILOSVAY), 1890, A., 406.
in potable water (ENKLAAR), 1889, A., 1234.
formation of, from free nitrogen (LOEW), 1890, A., 1051.
formation of, in the evaporation of water (SCHEURER-KESTNER), 1883, A., 850.
formation of, in the evaporation of water in presence of water and soil and alkalis (BAUMANN), 1889, A., 183.

Nitrous acid, formation of, in the saliva from formaldehyde and ammonia (WURSTER), 1889, A., 1228.
velocity of decomposition of, in aqueous solution (MONTEMARTINI), 1891, A., 522.
action of, on sulphurous acid (RASCHIG), 1887, A., 549, 635.
action of, on urea, uric acid and ammonium sulphate (EMMERLING), 1886, A., 747.
reduction of, to hydroxylamine (DIVERS), 1883, T., 454.
ethereal salts of (BERTONI), 1886, A., 217; 1887, A., 458; 1890, A., 353.

Nitrous acid, detection and **estimation:—**
detection of (LUNGE), 1890, A., 415; (DENIGÈS), 1892, A., 1124.
detection of, in saliva (ILOSVAY), 1890, A., 278.
detection of, in a mixture of alkaline salts (DE KONINCK), 1887, A., 297.
detection of, and in presence of nitric acid (WARINGTON), 1885, A., 593.
tests for (MELDOLA), 1884, T., 108; (LINDO), 1888, A., 1337.
diphenylamine and crystallised phenol as reagents for nitrates and (HAGER), 1886, A., 99.
naphthol and sulphuric acid as a reagent for (HAGER), 1886, A., 99.
phenols and sulphuric acid as reagents for (LINDO), 1888, A., 1337.
Griess' test for, in presence of hydrogen *per*oxide (WURSTER), 1887, A., 298.
use of ammonium acetate in detecting, by Griess' reaction (WURSTER), 1889, A., 1243.
in water, influence of temperature on Griess' reaction for (BOSIO), 1892, A., 657.
modification of Griess' sulphanilic test for (LINDO), 1888, A., 1340.
estimation of (DAVY), 1883, A., 515; (VIVIER), 1888, A., 527; (DUNSTAN and DYMOND), 1890, A., 193; (GREEN and EVERSHED), 1892, A., 751; (LUNGE), 1892, A., 1029.
estimation of nitric acid and, separately or together (LONGI), 1884, A., 366.
estimation of, either alone or in presence of nitrates and chlorides (DAY), 1888, T., 422; P., 40.

Nitrous acid, estimation:—
estimation of, in water (ZAMBELLI), 1887, A., 533; (ORMANDY and COHEN), 1890, T., 811; P., 139; (ROSENFELD), 1891, A., 496.
estimation, gasometric, of (FRANKLAND), 1888, T., 364; P., 23.
estimation, volumetric, of (GREEN and RIDEAL), 1884, A., 870; (GREEN and EVERSHED), 1887, A., 396.
estimation, volumetric, of combined (KINNICUTT and NEF), 1884, A., 493.

Nitrous anhydride. See Nitrogen *tri*oxide.

Nitrous oxide. See Nitrogen *mon*oxide.

Nitrites in plants (MODDERMAN), 1889, A., 295.
absence of, in plants (MOLISCH), 1887, A., 989.
in human saliva (MUSGRAVE), 1883, A., 227.
formation of (KAPPEL), 1887, A., 106.
formation and oxidation of, in soils (WINOGRADSKY), 1891, A., 1545.
formation of, in the nitrification of ammoniacal solutions (MUNRO), 1888, A., 82.
limit of the formation of ethereal, by double decomposition (BERTONI and TRUFFI), 1884, A., 1110.
preparation of alkaline (LEROY), 1889, A., 825.
production of, in nitrification (WARINGTON), 1891, T., 486.
magnetic rotation of ethereal (PERKIN), 1889, T., 686, 727.
decomposition of basic, by water (ROUSSEAU), 1892, A., 1272.
action of the copper-iron couple on, in acid solution (ULSCH), 1892, A., 1518.
action of metallic, on sulphites of metals other than potassium (DIVERS and HAGA), 1887, T., 659; P., 100.
action of, on blood pressure (BRUNTON and BOKENHAM), 1889, A., 630.
action of paraffinic, on blood pressure (CASH and DUNSTAN), 1891, A., 1270.
reduction of, to hydroxylamine by hydrogen sulphide (DIVERS and HAGA), 1887, T., 48.

Hyponitrous acid, heat of formation of (BERTHELOT and OGIER), 1883, A., 423.

Hyponitrite solution, alkali, preparation of (Divers and Haga), 1884, T., 85.
Hyponitrites (Berthelot and Ogier), 1883, A., 422; (Divers and Haga), 1884, T., 78; (Maquenne), 1889, A., 944.
formation of (Dunstan and Dymond), 1887, T., 646; P., 73.
formation of, from nitric oxide (Divers and Haga), 1885, T., 361; P., 45.
constitution of (Divers and Haga), 1889, T., 772.
heat of formation of (Berthelot and Ogier), 1883, A., 423; (Berthelot), 1889, A., 930.
conversion of oxyamidosulphonates into (Divers and Haga), 1889, T., 760; P., 146.
Nitrogen selenide (Verneuil), 1883, A., 423.
heat of explosion of (Berthelot and Vieille), 1883, A., 707.
oxysulphate. See Nitrosyl sulphate.
Nitrogen, detection and **estimation**:—
of, in ammonia and certain amines and amides, analytical studies on (Longi), 1885, A., 1092.
detection of, in organic substances (Graebe), 1884, A., 1072; (Donath), 1890, A., 663.
estimation of (Arnold), 1883, A., 378; (Grouven), 1883, A., 1028; (Kreusler), 1885, A., 430; (Arnold), 1885, A., 837; (Hufschmidt), 1885, A., 1011; (Houzeau), 1888, A., 752; (Cazeneuve and Hugounenq), 1888, A., 991; (Berthelot and André), 1889, A., 307; (L'Hôte), 1889, A., 746; (Leffmann and Beam), 1889, A., 796; (Drown and Martin), 1889, A., 1035; (Boyer), 1892, A., 237; (Smith), 1892, A., 527; (Voorhees), 1892, A., 751; (Edwards), 1892, A., 1125.
estimation of, by Boyer's method (Arnold and Wedemeyer), 1892, A., 1517.
estimation of, by Dumas' method, modification of (Johnson), 1885, A., 189.
estimation of, by Grouven's method (Kreusler and Landolt), 1884, A., 1215.
estimation of nitric, as nitric oxide (Scheiding), 1891, A., 107.
estimation of nitric, by aluminium (Stutzer), 1891, A., 617.
Nitrogen, estimation:—
estimation of nitric, by ferrous sulphate (Bailhache), 1889, A., 925.
comparison of the methods of estimation of (Oddy and Cohen), 1890, A., 1466.
apparatus for the estimation of, in ammonium salts (Hentschel), 1890, A., 1341.
apparatus, Dumas' (v. Ilinski), 1884, A., 1072.
estimation, simultaneous, of hydrogen and (Gehrenbeck), 1889, A., 1031.
estimation of, absorption of ammonia by acid solutions in the (Haynes), 1888, A., 752.
estimation of, by combustion (Johnson and Eiloart), 1886, A., 488.
estimation of, by combustion with calcium hydroxide (Johnson), 1884, A., 1422.
estimation of, by the copper oxide method and the comparison of this and the Ruffle method (Dabney and van Herff), 1885, A., 593, 930.
estimation of, by soda-lime (Atwater and Woods), 1888, A., 193; (Atwater), 1888, A., 990, 1334; (Quantin), 1889, A., 306.
sources of loss in the estimation of, by soda-lime (Atwater and Ball), 1888, A., 752; (Freydl), 1890, A., 1194.
estimation of, by Kjeldahl's method (Kjeldahl), 1884, A., 364; (Czeczetka; Wilfarth), 1885, A., 688; (Bosshard), 1885, A., 837; (Arnold), 1885, A., 930; 1887, A., 78; (Pfeiffer and Lehmann), 1886, A., 179; (Yardley), 1886, A., 282; (Rindell and Hannén), 1886, A., 648; (Armsby and Short), 1887, A., 298; (Raulin), 1887, A., 862; (Ulsch), 1887, A., 863; (Dafert), 1888, A., 85; (Lenz), 1888, A., 193; (Meldola and Moritz), 1888, A., 628; (L'Hôte), 1889, A., 438; (Viollette), 1889, A., 546; (Lange), 1889, A., 547; (Aubin and Alla), 1889, A., 648, 925; (Zecchini and Vigna), 1889, A., 649; (Gunning), 1889, A., 796; (Martinotti), 1889, A., 1088; (Niebling), 1890, A., 415; (Lunge), 1890, A., 661; (Foerster), 1890, A., 1466; (Argutinsky), 1891, A., 362; (Edwards), 1891, A., 862; (Stock), 1892, A., 1516.

Nitrogen, estimation:—
estimation of organic, by Ruffle's and Guyard's (Tamm's) methods (ARNOLD), 1883, A., 378.
estimation of, by the Schulze-Tiemann method (COCHIUS and MOELLER), 1891, A., 107.
estimation of, by Soxhlet's apparatus (BARLOW), 1888, A., 537; (LEWKOWITSCH), 1889, T., 359; P., 90.
estimation of, in ammonium magnesium phosphate (MAISSEN and ROSSI), 1890, A., 291.
estimation of, in coal and coke (FOSTER), 1883, T., 105; (SCHMITZ), 1886, A., 1071.
estimation of, in mixtures containing nitrogenous organic matter, ammoniacal salts, and nitrates (SHEPHERD), 1883, A., 685.
estimation of, in nitro-, azo-, and diazo-compounds (GOLDBERG), 1884, A., 364.
estimation of, in nitrates (FRICKE), 1892, A., 527; (SÜLLWALD), 1892, A., 528; (ARNOLD and WEDEMEYER), 1892, A., 1517.
estimation of, in nitrates by Kjeldahl's method (JODLBAUER), 1886, A., 834; (FOERSTER), 1889, A., 107, 547, 746; (KEBLER), 1891, A., 1397.
estimation of, in nitrates, by Jodlbauer's modification of Kjeldahl's method (DEVARDA), 1890, A., 292.
estimation of, in pickled railway sleepers (GRITTNER), 1891, A., 620.
estimation of, in substances containing halogens, source of error in (ZSIGMONDY), 1889, A., 546.
estimation of, in wine, must and lees (KULISCH), 1886, A., 652.
estimation of, in natural waters (BURGHARDT), 1887, A., 619; (LALIEU), 1889, A., 551.
estimation of, organic, in natural waters by Kjeldahl's method (LEFFMANN and BEAM), 1889, A., 796; (DROWN and MARTIN), 1889, A., 1035.
estimation of, in organic substances by means of alkaline permanganate (WAGNER), 1891, A., 109.
estimation of, in fæces (CAMERER), 1885, A., 303.
estimation of, in the milk and urine of Herbivora (WEISKE), 1886, A., 1072.
estimation of, in products of metabolism (PFEIFFER), 1886, A., 1053.

Nitrogen, estimation:—
estimation of, in urine (PETRI and LEHMANN), 1884, A., 1440; (CAMERER), 1885, A., 303; 1888, A., 518; (PFLUGER and BOHLAND), 1885, A., 608; (BOHLAND), 1885, A., 609; (GARNIER), 1887, A., 863; (OECHSNER DE CONINCK), 1889, A., 649.
See also Agricultural Chemistry.
Nitrogen-atom, asymmetrical, possibility of existence of (KRAFT), 1891, A., 51.
Nitrogen-free extract, constituents of (STONE), 1892, A., 653.
Nitrogenous constituents of malt, wort, beer and bread (ULLIK), 1883, A., 821.
contents of the digestive juices (ELLENBERGER and HOFMEISTER), 1887, A., 1129.
matter, artificial and natural digestion of (PFEIFFER), 1883, A., 227.
nuclei, nomenclature of compounds containing (WIDMAN), 1889, A., 56.
substances, separation of, by means of phosphomolybdic acid (HIRSCHLER), 1887, A., 310.
Nitroglutazines, *mono-* and *di-* (V PECHMANN), 1888, A., 67, 68.
Nitroglycerol. See Glyceryl *tri*nitrate.
Nitroglycerol works, recovering the waste acids from (POETSCH), 1885, A., 619.
*di***Nitroglycoluril** (FRANCHIMONT and KLOBBIE), 1888, A., 1180.
Nitroglyoxaline (RUNG and BEHREND), 1892, A., 1493.
Nitro-group, displacement of the, by chlorine or bromine (LOBRY DE BRUYN), 1892, A., 305.
displacement of, by an oxyalkyl-group (LOBRY DE BRUYN), 1885, A., 657.
substitution of the amido-group by, in aromatic compounds (SANDMEYER), 1887, A., 720.
first reduction products of (HOFFMANN and MEYER), 1892, A., 291; (WILLGERODT), 1892, A., 594; (KIRPAL), 1892, A., 1067.
*di***Nitroguaiacol** (HERZIG), 1883, A., 464.
Nitroguanidine (PELLIZZARI), 1892, A., 579; (FRANCHIMONT), 1892, A., 951; (THIELE), 1892, A., 1295.
thermochemistry of (MATIGNON), 1892, A., 1142.
*tri***Nitrohemimellithene** (JACOBSEN), 1887, A., 36.

Nitrohemipinic acid (Liebermann), 1887, A., 46.
Nitrohemipinic anhydride (Grüne), 1887, A., 49.
Nitroheptylbenzene (Auger), 1887, A., 816.
Nitrohexane (Konowaloff), 1892, A., 575.
Nitrohydantoin (Franchimont and Klobbie), 1888, A., 1179.
  action of water on (Franchimont and Klobbie), 1889, A., 125.
Nitrohydrobromic acid, action of, on organic compounds (Brunner and Kraemer), 1884, A., 1315.
Nitrohydrocarbons of the fatty series, tertiary (Bewad), 1891, A., 653.
Nitrohydrothiocinnamic acid (Bondzyński), 1887, A., 1109.
Nitrohydroxyanthraquinone ethylate (Liebermann and Hagen), 1883, A., 73.

Nonane (*ennane*) from American petroleum and chloro- (Lemoine), 1884, A., 1106.

Nonanetetracarboxylic acid (*diethylpentanetetracarboxylic acid*) (Perkin and Prentice), 1891, T., 833.

dissociation constant of (Walker), 1892, T., 704.

Nonarabinantetragalactangeddic acid (O'Sullivan), 1891, T., 1071.

n-**Nondecoic acid** (Schweizer), 1885, A., 508.

Non-electrolytes, cryoscopy of dilute aqueous solutions of electrolytes and (Pickering; Traube), 1891, A., 971.

nature of chemical change in (Armstrong), 1891, P., 118.

Nonenylamidoxime (Freund and Schönfeld), 1892, A., 132.

Non-metals, influence of temperature on the spectra of (van Monckhoven), 1883, A., 140.

Nonodilactone (Hjelt), 1883, A., 456.

Nonoic acids from different sources (Schmidt), 1884, A., 295.

Nononaphthene and its derivatives (Konowaloff), 1888, A., 679; 1891, A., 184.

heat of combustion of (Ossipoff), 1889, A., 6, 460.

action of nitric acid on (Konowaloff), 1892, A., 443.

ketonic compound from (Konowaloff), 1892, A., 443.

amido-, and nitro- (Konowaloff), 1892, A., 443.

*iso*Nononaphthene, heat of combustion of (Ossipoff), 1889, A., 6, 460.

Nononaphthylene and **nononaphthylic alcohol** (Konowaloff), 1891, A., 185.

Nononitrile (Freund and Schönfeld), 1892, A., 132.

Nonylamine, and the action of nitrous acid on (Freund and Schönfeld), 1892, A., 132.

Nonylcarbamide and **nonyl***di***thiocarbamic acid** (Freund and Schönfeld), 1892, A., 132.

Nonylene (*methyloctylene; dimethylhexylethylene*) [b.p. 141·5-143°] (Freund and Schönfeld), 1892, A., 133.

(*propylhexamethylene*) [b.p. 146°-148°] (Bamberger and Lengfeld), 1890, A., 1320.

(1:2-*methylethylhexamethylene*) [b.p. 150°-152°] (Kipping and Perkin), 1890, T., 25.

(1:2-*dimethylheptamethylene*) [b.p. 153°] (Kipping and Perkin), 1891, T., 227.

[b.p. 133°-136°] (Lemoine), 1884, A., 1107.

Nonylenic acid and its salts (Schneegans), 1885, A., 649.

*iso***Nonylenic acids** (Fittig and Feist), 1890, A., 592.

Nonylic alcohol [b.p. 213°] (Krafft), 1886, A., 998.

(*ethyldipropylcarbinol*) [b.p. 179·5°] (Tschebotareff and Saytzeff), 1886, A., 437.

(*dimethylhexylcarbinol*) [b.p. 183°] (Freund and Schönfeld), 1892, A., 133.

[b.p. 188°] (Lemoine), 1884, A., 1107.

Nonylic chloride and diphenylic *tri*cyanide (Krafft and Koenig), 1890, A., 1252.

iodide (Krafft), 1886, A., 998.

Nordenskiöldite (Brögger), 1890, A., 1078.

m-**Norhemipinic acid** (Rossin), 1892, A., 180.

Norhydrotropidine (Ladenburg), 1887, A., 740.

Norite, granular and quartz, analyses of (Teller and John), 1883, A., 1069.

Normeconineacetic acid (Liebermann and Kleemann), 1887, A., 47.

Normethyl-*o*-anhydramidohemipinic acid and **normethylazo-opianic acid** (Elbel), 1887, A., 49.

Normethylnitro-hemipinic acid and **-hemipinimide** (Elbel), 1887, A., 50.

Normethylnitro-opianic acid and its phenylhydrazine (Elbel), 1887, A., 49, 50.

Normethylnitro-opianoximic acid (Elbel), 1887, A., 50.

Normethylnitro-opianphenylhydrazide (Liebermann), 1887, A., 46; (Elbel), 1887, A., 50.

Nosite- (*nosean*-) **bearing** ejections from the Laacher See (Hubbard), 1890, A., 220.

Notochord, chemical composition of (Kossel), 1891, A., 1126.

Nucin. See 4′-Hydroxy-1:4-naphthaquinone.

Nucleic acid, supposed compound of guanine and (Malfatti), 1892, A., 1501.

Nuclein (Klinkenberg and Stutzer), 1883, A., 814; (Zacharias), 1884, A., 90; (Liebermann), 1889, A., 1021; (Malfatti), 1892, A., 224, 1501.

artificial preparation of (Liebermann), 1888, A., 510.

formation of uric acid from (Horbaczewski), 1892, A., 646.

of grape stones (Amthor), 1885, A., 823.

Nuclein of moulds (Stutzer), 1883, A., 1166.
  of yeast (Stutzer), 1883, A., 1166; (Liebermann), 1888, A., 510.
    metaphosphoric acid in (Liebermann), 1891, A., 477.
  microchemical detection of (Loew), 1885, A., 610.
Nucleins, artificially prepared (Pohl), 1889, A., 424.
Nucleo-proteids (Merck), 1886, A., 1051.
Nucleus, chemistry of the (Kossel), 1884, A., 97.
  aromatic, constitution of (Sworn), 1890, A., 238.
Nupharine (Grüning), 1883, A., 370.
Nut oil, acids from (Hazura and Grüssner), 1888, A., 817.
Nutmeg oil (Semmler), 1890, A., 1150.
Nutrition, influence of potassium bromide on (Schulze), 1884, A., 850.
  animal (Sanborn), 1887, A., 856.
    behaviour of amides in (Zuntz), 1884, A., 472.
  of Herbivora; does cellulose economise the decomposition of proteid in? (Weiske, Schulze and Flechsig), 1886, A., 728.
Nux vomica, alkaloids of (Shenstone), 1883, T., 101; 1885, T., 139; P., 5.
  effect of alcohol of various strengths on (Conroy), 1884, A., 946.
  tincture of (Conroy), 1884, A., 946.
  analysis of (Dunstan and Short), 1883, A., 689, 1175.
Nymphaea alba, constituents and properties of (Niederstadt), 1884, A., 108.
  chemistry of (Grüning), 1883, A., 369.

O.

Oak, scarlet, analyses of white and green leaves of the (Church), 1886, T., 839.
Oak-bark, two acids in (Musset), 1884, A., 1439.
"**Oak-red**" (Etti), 1883, A., 995; (Böttinger), 1884, A., 321.
Oak-tannic acid and **oak-tannin**. See Tannin.
Oats. See Agricultural Chemistry.
Obituary notices, 1883, T., 251; 1884, T., 209, 615; 1885, T., 309; 1886, T., 342; 1887, T., 469; 1888, T., 508; 1889, T., 289; 1890, T., 441; 1891, T., 452; 1892, T., 486.
Obsidian, solubility of, in sea water (Thoulet), 1889, A., 682.
  porphyritic (Beam), 1884, A., 28.
Obsidian cliff, Yellowstone National Park (Iddings), 1891, A., 26.
Oceanic deposits, solid and gaseous constituents of (Tornöe and Schmelck), 1884, A., 31.
Ochres (Hurst), 1889, A., 678.
  process for preparing (Cohn), 1884, A., 784.
Ochrolite from Pajsberg (Flink), 1891, A., 1168.
Ochrosia (Lactaria) acuminata, O. Ackeringae, O. coccinea, and *O. (Bleckeria) calocarpa*, alkaloids from (Greshoff), 1891, A., 337.
Octahedrite. See Anatase.
Octane from American petroleum (Lemoine), 1884, A., 1106.
  (*diisobutyl*) complete chlorination of (Hartmann), 1891, A., 811.
Octanedicarboxylic acid (*methylazelaic acid*) (Freer and Perkin), 1888, T., 218.
Octenoic aldehyde (*α-ethyl-β-propylacraldehyde*) (Raupenstrauch), 1887, A., 794.
Octenyl alcohol, glycerol from (Reformatsky), 1890, A., 121.
Octinene (*hexylacetylene; caprylidene; methylamylacetylene*) (Béhal), 1887, A., 788; (Béhal and Desgrez), 1892, A., 1064.
  formation of, from methylamylacetylene (Béhal), 1889, A., 950.
  hydration of (Béhal), 1889, A., 227.
  conversion of, into an isomeric hydrocarbon (Béhal), 1888, A., 929.
  (*diisocrotyl*) and its derivatives (Przybytek), 1889, A., 362.
  (*diisobutenyl*) (Przybytek), 1888, A., 123; (Faworsky), 1891, A., 1331.
  [m.p. 122°] (Reformatsky), 1885, A., 232.
Octinoic acid. See Diallylacetic acid.
Octoacetyl*tetr*amidotriphenylbenzene (Mellin), 1890, A., 1423.
Octoacetylmelibiose (Scheibler and Mittelmeier), 1890, A., 1085.
Octoacetylquercetin (Herzig), 1884, A., 847; (Liebermann), 1884, A., 1365.
  *tri*brom- (Liebermann), 1884, A., 1365.
Octodecinene (*hexadecylacetylene*) (Krafft and Reuter), 1892, A., 1164.
Octodecylbenzene and its derivatives (Krafft), 1887, A., 253.
Octodecylene [m.p. 18°] preparation of (Krafft), 1884, A., 571.
  (*anthemene*) [m.p. 64°] from Roman chamomile (Naudin), 1885, A., 37.

Octodecylenic bromide (KRAFFT), 1884, A., 1108.
Octodecylic alcohol (KRAFFT), 1883, A., 1075; 1884, A., 1280.
Octodecylic iodide (SCHWEIZER), 1885, A., 509.
Octodecylidene (KRAFFT), 1884, A., 1108.
Octodecylphenol (KRAFFT), 1887, A., 253.
Octohydroacridine, and its derivatives (GRAEBE), 1884, A., 608.
Octohydroanthracene (LUCAS), 1890, A., 637.
Octohydrodiphenylfurfuran (PERKIN and SCHLOESSER), 1890, T., 955.
Octohydrofluorene (GUYE), 1891, A., 314.
Octohydro-β-naphthaquinaldine. See 2′-Methyloctohydro-β-naphthaquinoline.
ar-**Octohydro-α-naphthaquinoline,** and *p*-amido- (BAMBERGER and STETTENHEIMER), 1891, A., 1260.
Octohydro-β-naphthaquinolines, *ac*- and *ar*- (BAMBERGER and MÜLLER), 1891, A., 1511.
Octohydrostilbazole (*styrylethyloctohydropyridine*) (PLATH), 1889, A., 164.
Octoic acid (*n-caprylic acid*) (CANZONERI), 1884, A., 461.
  (*diisobutyric acid*) (BRÜGGEMANN), 1888, A., 1176.
    thio- (LOVÉN), 1886, A., 333.
  (*dipropylacetic acid*), preparation of, from ethylic malonate (FÜRTH), 1888, A., 1053.
Octoic aldehyde, constitution of (BÉHAL), 1887, A., 788; 1892, A., 293.
  oxime of (*capraldoxime*) (BÉHAL), 1887, A., 795.
  (*ethylbutylacetaldehyde*) (RAUPENSTRAUCH), 1887, A., 794.
Octolactone (YOUNG), 1883, A., 455; (GORBOFF and KESSLER), 1888, A., 814.
*iso***Octolactone** (FITTIG and SCHNEEGANS), 1890, A., 591.
Octonaphthenecarboxylic acid and its derivatives (ASCHAN), 1891, A., 1453.
Octonitrile (*dibutyronitrile; imidobutyrylpropylic cyanide*) (WACHE), 1889, A., 684.
  γ-thio- (GABRIEL), 1890, A., 1221.
Octo-*m*-oxybenzoid (SCHIFF), 1883, A., 335.
Octopus vulgaris, blood of (GRIFFITHS), 1892, A., 648.
Octose (FISCHER), 1890, A., 598.
Octosulphates (WEBER), 1885, A., 121.
Octylacetoacetic acid, isomeride of (PERKIN), 1883, T., 92.
Octylacetothienone (*acetyloctylthiophen*) (v. SCHWEINITZ), 1886, A., 535.
Octylamine (HOOGEWERFF and VAN DORP), 1888, A., 1195.
  action of bromine in alkaline solution on (v. HOFMANN), 1884, A., 1114.
Octylbenzamide and its derivatives (BERAN), 1885, A., 523.
Octylbenzene [b.p. 263°] and its derivatives (v. SCHWEINITZ), 1886, A., 540; (AHRENS), 1887, A., 133.
  o-amido-, hydrochloride (AHRENS), 1887, A., 134.
  p-amido-, and its derivatives (BERAN), 1885, A., 523.
  bromo-, chloro-, *p*-iodo-, *o*-, *m*- and *p*-nitro- and *di*nitro- (AHRENS), 1887, A., 133.
*iso***Octylbenzene** [b.p. 245—255°] (PAAL and HOFFMANN), 1890, A., 1100.
Octylbenzonitrile (BERAN), 1885, A., 523.
Octylbenzylic cyanide (ROSSOLYMO), 1889, A., 862.
Octyldeoxybenzoin (BISCHOFF), 1889, A., 512.
Octyldiacetothienone (*diacetyloctylthiophen*) (v. SCHWEINITZ), 1886, A., 535.
Octylene (*n-caprylene*), complete chlorination of (HARTMANN), 1891, A., 811.
  (*s-diisopropylethylene*) (FOSSEK), 1884, A., 38.
  (*isobutylbutylene*) (FITTIG and FEIST), 1890, A., 592.
  (*diisobutylene*), heat of combustion of (MALBOT), 1890, A., 320.
    oxidation of (WAGNER), 1888, A., 666.
    chloro-, *di*chloride (MALBOT and GENTIL), 1889, A., 843.
  (1:2-*methylethylpentamethylene*) (MARSHALL and PERKIN), 1889, P., 143; 1890, T., 250.
iso-**Octylenic acid** (SCHNEEGANS), 1885, A., 649; (FITTIG and SCHNEEGANS), 1890, A., 591.
  oxidation of (FITTIG), 1888, A., 595.
  γ-bromo- (FITTIG and SCHNEEGANS), 1890, A., 591.
Octylerythritol (PRZYBYTEK), 1888, A., 123, 244; 1889, A., 362.
Octylic alcohol (*methyldipropylcarbinol*) (GORTALOFF and SAYTZEFF), 1886, A., 437.
  (*diethylpropylcarbinol*) (SOKOLOFF) 1888, A., 1170.

Octylic salts of normal fatty acids, boiling points and specific volumes of (Gartenmeister), 1886, A., 966.
acetate, secondary (Béhal and Desgrez), 1892, A., 1162.
allophanate (Gattermann), 1888, A., 574.
carbamate (Arth), 1886, A., 692.
mono-, *di-* and *tri*-chloracetates (Gehring), 1887, A., 653.
chloride (Krafft and Koenig), 1890, A., 1252.
preparation of (Malbot), 1890, A., 577.
diphenylic *tri*cyanide (Krafft and Koenig), 1890, A., 1252.
iodide, refractive power of, at different temperatures (Perkin), 1892, T., 295.
action of, on trimethylamine (H. and A. Malbot), 1892, A., 806.
sec.-**Octylic nitrite** (Bertoni), 1887, A., 458.
Octylidene. See Octinene.
Octylphenylamine. See Octylbenzene, amido-.

Oils, non-drying (Hazura and Grüssner), 1889, A., 1058.
Oils, resin. See Resin.
Oils, vegetable (Beilstein and Wiegand), 1883, A., 346; (Wallach), 1885, A., 171, 550; 1886, A., 70; 1887, A., 595, 965; 1888, A., 1204; 1889, A., 1072; 1890, A., 1314; 1891, A., 217, 1240; (Soltsien), 1887, A., 375; (Weber), 1887, A., 596; (Wallach and Gildemeister), 1888, A., 1205; (Schimmel), 1892, A., 1347.
  coloured (Hock), 1884, A., 82.
  extraction of (Naudin), 1884, A., 378.
  yield of, by plants (anon.), 1888, A., 496.
  specific refractive and dispersive energy of (Gladstone), 1886, T., 609; P., 216.
  action of iodine *penta*bromide on (Forney), 1884, A., 370.
  spontaneous oxidation of (Papasogli), 1889, A., 615.
  olefinic constituents of (Semmler), 1891, A., 539.
  oxygen compounds of (Semmler), 1892, A., 868.
  analysis of (Carles), 1886, A., 394; (Salkowski), 1888, A., 201; (Benedikt and Grüssner), 1890, A., 423; (Brullé), 1891, A., 506.

Oils, vegetable, detection of adulterated (Langbeck), 1885, A., 599.
- colour reactions of (Ihl), 1889, A., 802.
- iodine absorption as a test for (Davies; Williams), 1890, A., 199; (Snow), 1890, A., 199, 307; (Cripps), 1890, A., 200.
- Maumené's test for (Williams), 1890, A., 834.
- detection of, in lard (Welmans), 1892, A., 1133.
- estimation of fragrant (Levallois), 1885, A., 301.
- estimation of alcohol in (Hager), 1889, A., 445.
- of *Allium ursinum* (Semmler), 1887, A., 1089.
- of bitter almonds, detection of nitrobenzene in (List), 1889, A., 552.
- of *Andropogon Schoenanthus* (Semmler), 1890, A., 951.
- of Angostura bark (Beckurts and Nehring), 1892, A., 644.
- of anise (Umney), 1889, A., 659.
  - preparation of, in Annam (anon.), 1885, A., 1275.
- apricot (Maben), 1886, A., 644.
- of *Aristolochia reticulata* (Peacock), 1892, A., 70.
- of asafœtida (Semmler), 1891, A., 322, 464.
- of *Asarum europaeum* (Poleck), 1884, A., 1191; (Petersen), 1888, A., 680.
- of ash leaves (Gintl and Reinitzer), 1883, A., 219.
- bay (*Oleum Myrciæ acris*) (Mittmann), 1889, A., 1072.
- of bergamot (Wallach), 1885, A., 171; (Soltsien), 1887, A., 375; (Crismer), 1892, A., 349; (Semmler and Tiemann), 1892, A., 868; (Bertram and Walbaum), 1892, A., 1235.
  - adulteration of, with oil of turpentine (Heppe), 1885, A., 1163.
  - crystalline products from (Crismer), 1892, A., 349.
  - stearoptene of (Pomeranz), 1892, A., 71.
- of betel leaves (Bertram and Gildemeister), 1889, A., 863; (Eijkman), 1890, A., 135.
  - composition of (Schimmel), 1892, A., 833.
- of birch (Pettigrew), 1884, A., 459; 1885, A., 528; (Trimble and Schroeter), 1890, A., 256.
- cabbage, from *Brassica, sp.* (Davies), 1885, A., 1022.
- of cacao. See Cocoa butter.
- cajeput (Wallach), 1885, A., 171.

Oils, vegetable, of *Calycanthus glaucus* seeds (Wiley), 1890, A., 403.
- of *Camellia oleifera* seeds (McCallum), 1883, A., 1166.
- of camphor (Trimble and Schroeter), 1890, A., 261.
  - natural (MacEwan), 1886, A., 72.
  - atmospheric oxidation of (Kingzett), 1888, A., 605.
  - chemical examination of the constituents of (Yōshida), 1885, T., 779.
  - Japanese (Oishi), 1885, A., 270.
- caraway (Flückiger), 1884, A., 1138.
  - Norwegian (Nicolaysen), 1890, A., 902.
- of cardamoms (Weber), 1887, A., 596.
- of cassia, formation of an asphalt-like substance from (Hirschsohn), 1891, A., 732.
  - testing (Heppe), 1885, A., 697; (Gilbert; Benedikt and Grüssner), 1890, A., 423; (Hirschsohn), 1891, A., 504.
  - estimation of cinnamaldehyde in (Schimmel), 1892, A., 924.
- castor, specific gravity and refractive index of (Long), 1889, A., 86.
  - distinction of, from other fatty oils (Finkener), 1887, A., 402.
  - oxidation of, with nitric acid (Hell and Kitrosky), 1891, A., 812.
  - pimelic acid amongst the oxidation-products of (Gantter and Hell), 1885, A., 44.
  - insoluble residue from the distillation of (Leeds), 1883, A., 655; (Krafft and Brunner), 1885, A., 373.
  - examination of (Gilbert), 1890, A., 429.
- of cedar (Chapoteaut), 1883, A., 76.
- of cinnamon (Weber), 1892, A., 1509.
  - examination of (Benedikt and Grüssner; Gilbert), 1890, A., 423.
- of citronella (Dodge), 1890, A., 231; 1891, A., 285.
- of *Citrus Limetta* leaves (*lime leaves*) (Watts), 1886, T., 316; P., 158.
- of cloves, valuation of (Thoms), 1892, A., 250.
- coriander (Semmler), 1891, A., 540.
- cotton-seed, properties of (Leone and Longi), 1887, A., 536.
  - specific gravity and refractive index of (Long), 1889, A., 86.
  - constituents of (Papasogli), 1892, A., 584.

Oils, vegetable, cotton-seed, acid from (HAZURA and GRÜSSNER), 1888, A., 817.
  - analysis of (MUTER and DE KONINGH), 1891, A., 130.
  - Bechi's test for (BIZIO), 1889, A., 86.
  - detection of (MILLIAU), 1888, A., 633.
  - detection of, in fats (LEONE), 1890, A., 930.
  - detection of, in lard (BISHOP and INGÉ), 1889, A., 194; (ALLEN; HEHNER), 1889, A., 319; (WILLIAMS; JONES), 1889, A., 320; (WILSON), 1889, A., 659; (PATTINSON), 1890, A., 428.
  - detection of, in olive oil (BECHI), 1885, A., 301; (JEAN), 1888, A., 1136; (MILLIAU), 1888, A., 1349; (HIRSCHSOHN; BIEL), 1889, A., 658; (LEONE), 1890, A., 930.
  - estimation of, in lard (BOCKAIRY), 1890, A., 307.
- croton (KOBERT), 1887, A., 798.
  - purgative and vesicating principle of (SENIER), 1884, A., 909, 947.
- of *Curcas purgans* seeds (HORN), 1888, A., 674.
- of *Cyperus esculentus* (HELL and TWERDOMEDOFF), 1889, A., 1029.
- of *Daucus Carota* (LANDSBERG), 1889, A., 277.
- earth-nut (HAZURA and GRÜSSNER), 1889, A., 1058.
  - specific gravity and refractive index of (LONG), 1889, A., 86.
  - arachidic, lignoceric and oleic acids in (SCHÖN), 1888, A., 578.
  - oxidation of the unsaturated fatty acids of (HAZURA and GRÜSSNER), 1889, A., 1058.
- elemi (WALLACH), 1889, A., 1072.
- of Erechtites and of *Erigeron canadensis* (BEILSTEIN and WIEGAND), 1883, A., 346.
- of Eucalyptus (WALLACH), 1885, A., 171.
  - spontaneous oxidation of (PAPASOGLI), 1889, A., 616.
  - terpin hydrate from (MERCK), 1892, A., 1235.
- of *Eucalyptus amygdalina* (WALLACH and GILDEMEISTER), 1888, A., 1205.
- of Gaultheria (PETTIGREW), 1885, A., 528; (TRIMBLE and SCHROETER), 1890, A., 256.
  - See also Methylic salicylate.
- grape-seed, preparation and utilisation of (v. JOBST), 1885, A., 710.

Oils, vegetable, hemp-seed, acids from (HAZURA), 1887, A., 799; (HAZURA and GRÜSSNER), 1888, A., 817.
- of hops obtained from commercial lupulin (OSSIPOFF), 1884, A., 459.
- of Indian geranium (SEMMLER), 1890, A., 951; 1891, A., 30, 323; (DODGE), 1891, A., 285.
- of ivy (MAQUENNE), 1886, A., 274.
- of juniper (NICOLAYSEN), 1890, A., 902.
- Kesso, from *Valeriana officinalis, var. angustifolia* (BERTRAM and GILDEMEISTER), 1891, A., 238.
- kuromoji (*Lindera Sericea*) (KWASNICK), 1891, A., 464; 1892, A., 1480.
- of *Lallemantia iberica* (RICHTER), 1888, A., 83.
- of laurel (BRÜHL and MÜLLER), 1892, A., 722.
- of laurel leaves and berries (WALLACH), 1889, A., 1072.
- laurel-nut (HOOPER), 1889, A., 541.
- of lavender (SEMMLER and TIEMANN), 1892, A., 868; (BERTRAM and WALBAUM), 1892, A., 1235; (SCHIMMEL), 1892, A., 1347.
- of lemons (WALLACH), 1885, A., 171; (BOUCHARDAT and LAFONT), 1885, A., 1141; (SOLTSIEN), 1887, A., 375; (OLIVERI), 1891, A., 1496.
  - crystalline deposit from (TILDEN and BECK), 1890, T., 327; (CRISMER), 1892, A., 349.
  - reaction of, with manganous salts (CRISMER), 1892, A., 386.
  - adulteration of, with oil of turpentine (HEPPE), 1885, A., 1163; (OLIVERI), 1891, A., 1497.
- lemon grass (DODGE), 1891, A., 286.
- of *Licari kanali* (BARBIER), 1892, A., 1236.
- of lime seed (MUELLER), 1892, A., 92.
- of limes. See Oil of *Citrus Limetta.*
- linaloe (SEMMLER), 1891, A., 540.
- of *Lindera sericea* (KWASNICK), 1891, A., 464; 1892, A., 1480.
- linseed, points of difference between linseed oil varnish and (FINKENER), 1888, A., 327.
  - adulteration of (AIGNAN), 1890, A., 1198.
- macassar (THÜMMEL and KWASNICK), 1891, A., 1133.
- mace (WALLACH), 1889, A., 1072; (SEMMLER), 1890, A., 1150.
- of marjoram (BEILSTEIN and WIEGAND), 1883, A., 346.

Oils, vegetable, of Massoy bark (WOY), 1890, A., 638.
melisse, German (SEMMLER), 1891, A., 540.
Mentha Pulegium (BECKMANN; PLEISSNER), 1891, A., 936.
menyanthole (LENDRICH), 1892, A., 1262.
millet (KASSNER), 1888, A., 673.
of minjak-lagam balsam (HAUSSNER), 1884, A., 354.
of mustard. See Allylthiocarbimide.
of white mustard (SALKOWSKI), 1889, A., 1173.
of myrtle (JAHNS), 1889, A., 616.
nut, acids from (HAZURA and GRÜSSNER), 1888, A., 817.
of nutmeg (SEMMLER), 1890, A., 1150.
olive (HAZURA and GRÜSSNER), 1889, A., 374.
specific gravity and refractive index of (LONG), 1889, A., 86.
properties of (LEONE and LONGI), 1887, A., 536.
characteristics of (LEVALLOIS), 1887, A., 535.
reactions of (DE NEGRI and FABRIS), 1891, A., 1559.
adulteration of (AUDOYNAUD), 1886, A., 182; (BRULLÉ), 1888, A., 876; 1891, A., 506.
analysis of (CARPI), 1884, A., 931; (BRULLÉ), 1891, A., 506.
basic lead acetate as a test for (BRADFORD), 1885, A., 603.
detection of cotton seed oil in (BECHI), 1885, A., 301; (LEONE and LONGI), 1887, A., 536; (JEAN), 1888, A., 1136; (MILLIAU), 1888, A., 1349; (HIRSCHSOHN; BIEL), 1889, A., 658; (LEONE), 1890, A., 930.
detection of sesame oil in (LEONE and LONGI), 1887, A., 536; (MILLIAU), 1888, A., 1349; (TOCHER), 1891, A., 1400; (GASSEND), 1892, A., 1133.
orange, constituents of (SEMMLER), 1891, A., 539.
of orange peel (WALLACH), 1885, A., 171; (HEPPE), 1885, A., 1163.
of sweet orange peel (SOLTSIEN), 1887, A., 375.
peach (MABEN), 1886, A., 644.
peanut. See Oil, earthnut.
of black pepper (EBERHARDT), 1887, A., 969.
of peppermint (JANDOUS), 1888, A., 962.
Russian (ANDRES), 1890, A., 1428; (ANDRES and ANDRÉEFF), 1892, A., 723.

Oils, vegetable, of peppermint, Russian, spectroscopical properties of (ANDRES), 1891, A., 2.
test for (FEDERER), 1887, A., 1001.
detection of adulterations in (SNOW), 1890, A., 199.
of petitgrain (SEMMLER and TIEMANN), 1892, A., 868.
of Polei (BECKMANN; PLEISSNER), 1891, A., 936.
of poppy, acids from (HAZURA and GRÜSSNER), 1888, A., 817.
rape, examination of (KINGZETT), 1885, A., 446.
rape-seed, constituents of (REIMER and WILL), 1887, A., 1030.
of roses (MARKOWNIKOFF), 1891, A., 219.
German and Turkish (POLECK), 1891, A., 323; (ECKART), 1892, A., 203, 625.
testing (FLÜCKIGER), 1885, A., 934.
detection of Turkish geranium essence in (PANAJOTOW), 1891, A., 1555.
of sabadilla seeds (OPITZ), 1891, A., 1284.
of saffron (KAYSER), 1885, A., 59.
of sage (WALLACH), 1889, A., 1072.
sassafras, the phenol contained in (POMERANZ), 1890, A., 1111.
sesame, specific gravity and refractive index of (LONG), 1889, A., 86.
properties of (LEONE and LONGI), 1887, A., 536.
testing (BISHOP), 1890, A., 90.
detection of, in cocoa butter (ZIPPERER), 1888, A., 1136.
detection of, in olive oil (MILLIAU), 1888, A., 1349; (TOCHER), 1891, A., 1400; (GASSEND), 1892, A., 1133.
of spike (VOIRY and BOUCHARDAT), 1888, A., 605.
of sunflower (HAZURA), 1889, A., 956.
atmospheric oxidation of (KINGZETT), 1888, A., 605.
tea, of *Camellia oleifera* (DAVIES), 1885, A., 1022.
Turkey-red (BENEDIKT and ULZER), 1887, A., 914; (SCHEURER-KESTNER), 1891, A., 542, 665; (JUILLARD), 1892, A., 819.
Müller-Jacobs' investigations on (SCHMID), 1885, A., 313.
composition of, and its mode of action (LIECHTI and SUIDA), 1884, A., 238; 1885, A., 315; (MÜLLER-JACOBS), 1884, A., 946; 1885, A., 313.

Oils, vegetable, Turkey-red, injurious action of copper in (Schaal), 1883, A., 256.
estimation of fatty matter in (Williams), 1891, A., 1560.
determination of the nature of the crude oil in (Müller-Jacobs), 1885, A., 95.
turmeric, and its oxidation (Jackson and Menke), 1883, A., 482; 1885, A., 271.
of turpentine (Armstrong), 1891, T., 311.
heat conductivity of (Chree), 1888, A., 642.
American, action of heat on (Tilden), 1884, T., 411.
oxidation of, in sunlight (Armstrong), 1891, T., 311; (Armstrong and Pope), 1891, T., 315.
spontaneous oxidation of (Papasogli), 1889, A., 615.
detection of resin oil in (Baudin), 1891, A., 870.
detection of, in essence of lemons (Oliveri), 1891, A., 1497.
of vitriol. See Sulphuric acid.
of walnut (Maben), 1886, A., 644.
of wintergreen (Pettigrew), 1885, A., 528; (Trimble and Schroeter), 1890, A., 256.
See also Methylic salicylate.
wood, from Cochin China (Soubeiran), 1885, A., 394.
from *Elaeococca cordata* (Davies), 1885, A., 1022.
wormseed (Hell and Stürcke), 1884, A., 1363.
action of the halogen acids on (Hell and Ritter), 1884, A., 1363; 1885, A., 172.
See also Essences and Oils, drying and fatty.
Oil cake. See Agricultural Chemistry.
Oil seeds, preparation of soaps from (Seemann), 1885, A., 1023.

Opiancarbamide (Bistrzycki), 1888, A., 1210.
Opianic acid (Bistrzycki), 1888, A., 1209; (Goldschmiedt), 1892, A., 179.
action of acetone and of acetophenone on (Goldschmiedt), 1892, A., 179.
behaviour of, with phenylhydrazine (Liebermann), 1886, A., 550.
etherification of (Liebermann and Kleemann), 1887, A., 584.
derivatives of (Wegscheider), 1883, A., 996; (Liebermann), 1887, A., 45; (Liebermann and Kleemann), 1887, A., 47.
Opianic acid, brom- (Wegscheider), 1883, A., 997; (Tust), 1892, A., 1209.
nitr-, behaviour of, with phenylhydrazine (Liebermann), 1886, A., 550.
reduction of (Kleemann), 1887, A., 584.
ψ-Opianic acid and its salts, chemistry of (Perkin), 1890, T., 1001.
Opianic anhydride (Liebermann), 1887, A., 47.
Opianoxime (Perkin), 1890, T., 1070; (Allendorff), 1892, A., 180.
ψ-Opianoxime and the action of heat on (Perkin), 1890, T., 1069, 1070.
Opianoximic anhydride (Liebermann), 1887, A., 46, 258.
heat developed in the isomeric change of (Liebermann), 1892, A., 459.
brom- (Tust), 1892, A., 1210.
Opianylacetic acid, barium salt of (Liebermann and Kleemann), 1887, A., 47.
Opianylhydrazobenzene (Bistrzycki), 1888, A., 1209.
brom- (Tust), 1892, A., 1210.
Opianylphenylhydrazide (Liebermann), 1886, A., 550.
amido- (Liebermann), 1887, A., 45.
brom- (Tust), 1892, A., 1210.
Opianylphenylmethylhydrazone, brom- (Tust), 1892, A., 1210.
Opiaurin (Liebermann and Seidler), 1887, A., 580.
Opionin (Hesse), 1885, A., 1074.
Opionylic acid (Hesse), 1885, A., 1074.
Opium, action of, on the intestine (Spitzer), 1891, A., 852.
testing (Dietrich), 1887, A., 310.
analysis (Stillwell), 1887, A., 403; (Adrian and Gallois), 1887, A., 622; (Dott), 1892, A., 926.
estimation of morphine in (v. Perger), 1884, A., 1217; (Flückiger), 1885, A., 1165; 1890, A., 94; (Venturini), 1886, A., 1086; (Schlickum), 1887, A., 622: (Goebel), 1887, A., 869; (Kremel; Williams), 1888, A., 635; (Teschemacher and Smith), 1888, A., 635, 1137; (Looff), 1890, A., 1349; 1891, A., 771; (Dieterich), 1891, A., 511.
Opium-alkaloids (Plugge), 1887, A., 280; 1888, A., 379; (Kauder), 1891, A., 227.
separation of the (Plugge), 1887, A., 851.
Opium-preparations, colorimetric estimation of morphine in (Hinsdale), 1890, A., 1349.

- **Optically active compounds**, crystalline form of (Becke), 1889, A., 1041.
  - behaviour of, in mixtures of two solvents (Rimbach), 1892, A., 1137.
- **Optically inactive compounds**, decomposition of (Jungfleisch), 1884, A., 1303; (Bichat), 1886, A., 446, 612.
- **Orange**, bitter, composition of the rind of (Tanret), 1886, A., 576.
- **Orange-juice**, determination of free and precipitable acid in (Grosjean), 1883, T., 333.
- **Orange-oil**, constituents of (Semmler), 1891, A., 539.
- **Orange-peel**, oil of (Wallach), 1885, A., 171; (Heppe), 1885, A., 1163.
  - sweet, oil of (Soltsien), 1887, A., 375.
- **Oranges**, Californian, analyses of (Colby and Dyer), 1892, A., 1511.
- "**Orantia**" (Schmitt), 1884, A., 236.
- **Orantin** (Schmitt), 1884, A., 910.

  - relation between the composition and the absorption spectra of (Krüss and Oeconomides), 1883, A., 1041; (Hartley), 1885, T., 685; P., 59; 1886, P., 245; 1887, T., 152; 1888, T., 641; P., 66; (Krüss), 1885, A., 949; 1888, A., 1141; (Althausse and Krüss), 1889, A., 1093.
  - relation between the constitution and specific rotatory power of (Sorokin), 1888, A., 768.
  - relation between chemical constitution and heat of combustion of (Dieffenbach), 1890, A., 1206; (Thomsen), 1891, A., 632.
  - dispersive power of (Barbier and Roux), 1889, A., 805; 1890, A., 1353; 1891, A., 774; (Nasini), 1891, A., 138.
  - refractive power of (Kanonnikoff), 1883, A., 1041; 1886, A., 335.
  - refraction-equivalents of (Gladstone), 1884, T., 241.
  - molecular refraction and dispersion of (G. Gladstone), 1891, T., 290; P., 35; (J. H. and G. Gladstone), 1891, A., 774.
  - heat of combustion of (Stohmann), 1891, A., 251.
  - electrical conductivity of (Bartoli), 1885, A., 624; 1886, A., 191.

Organic compounds, magnetism of (Wleügel and Henrichsen), 1884, A., 1243; (Henrichsen), 1888, A., 769; 1892, A., 672.
determination of the melting point of (Landolt), 1890, A., 1.
formulæ for calculating the molecular volume of (Lossen), 1890, A., 323.
experiments on the diffusion of some inorganic and (Scheffer), 1883, A., 1047.
action of chlorine on, in presence of inorganic chlorides (Page), 1885, A., 36.
in alkaline solution, action of lead peroxide on (Gläser and Morawski), 1890, A., 20.
action of nitric acid on (Franchimont and Klobbie), 1889, A., 1143.
influence of certain groups on the behaviour of nitric acid with (Franchimont), 1889, A., 1145.
action of sunlight on (Klinger), 1889, A., 405; (Klinger and Standke), 1891, A., 900.
quantity of nitric oxide produced in the combustion of, with copper oxide (Klingemann), 1890, A., 292.
slow combustion of (Schlœsing), 1888, A., 979; 1889, A., 639.
incineration of (Kronberg), 1888, A., 993.
congelation of aqueous solutions of (Raoult), 1883, A., 952.
isomeric, heat of combustion of (Ossipoff), 1890, A., 680.
  relation of the heat of combustion of, to their densities (Müller-Erzbach), 1883, A., 1044.
  antiseptic powers of (Carnelley and Frew), 1890, T., 636; P., 90.
  solubility of (Carnelley and Thomson), 1888, T., 782; P., 80.
liquid, specific heats of (Schiff), 1888, A., 771.
  specific heats of homologous series of (Schiff), 1887, A., 6.
nitrogenous, method for the synthesis of (Gautier), 1885, A., 275.
crystallographic examination of (Zingel), 1886, A., 62; (Wickel), 1886, A., 234; (Heintze), 1886, A., 235.
detection of bromine, chlorine, iodine and sulphur in (Marsh), 1889, A., 796.
containing copper, analysis of (Walker), 1890, A., 296.
detection of (Smith), 1888, A., 90.
detection of nitrogen in (Donath), 1890, A., 663.

Organic compounds, ferric chloride as a test for (Ince), 1887, A., 400.
estimation of (Smith), 1888, A., 90.
estimation of ash in (Köbrich), 1888, A., 325.
method of estimating the halogens in volatile (Plimpton and Graves), 1883, T., 119.
estimation of nitrogen in (Lange), 1889, A., 547; (Blau), 1892, A., 1515; (Stock), 1892, A., 1516.
estimation of phosphoric acid in (Lange), 1889, A., 547.
estimation of sulphur in (Burton), 1890, A., 289.
estimation of sulphur and halogens in (Klason), 1886, A., 918.

Organic gases and vapours, chlorinated, properties of (Berthelot), 1883, A., 394.

Organic matter, combustible, in the air (Müntz and Aubin), 1885, A., 118.
loss of nitrogen during the decomposition of (Schlœsing), 1889, A., 638.
in soil, exhaustion of, by cropping without manures (Dehérain), 1890, A., 407.
estimation of, in the atmosphere (Carnelley and Mackie), 1887, A., 532; (Archarow), 1892, A., 542.
estimation of, in water (Mallet), 1883, A., 1171; (Leeds), 1884, A., 369; (Köbrich), 1887, A., 533; (Klein), 1887, A., 1000.

Organic radicles, negative nature of (Meyer), 1888, A., 147, 702; (Meyer and Oelkers), 1888, A., 703; (Rattner; Schneidewind), 1888, A., 704; (Knoevenagel), 1888, A., 705.

Organism, formation and change of alcohol and aldehyde in the (Albertoni), 1888, A., 973.
amido-compounds in the (Bahlmann), 1887, A., 512.
aromatic substances in the (Salkowski), 1885, A., 730.
assimilation of carbohydrates by the (Hanriot; Gautier), 1892, A., 742.
assimilation of milk-sugar by the (Bourquelot and Troisier), 1889, A., 735.
calorimetric investigations on heat production in the (Rosenthal), 1890, A., 182.
heats of combustion of the chief nitrogenous compounds in the (Berthelot and André), 1890, A., 937.

Organism, stability of carbonic oxide and oxalic acid in the (Gaglio), 1888, A., 619.
  change of sulphanilic acid into sulphanilocarbamic acid in the (Ville), 1892, A., 903.
  chemistry of the cell-nucleus in the (Kossel), 1885, A., 572; 1886, A., 566.
  synthetic action of living cells in the (Brinck), 1889, A., 632.
  fate of certain chlorine compounds in the (Kast), 1887, A., 612.
  combustion in the (Traube), 1889, A., 937.
  decomposition and syntheses in the (Schmiedeberg), 1883, A., 361.
  synthetical processes in the (Pflüger), 1889, A., 174.
  formation of fat from carbohydrates in the (Chaniewski), 1885, A., 280.
  fate of certain ferments in the (Hoffmann), 1889, A., 178.
  fluorine in the (Tammann), 1888, A., 732.
  formates in the (Gréhant and Quinquaud), 1887, A., 513.
  inflammable gases in the (Tacke), 1884, A., 1395.
  excretion of iron from the (v. Zaleski), 1888, A., 977.
  formation of lactic acid in the (Berlinerblau), 1888, A., 974.
  formation of lactic acid and glucose in the (Araki), 1891, A., 1125, 1392; 1892, A., 517, 1113.
  fate of lactic acid in the (Marceuse), 1887, A., 508.
  fate of lecithin in the (Hasebroek), 1888, A., 173.
  fate of morphine in the (Tauber), 1891, A., 479.
  existence of manganese in the (Maumené), 1885, A., 421.
  nitrates in the (Gossels), 1887, A., 389.
  elimination of nitrogen in the free state from the (Gruber), 1884, A., 1391.
  oxidation in the (Wurster), 1887, A., 610.
  influence of light on oxidation in the (Loeb), 1889, A., 172.
  oxidation of aromatic substances in the (Klingenberg), 1891, A., 1529.
  substitute values of the chief organic alimentary principles in the (Rubner), 1884, A., 189.
  formation of sugar in the, when oxygen is deficient (Dastre), 1892, A., 362.

Organism, thiocyanic acid in the (Bruylants), 1888, A., 1324.
  origin of urea in the (Coppola), 1890, A., 184.
  mechanism of the production of urea in the (Popoff), 1892, A., 89.
  formation of xanthocreatinine in the (Monari), 1888, A., 174.
  influence of certain amides on the (Weiske and Schulze), 1885, A., 409.
  action of azoimide on the (Loew), 1892, A., 90.
  influence of cold and warm baths on the temperature of the (Pletzer), 1884, A., 621.
  influence of carbohydrates on the (Albertoni), 1889, A., 1023.
  action of related compounds on the (Gibbs and Hare), 1890, A., 280, 813, 1018; (Gibbs and Reichert), 1891, A., 1280, 1393.
  effect of oil of mustard in foods on the (Ulbricht), 1890, A., 539.
  action of oxalic acid and its derivatives on the (Krohl), 1892, A., 1019.
  action of scatole in the (Mester), 1888, A., 174.
  action and metamorphosis of some substances in the, in relation to diabetes (Albertoni), 1885, A., 683.
  action of sugars in the (Albertoni), 1891, A., 1526.
  action of yeast on the (Neumayer), 1891, A., 237.
  behaviour of sulphur in the (Salkowski), 1889, A., 432; (Presch), 1890, A., 812.
  detection of iodoform, naphthol and chloroform in the fluids and organs of the (Lustgarten), 1883, A., 243.
  foetal, iron in the (Bunge), 1892, A., 1502.
  vegetable, formation of nitrogenous organic bases by the decomposition of proteids in the (Schulze), 1891, A., 856.

Organisms, vegetable, poisonous effects of arsenic, zinc and lead on (Nobbe), 1884, A., 1407.
  action of azoimide on (Loew), 1892, A., 90.
  estimation of fatty substances in (Maxwell), 1891, A., 511.

Organs, animal, fresh, supposed toxic action of aqueous solutions obtained from (di Mattei), 1884, A., 199.
  formation of uric acid and xanthine bases in (Horbaczewski), 1891, A., 1340.

Organs, animal, with impeded circulation in hydrocyanic acid poisoning, and lactic acid and glucose in (ZILLESSEN), 1891, A., 1126.
  of normal and rachitic children, inorganic constituents of (BRUBAKER), 1891, A., 847.
  vegetable, containing chlorophyll, influence of salt on the formation of starch in (LESAGE), 1891, A., 856.
Organosols (SCHNEIDER), 1892, A., 775.
Orientation by conversion of *p*-*di*nitro-derivatives into quinones (CLAUS, RAPS, HERFELDT and BERKEFELD), 1891, A., 1199.
  influence of atoms or groups on (KEHRMANN), 1890, A., 484.
Orobus niger, composition of (NILSON), 1892, A., 522.
Orpiment from Bosnia (KRENNER), 1885, A., 730.
  from the Yellowstone National Park (WEED and PIRSSON), 1892, A., 283.
  analysis of (JANNASCH and WASOWICZ), 1892, A., 657.

Oxalbutylbutyline. See Propylbutylglyoxaline.
Oxal*iso*butylbutyline. See Propyl*iso*-butylglyoxaline.
Oxaleneanilidoximeamidoxime (Tiemann), 1889, A., 1142; (Zinkeisen), 1890, A., 124.
Oxaleneanilidoximeazoxime-ethenyl (Zinkeisen), 1890, A., 124.
Oxalenediamidines, disubstituted, constitution of (Vorländer), 1891, A., 697.
Oxalenediamidoxime (Tiemann), 1889, A., 1142; (Fischer), 1889, A., 1163; (Zinkeisen), 1890, A., 122.
Oxalenediamidoxime diethyl ether, oxalenediazoximedibenzenyl, oxalenediazoximedipropenyldicarboxylic acid and **oxalenediuramidoxime** (Zinkeisen), 1890, A., 123, 124.
Oxalenedihydrazoximediethylidene, oxalene-*p*-tolylamidineamidoxime, and **oxalene-*p*-tolyl*di*amidodioxime** (Vorländer), 1891, A., 698.
Oxalethyl*iso*amyline. See Ethyl*iso*-butylglyoxaline.
Oxalethylbutyline. See Ethyl*iso*-propylglyoxaline.
Oxalethylenephenylhydrazide (Burchard), 1890, A., 250.
Oxalethylethyline and **oxalethyline.** See Methylethylglyoxaline.
Oxalethylœnanthyline. See Ethylhexylglyoxaline.
Oxalethylpropyline. See *p*-Diethylglyoxaline.
Oxalic acid in potatoes and in malt (Siewert), 1883, A., 232.
from the residue of *Spiritus ætheris nitrosi* (Frickhinger), 1887, A., 360.
Oxalic acid, formation and physiological significance of, in fungi (Wehmer), 1892, A., 230.
formation of, in vegetation (Berthelot and André), 1886, A., 734.
electrochemistry of (Jahn), 1890, A., 100.
thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1097; (Massol), 1891, A., 968.
specific heat of (Hess), 1889, A., 93.
effect of heat on the decomposition of, by ferric chloride (Lemoine), 1887, A., 324.
effect of light on the decomposition of, by ferric chloride (Lemoine), 1884, A., 381.
decomposition of, by sun-light (Duclaux), 1887, A., 189.
dissociation of, hydrated (Lescœur), 1887, A., 915.
coefficient of diffusion of (Stefan), 1889, A., 1047.
solubility of (Miczyński), 1886, A., 935.
action of, on barium chloride (Colson), 1891, A., 377.
oxidation of, by potassium dichromate (Bothamley), 1887, P., 141; 1888, T., 159; (Werner), 1887, P., 142; 1888, T., 405, 602; P., 33, 53.
use of dry, in the formation of condensation-products (Anschütz), 1884, A., 1019.
poisoning with (Bischoff), 1883, A., 1021.
stability of, in the animal organism (Gaglio), 1888, A., 619.
use of, as a test for arsenites in alkaline salts (Patrouillard), 1883, A., 243.
detection of, in urine (Salkowski), 1886, A., 395.
estimation of, in urine (Nickel), 1887, A., 401.
Oxalic acid, aluminium salt of, *tri*-basic (Mathieu-Plessy), 1884, A., 296.
ammonium salts of, solubility of (Engel), 1886, A., 443.
right and left-handed crystals of (Anschütz and Hintze), 1885, A., 1049.
ammonium copper salt of, action of light on (Eder), 1885, A., 1173.
ammonium nickel salts of (Kraut), 1888, A., 788.
beryllium potassium salt of, basic (Philipp), 1883, A., 1085.

Oxalic acid, calcium salt of, in the bark of trees (Kraus), 1892, A., 1370.
  formation of, in leaves (Schimper), 1888, A., 981; (Wehmer), 1890, A., 191.
  formation of, in plants (Wakker), 1888, A., 1126; (Kohl), 1890, A., 191; 1891, A., 857.
 double chromium salts of, constitution of (Hartley), 1887, P., 4.
 cobalt salts of, electrolysis of (Kehrmann and Pickersgill), 1891, A., 1189.
 cobalt ammonium salt of (Marshall), 1891, T., 769.
 copper salt of (Seubert and Rauter), 1892, A., 1431.
  compound of, with pyridine (Seubert and Rauter), 1892, A., 1431.
 cuprammonium salt of (Seubert and Rauter), 1892, A., 1431.
 ferrous salt of, decomposition of (Birnie), 1885, A., 752.
 magnesium salt of, in plants (Monteverde), 1891, A., 857.
 manganese salt of (Casthélaz), 1889, A., 957.
 manganese potassium salt of (Kehrmann), 1887, A., 800.
 mercury salt of, heat of formation of (Berthelot), 1884, A., 706.
 potassium salt of (Massol), 1890, A., 740.
 potassium antimony salt of (Kay), 1888, A., 675; (Wagner), 1889, A., 489.
  a substitute for tartar emetic (Anon.), 1885, A., 464.
 potassium chromium salts of (Werner), 1887, T., 384; 1888, T., 405.
 potassium cobalt salt of (Kehrmann), 1887, A., 220; (Kehrmann and Pickersgill), 1891, A., 1189.
 potassium copper salt of, action of light on (Eder), 1885, A., 1173.
 potassium sodium cobaltic salt of (Kehrmann), 1887, A., 220.
 sodium copper salt of, action of light on (Eder), 1885, A., 1173.
Oxalic acid series, specific volumes of some ethereal salts of the (Wiens), 1890, A., 102.
 electrolysis of ethylic potassium salts of the (Brown), 1891, A., 1192.
 distillation of the potassium hydrogen salts of the (Wisbar), 1891, A., 1011.
Oxalic chloride (Fauconnier), 1892, A., 588.
Oxalic ferment (Kohl), 1891, A., 857.
Oxalic nitrile, heats of combustion and formation of (Berthelot and Petit), 1889, A., 812.
Oxalimide (Ost and Mente), 1887, A., 234.
Oxalines. See Glyoxalines.
Oxalmethyl*iso*amyline. See Methyl*iso*butylglyoxaline.
Oxalmethylbutyline. See Methylpropylglyoxaline.
Oxalmethyl*iso*butyline. See Methyl*iso*propylglyoxaline.
Oxalmethylethyline. See Dimethylglyoxaline.
Oxalmethyline. See Methylglyoxaline.
Oxalmethylœnanthyline. See Methylhexylglyoxaline.
Oxalmethylpropyline. See Methylethylglyoxaline.
Oxalodimethylhydrazide (v. Brüning), 1890, A., 23.
Oxalodiphenylhydrazide (Bölsing and Tafel), 1892, A., 981.
Oxalodiphenyl*di*thiobiuret (v. Stojentin), 1885, A., 1196.
Oxalo-β-naphthalide, bis-nitr- (Perkin), 1892, T., 466.
Oxalo-β-naphthylhydrazide (Freund), 1892, A., 509.
Oxalo-*o*-toluidide (Mauthner and Suida), 1886, A., 886; 1889, A., 139.
 *di*nitr- (Perkin), 1892, T., 463.
Oxalo-*p*-toluidide, nitr- (Hinsberg), 1883, A., 323.
Oxalo-*o*- and -*p*-toluidides, *tetra*nitr- (Mixter and Kleeberg), 1889, A., 771; (Perkin), 1892, T., 464, 465.
Oxalpropyl*iso*amyline. See Propyl*iso*butylglyoxaline.
Oxalpropylbutyline. See Dipropylglyoxaline.
Oxalpropyl*iso*butyline. See Propyl*iso*propylglyoxaline.
Oxalpropylethyline. See Methylpropylglyoxaline.
Oxalpropyline. See Ethylglyoxaline.
Oxalpropylœnanthyline. See Propylhexylglyoxaline.
β-Oxalpropylpropyline. See Ethylpropylglyoxaline.
Oxalurhydrazide (Skinner and Ruhemann), 1888, T., 556.
Oxaluric acid, thermochemistry of (Matignon), 1891, A., 1449.
Oxalylanthranilic acid (Hoffmann and Koenigs), 1883, A., 1144.
Oxalylcarbamide. See Parabanic acid.
Oxalyl-ψ-cumidic acid. See ψ-Cumyloxamic acid.
Oxalyldiacetone (Claisen and Stylos), 1888, A., 676.

Oxalyldiacetophenone (Brömme and Claisen), 1888, A., 692.
Oxalyldibenzamic acid (Schiff), 1886, A., 549.
  amide of (Schiff), 1884, A., 906.
Oxalyllevulinic acid (Wislicenus), 1888, A., 1273.
Oxalylmolybdic acid (Péchard), 1889, A., 858.
Oxalyl-α-naphthyl mercaptan, *o*-amido- (Lang), 1892, A., 1079.
Oxalyl-α- and -β-naphthyl mercaptans, *di*amido- (v. Hofmann), 1887, A., 840.
Oxalylphenyl mercaptan, *o*-amido- (Lang), 1892, A., 1079.
Oxalyl-*o*-toluidic acid. See Tolyloxamic acid.
Oxalylxylidic acid. See Xylyloxamic acid.
Oxamethane. See Ethylic oxamate.
Oxamethanetolyloxamide. See Ethylic oxamidotolyloxamate.
Oxamethanetolylurethane. See Ethylic urethanotolyloxamate.
Oxamic acid (Oelkers), 1889, A., 962, 1142.
Oxamide (Henry), 1885, A., 886.
  decomposition of, by water and dilute acids (Berthelot and André), 1887, A., 236.
  *di*thio- (Wollny), 1884, A., 1109; (Ephraim), 1889, A., 1142; (Formánek), 1890, A., 29; (Forssell), 1891, A., 1003; (Wallach and Reinhardt), 1891, A., 1008.
Oxamidine hydrochloride (Pinner), 1883, A., 1088.
Oxanilamide, *tri*nitr- (Mixter and Walther), 1888, A., 142.
Oxanilic acid (*phenyloxamic acid*) (Anschütz), 1889, A., 707; (Aschan), 1890, A., 1124.
  halogen derivatives of (Dyer and Mixter), 1887, A., 251.
  p-nitr- (Perkin), 1892, T., 468.
  o- and *p*-nitr-, and reduction of (Aschan), 1886, A., 147.
  2:4-*di*nitr- and 2:4:6-*tri*nitr- (Perkin), 1892, T., 468, 469.
Oxanilide (*diphenyloxamide*) and its homologues, preparation of (Perkin), 1892, T., 459.
  action of nitric acid on (Perkin), 1892, T., 458; P., 56.
  halogen derivatives of (Dyer and Mixter), 1887, A., 251.
  *di*bromo*di*nitr-, and *di*bromo*tetra*nitr- (Mixter and Willcox), 1888, A., 142.
  *di*nitr- (Mixter and Walther), 1888, A., 141.
Oxanilide (*diphenyloxamide*), *tetra*nitr- (Mixter and Walther), 1888, A., 141; (Perkin), 1892, T., 460.
  *hexa*nitr- (Mixter and Walther), 1888, A., 141; (Perkin), 1892, T., 462.
Oxanilidodi-*o*-carboxylic acid (Mauthner and Suida), 1889, A., 139.
Oxanilyl chloride (Aschan), 1890, A., 1124.
Oxazine-dyes (Möhlau), 1892, A., 887.
  See also under Colouring matters.
Oxazine-series, syntheses in the (Knorr), 1889, A., 1218.
Oxazole (Hantzsch), 1892, A., 313.
Oxazoles and their derivatives (Lewy), 1888, A., 1101.
  synthesis of (Hantzsch), 1888, A., 574.
*iso***Oxazole,** amido- (Hanriot), 1891, A., 1108.
*iso***Oxazoles** (Claisen), 1892, A., 506.
  formation of (Dunstan and Dymond), 1891, T., 410.
Oxazolines (Gabriel and Heymann), 1890, A., 1267; (Elfeldt), 1892, A., 213.
  formation of (Gabriel and Neumann), 1892, A., 1331.
Oxen, urine of (Mittelbach), 1888, A., 1216.
Oxethyl-. See Oxyethyl-.
Oxetone and **oxetonecarboxylic acid** (Fittig and Ström), 1892, A., 813.
Ox-gall, presence of myristic acid in (Lassar-Cohn), 1892, A., 1114, 1503.
Oxidation by means of the galvanic current (Smith), 1889, A., 926.
  by means of hydrogen peroxide (Wurster), 1888, A., 43.
  by means of potassium permanganate (Remsen and Emerson), 1887, A., 146.
  rate of, of carbon compounds by potassium permanganate (Dreyfus), 1888, A., 24.
  primary and secondary, in the organism (Nasse), 1889, A., 172.
  in the animal body (Schmiedeberg), 1883, A., 361; (Wurster), 1887, A., 610.
  in animals, influence of light on (Loeb), 1889, A., 172.
  in the blood (Hoppe-Seyler), 1890, A., 651.
  physiological (Nasse), 1892, A., 1018.
  slow, absorption of nitrogen during (Berthelot), 1889, A., 673.
  and reduction (Ledebur), 1885, A., 631; (Ostwald), 1888, A., 1024.

Oxidation and reduction, simultaneous, by means of hydrocyanic acid (MICHAEL and PALMER), 1886, A., 155.
See also Agricultural Chemistry.
Oxides, metallic, change in volume during the formation of (BEKETOFF), 1887, A., 1073.
polymerisation of (HENRY), 1886, A., 303; (CARNELLEY and WALKER), 1887, P., 110; 1888, T., 59.
more stable, behaviour of, at high temperatures (BAILEY and HOPKINS), 1890, T., 269; P., 19.
action of boron on (MOISSAN), 1892, A., 1154.
action of nitric oxide on (SABATIER and SENDERENS), 1892, A., 1151, 1271.
action of nitric *per*oxide on (SABATIER and SENDERENS), 1892, A., 1390.
action of sulphur on (FILHOL and SENDERENS), 1883, A., 710; 1884, A., 959.
action of sulphur and water on (SENDERENS), 1887, A., 328; 1892, A., 770.
influence of, on the decomposition of potassium chlorate (FOWLER and GRANT), 1890, T., 272; P., 20.
production of metallic chlorides from (FAURE), 1888, A., 1250.
of the heavy metals and alkali halides, reaction between (BERSCH), 1891, A., 1413.
reduction of, with magnesium (WINKLER), 1891, A., 1155.
Polyoxides, constitution of (GEUTHER), 1884, A., 1260.
Oxides, mineral, synthesis of (WEINSCHENK), 1890, A., 709.
Oxides, organic, action of anhydrides on (FRANCHIMONT), 1883, A., 452.

  atomic weights of hydrogen and, relative values of the (Cooke and Richards), 1888, A., 647.
  atomic volume of (Amagat), 1885, A., 631; 1886, A., 662; (v. Wroblewski), 1886, A., 661.
  tetravalency of (Heyes), 1888, A., 551; (Meldola), 1889, A., 404.
  production of, by green cells (Pringsheim), 1888, A., 741.
  production of, by the action of sunlight on *Protococcus pluvialis* (Phipson), 1884, A., 201.
  preparation of (Göhring), 1889, A., 465.
  preparation and storage of pure (Shenstone and Cundall), 1887, T., 611.
  apparatus for preparing, quickly (Tacke), 1884, A., 1254.
  preparation of, in a Kipp's apparatus (Neumann), 1887, A., 769.
  preparation of, from bleaching powder (Bidet), 1886, A., 418; (Volhard), 1890, A., 8.
  preparation of, from potassium chlorate (Wagner), 1883, A., 281.
  preparation of, from potassium ferricyanide and hydrogen *per*oxide (Kassner), 1890, A., 352.
  utilisation of atmospheric (Kassner), 1891, A., 392.
  storage of, in zinc gasholders (Loewe), 1883, A., 619.
  chemical structure of, and dissociation in the sun's atmosphere (Grünwald), 1887, A., 1070.
  dispersion equivalents of (Gladstone), 1888, A., 389.
  refraction equivalent of (Gladstone), 1884, T., 257; (Brühl), 1887, A., 193.
  absorption spectra of (Egoroff), 1886, A., 169; (Janssen), 1886, A., 749; 1888, A., 765; (Liveing and Dewar), 1889, A., 1; 1890, A., 675.
  heat of combination of carbon and (Boillot), 1884, A., 141.
  heat of combination of hydrogen and (Boillot), 1885, A., 8.

Oxygen, forms of, obtained in the electrolysis of aqueous sulphuric acid (McLeod), 1886, T., 591; P., 215.
  density of (Amagat), 1885, A., 631; (Cooke), 1890, A., 322; (Leduc), 1890, A., 1370; 1891, A., 1416.
  relative densities of hydrogen and (Rayleigh), 1888, A., 643.
  deviations of, at low pressure from Boyle's law (Bohr), 1886, A., 591.
  volumetric relations of ozone and (Shenstone and Cundall), 1887, T., 625; P., 76.
  compressibility of, at very high pressures (Amagat), 1889, A., 8; 1891, A., 378.
  absorption of (v. der Pfordten), 1885, A., 836.
  absorption of, by carbon (Baker), 1887, T., 252.
  occlusion of, in pure silver (Brauner), 1889, T., 400.
  liquefaction of (Olszewski), 1883, A., 781; (Dewar), 1885, A., 331; (Cailletet), 1885, A., 859.
  liquefaction of, apparatus for demonstrating the (Dewar), 1885, A., 331.
  liquid, colour of (Olszewski), 1891, A., 773.
    absorption spectrum of (Olszewski), 1887, A., 625; 1891, A., 773.
    insulating properties of (v. Wroblewski), 1885, A., 1099.
    ebullition of (v. Wroblewski), 1884, A., 553.
    boiling point of, under atmospheric pressure (v. Wroblewski), 1884, A., 817.
    critical temperature and pressure of (v. Wroblewski), 1884, A., 148; (Sarrau), 1884, A., 149.
    relation between the temperature and pressure of (Olszewski), 1885, A., 475.
    coefficient of expansion of (Olszewski), 1884, A., 816.
    density of (v. Wroblewski), 1884, A., 14, 388; (Menges), 1884, A., 553; (Olszewski), 1884, A., 816; 1887, A., 694.
  solubility of, in water (Winkler), 1889, A., 936; 1892, A., 271; (Bohr and Bock), 1892, A., 108.
  solubility of, in water and in alcohol (Timoféeff), 1891, A., 15.
  solubility of, in mixtures of alcohol and water (Lubarsch), 1890, A., 103.

Oxygen, combustion in dried (Baker), 1889, A., 465.
combustion of, in ammonia (Hodgkinson and Lowndes), 1888, A., 1244.
combustion of, in hydrogen, a lecture experiment (v. Hofmann), 1883, A., 280.
slow combustion of hydrogen and, admixed (Krause and Meyer), 1891, A., 1153; (Askenasy and Meyer), 1892, A., 938.
combustion of organic substances in, at high pressure (Stohmann, Kleber, and Langbein), 1889, A., 929.
influence of steam and other gases on the combustion of carbonic oxide and (Beketoff), 1892, A., 274.
influence of aqueous vapour on the explosion of carbonic oxide and (Dixon), 1883, A., 12.
activity of (Traube), 1883, A., 282; (Hoppe-Seyler), 1883, A., 1048.
activity of, in presence of nascent hydrogen (Hoppe-Seyler), 1883, A., 848; 1886, A., 120.
active (Baumann), 1884, A., 14.
formation of, in the atmosphere (Wurster), 1887, A., 211.
formation of, in paper (Wurster), 1887, A., 211.
reagents for the estimation of minimal quantities of (Wurster), 1887, A., 295.
m-phenylenediamine as a test for (Cazeneuve), 1891, A., 1289.
estimation of, by means of tetramethyl-*p*-phenylenediamine (Wurster), 1888, A., 627.
See also Ozone.
action of light on moist (Richardson), 1889, P., 134.
action of light on the hydrides of the halogens in presence of (Richardson), 1887, T., 801.
action of, on hydrochloric acid under the influence of light (McLeod), 1886, T., 608.
action of the silent discharge on nitrogen and, in presence of chlorine (Hautefeuille and Chappuis), 1884, A., 710.
action of hydrogen on (Dixon), 1886, T., 107.
action of nascent hydrogen on (Hoppe-Seyler), 1883, A., 848; 1886, A., 120; (Traube), 1883, A., 900.
action of chlorine and hydrogen on (Harker), 1892, A., 1147.
Oxygen, action of, on nitric oxide (Emich), 1892, A., 940.
reciprocal displacement of the halogens and (Berthelot), 1890, A., 6.
ketonic, substitution of the azo-group for (Curtius), 1889, A., 1157; (Curtius and Lang), 1892, A., 451.
equilibrium between hydrogen, chlorine and (Le Chatelier), 1890, A., 8.
rôle of, in plant life (Palladin), 1888, A., 1125.
influence of compressed, on the growth of plants (Jentys), 1888, A., 1125.
dependence of the assimilation of green cells on their respiration of (Pringsheim), 1888, A., 185.
simultaneous evolution of carbonic anhydride and, by Cactaceæ (Aubert), 1891, A., 856.
emission of, by plants in coloured light (Pringsheim), 1886, A., 642.
elimination of, from plant cells (Engelmann), 1883, A., 105.
exhalation of, by fleshy-leaved plants in absence of carbonic anhydride (Mayer), 1887, A., 988.
action of, on the activity of the lower organisms (Hoppe-Seyler), 1884, A., 1399.
relation of bacterial life to (Liborius), 1887, A., 291.
influence of, on fermentation (Hoppe-Seyler), 1883, A., 489.
influence of, on alcoholic fermentation (Brown), 1892, T., 369; P., 33.
action of, on animals (Richardson), 1887, A., 855.
"devitalised" (Richardson), 1887, A., 855.
the specific quantities of, in blood (Bohr), 1891, A., 344.
in the blood of animals at great altitudes (Viault), 1891, A., 753.
tension of, in blood and in solutions of oxyhæmoglobin (Hüfner), 1888, A., 1214.
heat developed by the action of, on the blood (Berthelot), 1890, A., 274.
determination of the rate of consumption of, in the tissues by means of the spectroscope (Dennig), 1884, A., 1391.
combination of hæmoglobin with (Bohr), 1892, A., 1369.
influence of, on the separation of carbonic anhydride in the lungs (Werigo), 1892, A., 1369.

Oxygen, detection and estimation:—
detection of, by Schützenberger's reagent (JODIN), 1886, A., 648.
estimation of (SINIBALDI), 1888, A., 322.
gasometric estimation of (DE KONINCK), 1891, A., 616.
Orsat's apparatus for the estimation of (KERSHAW), 1884, A., 695; (RUFFLE), 1890, A., 411.
Schützenberger's process for the estimation of free (KÖNIG), 1892, A., 98.
estimation of aldehydic and ketonic (STRACHE), 1892, A., 546, 1530.
estimation of free, by means of nitric oxide (DE KONINCK), 1892, A., 97.
estimation of, in air (HEMPEL), 1885, A., 592.
estimation of, in air by Priestley's method (WANKLYN), 1891, A., 362.
estimation of, in the air of forests (EBERMAYER), 1886, A., 1066.
estimation of, in the blood (SIEGFRIED), 1891, A., 845.
estimation of, in metals and alloys (MÜLLER), 1885, A., 1167.
estimation of available, in *per*oxides (DE KONINCK and LECRENIER), 1891, A., 1136.
estimation of, absorbed in respiration (HANRIOT and RICHET), 1887, A., 507.
estimation of, in water (WILLIAMS and RAMSAY), 1886, T., 751; P., 223; (DUPRÉ), 1886, A., 579; (LALIEU), 1888, A., 874; 1889, A., 551; (BLAREZ), 1888, A., 1344; (ROSCOE and LUNT), 1889, T., 552; P., 124; (WINKLER), 1889, A., 79; (THRESH), 1890, T., 185; P., 1; (MÜLLER), 1890, A., 412; (LINOSSIER), 1891, A., 616; (ADAMS), 1892, T., 310; P., 1; (KISCH), 1892, A., 98.
eudiometric investigation with mixtures of, and ammonia (NEUMANN), 1889, A., 1031.
Oxygen-carriers (MEYER), 1888, A., 216.
Oxygen-compounds, reduction of, by magnesium (WINKLER), 1891, A., 801.
reduction of, by sodium (ROSENFELD), 1891, A., 150.
correlation of, and hydrogen compounds of the elements (FLAWITZKY), 1892, A., 1270.
molecular (TRAUBE), 1886, A., 661.
"**Oxygluconic acid**" (BOUTROUX), 1886, A., 683.
Oxyglucose (FISCHER), 1888, A., 1267.
Oxyhæmoglobin. See under Hæmoglobin.
Oxyhexic acid. See Terebic acid.
Oxyhydrastinine (FREUND), 1889, A., 627.
constitution of (FREUND), 1889, A., 1222.
synthesis of, from methylic ω-chlorethylpiperonylcarboxylate (PERKIN), 1890, T., 997, 1034.
Oxyhydrocollidine (CANZONERI and SPICA), 1885, A., 747.
Oxyhydrogen flame, spectrum of (LIVEING and DEWAR), 1888, A., 637.
Oxyhydrogen gas, ignition temperature of (FREYER and MEYER), 1892, A., 680.
absorption of, by soil (IMMENDORFF), 1892, A., 377.
action of light on (ASKENASY and MEYER), 1892, A., 939.
supposed re-combination of, in the dark (RICCIARDI), 1884, A., 1092.
catalytic action of metals on (BERLINER), 1889, A., 206.
lecture experiments on the combination of the (MEYER), 1892, A., 562.
Oxyindonaphthene. See Hydrindone.
Oxyketones, formation of (JAMES), 1886, T., 54.
Oxylactose (FISCHER), 1888, A., 1267.
Oxylepiden, acicular and tabular. See Dibenzoylstilbene and Tetraphenylcrotolactone.
Oxylepidenic acid. See Triphenylbenzoylpropionic acid.
Oxylepidine. See Oxy-4′-methylquinoline.
Oxylupinine (BAUMERT), 1883, A., 100.
Oxymenthylic acid (ARTH), 1886, A., 892.
Oxymercuric hydrogen and sodium imidosulphonates (DIVERS and HAGA), 1892, T., 977, 983.
Oxymethylene. See Formaldehyde.
Oxymethylenemethoxybutenylbenzene (SEMMLER), 1892, A., 311.
Oxymethylethenyltolylenediamine (NIEMENTOWSKI), 1887, A., 937.
Oxymethylindole. See Methyloxindole.
Oxymethylpyrrolidine. See 2-Methylpyrrolidone.
4′-Oxy-2′-methylquinazoline (WEDDIGE), 1887, A., 1044.
chloro-derivatives of (DEHOFF), 1891, A., 84.
m-nitro- (DEHOFF), 1890, A., 802; 1891, A., 84; (THIEME), 1891, A., 917.
4′-Oxy-3′-methylquinazoline (KNAPE), 1891, A., 909.

- **Oxymethylquinazoline.** See also Hydroxymethylquinazoline.
- **Oxymethylquinizine.** See Phenylmethylpyrazolone.
- 1-**Oxy-2-methylquinoline,** 4-nitr- and 4-nitroso- (Nölting and Trautmann), 1891, A., 326; 1892, A., 727.
- 1-**Oxy-3-methylquinoline,** 4-nitroso- (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.
- 1-**Oxy-4-methylquinoline,** 2-nitr- and 2-nitroso- (Nölting and Trautmann), 1891, A., 327; 1892, A., 728.
- 4-**Oxy-1-methylquinoline,** 3-nitr- and 3-nitroso- (Nölting and Trautmann), 1891, A., 328; 1892, A., 729.
- 4-**Oxy-3-methylquinoline,** 1-nitr- and 1-nitroso- (Nölting and Trautmann), 1891, A., 327; 1892, A., 727.
  - 3-nitroso- (Nölting and Trautmann), 1891, A., 327.
- 4′-**Oxy-2′-methylquinoline** and 3-brom- (Knorr and Antrick), 1885, A., 274
- **Oxy-4-methylquinoline,** *tri*brom- (Comstock and Koenigs), 1884, A., 1383.
- **Oxy-3-methylquinolineoxime** (Nölting and Trautmann), 1891, A., 326.
- **Oxymethyluracil,** *di*chlor- (Behrend), 1887, A., 129.
- **Oxymetric solution,** Schützenberger's, decomposition of, by light (Jodin), 1886, A., 648.
- **Oxymorphine** (*ψ-morphine; oxydimorphine*) and its derivatives (Hesse), 1884, A., 616; 1887, A., 163; (Polstorff), 1886, A., 900.
  - reactions of (Hesse), 1886, A., 1047.
- **Oxynaphthaquinonesulphonic acid.** See Hydroxynaphthaquinonesulphonic acid.
- **Oxynicotine** (Pinner and Wolffenstein), 1891, A., 473.
- **Oxy*tri*nicotine** (Etard), 1884, A., 464.

- **Oxyurushic acid** (Yōshida), 1883, T., 486.
- **Oxywrightine.** See Oxyconessine.
- **Ozokerite,** Caucasian (Beilstein and Wiegand), 1883, A., 1073.
  - from Galicia (Grabowski), 1885, A., 487.
  - from New Jersey (Smith), 1885, A., 356.
  - process for bleaching (Chemin), 1885, A., 101.
  - complete chlorination of (Hartmann), 1891, A., 812.

Ozokerite, valuation of (Lach), 1885, A., 1266.
detection of, in bees-wax (Hager), 1890, A., 421.
See also Mineral wax and Paraffin.

Ozone from pure oxygen (Shenstone and Cundall), 1887, T., 610; P., 75.
formation of (Kappel), 1883, A., 282; (Thomson and Threlfall), 1887, A., 327.
formation of, during combustion (Loew), 1890, A., 330; (Ilosvay), 1890, A., 447.
formation of, in flames (Cundall), 1890, P., 26; (Ilosvay), 1891, A., 798.
formation of, in the electrolysis of aqueous sulphuric acid (McLeod), 1886, T., 591.
connection of the formation of, with atmospheric electricity (Wurster), 1887, A., 211.
formation of, in presence of platinum-black (Mulder and van der Meulen), 1883, A., 284.
production of, by the electrical discharge (Bichat and Guntz), 1888, A., 1234.
production of, by the slow oxidation of phosphorus (Engel), 1886, A., 302.
two properties of, explanation of (Debus), 1888, T., 324.
spectrum of, and the presence of, in the atmosphere (Schöne), 1885, A., 713.
electrical conductivity due to the formation of (Elster and Geitel), 1890, A., 676.
boiling point of (Olszewski), 1887, A., 634; 1889, A., 821.
volumetric relations of oxygen and (Shenstone and Cundall), 1887, T., 625; P., 76.
reactions of (Wagner), 1884, A., 259.
action of, on ether (Dunstan and Dymond), 1890, T., 584.
action of, on guaiacum resin (Kowalewsky), 1889, A., 900.
rate of decomposition of (Mulder), 1886, A., 9.
influence of, on germination (Vogel), 1887, A., 516.
therapeutic and physiological effects of (Labbé and Oudin), 1891, A., 1531.
behaviour of, with blood (Binz), 1883, A., 486; 1884, A., 95.
estimation, volumetric, of (Behrend and Kast), 1890, A., 290.
See also Oxygen, active.

Ozothellia nodosa, gases contained in the bladders of (Wille), 1890, A., 916.

P.

Pachnolite (Klein), 1883, A., 427; (Groth), 1884, A., 265; (Des Cloizeaux), 1884, A., 716.
from Colorado (Cross and Hillebrand), 1884, A., 21.
chemical composition of (Brandl), 1883, A., 29.

Pachyrhizus angulatus, poisonous principle from (Greshoff), 1891, A., 335.

Paeonol (Nagai), 1892, A., 58.

Paeonol-oxime and **-phenylhydrazone** (Tiemann), 1892, A., 59.

Paint, waterproof, for stones, etc. (anon), 1883, A., 760.

Paints, estimation of turpentine in (Phillips), 1891, A., 1302.

Palæopicrite of Amelose and its alteration products (Brauns), 1888, A., 34.
from Stoppenberg in the Harz (Lossen), 1889, A., 573.

Palinurus vulgaris, blood of (Griffiths), 1892, A., 648.

Palladium, atomic weight of (Keiser), 1890, A., 17; (Seubert), 1891, A., 885; (Bailey and Lamb), 1892, T., 745; P., 138.
electric properties of, when containing hydrogen (Fromme), 1883, A., 766.
absorption of oxygen by (Neumann), 1892, A., 943.
occlusion of hydrogen by (Schiff), 1885, A., 1035; (Thoma), 1889, A., 568; (Wilm), 1892, A., 563; (Neumann and Streintz), 1892, A., 567.
action of nitric oxide on (Sabatier and Senderens), 1892, A., 1152.
behaviour of, in chromic and nitric acids (Fromme), 1883, A., 699, 766.
direct oxidation of (Wilm), 1892, A., 572.
lowering of the freezing point of bismuth, cadmium and lead by (Heycock and Neville), 1892, T., 894, 900, 906.
influence of, on the freezing point of tin (Heycock and Neville), 1890, T., 380.
non-magnetisable alloys of, for watch works (Paillard), 1889, A., 573.

Palladium chlorides, electrolytic conductivity of (Hampe), 1888, A., 890.

Palladium ammonium chloride, action of hydrogen sulphide on (Smith and Keller), 1891, A., 272.
  monoxide (*palladious oxide*) (Wilm), 1892, A., 572.
  potassium chloronitrite (Vèzes), 1892, A., 1284.
Palladium, estimation and separation:—
  estimation, electrolytic, of (Smith and Keller), 1890, A., 831; (Smith), 1891, A., 1140.
  separation of gold from (Smith and Muhr), 1891, A., 1396.
  separation of mercury, lead, copper, bismuth, and, from one another (Rosenbladt), 1887, A., 302.
Palladium-gold, native. See Porpezite.
Palladium-hydrogen as a reagent (Schwarzenbach and Kritchewsky), 1886, A., 1071.
  co-operation of water in the slow oxidation of (Traube), 1885, A., 1105.

(1:5-) (GUSTAVSON and DEMJANOFF), 1889, A., 950; (DEMJANOFF), 1892, A., 1292.
(2:3-) oxidation of (v. PECHMANN), 1890, A., 1222.
"**Peonine,**" or "red aurin" (DALE and SCHORLEMMER), 1883, T., 186.
Peonol (WILL), 1886, A., 906.
synthesis of (TAHARA), 1891, A., 1223.
Peperite of the Puy de la Piquette (GONNARD), 1888, A., 121.
Pepper, volatile alkaloid in (JOHNSTONE), 1889, A., 298.
piperidine in (JOHNSTONE), 1890, A., 95.
adulteration of (RABOURDIN), 1885, A., 303; (LANDRIN), 1885, A., 451.
analysis of (HEISCH), 1887, A., 312; (JOHNSTONE), 1890, A., 95.
test for the addition of ground olive stones to (GILLET), 1889, A., 88.
Pepper oil, black (EBERHARDT), 1887, A., 969.
Pepper powder (LENZ), 1885, A., 701.
Peppermint oil. See Oils, vegetable.
Pepsin. See Enzymes.
Pepsinogen (LANGLEY and EDKINS), 1886, A., 1051.
Peptone blood, gases of (LAHOUSSE), 1889, A., 531; (BLACHSTEIN), 1892, A., 363.
Peptone gelatin (TATARINOFF), 1884, A., 344; (CHITTENDEN and SOLLEY), 1891, A., 950.
Peptone, malt- (SZYMANSKI), 1885, A., 822.
Peptone salts from glutin (PAAL), 1892, A., 895; (BÖTTINGER), 1892, A., 1016.
Peptones (v. POEHL), 1883, A., 926; (KÜHNE and CHITTENDEN), 1886, A., 819; (NEUMEISTER), 1888, A., 509; (SEBELIEN), 1890, A., 182.
distribution of, in the animal body (HOFMEISTER), 1883, A., 675.
in the blood and organs of leucæmic patients (v. JAKSCH), 1892, A., 519.
in the blood and urine (GEORGES), 1887, A., 188.
in hen's eggs during incubation (FISCHEL), 1886, A., 166.
in fibromata of the uterus (FISCHEL), 1886, A., 167.
from proteid matters by the action of pancreatic ferment (OTTO), 1884, A., 1057.
proportion of, in the gastric mucous membrane (HOFMEISTER), 1883, A., 677.
formation of (CLERMONT), 1888, A., 167.
formation of, and its conversion into albuminoid substances (v. POEHL), 1883, A., 603.
formation of, in gastric digestion (CHITTENDEN and HARTWELL), 1891, A., 953.
preparation of (MERCK), 1886, A., 1051.
constitution of (SCHÜTZENBERGER), 1892, A., 1500.
chemical nature of (PALM), 1888, A., 972.
molecular weights of (CIAMICIAN and ZANETTI), 1892, A., 1501.
capillarimetric distinction between albuminoids, gelatin and (BODLÄNDER and TRAUBE), 1886, A., 1087.
effect of, on the clotting of blood and lymph (SHORE), 1891, A., 481.
formation of sugar from, in blood (LÉPINE), 1892, A., 1502.
the source of sugar in the liver (SEEGEN), 1883, A., 818.
conversion of, by the liver (SEEGEN), 1886, A., 382.
physiological action of (NEUMEISTER), 1888, A., 516.
as a pyrexial agent (OTT and COLLMAR), 1888, A., 1325.
fate of (SHORE), 1891, A., 479.

Peptones, behaviour of bile acids with (Maly and Emich), 1883, A., 673.
decomposition of, in the human body (Graffenberger), 1892, A., 904.
reactions of (Neumeister), 1890, A., 804.
commercial, examination of (König and Kisch), 1889, A., 803.
precipitation of (Martin), 1886, A., 636.
analysis of (Denaeyer), 1890, A., 1351; (Heaton and Vasey), 1892, A., 1535.
detection of (Posner), 1888, A., 1140.
salicylsulphonic acid as a test for (MacWilliam), 1892, A., 552.
detection of, in urine (Martin), 1888, A., 764.
Tanret's reaction for, in urine (Brasse), 1888, A., 204.
examination of urine for (Méhu), 1885, A., 451.
estimation of, in stomach contents (Riva-Rocci), 1892, A., 1136.
estimation, volumetric, of, in urine (Roux), 1892, A., 1264.
separation of albumin from (Weiske), 1886, A., 1087; (Palm), 1888, A., 972.
separation of, from albuminous substances (Kossel), 1885, A., 573.
Antipeptone (Kühne and Chittenden), 1884, A., 849; 1886, A., 820.
Hemipeptone (Kühne and Chittenden), 1884, A., 849.
Myosinpeptone (Chittenden and Goodwin), 1891, A., 950.
Propeptone (Herth), 1884, A., 1388; 1886, A., 567.
from proteid matters by the action of pancreatic ferment (Otto), 1884, A., 1057.
pyrogallol as a reagent for (Axenfeld), 1887, A., 1127.
detection of (Posner), 1888, A., 1140.
See also Albumose and Proteoses.
ψ-Peptone (Neumeister), 1891, A., 235.
Ptomopeptone (v. Poehl), 1883, A., 926.
Peptonic fermentation (Marcano), 1885, A., 181.
of meat (Marcano), 1888, A., 1318.
Peptonisation (Chandelon), 1884, A., 1390; 1885, A., 1252.
Peptonised foods (Horton and Smith), 1891, A., 953.
Peptotoxin (Salkowski), 1891, A., 1267.
erbromic acid. See under Bromine.
Perchloric acid. See under Chlorine.
Percolation, continuous, with boiling liquids, apparatus for (Will), 1885, A., 631; (Thresh), 1885, A., 835.
Percylite (Websky), 1888, A., 561.
from Chili (v. Sandberger), 1887, A., 902.
Perezia fruticosa, pipitzahoic acid in the roots of (Greenish), 1885, A., 396.
Perezinone and its salts (Mylius), 1885, A., 778.
Perezone (*pipitzahoic acid*) and its derivatives (Greenish), 1885, A., 396; (Anschütz), 1885, A., 776; (Mylius), 1885, A., 777, 805; (Anschütz and Leather), 1885, A., 777; 1886, T., 709, 712; P., 229.
action of hydroxylamine and phenylhydrazine on (Anschütz and Leather), 1886, T., 723, 724.
*di*bromide and amido- (Anschütz and Leather), 1886, T., 720, 731.
Perezonoxime (Mylius), 1885, A., 777; (Anschütz and Leather), 1886, T., 721.
Perfumes, extraction of (Naudin), 1884, A., 378.
Perhydroanthracene (Lucas), 1888, A., 1201; 1890, A., 637.
Perhydrofluorene (Liebermann and Spiegel), 1889, A., 720.
Perhydrophenanthrene (Liebermann and Spiegel), 1889, A., 720; (Lucas), 1890, A., 637.
Perhydropicene (Liebermann and Spiegel), 1889, A., 720.
Pericardial fluid, chylous (Hasebroek), 1888, A., 736.
Periclase from Nordmarken (Sjögren), 1889, A., 216.
artificial (Otto and Kloos), 1891, A., 991.
See also Magnesium oxide.
Peridinia, pigments of the (Schütt), 1890, A., 1172.
Peridinia-chlorophyllin and **peridinin** (Schütt), 1890, A., 1173.
Peridot of Schelinger Matten (Knop), 1887, A., 1086.
Peridotite from Arkansas (Branner and Brackett), 1890, A., 345.
of Elliot Co., Kentucky (Diller), 1886, A., 993; 1889, A., 680.
from the Harz (Koch), 1891, A., 24.
of Iron Mine Hill, Cumberland, Rhode Island (Wadsworth), 1889, A., 27.
in New York (Williams), 1886, A., 433; (Smyth), 1892, A., 1057.

Periodic acid and **periodates.** See under Iodine.
Periodic law (CARNELLEY), 1885, A., 344; 1886, A., 503; (SPRING), 1887, A., 211; (MENDELÉEFF), 1889, T., 634.
  history of the (NEWLANDS), 1884, A., 958.
  and the occurrence of the elements in nature (CARNELLEY), 1885, A., 13.
  approximate algebraic expression of the (CARNELLEY), 1891, A., 13.
  relation of certain properties of metals to the (ROBERTS-AUSTEN), 1889, A., 105; 1891, A., 1161.
  and mordants (PRUD'HOMME), 1891, A., 523.
  experimental researches on the (BRAUNER), 1889, T., 382; P., 94.
Periodic property of the elements (SUTHERLAND), 1891, A., 12.
Periodic relations of the elements (BASSETT), 1892, A., 562.
Periodides. See under Iodine.
Perkin's reaction (FITTIG), 1883, A., 1122; 1885, A., 663; (PERKIN), 1886, T., 317; (SALOMONSON), 1888, A., 476; (REBUFFAT), 1891, A., 69.
  in the paraffin series (SCHNEEGANS), 1885, A., 649.
  synthesis of a sulphur-derivative of cinnamic acid by (LOVÉN), 1886, A., 241.
Permanganic acid and **permanganates.** See under Manganese.
Permeability of precipitated membranes (TAMMANN), 1892, A., 1383.
Permolybdic acid and **permolybdates.** See under Molybdenum.
Perofskite, so-called, from Magnet Cove, Arkansas (MAR), 1891, A., 529.
  from Rympfischwäng near Zermatt, analysis of (BRUN), 1884, A., 402.
  artificial production of (BOURGEOIS), 1884, A., 565.
Peronospora viticola. See Mildew in vines under Agricultural Chemistry.
Peroxides, constitution of (RICHARZ), 1888, A., 769; (TRAUBE), 1889, A., 939.
  electromotive force of thin layers of hydrated (SCHREBER), 1889, A., 661.
  as oxidising agents (POLLACCI), 1886, A., 507.
  reactions of (BERTHELOT), 1883, A., 425.
  estimation of the available oxygen in (DE KONINCK and LECRENIER), 1891, A., 1136.
Peroxides of the alkaline earths, estimation of (KASSNER), 1891, A., 245.
  estimation, volumetric, of (DIEHL), 1883, A., 242.
Peroxyprotoic acid (MALY), 1888, A., 1120.
Per-ruthenic acid and **per-ruthenates.** See under Ruthenium.
Persbergite, analysis of (IGELSTRÖM), 1886, A., 31.
Perseitol (*heptitol; perseite*). See Carbohydrates.
Perspiration, chemistry of (CAPRANICA), 1884, A., 189.
  secretion of, by the skin after taking alcohol (BODLÄNDER), 1888, A., 977.
  of animals. See Agricultural Chemistry.
Perstannic anhydride. See under Tin.
Persulphuric acid and **persulphates.** See under Sulphur.
Perthiocyanic acids, *n*- and *iso*- (KLASON), 1889, A., 227.
Perthiocyanogen, preparation of, by electrolysis (GOPPELSROEDER), 1885, A., 107.
  fixing of, in printing (SCHMID), 1884, A., 796.
  See also "Canarin."
Perthiocyanoglycollic acid (KLASON), 1889, A., 229.
Perthiomolybdates. See under Molybdenum.
Pertitanic acid. See under Titanium.
Pertungstic acid. See under Tungsten.
Peru balsam. See Balsam, Peru.
Petalite from Maine (CLARKE), 1892, A., 1411.
  from Utö, analysis of (SONDÉN), 1883, A., 440.
Petitgrain, oil of ("*oil of petitgrain*") (SEMMLER and TIEMANN), 1892, A., 868.
Petrographical purposes, application of a solution of barium-mercury iodide to (ROHRBACH), 1883, A., 1060.
Petrographical research, evidence afforded by, of chemical change under great pressure (JUDD), 1890, T., 404; P., 35.
Petrography of South West Africa (WULF), 1890, A., 221.
  of the South West Brazilian frontier (MACHADO), 1888, A., 926.
Petroleum, Mineral- and **Paraffin-oils**—
  American, distillation of (MENDELÉEFF), 1885, A., 708.

Petroleum, Mineral- and Paraffin-oils—
  American, hydrocarbons from, and their derivatives (Lemoine), 1884, A., 1106.
  Baku, acids from (Aschan), 1891, A., 1452.
    acids poor in carbon from (Aschan), 1890, A., 737.

    constitution of hydrocarbons C_nH_{2n} from (Markownikoff and Spady), 1887, A., 922.
  Galician (Lachowicz), 1884, A., 166.
    bases in (Bandrowski), 1887, A., 979.
    p-xylene in (Pawlewski), 1885, A., 1126.
    examination of (Nawratil), 1883, A., 533.
  Italian (Porro), 1883, A., 1180.
  Japanese, distilled, hydrocarbon from (Divers and Nakamura), 1885, T., 924.
  Ohio, sulphur compounds in (Mabery and Smith), 1891, A., 1172.
  Pennsylvanian, complete chlorination of (Hartmann), 1891, A., 811.
  Russian (Biel), 1884, A., 936.
    hydrocarbons of (Le Bel), 1887, A., 225.
  formation of (Engler), 1888, A., 928.
  constitution of (Le Bel), 1890, A., 223.
  physical properties of (Pagliani), 1884, A., 277.
  connection between illuminating power, flashing point and boiling point (Engler), 1886, A., 402.
  heat conductivity of (Chree), 1888, A., 642.
  fractional distillation of, in a current of steam (Rasiński), 1884, A., 936.
  decomposition of, by heat (Lissenko), 1888, A., 436.
  absorption of gases by (Gniewosz and Walfisz), 1888, A., 342.
  action of, on lead (Fox), 1888, A., 1249.
  and the hydrocarbons of coal tar and shale tar, relations between (Kraemer and Böttcher), 1887, A., 648.

Petroleum, Mineral- and Paraffin-oils—
  adulteration of, by means of solar oil (Heppe), 1885, A., 599.
  process for solidifying (Roth), 1885, A., 309.
  lubricating, thickening material for (Marquardt), 1886, A., 651.
  safety of (Newbury and Cutter), 1889, A., 82.
  alkaloid-like bases in (Weller), 1887, A., 979.
  pyridine-like bases in (Zaloziecki), 1892, A., 1357.
  different, presence of ψ-cumene and mesitylene in (Engler), 1885, A., 1209.
  products of the manufacture of gas from (Armstrong and Miller), 1885, P., 77.
  natural, mineral matter in (Le Bel), 1889, A., 226.
  constitution of the oxygen compounds in (Zaloziecki), 1891, A., 999.
  raw, sulphur compounds in (Mabery and Smith), 1890, A., 350.
  testing for, in fat oils, oleins, and fuller's fat (Focke), 1886, A., 581.
  testing (Stoddard), 1883, A., 383, 517; 1884, A., 1431; (Beilstein), 1884, A., 369, 500; (Gray), 1892, A., 542.
  testing in tropical climates with Abel's apparatus (Abel and Redwood), 1884, A., 877.
  detection of fat oils in (Lux), 1886, A., 103.
  detection of resin oils in (Valenta), 1885, A., 93; (Storch), 1888, A., 536; (Grittner), 1892, A., 548.
  estimation of, in fat oils (Grittner), 1891, A., 505.
  estimation of resin oils in (Demski and Morawski), 1886, A., 282.
  estimation of, in turpentine (Burton), 1890, A., 669.
  separation of, from saponifiable fats (Gawalowski), 1887, A., 1001.
Petroleum-coke, analysis of (Lidoff), 1883, A., 408.
Petroleum gas, action of sulphuric and hydrochloric acids on (Lonatschewski-Petruniaka), 1889, A., 187.
  compressed, liquid hydrocarbons from (Williams), 1884, A., 879.
Petroleum lamps (Biel), 1884, A., 936; (Schmelck), 1885, A., 452.
Petroleum-residues, sulphur compounds in (Mabery and Smith), 1890, A., 350.

Petroleum-residues, recovery of paraffin and heavy oils from (DURIN), 1885, A., 463.
Pettenkofer's reaction (MYLIUS), 1887, A., 1149.
Peucedanine (*imperatorine*), reactions of (BROCINER), 1890, A., 310.
Peziza aurantia and *P. convexula*, orange-red colouring matter of (ROSOLL), 1884, A., 847.
Phacellite from Vesuvius (SCACCHI), 1891, A., 22.
Phaeochlorophyll. See Phyllocyanin.
Phalaris arundinacea, analyses of (WILSON), 1889, A., 1078.
Phalaris canariensis, composition of the seeds of (MAYER), 1889, A., 794.
Phanerogams, assimilation of free nitrogen by (FRANK), 1892, A., 370.
Pharmacolite (DUFET), 1888, A., 794.
  from Styria (HATLE and TAUSS), 1891, A., 21.
  from Völleg (HATLE and TAUSS), 1888, A., 429.
  from the Vosges (JANNETTAZ), 1890, A., 342.
Pharmacosiderite from Sandberg, Hungary (SZABÓ de St. MIKLÓS), 1886, A., 517.
Phaseolus vulgaris, nitrogen assimilation of (NOBBE, SCHMID, HILTNER and HOTTER), 1891, A., 1538.
  constituents of the seed pods of (LIKIERNIK), 1891, A., 606.
  galactan in the seeds of (MAXWELL), 1890, A., 917.
Phaseomannite. See Inosite under Carbohydrates.
Phasol (LIKIERNIK), 1891, A., 606.
Phellandrene. See Terpenes.
Phellandrium aquaticum (PESCI), 1884, A., 331.
Phellonic acid (GILSON), 1891, A., 465.
p-**Phenacetide**, *di*nitro- (WENDER), 1890, A., 751.
Phenacetin, detection of antifebrin in (SCHRÖDER), 1889, A., 660.
  detection of, in urine (SESTINI and CAMPANI), 1892, A., 665.
  o-nitro- (AUTENRIETH and HINSBERG), 1892, A., 160.
Phenacetolin as an indicator (THOMSON), 1883, A., 682, 824; 1884, A., 691, 869.
Phenaceturamide (HOTTER), 1888, A., 1299.
Phenaceturic acid, and its derivatives (GIACOSA), 1884, A., 1061; (HOTTER), 1888, A., 1298.
  in the urine of horses (SALKOWSKI), 1885, A., 413.
Phenaceturic acid, synthesis of (HOTTER), 1887, A., 368.
  amido- and nitro- (HOTTER), 1888, A., 1299.
β-**Phenacetyl-αβ-diphenylacryl-amide** and **-ethylamide** (COHN), 1892, A., 483.
Phenacite. See Phenakite.
Phenacyl compounds (STAEDEL), 1888, A., 1093.
Phenacyl*iso*amyl-acetic and **-malonic acids** (PAAL and HOFFMANN), 1890, A., 1100.
Phenacylethylacetic acid (DITTRICH and PAAL), 1889, A., 257.
Phenacylethylanilide (WELLER), 1883, A., 582.
Phenacylethylmalonic acid (DITTRICH and PAAL), 1889, A., 257.
Phenacylic bromide. See Acetophenone, ω-brom-.
Phenacylic sulphide (TAFEL and MAURITZ), 1891, A., 302.
Phenacylphthalamic acid (GOEDECKEMEYER), 1888, A., 1294.
Phenacylphthalimide (GOEDECKEMEYER), 1888, A., 1294.

Phenol of birch wood tar (Pfrenger), 1891, A., 432.
  from blast furnace tar (Smith, Coutts, and Brothers), 1885, P., 104; 1886, T., 17.
  in the stem, leaves, and cones of *Pinus sylvestris* (Griffiths), 1884, A., 863.
  in human sweat (Kast), 1887, A., 1132.
  preparation of, from benzene (Friedel and Crafts), 1889, A., 241.
  electrolysis of, with alternating currents (Drechsel), 1884, A., 1136; 1888, A., 1276.
  thermochemistry of (Stohmann and Langbein), 1892, A., 764; (de Forcrand), 1892, A., 1042.
  heat of combustion of (Berthelot and Luginin), 1887, A., 762.
  thermal function of (de Forcrand), 1892, A., 1042.
  depression of the melting point by (Juillard and Curchod), 1892, A., 556.
  action of allylic iodide on, in presence of zinc or aluminium-foil (Frankland and Turner), 1883, T., 357.
  action of bromine on (Weinreb and Bondi), 1885, A., 1266.

Phenol, action of diazo-*p*-nitrobenzene on (Meldola), 1885, T., 658.
  action of *di*chlorether on (Wislicenus and Reinhardt), 1888, A., 373.
  action of the chlorides of propionyl and butyryl on (Perkin), 1889, T., 546; P., 106.
  action of chlorine on, in alkaline solution (Hantzsch), 1889, A., 853.
  action of epichlorhydrin on (Lindemann), 1891, A., 1198.
  action of iodine on, in alkaline solution (Messinger and Vortmann), 1889, A., 1150.
  action of, on ketonic acids (Böttinger), 1884, A., 55.
  action of methylchloroform on, in presence of alkalis (Biginelli), 1891, A., 296.
  condensation of, with *m*-nitrobenzaldehyde (de Varda and Zenoni), 1891, A., 1346.
  action of nitrogen iodide on (Lepetit), 1890, A., 1402.
  action of nitrous anhydride on (Friedburg and Mandel), 1890, A., 1401.
  action of phospham on (Vidal), 1892, A., 1311.
  action of phosphorous chloride on (Anschütz and Emery), 1887, A., 947; 1890, A., 34.
  action of quinonechlorimide on (Möhlau), 1884, A., 593.
  action of sulphur *di*chloride on (Tassinari), 1887, A., 807.
  action of titanium chloride on (Schumann), 1888, A., 679.
  chlorination and bromination of (Gordon), 1891, P., 64.
  oxidation of, by nitrobenzene (Siegfried), 1885, A., 1060.
  perchlorination of (Hugounenq), 1889, A., 1149.
  sulphonation of (Fulda), 1891, A., 391.
  as a reagent for nitrates, nitrites and chlorates (Hager), 1886, A., 99; (Lindo), 1888, A., 1337.
  cause of the red colour of (Mylius), 1887, A., 807.
  red, colouring matter of (Fabini), 1891, A., 1198.
  mixed vapours of carbon *di*sulphide and, action of hot copper on (Carnelley and Dunn), 1888, P., 53; A., 1095.
  compound of, with carbonic anhydride (Klepl), 1883, A., 584.
  compound of, with sulphurous anhydride (Hölzer), 1883, A., 585.
Phenol derivatives (Henry), 1883, A., 802; (Benedikt), 1883, A., 985.
  homologues of, preparation of (Anon.), 1883, A., 253.
    oxidation of (Heymann and Koenigs), 1886, A., 542; 1887, A., 241, 1035.
    conversion of, into amines (Lloyd), 1887, A., 721; 1889, A., 700.
  sodium derivative of, action of iodine and of nitric *per*oxide on (Schall), 1883, A., 1109.
    action of sulphur on (Haitinger), 1883, A., 938.
  idiosyncrasy of certain animals with respect to (Zwaardemaker), 1891, A., 762.
Phenol, *o*-amido-, action of acetone on (Engler and Bauer), 1889, A., 524.
    action of chloracetic acid on (Vater), 1884, A., 1144.
    action of chloracetic chloride on (Aschan), 1887, A., 814.
    action of chlorine on (Zincke and Küster), 1888, A., 1277; 1889, A., 599; 1890, A., 754, 1255.
    action of ethylic acetoacetate on (Hantzsch), 1883, A., 1111.
    benzoate (Böttcher), 1883, A., 800.
  p-amido-, derivatives of (Kalckhoff), 1883, A., 1109.
    action of acetone on (Engler and Bauer), 1889, A., 524.
    action of chloracetic acid on (Vater), 1884, A., 1144.
    oxidation of (v. Bandrowski), 1889, A., 973.
  o- and *p*-amido-, action of picric chloride on (Turpin), 1891, T., 718.
    action of quinones on (Zincke and Hebebrand), 1885, A., 257.
    condensation products of (Haegele), 1892, A., 1451.
  o-, *m*- and *p*-amido-, hydrochlorides of, reactions of (Kalckhoff), 1883, A., 1111.
  m:*p*-*di*amido- (Hähle), 1891, A., 431.
  *tri*amido-, and some of its derivatives (Bamberger), 1884, A., 309.
  bromo-derivatives of (Benedikt), 1883, A., 984; (Werner), 1885, A., 658.
  bromo-, the so-called "fourth" (Fittica), 1884, A., 55; 1887, A., 134; (Hand), 1886, A., 1017.
  p-bromo- (Werner), 1884, A., 900.
  3:5-*di*bromo- (Blau), 1887, A., 242.

  - thermochemistry of (Stohmann and Langbein), 1892, A., 763.
  - heats of combustion and formation of (Stohmann, Rodatz and Herzberg), 1887, A., 98.
  - heats of solution, and of neutralisation of (Berthelot), 1886, A., 6.
  - of complex function, heats of solution and of neutralisation of (Berthelot and Werner), 1885, A., 628; (Berthelot), 1886, A., 7.
  - polyhydric, heat of neutralisation of (Berthelot and Werner), 1885, A., 628.
  - electrical conductivity of (Berthelot), 1890, A., 677.
  - specific volumes of (Pinette), 1888, A., 335.
  - polyvalent, action of acetaldehyde on (Causse), 1887, A., 809.
  - action of aldehydes on (Michael), 1884, A., 597; 1887, A., 825; (Michael and Comey), 1884, A., 598; (Michael and Ryder), 1886, A., 695; (Claisen), 1887, A., 270.

Phenols, condensation of aromatic aldehydes with (TRZCIŃSKI), 1884, A., 590.
action of alkali hydrosulphides on (FUCHS), 1889, A., 496; 1891, A., 46.
condensation of, with *iso*amylene and cinnamene (KOENIGS and CARL), 1892, A., 446.
action of benzaldehyde on (MICHAEL and RYDER), 1887, A., 723; (RUSSANOFF), 1889, A., 1188; 1891, A., 1234.
polyhydric, action of borax on (LAMBERT), 1889, A., 864.
polyhydric, action of chloro*di*nitrobenzene on (NIETZKI and SCHÜNDELEN), 1892, A., 310.
action of chlorine on (ZINCKE), 1887, A., 960; 1888, A., 708; 1892, A., 1186; (ZINCKE and KEGEL), 1889, A., 265.
higher, action of cyanuric chloride and chlorocyanuric diamide on (OTTO), 1887, A., 1033.
action of diazobenzene on (LIEBERMANN and v. KOSTANECKI), 1884, A., 1146.
action of formaldehyde on (KLEEBERG), 1891, A., 1199.
action of hydrazine hydrate on (CURTIUS and THUN), 1891, A., 1360.
condensation of unsaturated hydrocarbons with (KOENIGS), 1891, A., 208, 571; (KOENIGS and CARL), 1892, A., 446; (KOENIGS and MAI), 1892, A., 1443.
action of hydrogen chloride on a mixture of, with aldehyde (CLAUS and TRAINER), 1887, A., 231.
action of hydrogen *per*oxide on (MARTINON), 1885, A., 658.
action of aromatic hydroxy-acids on (MICHAEL), 1884, A., 310.
action of methylchloroform and ethylchloroform on alkaline solutions of (HEIBER), 1892, A., 308.
action of nitric acid on (STAEDEL), 1883, A., 861.
action of nascent nitrous acid on (DENINGER), 1890, A., 38.
action of phenylhydrazine on (SEYEWITZ), 1892, A., 49.
action of phenylic cyanate on (SNAPE), 1885, T., 770; (LEUCKART and SCHMIDT), 1885, A., 1224.
action of phosphorus *tri*sulphide on (GEUTHER), 1884, A., 54.
action of phthalic chloride on (MEYER), 1891, A., 1485.
action of thionyl chloride on (TASSINARI), 1891, A., 186.

Phenols, reaction between diazoamido-compounds and (HEUMANN and OECONOMIDES), 1887, A., 664.
desmotropy in (HERZIG and ZEISEL), 1888, A., 822; 1889, A., 247, 966; 1890, A., 243, 1404; 1891, A., 75.
behaviour of, towards the alkali hydrosulphides (FUCHS), 1889, A., 496; 1891, A., 46.
introduction of the carboxyl-group into (v. KOSTANECKI), 1886, A., 242.
iodated (MESSINGER and VORTMANN), 1889, A., 1150.
iodation of, in ammoniacal solution (WILLGERODT and KORNBLUM), 1889, A., 697.
iodation of, by nitrogen iodide (WILLGERODT), 1888, A., 940.
substituted, reduction of (PFAFF), 1883, A., 802.
conversion of, into amines (BUCH), 1885, A., 147; (MERZ and MÜLLER), 1887, A., 576.
conversion of, into nitriles and carboxylic acids (MERZ), 1883, A., 802; (HEIM), 1883, A., 1111.
colouring matters of. See Colouring matters.
combination of camphor with (LÉGER), 1890, A., 1427.
some compounds of, with amido-bases (DYSON), 1883, T., 466.
compounds of benzo*tri*chloride with (DOEBNER), 1883, A., 861; 1890, A., 901.
benzoyl compounds of (SKRAUP), 1889, A., 1152.
compounds of, with ethylic aceto-acetate (v. PECHMANN and COHEN), 1884, A., 1331; 1885, A., 56.
compounds of volatile fatty acids with (NENCKI), 1890, A., 488.
carbonates of (WALLACH), 1885, A., 254.
ethers of, boiling points and specific volumes of (PINETTE), 1888, A., 335.
ethereal derivatives of (STAEDEL), 1883, A., 585.
substitution-products of ethereal derivatives of (STAEDEL), 1883, A., 662.
preparation of methyl ethers from (VINCENT), 1884, A., 589.
phosphates of, and reactions of (KREYSLER), 1885, A., 1054, 1055.
silicates of (MARTINI and WEBER), 1883, A., 983; (HERTKORN), 1885, A., 1056.
dihydric and trihydric, physiological action of (GIBBS and HARE), 1890, A., 1019.

Phenols as reagents for carbohydrates (Ihl), 1885, A., 694.
  as reagents for nitrates, nitrites and chlorates (Lindo), 1888, A., 1337.
  commercial, analysis of (Casthélaz), 1885, A., 447.
  detection of, in urine (Baumann), 1883, A., 885.
  estimation of, in urine (Baumann), 1883, A., 885; (Rumpf), 1892, A., 544.
  estimation, volumetric, of (Messinger and Vortmann), 1890, A., 1473.
Phenolacenaphthene, nitro*di*nitroso- (Willgerodt), 1891, A., 689.
Phenolanthracene, nitro*di*nitroso- (Willgerodt), 1891, A., 689.
Phenolazo-. See under Azo-.
Phenolbishydrazobenzene (*bisphenylhydrazophenol*) (v. Baeyer and Kochendoerfer), 1889, A., 1162.
Phenol-blue (*dimethylamidophenylquinoneimide; quinonedimethylanilineimide*) (Möhlau), 1886, A., 146; (Fogh), 1888, A., 592.
  preparation of (Möhlau), 1884, A., 594.
  *tri*chloro- (Möhlau), 1884, A., 595.
Phenol-*mono*- and -*hemi*-camphorides (Léger), 1890, A., 1427.
Phenolcarbamide (Eckenroth), 1886, A., 946.
Phenoldiammonium (Curtius and Thun), 1891, A., 1360.
Phenoldisulphonic acid (Allain Lecanu), 1889, A., 1185.
Phenolic acids, instability of carboxyl in (Cazeneuve), 1892, A., 1332.
Phenolisatin (v. Baeyer and Lazarus), 1886, A., 155.
Phenolphenylamine, derivatives of (v. Bandrowski), 1888, A., 943.
Phenolphthalein, addition of, to margarine (Holm), 1891, A., 872.
  as an indicator (Thomson), 1883, A., 682, 824, 827; 1884, A., 691, 869; (Long), 1885, A., 835; (Léger), 1885, A., 931.
  as an indicator in the estimation of carbonic anhydride in mixtures of gases (Blochmann), 1884, A., 1072.
  behaviour of, with ammonia (Long), 1889, A., 746.
  behaviour of alkaline solutions of, in presence of alcohol (H. N. and C. N. Draper), 1887, A., 618.
  anhydride. See Fluoran.
  ethyl ether (Grande), 1892, A., 1096.
Phenolphthalin ethyl ether (Herzig), 1892, A., 1319.
Phenolquinoline. See Hydroxyphenylquinoline.
Phenol-series, isomeric changes in (Ling), 1886, P., 268; 1887, T., 147; 1889, T., 583; P., 125.
Phenolsulphonic acid, 2-chlor-4-amido- (Kollrepp), 1886, A., 1019.
Phenol-4-sulphonic acid, 2:6-*di*iodo- (Kehrmann), 1888, A., 595, 841, 842; (Ostermayer), 1888, A., 596.
o-**Phenolsulphonic acid** (*hydroxyphenylsulphonic acid*) (Serrant), 1886, A., 707; (Allain Lecanu), 1889, A., 1183.
  as an antiseptic (Vigier), 1885, A., 612; (Serrant), 1885, A., 1166.
  bromo- (Allain Lecanu), 1889, A., 1184.
  o:p-*di*chloro-, action of sulphuric acid on (Gordon), 1891, P., 64.
  See also Aseptol.
p-**Phenolsulphonic acid** (Allain Lecanu), 1886, A., 1031.
  *di*nitro-, preparation of (Beyer and Kegel), 1885, A., 269.
Phenolsulphonic acids from camphor (Cazeneuve), 1890, A., 791.
  amido-, and their relationship to Liebermann's colouring matters (Brunner and Kraemer), 1884, A., 1354.
    action of bleaching powder on (Hirsch), 1887, A., 834.
  iodo- (Kehrmann), 1889, A., 993.
Phenolsulphuric acid, preparation of, from urine (Brieger), 1884, A., 1353.
Phenomalic acid. See Acetylacrylic acid.
Phenomorpholine (Knorr), 1889, A., 1220.
Phenonaphthacridone (Schöpff), 1892, A., 1477.
Phenonaphtho-xanthone (v. Kostanecki), 1892, A., 1099.
Phenophenanthrazine, nitro- and amido- (Heim), 1888, A., 1097.
Pheno-α-phenyl-*p*-azoxine (Lellmann and Donner), 1890, A., 523.
Phenoquinoline-xanthone (v. Kostanecki), 1892, A., 1099.
Pheno-quinoxazine and -quinoxazone (Möhlau), 1892, A., 887.
Phenosaffranine and its derivatives (Nietzki), 1883, A., 731; (anon.), 1884, A., 538; (Barbier and Vignon), 1888, A., 688; (Nietzki and Otto), 1888, A., 831.
  constitution of (Bernthsen), 1887, A., 140.
  hydrochloride (Witt), 1887, A., 250.
  See also Saffranine.

α-**Phenotriazine** (Bischler), 1890, A., 143; (Hempel), 1890, A., 613.
  p-bromo- (Bischler and Brodsky), 1890, A., 152.
Phenotriazines, synthesis of (Busch), 1892, A., 734.
Phenoxides, compounds of, with cuprous and mercurous chlorides (Pouchet), 1888, A., 586.
Phenoxyacetal and its thio-derivative (Autenrieth), 1891, A., 541.
Phenoxyacetone, thio- (*acetonylphenylic sulphide*) (Delisle), 1889, A., 489; (Autenrieth), 1891, A., 541.
Phenoxyacetonediethylmercaptole, thio- (Autenrieth), 1891, A., 568.
Phenoxyacetonediphenylmercaptole, thio- (Autenrieth), 1891, A., 568, 1067.
Phenoxyacetophenone and its *p*-nitroderivative (Möhlau), 1883, A., 332.
Phenoxyacetylacrylic acids. See Coumaroxyacetic acids.

Phenylacetaldehyde, condensation of, with ammonia and ethylic acetoacetate (JEANRENAUD), 1888, A., 965.
  action of nitric acid on (FORRER), 1884, A., 1020.
  derivatives of (FORRER), 1884, A., 1020.
Phenylacetaldehydephenylhydrazone (FISCHER and SCHMIDT), 1888, A., 699.
Phenylacetaldoxime (DOLLFUS), 1892, A., 1174.
Phenylacetamide, action of bromine on (v. HOFMANN), 1886, A., 45.
  p-amido- (PURGOTTI), 1891, A., 562.
  p-cyano- (MELLINGHOFF), 1890, A., 239.
  m- and *p*-nitro- (PURGOTTI), 1891, A., 562.
Phenylacetamidine, and its derivatives (LUCKENBACH), 1884, A., 1134.
Phenylacetic acid (ANSCHÜTZ and BERNS), 1887, A., 829.
  preparation of (STAEDEL), 1886, A., 945; (ZINSSER), 1892, A., 344.
  thermochemistry of (STOHMANN, KLEBER and LANGBEIN), 1889, A., 1096.
  influence of, on proteid metabolism (SALKOWSKI and KOTOFF), 1888, A., 513.
  mixtures of β-phenylpropionic acid and, melting point and separation of (SALKOWSKI), 1885, A., 602; 1886, A., 351.
  derivatives of (GABRIEL), 1883, A., 64; (R. MEYER), 1886, A., 63; (A. MEYER), 1888, A., 693; (HAUSSKNECHT), 1889, A., 506.
  ethereal salts of, action of sodium on (HODGKINSON), 1886, P., 188.
  oxime of, and its salts (MÜLLER), 1883, A., 1129; 1884, A., 584; (HANTZSCH), 1890, A., 1274; 1891, A., 444.
Phenylacetic acid, amido- (GABRIEL and BORGMANN), 1883, A., 1121.

Phenylacetic acid, amido-*p*-cyano- (Traube), 1883, A., 193.
  bromo-, an apparent exception to the Le Bel-van't Hoff hypothesis (Easterfield), 1891, T., 71.
   action of, on ethylic acetoacetate (Weltner), 1884, A., 746; 1885, A., 793.
  m-bromo*di*nitro- (Jackson and Robinson), 1890, A., 378.
  bromonitramido- (Gabriel), 1883, A., 64.
  p-cyano- (Mellinghoff), 1890, A., 239.
  m-nitro- (Gabriel and Borgmann), 1883, A., 1121.
  o:p-*di*nitro- (Heckmann), 1884, A., 178.
Phenylacetic anhydride, amido- (Kossel), 1892, A., 468.
Phenylacetimido-acetate (Luckenbach), 1884, A., 1134.
Phenylacetimidoethyl ether, and its hydrochloride (Luckenbach), 1884, A., 1134.
Phenylaceto-. See also Phenylacetyl-.
Phenylacetobromamide (Hoogewerff and van Dorp), 1888, A., 1195.
Phenylaceto-*m*-chloranilide (Bischler), 1892, A., 1465.
Phenylaceto-diethylamide and **-diphenylamide** (Haussknecht), 1889, A., 506.
Phenylacetodiphenylhydrazide (Bölsing and Tafel), 1892, A., 981.
Phenylacetonitrile (*benzylic cyanide*), heats of combustion and formation of (Berthelot and Petit), 1889, A., 812.
  displacement of the methylene hydrogen atoms in (Janssen), 1889, A., 596; (Rossolymo), 1889, A., 861; (Buddeberg), 1890, A., 1142.
  action of, on organic acids (Colby and Dodge), 1891, A., 409.
  action of phthalic anhydride on (Gabriel), 1885, A., 902.
  transformation of, in the organism (Giacosa), 1884, A., 1061.
  substituted (Neure), 1889, A., 597.
  and its substitution products, condensation of, with aldehyde and with amylic nitrite (Frost), 1889, A., 597.
  metallic derivatives of (Haussknecht), 1889, A., 507.
  derivatives of (Luckenbach), 1884, A., 1134; (Meyer), 1888, A., 693.
Phenylacetonitrile (*benzylic cyanide*), *m*-amido- (Friedländer), 1884, A., 737; (Salkowski), 1884, A., 1176.
Phenylacetonitrile (*benzylic cyanide*), *p*-amido-, and its salts (Friedländer and Mähly), 1883, A., 919; (Friedländer), 1884, A., 737.
  chloro- (Michael and Jeanprêtre), 1892, A., 1088.
  o-cyano- (Gabriel and Otto), 1887, A., 1035.
   action of hydroxylamine on (Eichelbaum), 1890, A., 146.
  m-cyano- (Reinglass), 1891, A., 1344.
  p-cyano- (Mellinghoff), 1890, A., 239.
  o-nitro- (Perkin), 1883, T., 111; (Salkowski), 1884, A., 1176; (Bamberger), 1887, A., 131.
  m-nitro- (Salkowski), 1884, A., 1176.
  p-nitro-, diazo-derivatives of (Perkin), 1883, T., 111.
   condensation products of (Remse), 1891, A., 208.
Phenylacetonitrilecarbamide (Pinner and Lifschütz), 1887, A., 1055.
Phenylacetonitrile-*o*-carboxylic acid, and its salts (Wislicenus), 1885, A., 532.
Phenylacetonylphenylic sulphide (Delisle), 1889, A., 489.
Phenylacetophenylhydrazide (Bülow), 1887, A., 138; (Purgotti), 1891, A., 59.
Phenylaceto-*o*-toluidide (Bischler), 1892, A., 1465.
Phenylaceto-*p*-toluidide (Purgotti), 1891, A., 59; (Bischler), 1892, A., 1465.
Phenylacetotolylenediamide (Bistrzycki and Cybulski), 1891, A., 694.
Phenylacetoxy-. See Acetoxyphenyl-.
Phenylacetylacetone (Fischer and Bülow), 1885, A., 1237.
Phenylacetylene (Holleman), 1888, A., 261.
  reduction of (Aronstein and Holleman), 1889, A., 878.
  silver derivative of (Liebermann and Damerow), 1892, A., 831.
Phenylacetylenebenzoylacetic acid (Kapf and Paal), 1888, A., 839; 1889, A., 148.
Phenylacetylide, silver derivative of (Liebermann and Damerow), 1892, A., 831.
Phenylacetyl-. See also Acetylphenyl-.
Phenylacridine (Bernthsen), 1883, A., 580; 1884, A., 1356; (Bernthsen and Bender), 1883, A., 1133.
  from chrysaniline (Fischer and Körner), 1884, A., 749.

Phenylacridine, derivatives of (Bernthsen), 1884, A., 1356; (Claus and Nicolaysen), 1886, A., 68.
  ammonium bases of (Bernthsen), 1892, A., 1095.
  hydrochloride (Claus and Nicolaysen), 1886, A., 68.
  methhydroxide (Bernthsen and Bender), 1883, A., 1133.
    constitution of (Bernthsen), 1884, A., 1357.
  amido-. See Anilidoacridine.
  *di*amido-. See Chrysaniline.
Phenylacrosazones, α- and β- (Fischer and Tafel), 1888, A., 39.
α-Phenylacrylic acid. See Atropic acid.
β-Phenylacrylic acid. See Cinnamic acid.
Phenyl-α-alanine. See α-Anilidopropionic acid and Phenyl-α-amidopropionic acid.
Phenyl-β-alanine. See β-Anilidopropionic acid.
Phenylalanine-*p*-sulphonic acid (Erlenmeyer and Lipp), 1883, A., 993.
Phenylallenyl-. See Cinnamenyl-.
Phenylallylacetonitrile (Buddeberg), 1890, A., 1142.
Phenylallylene (Körner), 1888, A., 368.
  and its *di*- and *tetra*-bromide (Körner), 1889, A., 372.
Phenylallylhydrazine (Fischer and Knoevenagel), 1887, A., 933.

Phenyl*iso*butylthiocarbimide (Pahl), 1884, A., 1010.

Phenylbutyric acid (Jayne), 1883, A., 473.
  α- and β-bromo- (Jayne), 1883, A., 472; (Fittig and Morris), 1890, A., 891.
  αβ-*di*bromo-, decomposition of (Fittig, Obermüller and Schiffer), 1892, A., 987.
  γ-chloro- (Fittig and Morris), 1890, A., 891.
  α-iodo- (Fittig and Morris), 1890, A., 891.

Phenyl*iso*butyric acid (*α-methylhydrocinnamic acid*), derivatives of (Edeleanu), 1887, A., 583; 1888, T., 558; P., 55.
  αβ-*di*bromo- (A. Körner), 1888, A., 368.
    derivatives of (A. Körner), 1888, A., 368; (T. Körner), 1889, A., 372.
  m-chloro- (v. Miller and Rohde), 1890, A., 1140.
  p-nitro- and nitramido- (Edeleanu), 1888, T., 558.

α-Phenylbutyric acid (*phenylethylacetic acid*) (Neure), 1889, A., 597.

Phenylbutyric-*o*-carboxylic acids (Roser), 1886, A., 243.

Phenylbutyrolactone (Jayne), 1883, A., 472.
  action of halogen acids on (Fittig and Morris), 1890, A., 891.
  action of halogen acids and of gaseous ammonia on (Fittig), 1884, A., 744.
  β-bromo- and *iso*bromo- (Fittig, Obermüller and Schiffer), 1892, A., 987.

Phenyl*iso*butyroxypivalic acid and anhydride (Ott), 1885, A., 663.

Phenylcacodyl (*tetraphenyldiarsine*) (Michaelis and Schulte), 1883, A., 187.

Phenylcarbamic acid, sulpho- (Nölting), 1889, A., 144.

Phenylcarbamide and its derivatives (Pinnow), 1892, A., 460.
  action of halogenated amines on (Gattermann), 1886, A., 795.
  bromo-derivatives of (Bertram), 1892, A., 467.
  di-p-chloro- (Hewitt), 1891, T., 212.

Phenylcarbamides, thio-, melting points of (Paschkowetzky), 1892, A., 324.

Phenylcarbamyl-. See Carbanilido-.

Phenylcarbazacridine (Bizzarri), 1891, A., 219.

Phenylcarbizinecarboxyl-amide and -anilide (Freund and Goldsmith), 1888, A., 1187.

Phenylcarbizinecarboxylic acid, amido- (Freund and Kuh), 1890, A., 1441.
Phenylcarbizine-thiamide and **-thianilide** (Freund and Goldsmith), 1888, A., 1188.
Phenylcarbylamine. See Phenylic *iso*cyanide.
Phenyl*di*chlorocarbindimethylcarbinol (Willgerodt and Genieser), 1888, A., 811.
Phenyl-*m*-chlorophenylhydrazine, *o*:*p*-*di*nitro- (Willgerodt and Mühe), 1892, A., 454.
Phenyl-*p*-chlorophenylhydrazine, *o*:*p*-*di*nitro- (Willgerodt), 1890, A., 1119; (Willgerodt and Böhm), 1891, A., 906.
Phenylchrysylthiocarbamide (Abegg), 1891, A., 731.
α-Phenylcinchonic acid (2′-*phenylquinoline*-4′-*carboxylic acid*) (Doebner), 1887, A., 504.
  homologues of (Doebner and Gieseke), 1888, A., 300.
Phenylcinnamenyl-uramidethoxime and **-uramidoxime** (Wolff), 1890, A., 42.
α-Phenylcinnamic acid, derivatives of (Cabella), 1884, A., 1348.
  o-nitro- (Oglialoro-Todaro and Rosini), 1891, A., 214.
α-Phenylcinnamonitrile (Neure), 1889, A., 597.
α-Phenyl-β-cinnamylideneacrylic acid (Rebuffat), 1885, A., 1137.
α-Phenyl-β-cinnamylideneneacrylonitrile (Freund and Immerwahr), 1890, A., 1408.
Phenylcitraconazide, nitro- (Michael), 1886, A., 699.
1-Phenylcomenamic acid (Mennel), 1885, A., 1203.
Phenylconiine, *o*:*p*-*di*nitro- (Lellmann and Just), 1891, A., 1245.
Phenyl-*p*-coumaric acid, synthesis of (Oglialoro-Todaro), 1884, A., 176.
  derivatives of (Cabella), 1888, A., 694.
Phenylcoumarin, crystallography of (Scacchi), 1885, A., 901.
Phenylcoumarinsulphonic acids, and their salts (Curatolo), 1885, A., 539.
Phenylcrotonaldehyde, *m*-amido- (v. Miller and Kinkelin), 1886, A., 701.
  m-nitro- (v. Miller and Kinkelin), 1886, A., 560.
    base from (v. Miller and Kinkelin), 1886, A., 701.
Phenylcrotonaldehyde, *m*-nitro-, product of the reduction of (v. Miller and Kinkelin), 1886, A., 799.
Phenylcrotonic acid (*α-methylcinnamic acid; phenylmethylacrylic acid*) (Stuart), 1883, T., 404, 407; (Raikow), 1888, A., 369.
  preparation of (Erdmann), 1885, A., 528.
  formation of (Slocum), 1885, A., 662.
  nitration of, in the side chain (Erdmann), 1891, A., 1483.
  action of sulphuric acid on (Erdmann), 1885, A., 528.
  derivatives of (Edeleanu), 1887, A., 583; 1888, T., 558; P., 55.
  β-bromo- (Körner), 1888, A., 368.
  β-chloro- (Perkin and Calman), 1886, T., 158; P., 139.
  m-chloro- (v. Miller and Rohde), 1890, A., 1139.
  m-nitro- (v. Miller and Rohde), 1890, A., 1140.
Phenyl*iso*crotonic acid (*βγ-phenylcrotonic acid*) and its derivatives (Jayne), 1883, A., 472; (Buchner and Dessauer), 1892, A., 850.
  action of nitric acid on (Erdmann), 1884, A., 906.
  oxidation of (Fittig), 1888, A., 595; (Fittig and Obermüller), 1892, A., 986.
  p-chloro- (Schwechten), 1890, A., 620; (Erdmann and Schwechten), 1891, A., 449.
  2:4- and 2:5-*di*chloro- (Schwechten), 1890, A., 620; (Erdmann and Schwechten), 1891, A., 450.
  3:4-*di*chloro- (Erdmann), 1889, A., 265; (Schwechten), 1890, A., 620; (Erdmann and Schwechten), 1891, A., 451.
Phenylcrotonitrilecarbamide (Pinner and Lifschütz), 1887, A., 1055.
Phenyl*iso*croton-α-lactone (Biedermann), 1892, A., 472.
Phenylcumazonic acid (Widman), 1884, A., 304.
Phenylcumylthiocarbamide (Goldschmidt and Gessner), 1887, A., 1039.
Phenylcyanamide and its derivatives (v. Hofmann), 1886, A., 233.
  preparation of (Berger), 1884, A., 1157.
  action of acetamide on (Berger), 1885, A., 387.
Phenylcyanethine. See 6-Phenylamido-5-methyl-2:4-diethyl-*m*-diazine.

Phenylcyantetrazole (Bladin), 1887, A., 139.
Phenyl*iso*cyanuric acid (Rathke), 1888, A., 591; (Smolka and Friedreich), 1890, A., 618.
Phenyl-*p*-cymylcarbinol (Claus and Elbs), 1885, A., 1065; (Elbs), 1887, A., 942.
Phenylcysteine, bromo-, action of acetic anhydride on (Baumann), 1885, A., 514.
Phenyldehydrohexone (Perkin), 1887, T., 731.
  action of hydrogen bromide on (Perkin), 1887, T., 732.
Phenyldehydrohexonecarboxylic acid (Perkin), 1887, T., 728; (Kipping and Perkin), 1890, T., 308.
  action of hydrogen bromide and of water on (Perkin), 1887, T., 732.
  p-nitro- (Perkin), 1887, T., 736.
Phenyldehydropentone (Marshall and Perkin), 1891, T., 886.
Phenyldi-*p*-acetamidoditolylmethane, *β*-*p*-nitro- (Bischler), 1889, A., 132.
Phenyldiacetyl (Müller and v. Pechmann), 1889, A., 1171.
Phenyldi*iso*amylamine (Lloyd), 1887, A., 721; 1889, A., 700.
Phenyldiamylhydrazine (Grimaldi), 1891, A., 302.
Phenyldianethoilmethane, *m*-nitro- (de Varda), 1891, A., 1347.
Phenyldibenzylcarbamide (Hammerich), 1892, A., 1083.
5-**Phenyl-2:4-dibenzyl-*m*-diazine,** 6-amido- (Wache), 1889, A., 684.
as-**Phenyldibenzylthiocarbamide** (Dixon), 1891, T., 567.
Phenyldi*iso*butylamine (Lloyd), 1887, A., 721; 1889, A., 700.
Phenyldi*iso*butylcarbamide, -guanidine and -thiocarbamide (Pahl), 1884, A., 1010.
Phenyldi-*o*-cresolmethane (*phenyldihydroxyditolylmethane*), *m*-nitro- (Siboni), 1892, A., 621.
Phenyldiethyl ethylene oxide (Henry), 1883, A., 803.
Phenyldiethylacetamidine and its hydrochloride (Luckenbach), 1884, A., 1135.
Phenyldiethylalkine. See Hydroxyethylethylaniline.
Phenyldiethylarsine (Schulte), 1883, A., 186.
  action of benzylidenic chloride on (Holle), 1892, A., 984.
Phenyldiethylazonium iodide (Philips), 1889, A., 1158.
Phenyldiethylcarbamide (Gebhardt), 1885, A., 383.
Phenyldiethylenetriamine (Gabriel), 1889, A., 1167.
Phenyldiethylethylidenetrisulphone (Laves), 1892, A., 613.
Phenyldiethylformamidine (Comstock and Wheeler), 1892, A., 707.
Phenyldiethylmethenyltrisulphone, and its chloro- and bromo-derivatives (Laves), 1892, A., 613.
Phenyldiethylthiocarbamine derivatives (Billeter), 1887, A., 823.
Phenyldifurylnaphthadihydroquinoxaline (Fischer), 1892, A., 1475.
Phenyldiguanide derivatives (Smolka and Friedreich), 1888, A., 830.
2′-**Phenyl-1′:3′-dihydroindazine** (Paal), 1891, A., 724.
2′-**Phenyldihydroindole** (Fischer and Schmidt), 1888, A., 699.
Phenyldihydro-*β*-naphthatriazine (Goldschmidt and Poltzer), 1891, A., 840.
Phenyldihydro-*β*-phenotriazine (Busch), 1892, A., 734.
Phenyldihydroquinazoline (Paal and Busch), 1890, A., 72.
Phenyldihydroquinolylmethane (Einhorn), 1886, A., 720.
Phenyl*iso*dihydroxybutyric acid (Fischer and Stewart), 1892, A., 1448.
Phenyl*iso*dihydroxybutyric acid, salts of (Fittig and Obermüller), 1892, A., 987.
Phenyldihydroxyphenylmethanedicarboxylic acids, *o*-, *m*- and *p*-nitro- (de Varda), 1892, A., 621.
ω-**Phenyl-*αβ*- and -*αω*-diketobutane** (Müller and v. Pechmann), 1889, A., 1171.
Phenyldiketodimethylanilidopiperidinecarboxylic acid (Reissert), 1888, A., 697.
Phenyldiketomethylanilido-*mono*- and *di*-bromopyrrolidines (Reissert), 1890, A., 642.
Phenyldiketomethylanilido*di*chloropyrrolidine (Reissert), 1890, A., 643.
Phenyl-*αδ*-diketopiperazine (Bischoff), 1889, A., 1015.
α-**Phenyl-*αω*-diketopropane.** See Phenyl methyl diketone.

  benzyl derivatives of (Meldola and Coste), 1889, T., 590; P., 116.
  cyanic acid derivatives of (Lellmann), 1883, A., 798.

p-**Phenylenediaminedibenzylidenesulphonic acid,** sodium salt of (Kafka), 1891, A., 721.

o-**Phenylenediaminesulphonic acid** (Nietzki and Lerch), 1889, A., 144.

o-**Phenylenediamine-*p*-sulphonic acid** (Lerch), 1889, A., 881.

2:5-**Phenylenediaminethiosulphonic acid** (Bernthsen), 1889, A., 777.

o-**Phenylenediazosulphide** (Jacobson), 1889, A., 135.

Phenylenediazosulphidecarboxylic acid (Pfitzinger and Gattermann), 1889, A., 868.

Phenylenedibenzyldiacetic acid (Meyer and Oelkers), 1888, A., 704.

Phenylenedicarbamides, three isomeric (Lellmann), 1883, A., 798.

Phenylenediethyldisulphone (Otto and Casanova), 1888, A., 255.

Phenylenediglycocine. See Phenylene*di*amidodiacetic acid.

p-**Phenylenedimethylaminediethylmethylphosphonium iodide** (Michaelis and Schenk), 1891, A., 436.

p-**Phenylenedimethylaminediethylphosphine** and its oxide and sulphide (Michaelis and Schenk), 1891, A., 436.

p-**Phenylenedimethylaminedimethylphosphine** and its oxide and sulphide (Michaelis and Schenk), 1891, A., 435.

p-**Phenylenedimethylaminediphenylmethylphosphonium iodide** and *p*-**phenylenedimethylaminediphenylphosphine oxide** and **sulphide** (Michaelis and Schenk), 1891, A., 436.

Phenylenedimethylaminephenylmethylphosphine oxide and **phenylenedimethylamine-triethyl-** and **-trimethyl-phosphonium iodides** (Michaelis and Schenk), 1891, A., 435.

m-**Phenylenedimethyldinitramine,** *tri*nitro- (van Romburgh), 1888, A., 1079, 1185.

o-**Phenylenedipropionic acid** (Perkin), 1886, A., 469; 1888, T., 18.

Phenylenedipropionic acids, *m*- and *p*- (Kipping), 1888, T., 32, 39.

Phenylene-ethenylamidine, nitro- (*nitrethenyl-o-phenylenediamine*) (Heim), 1888, A., 1097.

Phenylene-ethenylethylamidine (*ethenylethyl-o-phenylenediamine*) (Hempel), 1889, A., 600; 1890, A., 612.

Phenylene-ethyl-*o*-diamines (*amidoethylaniline*) (Hempel), 1889, A., 600; 1890, A., 612.

Phenylene-ethyl-*m*-diamine (Nölting and Stricker), 1886, A., 545.

Phenylene-ethyl-*p*-diamine (Schweitzer), 1886, A., 347; (Fischer and Hepp), 1887, A., 244.

o-**Phenylene-ethylenediamine** and its derivatives (Merz and Ris), 1887, A., 722; (Ris), 1888, A., 468.

Phenylene-ethylenedisulphone (Otto and Casanova), 1888, A., 256.

Phenylenehydroxylamine, *di*nitro- (Willgerodt), 1892, A., 594.

Phenylene*di*imidobutyric acid, synthesis of (Knorr), 1884, A., 1198.

o-**Phenylenemethyldiamine** (Fischer), 1892, A., 1475.

m-**Phenylenemethyldiamine** (Nölting and Stricker), 1886, A., 544.

p-**Phenylenemethyldiamine** (Bernthsen and Goske), 1887, A., 667.

Phenylenemethylethenylamidine (Fischer), 1892, A., 1475.

β-**Phenylenenaphthylenemethane oxide** (Phomina), 1890, A., 901.

Phenylene-*β*-naphthylethenyldiamine, nitro- (Heim), 1888, A., 488.

m-**Phenyleneoxy*tri*chlorethylene** (Michael), 1886, A., 614.

Phenylenepropenyldiamine, action of bromine on (Smith), 1885, A., 524.

Phenylenepropyldiamine (Wacker), 1888, A., 466.

Phenylenepropylenediamine (Ris), 1888, A., 468.

Phenylenepyridineketonedicarboxylic acids, *α*- and *β*- (Doebner and Peters), 1890, A., 1008.
  formation of, by the oxidation of naphthaquinoline derivatives (Doebner and Peters), 1890, A., 1007.

Phenylenequinaldine. See Phenyl-2′-methylquinoline.

m-**Phenylenesuccinamic acid** (Griess), 1885, A., 1220.

Phenylenetetramethyl-. See Tetramethylphenylene-.

o-**Phenylenethiocarbamide** (Lellmann), 1883, A., 324; 1884, A., 49.

Phenylenethiocarbamides (Lellmann), 1883, A., 185; (Billeter and Steiner), 1887, A., 366.

Phenylene*di***thiocarbamides** and their derivatives (Lellmann), 1883, A., 324; 1884, A., 49.

o-**Phenylene**-*p*-**tolylguanidine** (Keller), 1891, A., 1470.

p-**Phenyleneurethane** (Gattermann and Wrampelmeyer), 1886, A., 50.

Phenylenic carbamates, *o*-, *m*-, and *p*- (Gattermann), 1888, A., 575.

Phenylenic cyanates, *m*- and *p*- (Gattermann and Wrampelmeyer), 1886, A., 50.

Phenylenic oxide (Vaubel), 1892, A., 1187.

p-**Phenylenic** *di***sulphide** (Leuckart), 1890, A., 605.

m-**Phenylenic** *o*-**tolylcarbamate** (Gattermann and Cantzler), 1892, A., 832.

Phenylethenyl*di***amidoacetone** (Rügheimer and Mischel), 1892, A., 952.

Phenylethenylamidoxime, and its derivatives (Knudsen), 1885, A., 897, 1218.
  p-cyano- (Rosenthal), 1890, A., 147.

Phenylethenylamidoximebenzenesulphone (Pinnow), 1892, A., 461.

Phenylethenylazidine hydrochloride (Pinner), 1884, A., 1323.

Phenylethenylazo-. See Azo.

Phenylethenylphenyluramidoxime (Knudsen), 1885, A., 898.
  ethyl ether (Knudsen), 1885, A., 1218.

Phenylethoxynaphthalene, *di*amido- (Weinberg), 1888, A., 286.

Phenylethylacetanilide, β-bromo- (Elfeldt), 1892, A., 214.

Phenylethylacetic acid (Neure), 1889, A., 597.

Phenylethylallylthiocarbamide (Gebhardt), 1885, A., 383.

Phenylethylamidoacetic acid (Heumann), 1891, A., 837.

Phenylethylamidobenzeneazophenylethylaniline (Lippmann and Fleissner), 1884, A., 180.

α-**Phenylethylamine** (Tafel), 1886, A., 940.
  derivatives (Tafel), 1889, A., 976.

ω-**Phenylethylamine** (Erlenmeyer and Lipp), 1883, A., 993.
  preparation of (Hoogewerff and van Dorp), 1887, A., 245.
  oxalate (Hoogewerff and van Dorp), 1888, A., 1196.

as-**Phenylethylcarbamide** (Gebhardt), 1884, A., 1321.

Phenylethylcarbinol (Errera), 1887, A., 35.

Phenylethylene. See Styrene.

Phenylethylene-carbamide and **-thiocarbamide** (Newman), 1891, A., 1206.

Phenylethylenediamine (Gabriel), 1889, A., 1166.

Phenylethyl-hydantoin and **-ψ-hydantoin** (Pinner), 1888, A., 1103.

Phenylethylhydrazine acetoacetate, action of hydrocyanic acid on (v. Miller and Plöchl), 1892, A., 1196.
  o-amido- (Hempel), 1890, A., 612.

Phenylethylhydrazine-glyoxal and **-glyoxylic acid** (Elbers), 1885, A., 535.

Phenylethylhydrazone, thionyl- (Michaelis), 1889, A., 1163.

Phenylethylic alcohol, oximido- (Meyer and Nägeli), 1883, A., 1076.

Phenylethylic salicylate, *o*-nitro- (*salicylethylene nitrophenol ether*) (Wagner), 1884, A., 436.

Phenylethylidene cyanhydrin (Erlenmeyer and Lipp), 1883, A., 992.

Phenylethylidenebenzenylamidoxime (Zimmer), 1890, A., 253.

Phenylethylketone-*o*-**carboxylic acid** (*benzoylethyl-o-carboxylic acid*) (Roser), 1886, A., 243.

Phenylethyllactic acid, behaviour of (Slocum), 1885, A., 662.

β-**Phenyl**-α-**ethyllactic acid** (Perkin and Stenhouse), 1891, P., 43.

Phenylethylmalonamide (Freund and Goldsmith), 1888, A., 676.

Phenylethylnitrosamine, *p*-nitro- (Meldola and Streatfeild), 1886, T., 631.

5-**Phenyl**-1-**ethyloxy**-ψ-**thiazole** (Hubacher), 1891, A., 222.

Phenylethylphenol. See Hydroxydiphenylethane.

Phenylethylphenylthiocarbamide (Mainzer), 1883, A., 1106.

Phenylethylphthalamic acid and its salts (Piutti), 1884, A., 449.

Phenylethylpropionic acid, preparation and properties of (Anschütz and Berns), 1891, A., 914.

1:5-Phenylethylpyrazole (Claisen and Stylos), 1888, A., 671.
Phenylethylsemithiocarbazide (Dixon), 1889, T., 302.
Phenylethylsulphone (Otto), 1885, A., 537.
α-**Phenyl-*μ*-ethylthiazole** (Hubacher), 1891, A., 221.
Phenylethylthiobiuret (Tursini), 1884, A., 1141.
Phenylethylthiocarbamide (Neubert), 1886, A., 873.
as-**Phenylethylthiocarbamide** (Gebhardt), 1884, A., 1321.
Phenylethylthiocarbamine chloride and oxide (Billeter), 1887, A., 822.
Phenylethylthiocarbimide (Neubert), 1886, A., 873.
Phenylethylthiohydantoin hydrochloride (Neubert), 1886, A., 873.
2-Phenyl-4-ethylthiophen (Dittrich and Paal), 1889, A., 258.
Phenylethyltriazolecarboxylic acid (Bladin), 1892, A., 637.
Phenylethylurethane, nitro- (Steudemann), 1883, A., 802.
Phenylfenchylamine (Wallach), 1891, A., 1088.
Phenylformamidine, cyano- (Comstock and Wheeler), 1892, A., 707.
Phenylfurazan (Russanoff), 1892, A., 322.
α-**Phenylfurfuracrylonitrile** (Frost), 1889, A., 598.
  p-amido-, and *p*-nitro- (Freund and Immerwahr), 1890, A., 1408.
Phenylfurfuryl-carbamide and -thiocarbamide (Deutzmann), 1892, A., 43.
Phenylgalactosazone (Scheibler), 1884, A., 1287; (Fischer), 1885, A., 54.
Phenylglucosazone (Fischer), 1885, A., 53; 1886, A., 933.
Phenylglucosazonecarboxylic acid (Roder), 1887, A., 150.
Phenylglutaric acid (Michael), 1887, A., 672.
β-**Phenylglyceric acid** (*αβ-dihydroxyphenylpropionic acid*) (Lipp), 1883, A., 994; (Fittig and Ruer), 1892, A., 986.
Phenylglycerol (*dihydroxyphenoxypropane*) (Lindemann), 1891, A., 1198.
Phenylglycerosazone (Fischer and Tafel), 1887, A., 651.
Phenylglycidic acid (*β-phenylhydroxyacrylic acid*) (Plöchl), 1884, A., 604; 1887, A., 254; (Erlenmeyer), 1887, A., 142, 1046; (Wislicenus), 1887, A., 587.
Phenylglycidic acid (*β-phenylhydroxyacrylic acid*), synthesis of (Erlenmeyer), 1889, A., 990.
  sodium salt of, behaviour of ammonia and organic bases with (Erlenmeyer), 1889, A., 988.
  o- and *p*-nitro- (Lipp), 1887, A., 142.
Phenylglycidic acids, optically active (Erlenmeyer), 1891, A., 1482.
o-**Phenylglycincarboxylic acid.** See Carboxyanilidoacetic acid.
Phenylglycinmethylanilide. See Phenylamidoacetomethylanilide.
Phenylglycinphenylamidoacetic acid. See Anilidoacetanilidoacetic acid.
Phenylglycocine. See Anilidoacetic acid.
"**Phenylglycocinesulphonic acid**" (Zehenter), 1885, A., 55, 1235.
Phenylglycollic acid. See Mandelic acid.
Phenylglycuronic acid (Külz), 1885, A., 283; 1890, A., 1286.
Phenylglyoxal (v. Pechmann), 1888, A., 146; (Müller and v. Pechmann), 1890, A., 51.
  hydrate (v. Pechmann), 1888, A., 146.
1-Phenylglyoxaline (Wohl and Marckwald), 1892, A., 624.
2-Phenylglyoxaline (Maquenne), 1891, A., 331.
2-Phenylglyoxalinedicarboxylic acid (Maquenne), 1890, A., 1440.
Phenylglyoxalmethylphenylosazone (Culmann), 1888, A., 1287.
1-Phenylglyoxalylmercaptide (Wohl and Marckwald), 1892, A., 624.
Phenylglyoxime (Schramm), 1884, A., 52; (Strassmann), 1889, A., 610.
  *per*oxide (Scholl), 1891, A., 316.
Phenylglyoximes (Russanoff), 1892, A., 321.
Phenyl-*amphi*- and -*syn*-glyoximecarboxylic acids (Nussberger), 1892, A., 1177.
Phenylglyoxylic acid, formation of, from benzoic cyanide (v. Buchka), 1887, A., 487.
  preparation of, from acetophenone (v. Buchka and Irish), 1887, A., 483.
  condensation products of (Homolka), 1885, A., 758.
  derivatives of (Hausknecht), 1889, A., 506.
  stereochemically isomeric oximes of (Müller), 1883, A., 1129; 1884, A., 584; (Hantzsch), 1890, A., 1274; 1891, A., 444.

Phenylglyoxylic acid, phenylhydrazone and phenylethylhydrazone of (Elbers), 1885, A., 534.
Phenylglyoxylic acid, *o*-amido-. See Isatinic acid.
  amidocyano- (Griess), 1885, A., 1226.
  o-nitro-, hydrazone, isomeric form of (Krause), 1891, A., 302.
    methylphenylhydrazone (Fehrlin), 1890, A., 1118.
  o- and *m*-nitro-, hydrazone (Fehrlin), 1890, A., 1117.
Phenylglyoxylic lactim, *o*-amido-. See Isatin.
Phenylglyoxylic-*o*-toluidide (Nef), 1892, A., 1442.
Phenyl-group, negative nature of the (Meyer), 1887, A., 572.
Phenylguanazole (Pellizzari), 1892, A., 356.
Phenylguanidine picrate (Prelinger), 1892, A., 950.
i-**Phenylgulosazone** (Fischer and Curtiss), 1892, A., 823.
  p-bromo- (Fischer and Curtiss), 1892, A., 823.
Phenylhalogenacrylic acids (Erlenmeyer), 1883, A., 196.
Phenylheptonitrile. See Phenylamylacetonitrile.
Phenylhexamethylene, derivatives of (Kipping and Perkin), 1889, P., 161; 1890, T., 304.
Phenylhexamethylene methyl ketone and **ketoxime** (Kipping and Perkin), 1890, T., 320.
Phenylhexamethylenecarboxylic acid (Kipping and Perkin), 1890, T., 316, 322.
Phenylhexamethylenedicarboxylic acid (Kipping and Perkin), 1890, T., 315.
s-**Phenyl-ψ-hexylcarbamide** (Freund and Herrmann), 1890, A., 474.
Phenylhexyldihydro-β-naphthatriazine (Goldschmidt and Poltzer), 1891, A., 841.
Phenyl*iso*hexylene and its *di*bromide (Schramm), 1883, A., 977.
s-**Phenyl-ψ-hexylthiocarbamide** (Freund and Herrmann), 1890, A., 474.
Phenylhexyltriazolecarboxylic acid (Bladin), 1892, A., 597.
Phenylhippuric acid (Kossel), 1892, A., 468.
Phenylhomoitamalic acid. See Hydroxybenzylpyrotartaric acid.
Phenylhomoparaconic acid, and its salts (Penfield), 1883, A., 473.
Phenyl*iso*homoparaconic acid (Fittig), 1888, A., 252.
α-**Phenylhydantoic acid** (Pinner), 1888, A., 1103.
α-**Phenylhydantoic amide** (Pinner and Spilker), 1889, A., 706.
α-**Phenylhydantoin** (Pinner), 1888, A., 1102.
γ-**Phenylhydantoin** (Guareschi), 1892, A., 828.
ψ-**Phenylhydantoin** (Pinner), 1888, A., 1102.
Phenylhydracrylic acid. See β-Hydroxyphenylpropionic acid.
Phenylhydrazides, formation of (Fischer and Passmore), 1890, A., 152.
Phenylhydrazidoacetic acid (Elbers), 1885, A., 535.
  asymmetrical (Reissert and Kayser), 1891, A., 1054.
Phenylhydrazidobenzylidenephenylhydrazone. See Benzenyldiphenylazidine.
α-**Phenylhydrazidobutyramide** (v. Miller and Plöchl), 1892, A., 1192.
α-**Phenylhydrazidobutyric acid** (Japp and Klingemann), 1888, T., 538.
as-**Phenylhydrazidobutyric acid** (Lederer), 1892, A., 635.
α-**Phenylhydrazido*iso*butyric anhydride** (Reissert), 1884, A., 1153.
α-**Phenylhydrazido-*iso*butyrimide** and **-*iso*butyronitrile** (Reissert), 1884, A., 1152.
Phenylhydrazido-*o*- and -*p*-cresetoils (Nölting and Werner), 1891, A., 212.
ψ-**Phenylhydrazido-α-hydroxybutyric acid**, and its derivatives (Reissert and Kayser), 1890, A., 155.
ψ-**Phenylhydrazidomandelic acid** (Reissert and Kayser), 1890, A., 156.
  nitroso- (Reissert and Kayser), 1891, A., 439.
2′-**Phenylhydrazido-4′-methylquinoline** (2′-*phenylhydrazolepidine*) (Ephraim), 1892, A., 1488.
Phenylhydrazidophenylacetic acid (Elbers), 1885, A., 534; (Reissert and Kayser), 1891, A., 438.
Phenylhydrazidophenylbiazolone (Freund and Kuh), 1890, A., 1441.
Phenylhydrazidophenyl-*mono*- and -*di*-thiobiazolones (Freund and Kuh), 1890, A., 1441.
α-**Phenylhydrazidopropionic acid** (Fischer and Jourdan), 1884, A., 53; (v. Miller and Plöchl), 1892, A., 1196; (Reissert), 1892, A., 1456.
  salts of (Reissert), 1884, A., 1152.

α-**Phenylhydrazidopropionitrile** (Reissert), 1884, A., 1152; (v. Miller and Plöchl), 1892, A., 1195.
  amide of (Reissert), 1884, A., 1152.
2′-**Phenylhydrazidoquinoline** (Ephraim), 1891, A., 1509.
Phenylhydrazile acids, formation of, from the anhydrides of dibasic acids (Anschütz), 1888, A., 367.
Phenylhydrazine (Fischer), 1887, A., 138.
  preparation of (Meyer and Lecco), 1884, A., 597; (Reychler), 1884, A., 1042.
  commercial, substance contained in (v. Meyer), 1886, A., 349.
  and acid amides (Just), 1886, A., 700.
  action of substituted acetoacetates on (Knorr), 1884, A., 302; (Knorr and Blank), 1884, A., 1380; 1885, A., 555, 810.
  action of, on amido-compounds of the benzene series (Just), 1886, A., 699.
  action of arsenic chloride on (Michaelis and Oster), 1892, A., 1326.
  action of, on benzoylacetylcarboxylic acid (Roser), 1885, A., 797.
  action of, on benzoylacetone and its nitro-derivative (Fischer and Bülow), 1885, A., 1237.
  action of boron chloride on (Michaelis and Oster), 1892, A., 1326.
  action of carbamide on (Pinner), 1887, A., 1042; (Edeleanu), 1892, A., 1323.
  action of carbonyl chloride and of carbonyl sulphide on (Fischer), 1889, A., 1164; (Heller), 1891, A., 1212.
  action of, on *tetra*chloracetone (Levy and Witte), 1889, A., 1160.
  action of copper sulphate on hot acid solutions of (Gattermann and Hölzle), 1892, A., 842.
  action of, on cyanhydrins (Reissert), 1884, A., 1152.
  action of cyanogen chloride on (Pellizzari and Tivoli), 1892, A., 1323.
  action of ethylic acetoacetate on (Knorr), 1884, A., 302.
  action of ethylic acetylbenzalacetate on (Knorr and Blank), 1885, A., 810.
  action of ethylic benzoylacetoacetate on (Knorr and Blank), 1885, A., 555.
  action of ethylic chlorocarbonate on (Fischer), 1889, A., 1165; (Heller), 1891, A., 1212.
Phenylhydrazine, action of ethylic diacetylsuccinate on (Knorr and Bülow), 1884, A., 1381; (Knorr), 1885, A., 995.
  action of ethylic *o*- and *p*-nitrobenzoylacetate on (Knorr and Jödicke), 1885, A., 1247.
  action of ethylic succinosuccinate on (Knorr), 1884, A., 1154; (Knorr and Bülow), 1884, A., 1380.
  action of, on imido-ethers (Pinner), 1884, A., 743, 1323.
  action of *o*-nitrobenzylic chloride on (Paal and Bodewig), 1892, A., 1455.
  action of nitroso-bases on (Fischer and Wacker), 1888, A., 1286; 1889, A., 702.
  action of, on phloroglucinol and resorcinol (v. Baeyer and Kochendoerfer), 1889, A., 1162.
  action of phosphorus *tri*chloride on (Michaelis and Oster), 1892, A., 1324.
  action of, on phthalic anhydride (Hötte), 1885, A., 1221.
  action of silicon chloride on (Michaelis and Oster), 1892, A., 1326.
  action of, on sulphinic acids (Escales), 1885, A., 798.
  nitration of (Michael), 1886, A., 699.
  oxidation of, with Fehling's solution (Strache and Kitt), 1892, A., 1322.
  effects of, on the organism (Hoppe-Seyler), 1885, A., 574.
  action of, on the skin (Beythien and Tollens), 1890, A., 582.
  compounds of glucoses and sucroses with (Fischer), 1885, A., 53.
  compounds of, with ketonic and aldehydic acids (Fischer), 1884, A., 1151.
  derivatives of (Marckwaldt), 1889, A., 392; (Willgerodt and Mühe), 1892, A., 453.
    action of, on the blood (Heinz), 1891, A., 602.
  p-alkyloxy-derivatives of (Altschul), 1892, A., 1080, 1198.
  benzoyl-derivatives of (Tafel), 1885, A., 1060.
  halogen derivatives of (Neufeld), 1889, A., 251.
  inorganic derivatives of (Michaelis), 1889, A., 1163; 1892, A., 1324; (Michaelis and Ruhl), 1890, A., 617.
  metallic derivatives of (Martini), 1892, A., 1454.

- **Phenylhydrazine** salts, reactions of (Cross and Bevan), 1884, A., 897.
  - reagent for aldehydes and ketones (Fischer), 1884, A., 1150.
  - titration of (v. Meyer), 1887, A., 1042.
- **Phenylhydrazine** acetate (de Vries and Holleman), 1892, A., 981.
  - acetoacetate, phenylhydrazone of (v. Pechmann and Jenisch), 1892, A., 162.
  - benzenesulphinate (Escales), 1885, A., 798.
  - benzoylformate, phenylhydrazone of (Curtius and Lang), 1892, A., 453.
  - carbonyl chloroplatinite (Foerster), 1892, A., 353.
  - cinnamaldehydrazonesulphonate (Heusler), 1891, A., 1052.
  - cinnamate and *allo*cinnamate (Liebermann), 1891, A., 833.
  - cyanuric chloride (Fries), 1886, T., 742.
  - hydrocinnamate (Liebermann), 1891, A., 833.
  - hydrogen diaminechromium thiocyanate (Christensen), 1892, A., 1001.
  - *iso*nitrile of (Ruhemann and Elliott), 1888, T., 850; P., 88.
  - *di*nitro-α-naphtholsulphonate (Richardson), 1888, A., 1286.
  - parabanate (Skinner and Ruhemann), 1888, T., 555.
  - phenylsemithiocarbazate (Heller), 1891, A., 1212.
  - phosphenite and phosphite (Michaelis and Oster), 1892, A., 1325.
  - β-phthalylphenylhydrazinate (Otto and Holst), 1890, A., 1327.
  - potassium salt of (Michaelis and Schmidt), 1887, A., 366.
  - pyrocinchonylphenylhydrazinate (Otto and Holst), 1890, A., 1327.
  - sodium salt of (Michaelis), 1886, A., 1025; 1889, A., 1158.
    - action of acid chlorides and anhydrides on (Michaelis and Schmidt), 1889, A., 1159.
    - action of alkylic bromides and of benzylic chloride on (Philips), 1889, A., 1158.
  - *p*-tolylphosphenite (Michaelis and Oster), 1892, A., 1325.
- **Phenylhydrazine,** *o*-amido- (Bischler), 1889, A., 501.
  - *m*-amido-, and its hydrochloride (Griess), 1885, A., 789.
  - *p*-bromo-*o*-nitro- (Bischler and Brodsky), 1890, A., 151.
- **Phenylhydrazine,** *o*-chloro- (Hewitt), 1891, T., 209; P., 3; (Willgerodt), 1891, A., 1043.
  - *o*-chloro-, hydrochloride (Hewitt), 1891, T., 209.
  - *m*-chloro-, and its derivatives (Willgerodt and Mühe), 1892, A., 454.
  - *p*-chloro- (Hewitt), 1891, T., 211; P., 3.
    - action of chloroform and alcoholic potash on (Hewitt), 1891, T., 213.
  - cyano-, and its hydrochloride (Senf), 1887, A., 929.
  - *di*cyano-, action of ethylic acetoacetate on (Bladin), 1892, A., 597.
    - condensation of, with fatty aldehydes (Bladin), 1892, A., 596.
    - derivatives of (Bladin), 1885, A., 979; 1886, A., 146; 1887, A., 138; 1889, A., 702.
  - *o*-nitro- (Bischler), 1889, A., 501; 1890, A., 148.
  - *m*-nitro- (Bischler and Brodsky), 1890, A., 150.
  - *p*-thio- (Ruhl), 1891, A., 301; 1892, A., 1326.
  - thionyl- (Michaelis), 1889, A., 1163; 1891, A., 717; (Michaelis and Ruhl), 1890, A., 617.
  - thionylthio- (Ruhl), 1892, A., 1326.
- **Phenylhydrazines** (Willgerodt and Ferko), 1888, A., 829.
  - asymmetrical secondary, preparation of (Philips), 1889, A., 1158.
  - chlorinated (Hewitt), 1891, T., 209.
  - sulphonation of (Gallinek and v. Richter), 1886, A., 236.
  - nitro-, action of heat on, in presence of various liquids (Willgerodt), 1890, A., 40.
  - *s*-nitro-, of the aromatic series (Willgerodt), 1890, A., 40.
- “**Phenylhydrazine-alloxan**” (Skinner and Ruhemann), 1888, T., 557.
- **Phenylhydrazinedisulphonic acids,** *m*- and *p*- (*hydrazinebenzenedisulphonic acids*) (Limpricht), 1889, A., 397.
- **Phenylhydrazinehydroxyazonaphthalenesulphonic acid** (Richardson), 1888, A., 1286.
- **Phenylhydrazineketophenylmethylpyrazolone.** See Phenylmethylpyrazoloneazobenzene under Azo.
- **Phenylhydrazinesulphonic acid,** *di*bromo- (Limpricht), 1889, A., 398.
- **Phenylhydrazine-*o*-sulphonic acid,** 5-amido-, and 5-nitro- (Limpricht), 1885, A., 1216.

Phenylhydrazine-*m*-sulphonic acid (LIMPRICHT), 1889, A., 397.
Phenylhydrazine-*p*-sulphonic acid (LIMPRICHT), 1885, A., 1216; (PFÜLF), 1887, A., 933.
  o-amido-, and *o*-nitro- (NIETZKI and LERCH), 1889, A., 144; (LERCH), 1889, A., 881.
Phenylhydrazinesulphonic acids, *o*- and *p*-, and their salts (GALLINEK and v. RICHTER), 1886, A., 237.
Phenylhydrazones (RUDOLPH), 1889, A., 251; (FISCHER and ACH), 1890, A., 40.
Phenylhydrindone (v. MILLER and ROHDE), 1892, A., 1220; (LIEBERMANN and HARTMANN), 1892, A., 1228.
Phenylhydroacridine and its derivatives (BERNTHSEN and BENDER), 1883, A., 1134, 1135.
Phenylhydrocarbazacridine (BIZZARRI), 1891, A., 220.
Phenylhydrocarbostyril (OGLIALORO-TODARO and ROSINI), 1891, A., 214.
α-**Phenylhydrocinnamic acid.** See Phenylbenzylacetic acid.
Phenylhydrocoumarin (LIEBERMANN and HARTMANN), 1891, A., 1484.
Phenylhydrouracil (HOOGEWERFF and VAN DORP), 1891, A., 197.
Phenylhydroxybenzoic acid. See Phenylsalicylic acid.
Phenyl-1:2-hydroxylamine, 4:6-*di*nitro- (WILLGERODT), 1891, A., 638; 1892, A., 594.
Phenyl*iso*hydroxybutyrolactone (FITTIG and OBERMÜLLER), 1892, A., 987.
2′-Phenyl-4′-hydroxy-2-ketotetrahydroquinazoline (PINNER), 1890, A., 70.
Phenylhydroxy-. See also Hydroxyphenyl-.
Phenylic salts, action of sodium mercaptide on (SEIFERT), 1885, A., 1057.
  acetate, action of chlorine and bromine on (SEELIG), 1889, A., 599.
    crystallised (PERKIN), 1889, P., 106.
  o-acetate (HEIBER), 1892, A., 308.
  acetylsalicylate and its nitro-derivatives (KNEBEL), 1891, A., 915.
  amidoethylic acetate (ELFELDT), 1892, A., 214.
  anthranilate (SCHMIDT), 1888, A., 371.
  benzenesulphonate (OTTO), 1886, A., 883; (GEORGESCU), 1891, A., 568.
Phenylic benzenethiosulphonate (ESCALES), 1885, A., 798.
  benzoate, *tri*bromo-, and its nitro-derivative (DACCOMO), 1885, A., 890.
    o-, *m*-, and *p*-chloro- (MOSSO), 1888, A., 456; (DACCOMO), 1892, A., 308.
    chloro*di*bromo- (GARZINO), 1890, A., 1108.
    o-, *m*-, and *p*-nitro- (NEUMANN), 1886, A., 350, 939; 1887, A., 254.
    o-nitro-, reduction of (BÖTTCHER), 1885, A., 658.
    nitroso- (WALKER), 1884, A., 1003.
  bromide. See Benzene, bromo-.
  butyrate (PERKIN), 1889, T., 547.
  carbamate (GATTERMANN), 1888, A., 575.
  carbonate, reactions of (ECKENROTH and RÜCKEL), 1890, A., 750.
    *di*bromo-, *di*nitro-, and nitramido- (LÖWENBERG), 1886, A., 789.
  chloride. See Benzene, chloro-.
  *tri*chlorophosphate (LAMPERT), 1886, A., 616.
  cinnamate (ANSCHÜTZ and WIRTZ), 1885, T., 901; (ANSCHÜTZ), 1885, A., 1064.
    action of heat on (ANSCHÜTZ and WIRTZ; ANSCHÜTZ), 1885, A., 1064.
    decomposition of, by heat (ANSCHÜTZ), 1885, T., 898.
  citrate and the action of sodium mercaptide on (SEIFERT), 1885, A., 1057.
  cyanate, preparation of (HENTSCHEL), 1884, A., 1002; (KÜHN and LIEBERT), 1890, A., 962.
    synthesis by means of (LEUCKART), 1890, A., 759.
    action of benzene and its homologues on (LEUCKART), 1885, A., 773.
    action of hydroxylamine on (FISCHER), 1889, A., 1164.
    action of, on phenols and phenol ethers (LEUCKART and SCHMIDT), 1885, A., 1224.
    action of, on polyhydric alcohols (TESMER), 1885, A., 774; 1886, A., 49.
    action of, on polyhydric and certain monohydric alcohols and phenols (SNAPE), 1885, T., 770.
    conversion of, into phenylic cyanurate (v. HOFMANN), 1885, A., 774.
    compounds of polyhydric alcohols with (TESMER), 1885, A., 774; 1886, A., 49.

Phenylic cyanate, derivatives of (Gumpert), 1885, A., 656.
  hydrochloride of (Hentschel), 1885, A., 888.
 *iso*cyanate (*carbanil*) (Gumpert), 1886, A., 342.
  action of, on amido-compounds (Kühn), 1885, A., 260, 979.
  action of, on formyl- and thioformyl-derivatives of aniline and its homologues (Senier), 1885, T., 770.
 cyanide. See Benzonitrile.
 *iso*cyanide, preparation and properties of (Nef), 1892, A., 1438.
 cyanurate, conversion of phenylic cyanate into (v. Hofmann), 1885, A., 774.
  tri-p-nitro- (Otto), 1887, A., 1033.
 *iso*cyanurate (v. Hofmann), 1886, A., 233.
 diazobenzenesalicylate (Limpricht), 1891, A., 1036.
 $\Delta^{1:4}$-dihydroterephthalate (v. Baeyer and Herb), 1890, A., 1132.
 diphenylcarbamate (Lellmann and Bonhöffer), 1887, A., 936.
  o-amido-, and *o*-nitro- (Lellmann and Bonhöffer), 1887, A., 936.
 diphenylcarbamates, amido-, and nitro- (Lellmann and Benz), 1891, A., 1215.
 diphenylphosphinate (Michaelis and La Coste), 1885, A., 1214.
 ethylic carbonate, *o*-nitro- (Bender), 1887, A., 37.
 ethylic 4-hydroxy*iso*phthalate (Hähle), 1891, A., 1369.
 ethylic *o*-oxalate (Claparède and Smith), 1883, T., 360; (Staub and Smith), 1884, T., 301.
 ethylic *di*sulphide (Otto and Rössing), 1887, A., 243.
 ethylphenyl-*mono*- and -*di*-thiocarbamates (Billeter and Strohl), 1888, A., 365.
 ethylxanthate and *p*-amido- (Leuckart), 1890, A., 603.
 o-formate (Tiemann), 1883, A., 340.
  tribasic nitro- (Weddige), 1883, A., 340.
 fumarate (Anschütz and Wirtz), 1885, T., 900.
  decomposition of, by heat (Anschütz and Wirtz), 1885, A, 1064.
 $\Delta^{2:\text{cistrans}}$-hexahydroterephthalate (v. Baeyer and Herb), 1890, A., 1134.
 p-hydroxybenzoate (Klepl), 1884, A., 448.
Phenylic hydroxy*iso*phthalate (Hähle), 1891, A., 1369.
 hydroxypyrotartrates (*itamalates*) (Jayne), 1883, A., 473.
 iodide. See Benzene, iodo-.
 laurate (Krafft and Bürger), 1884, A., 1125.
 methylic sulphide (Obermeyer), 1888, A., 124.
  o-amido- (v. Hofmann), 1887, A., 823.
 myristate (Krafft and Bürger), 1884, A., 1125.
 α-naphthylic sulphide (Ziegler), 1890, A., 1292.
 naphthylic sulphides (Krafft and Bourgeois), 1891, A., 77.
 nitrobenzoates, *tri*chloro- and *tri*-chloronitro- (Daccomo), 1885, A., 890.
  nitro- (Neumann), 1886, A., 350, 939; 1887, A., 254.
 nitrosalicylates (Knebel), 1890, A., 1284; 1891, A., 915.
 o-oxalate (Staub and Smith), 1884, T., 301.
 palmitate (Krafft and Bürger), 1884, A., 1125.
 phenylcarbamate (Gumpert), 1885, A., 656; 1886, A., 342.
  nitro- (Gumpert), 1886, A., 342.
 phenyl-*p*-hydroxybenzoate (Klepl), 1884, A., 447.
 phenylmethylcarbamate, and nitro- and amido- (Lellmann and Benz), 1891, A., 1214.
 phenyl-β-naphthylcarbamate (Paschkowetzky), 1892, A., 166.
 phenylthiocarbamate (Snape), 1885, T., 778; (Dixon), 1890, T., 268.
 phosphate, *p*-nitro- (Rapp), 1884, A., 1337.
 phthalate, chloro- (Mosso), 1888, A., 456.
 propionate (Perkin), 1889, T., 546; (Nencki), 1890, A., 488.
 salicylate, and the action of sodium mercaptide on (Seifert), 1885, A., 1057.
  derivatives of (Knebel), 1891, A., 915.
  nitro-derivatives of (Knebel), 1890, A., 1284; 1891, A., 915.
 selenide (Chabrié), 1889, A., 41, 1167.
 sodium sulphite (Schall), 1892, A., 970; (Schall and Uhl), 1892, A., 1076.
  action of iodoform on (Schall and Uhl), 1892, A., 1076.
 stearate (Krafft and Bürger), 1884, A., 1126.

Phenylic succinate, decomposition of, by heat (Anschütz and Wirtz), 1885, T., 899; (Anschütz), 1885, A., 1065.
  sulphide, chloro- (Michaelis and Godchaux), 1891, A., 715.
    *di*nitro- (Austen and Smith), 1886, A., 693.
  *di*sulphide, *o*-amido- (v. Hofmann), 1887, A., 823.
    m-nitro- (Leuckart), 1890, A., 604.
    p-nitro- (Willgerodt), 1885, A., 519.
  *tetra*sulphide (Otto), 1887, A., 923.
  Δ^1-tetrahydroterephthalate (v. Baeyer and Herb), 1890, A., 1133.
  $\Delta^{2cistrans}$-tetrahydroterephthalate (v. Baeyer and Herb), 1890, A., 1134.
  o-thioacetate (Laves), 1892, A., 612.
  thioallophanate (Gattermann), 1889, A., 575.
  thiobenzenesulphonate, reduction of (Otto and Rössing), 1887, A., 954.
  thiobenzoate, *α*-*di*nitro- (Willgerodt), 1885, A., 519.
  thiocarbonate (Bergreen), 1888, A., 445.
  *di*thiocarbonate (Löwenberg), 1886, A., 789.
    chloro- (Daccomo), 1892, A., 306, 307.
  thiocyanate (Thurnauer), 1890, A., 749.
    *di*amido- (Austen), 1889, A., 700.
    *di*nitro- (Austen and Smith), 1886, A., 693.
  thiodi-β-naphthylcarbamate (Paschkowetzky), 1892, A., 166.
  thiodiphenylcarbamate (Paschkowetzky), 1892, A., 164.
  *tri*thioformate, oxidation of (Laves), 1890, A., 988.
  tolylcarbamates, *o*- and *p*- (Eckenroth and Rückel), 1890, A., 750.
  p-tolylic *di*sulphide (Otto and Rössing), 1887, A., 242.
  xanthate, chloro- (Daccomo), 1892, A., 308.
Phenylimidoacetone, oxime of (Knorr), 1884, A., 1368; (Holleman), 1892, A., 985.
Phenylimidoalloxan (Pellizzari), 1888, A., 682.
Phenylimidobenzil (Bandrowski), 1889, A., 147.
Phenylimidobenzoin (Voigt), 1886, A., 887.
  action of hydrocyanic acid on (v. Miller and Plöchl), 1892, A., 1196.
Phenylimidobenzoin, bromo- (Voigt) 1886, A., 888.
Phenylimidobromacetic acid (Knorr and Antrick), 1885, A., 273.
Phenyl-β-imidobutyric acid, synthesis of (Knorr), 1884, A., 1198.
  action of nitrous acid on (Knorr), 1884, A., 1368.
Phenylimidocarbonyl chloride (Nef), 1892, A., 1439.
Phenylimidocyanamide (Pellizzari and Tivoli), 1892, A., 1323.
Phenylimidodiacetic acid (Bischoff and Nastvogel), 1889, A., 1013.
Phenylimidodiacetic anhydride (Bischoff and Hausdörfer), 1892, A., 1334.
Phenylimidodiacetic anilide and **di-anilide** (Hausdörfer), 1889, A., 1014.
Phenylimidodiphenylguanidine (Marckwaldt), 1889, A., 393.
Phenylimidoformic chloride hydrochloride (Nef), 1892, A., 1440.
Phenylimidoguanidine (Pellizzari), 1891, A., 1471.
  action of ethylic acetoacetate on (Pellizzari), 1891, A., 1472.
Phenylimidomethylpropionylacetonitrile (Bouveault), 1891, A., 52.
Phenylimidomucohydroxy-bromic and **-chloric acids** (Hill and Palmer), 1888, A., 452.
Phenylimidophenyl (Seifert), 1890, A., 490.
Phenylimidopropionic acid (*anilpyruvic acid*) (Böttinger), 1883, A., 1128; 1891, A., 1054.
  condensation of (Böttinger), 1892, A., 54.
  bromo-derivative of (Böttinger), 1883, A., 1128.
Phenylimidopropionic chloride (Nef), 1892, A., 1440.
Phenylimidopropionitrile (*benzoylmethylic cyanide, imido-*) (Holtzwart), 1889, A., 683.
α-**Phenylimidopropionitrile** (Erlenmeyer and Lipp), 1883, A., 992.
Phenylimidopyrroylpyruvic acid and **anhydride** (Angeli), 1890, A., 1243.
μ-**Phenylimidothiazoline** (Näf), 1891, A., 1517.
2′-**Phenylindazine** (Paal), 1891, A., 723.
  p-chloro- (Paal), 1891, A., 724.
1′-**Phenylindazine-3′-carboxylic acid**, nitro-, action of stannous chloride on (Schulhöfer), 1891, A., 1231.
1′-**Phenyl-ψ-indazine-3′-carboxylic acid**, nitro- (Meyer), 1889, A., 517.

1′-**Phenylindole** (Pfülf), 1887, A., 956.
2′-**Phenylindole** and its derivatives (Etard), 1883, A., 179; (Pictet), 1886, A., 711; (Fischer and Schmidt), 1888, A., 698; (Bischler), 1892, A., 1465.
amido-, and nitroso- (Fischer and Schmidt), 1888, A., 698.
chloro- (Bischler), 1892, A., 1466.
See also Methylphenanthridine.
3′-**Phenylindole** (Fischer and Schmidt), 1888, A., 958.
reactions of (Ince), 1890, A., 57.
Phenylindoles, formation of, by isomeric change (Ince), 1889, P., 90.
1′-**Phenylindole-3′-carboxylic acid**, synthesis of (Fischer and Hess), 1884, A., 1181.
Phenylinduline (Fischer and Hepp), 1891, A., 1046.
action of acetic acid on (Fischer and Hepp), 1892, A., 341.
amido- (Fischer and Hepp), 1891, A., 1046.
action of sulphuric acid on (Fischer and Hepp), 1892, A., 341.
Phenyl-ψ-isatin (Pfülf), 1887, A., 956.
Phenylitaconic acid (Fittig and Leoni), 1890, A., 894; (Fittig and Röders), 1890, A., 895.
Phenylitamalic acid. See Hydroxyphenylpyrotartaric acid.
Phenylium-. See Phenylammonium.
Phenylizinedihydroxytartaric acid (Ziegler and Locher), 1887, A., 578.
m-nitro- (Bischler and Brodsky), 1890, A., 151.
3′-**Phenyl-2′-ketodihydroquinazoline** (Söderbaum and Widman), 1890, A., 178.
3′-**Phenyl-4′-ketodihydroquinazoline** (Paal and Busch), 1890, A., 72; (Paal and Krecke), 1892, A., 81.
3′-**Phenyl-4′-ketodihydroquinazoline-2′-carboxylic acid** (Paal and Krecke), 1892, A., 81.
3′-**Phenyl-4′-ketohydrazodihydroquinazoline** (Paal and Busch), 1890, A., 72.
Phenylketohydroxybutyric acid (Fischer and Stewart), 1892, A., 1448.
Phenylketohydroxydimethylanilidotetrahydropyridinecarboxylic lactone, real nature of (Anschütz), 1891, A., 741.
Phenylketopentene. See Phenylmethylfurfuran.
1-**Phenylketopyrazolone 4-phenylhydrazone** (Knorr), 1888, A., 724.
1-**Phenylketopyrazolone-3-carboxylic acid 4-phenylhydrazone** (Knorr), 1888, A., 724.
3′-**Phenyl-2′-ketotetrahydroquinazoline** and its derivatives (Söderbaum and Widman), 1889, A., 973; (Nietzki), 1890, A., 178; (Paal and Bodewig), 1891, A., 944; (Busch), 1892, A., 1495.
Phenyl-α-lactic acid, β-amido- (Erlenmeyer), 1889, A., 988.
p-amido- (Erlenmeyer and Lipp), 1883, A., 994.
nitro-, nitrate of (Erlenmeyer and Lipp), 1883, A., 993.
Phenyl-β-lactic acid. See β-Hydroxyphenylpropionic acid.
Phenyl-β-lactic methyl ketone. See β-Hydroxyphenylpropionyl methyl ketone.

Phenyl*di*-*o*-nitrodibenzylhydrazine (Paal and Bodewig), 1892, A., 1456.

Phenylnitromethane. See Toluene, nitro-.

Phenyl*tetra*nitronaphthylamine (Merz and Weith), 1883, A., 344.

Phenyl-*p*- and -*o*-nitrophenyl oxides, *di*- and *tri*-nitro- (*tri- and tetranitrodiphenyl oxides*) (Willgerodt and Huetlin), 1884, A., 1328.

Phenyl-*o:p*-*di*nitrophenylcarbin cyanide, *p*-nitro- (*trinitrodiphenylacetonitrile*) (v. Richter), 1888, A., 1186.

Phenyl-*m*-nitrophenylmethylcarbamide (*m-nitro-s-diphenylmethylcarbamide*) (Lellmann and Benz), 1891, A., 1215.

az-**Phenyl-*ald*-*m*- and -*p*-nitrophenylnaphthatriazines** and *p*- and *m*-nitro- (Meldola and Forster), 1891, T., 693.

Phenylnitropropionic acid, *p*-nitro-, derivatives of (Friedländer and Mähly), 1885, A., 1137.

Phenyl*di*nitropropionic acid (Gabriel), 1885, A., 1229.

Phenylnitropropylene and its derivatives (Priebs), 1884, A., 313; 1885, A., 161.

Phenylnitrosoimidothiazoline (Schatzmann), 1891, A., 745; (Näf), 1891, A., 1517.

Phenylnitrososulphone (Rössing), 1890, A., 781.

Phenyl*di*nitrotoluidine (*γ-dinitrotolylphenylamine*) (Hepp), 1883, A., 317.

Phenyl-*m*-nitro-*p*-tolylcarbamide (Leuckart), 1890, A., 760.

Phenyl-*o*-nitro-*p*-tolylthiocarbamide, *m*-nitro- (Steudemann), 1884, A., 307.

Phenylnonyl-carbamide and **-thiocarbamide** (Freund and Schönfeld), 1892, A., 132, 133.

Phenyloctane. See Octylbenzene.

Phenyloctonitrile (*hexylbenzylic cyanide*) (Rossolymo), 1889, A., 862.

Phenylosazoneglyoxalcarboxylic acid (Nastvogel), 1889, A., 237.

n-**Phenylosotriazaldehyde** (Jonas and v. Pechmann), 1891, A., 1113.

n-**Phenylosotriazole** and its homologues (Jonas and v. Pechmann), 1891, A., 1113.
cyano- (Jonas and v. Pechmann), 1891, A., 1114.

n-**Phenylosotriazolecarboxylic acid** and its derivatives (Jonas and v. Pechmann), 1891, A., 1112.
amido-, and nitro- (Baltzer and v. Pechmann), 1891, A., 1116.

n-**Phenylosotriazoledicarboxylic acid** (Baltzer and v. Pechmann), 1891, A., 1116.

n-**Phenylosotriazolethiamide** (Jonas and v. Pechmann), 1891, A., 1114.

Phenylosotriazonecarboxylic acid (v. Pechmann), 1888, A., 1289.

n-**Phenylosotriazylamine** and *n*-**phenylosotriazyl alcohol** (Jonas and v. Pechmann), 1891, A., 1114.

Phenyloxamic acid. See Oxanilic acid.

μ-**Phenyloxazoline** (Gabriel and Heymann), 1890, A., 1267.
preparation of (Gabriel and Neumann), 1892, A., 1332.
m-nitro- (Elfeldt), 1892, A., 213.

Phenyl*iso*oxazole (Claisen and Stock), 1891, A., 451.

Phenyl*iso*oxazolone (Perkin and Stenhouse), 1891, T., 1005; (Claisen and Zedel), 1891, A., 468; (Hantzsch), 1891, A., 740; (Nussberger), 1892, A., 1177.

Phenyl*iso*oxazolone, oxime of (Claisen and Zedel), 1891, A., 468.

Phenyloximidoacetic acids, α- and β- (Müller), 1883, A., 1129; 1884, A., 584; (Hantzsch), 1890, A., 1274; 1891, A., 444.

Phenyloximidoacetonitrile (Russanoff), 1892, A., 322.

α-**Phenyloxyacrylic acid.** See Coumaric acid.

β-**Phenyloxyacrylic acid.** See Phenylglycidic acid.

Phenylparabanic acid (v. Stojentin), 1885, A., 1196.

Phenylparaconic acid and its salts (Jayne), 1883, A., 472; (Fittig and Röders), 1890, A., 621.
  constitution of (Erdmann), 1884, A., 906.
  nitration of (Erdmann), 1886, A., 67.
  bromo- and *iso*bromo- (Fittig and Leoni), 1890, A., 895.
  chloro- (*o*-, *m*- and *p*-), disubstituted naphthalenes from (Erdmann and Kirchhoff), 1889, A., 150.
  2:4-, 2:5- and 3:4-*di*chloro-, and their derivatives (Erdmann), 1889, A., 265; (Schwechten), 1890, A., 619; (Erdmann and Schwechten), 1891, A., 450.
  nitro- (Salomonson), 1885, A., 1224; 1888, A., 480.

Phenylparamide (*mellitic acid, phenylimide of*) (Hötte), 1885, A., 1220.

Phenylpentane. See Amylbenzene.

ω-**Phenylpentamethylene glycol** and **bromide** (Kipping and Perkin), 1890, T., 311, 313.

Phenylpentamethylpyrazolone (1-ψ-*cumyl*-2:3-*dimethylpyrazolone*) (Haller), 1885, A., 818.

Phenylpentenoic acid. See Hydrostyrylacrylic acid and Phenylmethyl-*iso*crotonic acid.

μ-**Phenylpentoxazoline** (Gabriel and Elfeldt), 1892, A., 212.
  m-nitro- (Elfeldt), 1892, A., 214.

Phenylpentylene. See Phenylamylene.

Phenyl*iso*pentylene. See *iso*Amylbenzene.

Phenylphenacyl oxide, *m*-nitro- (Lellmann and Donner), 1890, A., 523.

2′-**Phenylphen-*p*-azoxine** (Lellmann and Donner), 1890, A., 524.

Phenylphenotriazole, *meso*- (Kehrmann and Messinger), 1892, A., 889.

Phenyl-*o*-phenylenediamine (*amidodiphenylamine*) (Schöpff), 1890, A., 1113.

Phenyl-*p*-phenylenediamine (Ikuta), 1888, A., 167; (Hencke), 1890, A., 609.

Phenyl-*o*-phenyleneguanidine (Keller), 1891, A., 1469.

"**Phenyl-*p*-phenylglycoluric acid**" (Guareschi), 1892, A., 828.

Phenylphenylhydrazine, 3-bromo-6-nitro- (Willgerodt), 1888, A., 949.
  allo-*m*-chloro-*o*-nitro-, preparation of (Willgerodt and Ellon), 1891, A., 1361.

Phenyl-*ald*-phenylnaphthatriazine. See Diphenyl-αβ-naphthatriazine.

Phenylphenylsemithiocarbazides, *o*- and *p*-chloro- (Hewitt), 1891, T., 210, 212.

Phenylphosphoric acid. See Phenylic phosphate.

Phenylphosphorous acid (Noack), 1883, A., 736.

Phenylphosphoryl chloride (Noack), 1883, A., 735.

Phenylphosphoryl *di*-, *tetra*- and **thiochlorides** (Anschütz and Emery), 1890, A., 34, 35.

5-**Phenyl*iso*phthalic acid** (Doebner), 1890, A., 1284; 1891, A., 1065.

o-**Phenylphthalidecarboxylic acid,** isomeride of (Juillard), 1888, A., 955.

Phenylphthalimide, preparation of (Haller), 1892, A., 1204.

Phenylpiperazine, *p*-nitro- (Schmidt and Wichmann), 1892, A., 210.

1-**Phenyl-3:6-*o*-piperazone** (Michaelis and Hermens), 1892, A., 1494.

1-**Phenylpiperidine** and its derivatives (Lellmann), 1887, A., 604; (Lellmann and Geller), 1888, A., 1107.
  o-amido- (Lellmann and Just), 1891, A., 1245.
  p-amido-, formation of dyes from (Lellmann and Geller), 1888, A., 1108.
  p-bromo- (Lellmann and Just), 1891, A., 1244.
  nitro-derivatives of (Lellmann), 1887, A., 604.

γ-**Phenylpiperidine** (Bally), 1888, A., 65.

Phenylpiperidylcarbamide (Gebhardt), 1885, A., 384; (Wallach and Lehmann), 1887, A., 385.

Phenylpiperidyllactic acid (Erlenmeyer), 1889, A., 988.

Phenylpiperidylthiocarbamide (Skinner and Ruhemann), 1888, T., 558.

α-**Phenylpropaldehyde** (v. Miller and Rohde), 1891, A., 898.

β-**Phenylpropaldehyde** (*hydrocinnamaldehyde*) (v. Miller and Rohde), 1890, A., 979.

Phenylpropargyl oxide (Henry), 1883, A., 803.

Phenylpropenylamidine (Michael and Wing), 1885, A., 963.
Phenylpropiolic acid (Perkin and Bellenot), 1886, T., 441.
  preparation of (Perkin), 1884, T., 171.
  direct addition of hydrogen to (Aronstein and Holleman), 1889, A., 878.
  formation of *allo*cinnamic acid from (Liebermann and Scholz), 1892, A., 848.
  *di*chloride (Nissen), 1892, A., 1464.
  o-amido-, and its derivatives (v. Baeyer and Bloem), 1883, A., 196.
α-**Phenylpropionamide** (Janssen), 1889, A., 596.
β-**Phenylpropionamide** (v. Hofmann), 1886, A., 45; (Hughes), 1891, P., 71.
Phenylpropionic acid, formation of a hydrocarbon, $C_{18}H_{12}$, from (Kipping), 1892, P., 107.
α-**Phenylpropionic acid** (*hydratropic acid*) (Oliveri), 1890, A., 375.
  preparation of (Janssen), 1889, A., 596.
  derivatives of (Trinius), 1885, A., 529.
β-**Phenylpropionic acid** (*hydrocinnamic acid*) and its derivatives (Gabriel), 1883, A., 195; (Gabriel and Herzberg), 1883, A., 1123; (Herzberg), 1885, A., 661.
  thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096.
  melting point and separation of mixtures of phenylacetic acid and (Salkowski), 1885, A., 602.
  3:4-*di*amido- (Gabriel), 1883, A., 195.
  m-bromo- (Gabriel), 1883, A., 195.
  3:4-bromamido- (Gabriel), 1883, A., 195.
  o-, *m*- and *p*-chloro- (Herzberg), 1885, A., 661.
  p-chloro- (Miersch), 1892, A., 1222.
  αβ-*di*chloro- (Erlenmeyer), 1883, A., 196.
  chlorobromo- (Erlenmeyer), 1883, A., 196.
  o-, *m*- and *p*-iodo- (Herzberg), 1885, A., 661.
  3:5-*di*nitr-4-amido- (Stoehr), 1884, A., 1350.
α-**Phenylpropionic anhydride,** *o*-amido-. See Atroxindole.
β-**Phenylpropionic anhydride,** *o*-amido-. See Hydrocarbostyril.
β-**Phenylpropionic** (*cinnamic*) **chloride** (Hughes), 1891, P., 71.
α-**Phenylpropionitrile** (Meyer), 1889, A., 596.
Phenylpropionylcarbamide (Kühn), 1885, A., 260.
Phenylpropylacetamide, β- and γ-bromo- (Elfeldt), 1892, A., 214.
Phenylpropylacetic acid (Rossolymo), 1889, A., 861.
Phenyl*iso*propylacetylglycollic acid. See Acetylcumylglycollic acid.
Phenylpropylamine and its derivatives (Tafel), 1886, A., 940; 1889, A., 976; (Garelli), 1892, A., 845.
  di- and *tri*-nitro- (van Romburgh), 1886, A., 455.
Phenyl*iso*propylamine (Edeleanu), 1887, A., 583.
Phenyl*iso*propylbenzenylnaphthylenediamine (Fischer), 1892, A., 1473.
Phenylpropylcarbinol (Marshall and Perkin), 1891, T., 886.
Phenylpropylene. See Allylbenzene.
1-Phenyl-4-*iso*propylene-3:5-pyrazolidone (Michaelis and Burmeister), 1892, A., 1005.
Phenylpropylene-ψ-semithiocarbazide (Avenarius), 1891, A., 550.
Phenylpropylene-ψ-thiocarbamide (Prager), 1890, A., 159.
Phenyl*iso*propylethylene glycol (Fossek), 1884, A., 833.
Phenyl*iso*propylhydrazine (Philips), 1887, A., 1104.
Phenylpropylic alcohol (Errera), 1887, A., 35.
Phenyl*iso*propylic alcohol (*benzylmethylcarbinol*) (Errera), 1887, A., 35.
Phenyl*iso*propylketone-*o*-carboxylic acid (*benzoylisopropyl-o-carboxylic acid*) (Roser), 1885, A., 268.
Phenylpropylnitramine, *tri*nitro- (van Romburgh), 1886, A., 455.
Phenylpropylthiocarbamine chloride (Billeter and Strohl), 1888, A., 364.
Phenyl-propyl- and -*iso*propyl-triazole-carboxylic acids (Bladin), 1892, A., 638.
Phenylpropyl-. See also Propylphenyl-.
Phenyl*meta*pyrazole (Pinner and Lifschütz), 1887, A., 1055.
1-Phenylpyrazole (Balbiano), 1887, A., 1054; 1889, A., 1215; (Knorr and Laubmann), 1889, A., 410.
  derivatives of (Balbiano), 1890, A., 1164.
  4-bromo- and *di*- and *tri*-bromo- (Balbiano), 1890, A., 797.
2-Phenyl-β-pyrazole. See 2-Phenylglyoxaline.

1-Phenylpyrazole-4-carboxylic acid (Knorr and Laubmann), 1889, A., 410.
1-Phenylpyrazole-5-carboxylic acid (Claisen and Roosen), 1891, A., 1107.
1-Phenylpyrazole-3:5-dicarboxylic acid (Balbiano), 1890, A., 1164; (Claisen and Roosen), 1891, A., 1107.
  4-bromo- (Balbiano), 1890, A., 1165.
1-Phenylpyrazole-3:4:5-tricarboxylic acid (Knorr and Laubmann), 1889, A., 410.
1-Phenylpyrazolidine (Michaelis and Lampe), 1892, A., 355.
1-Phenyl-3:5-pyrazolidone (Michaelis and Burmeister), 1892, A., 1004.
  4-oxime of (Michaelis and Burmeister), 1892, A., 1005.
1-Phenyl-3:5-pyrazolidone-4-azobenzene (Michaelis and Burmeister), 1892, A., 1005.
1-Phenylpyrazoline (Fischer and Knoevenagel), 1887, A., 932; (Balbiano), 1889, A., 1215.
Phenyl*meta*pyrazolone (*α-phenylhydantoin*) (Pinner), 1888, A., 1102.
Phenylpyrazolone (*quinizine*) derivatives, constitution of (Knorr), 1884, A., 1377; 1887, A., 601.
1-Phenylpyrazolone (Ruhemann and Morrell), 1892, T., 799.
1-Phenyl*iso*pyrazolone and 4-bromo- (Fischer and Knoevenagel), 1887, A., 933.
1-Phenylpyrazolone-3-carboxylic acid (Buchner), 1890, A., 156.
1-Phenylpyrazolone-4-carboxylic acid (Ruhemann and Morrell), 1892, T., 797, 799.
1-Phenylpyrazolone-3-carboxylic acid, 4-amido- (Tafel), 1887, A., 468.
2-Phenylpyridine (Skraup and Cobenzl), 1883, A., 1015.
3-Phenylpyridine, and its diketone (Skraup and Cobenzl), 1883, A., 1013.
4-Phenylpyridine, and its salts (Hantzsch), 1884, A., 1194.
2-Phenylpyridine ketone, and its salts (Skraup and Cobenzl), 1883, A., 1015.
3-Phenylpyridinecarboxylic acid and its salts (Skraup and Cobenzl), 1883, A., 1012.
Phenylpyridinedicarboxylic acids, 2- and 3-, and their salts (Skraup and Cobenzl), 1883, A., 1014, 1011.
2-Phenylpyridinedicarboxylic acid, *di*bromo-, and its salts (Skraup and Cobenzl), 1883, A., 1014.
2-Phenylpyridinephenyleneketonecarboxylic acid (Doebner and Kuntze), 1889, A., 412.
3-Phenylpyridinesulphodicarboxylic acid (Immerheiser), 1889, A., 527.
4-Phenylpyridinetetracarboxylic acid, and its salts (Hantzsch), 1884, A., 1193.
1-Phenyl-4-pyridone, *αββ-tri*chloro- (Zincke), 1890, A., 965; (Zincke and Fuchs), 1892, A., 448.
1-Phenyl-4-pyridonecarboxylic acid, *αββ-tri*chloro- (Zincke), 1890, A., 965; (Zincke and Fuchs), 1892, A., 448.
Phenylpyrrodiazolecarboxylic acid, 1:3-, synthesis of (Andreocci), 1892, A., 636.
1-Phenylpyrrolineazobenzene (Fischer and Hepp), 1886, A., 1042.
1-Phenylpyrroline-2:5-dibenzoic acid (Baumann), 1887, A., 735.
Phenylpyruvic acid (Plöchl), 1884, A., 604; 1887, A., 254; (Erlenmeyer), 1887, A., 142, 1046; (Wislicenus), 1887, A., 587.
  synthesis of (Erlenmeyer), 1889, A., 990.
Phenylquinaldine. See Phenyl-2′-methylquinoline.
Phenylquinaldinic acid, See 4′-Phenylquinoline-2′-carboxylic acid.
2′-Phenylquinazoline (Gabriel and Jansen), 1890, A., 1442.
α-Phenylquininic acid (Doebner), 1889, A., 411.
Phenylquinoline, amido- [m.p. 136°·5] (Jellinek), 1886, A., 1045.
1-Phenylquinoline and its derivatives (La Coste and Sorger), 1886, A., 80.
3-Phenylquinoline and its derivatives (La Coste and Sorger), 1886, A., 81.
  amido-(Weidel and v. Georgievics), 1888, A., 967.
2′-Phenylquinoline, preparation of (Friedländer and Göhring), 1883, A., 1148; (Doebner and v. Miller), 1883, A., 1149.
  derivatives of (Doebner and v. Miller), 1886, A., 721; (Murmann), 1892, A., 1003.
  2-amido- (v. Miller and Kinkelin), 1885, A., 1144.
3′-Phenylquinoline, preparation of (Friedländer and Göhring), 1883, A., 1148.
4′-Phenylquinoline and its derivatives (Grimaux), 1883, A., 668; (Koenigs and Nef), 1886, A., 1045; 1887, A., 599.

3′-Phenyl*iso*quinoline and 4′-amido-, and 1′:4′:-chloronitro- (Gabriel), 1886, A., 265, 630.

Phenylquinolineamine, and its salts (Friedländer and Weinberg), 1885, A., 990.

2′-Phenylquinoline-4′-carboxylic acid (*α-phenylcinchonic acid*) (Doebner), 1887, A., 504.
  homologues of (Doebner and Gieseke), 1888, A., 300.

4′-Phenylquinoline-2′-carboxylic acid (*phenylquinaldinic acid*) (Koenigs and Nef), 1886, A., 1045.

3-Phenylquinoline-*mono*- and -*di*-carboxylic acids (Claus and Nicolaysen), 1886, A., 68.

2′-Phenylquinolinesulphonic acids (Murmann), 1892, A., 1003.

3-Phenylquinoline-*p*- and -*β*-sulphonic acids and their salts (La Coste and Sorger), 1886, A., 82.

Phenylquinonediimide (Hencke), 1890, A., 609.

Phenylrosaniline, *di*nitro- (Nölting), 1883, A., 54.

Phenylrosinduline (*rosinduline*) (Fischer and Hepp), 1888, A., 1291; 1890, A., 909.
  amido- (Fischer and Hepp), 1890, A., 765.

Phenylrosindulinesulphonic acid (Fischer and Hepp), 1891, A., 1045.

Phenylsalicenyluramidoxime (Spilker), 1890, A., 144.

Phenylsalicylic acid (Graebe), 1888, A., 477; (Arbenz), 1890, A., 892.
  *tri*bromo-, and *di*nitro- (Arbenz), 1890, A., 893.

Phenylsantoninmethane, *m*-nitro- (Bertoni), 1892, A., 622.

α-Phenylselenazylamine (Hoffmann), 1889, A., 726.

Phenylseleniocarbamide (Stolte), 1886, A., 781.

Phenylseleniocarbimide (Stolte), 1887, A., 43.

Phenylsemicarbazide (Edeleanu), 1892, A., 1323.
  o-chloro- (Hewitt), 1891, T., 210.

Phenylsemithiocarbazide (Skinner and Ruhemann), 1888, A., 274.

Phenylsorbinosazone (Fischer), 1887, A., 567.

Phenylsuccenylamidine (Comstock and Wheeler), 1892, A., 702.

Phenylsuccinamic acid, *p*-bromo- (Hoogewerff and van Dorp), 1891, A., 196.

Phenylsuccinamide, constitution of (Hoogewerff and van Dorp), 1891, A., 197.
  action of potassium hypobromite on (Hoogewerff and van Dorp), 1891, A., 196.
  p-bromo-, and bromamido- (Hoogewerff and van Dorp), 1891, A. 196.

Phenylsuccinazone (Ciamician and Zanetti), 1890, A., 1120.

Phenylsuccinimide (Moine), 1887, A., 489.
  preparation of (Haller), 1892, A., 1204.

Phenylsulpharsenic acid, disodium salt of (Schulte), 1883, A., 187.

Phenylsulphineacetic acid, non-existence of (Otto and Engelhardt), 1887, A., 263.

"**Phenylsulphocyamine,**" α-amido- (Ville), 1887, A., 833.

Phenylsulphonamic acid (Traube), 1890, A., 1137.
  *di*bromo-, barium salt of (Traube), 1891, A., 569.

Phenylsulphone. See Diphenylsulphone.

Phenylsulphoneacetates, properties of (Michael and Palmer), 1885, A., 986.

Phenylsulphoneacetonamine (R. and W. Otto), 1888, A., 282.

Phenylsulphoneacetonephenylmercaptole (R. and W. Otto), 1888, A., 282; (Otto and Rössing), 1891, A., 568.

Phenylsulphoneacetoxime (R. and W. Otto), 1888, A., 282.

Phenylsulphone-*o*-amido- and -*o*-nitroanilides and -*m*-amido- and -*m*-nitro-*p*-toluidides (Lellmann), 1884, A., 51.

Phenylsulphone-δ-amidovaleric acid (Schotten and Schlömann), 1892, A., 354.

Phenylsulphone-*mono*-and -*di*-bromacetones (R. and W. Otto), 1888, A., 282.

Phenylsulphone*di*bromamide (Hoogewerff and van Dorp), 1888, A., 1194.

α-Phenylsulphone-α-bromopropionic acid (Otto), 1890, A., 381.

α-Phenylsulphonebutyric acid (R. and W. Otto), 1888, A., 577.

β-Phenylsulphone-crotonic and -*iso*crotonic acids (Autenrieth), 1891, A., 203.

Phenylsulphone-ethylic alcohol, and its derivatives (Otto and Damköhler), 1885, A., 262.

Phenylsulphone-ethylic sulphate and chloride (Otto and Damköhler), 1885, A., 262, 263.

Phenylsulphonehydroxypropionic acid, *p*-chloro- (König), 1892, A., 1091.

Phenylsulphonephenylbenzenylamidine (Wallach), 1883, A., 48.

Phenylsulphonephenylhydrazine (Escales), 1885, A., 798.

α-**Phenylsulphonepropionic acid** (Otto), 1890, A., 381.
  preparation of the ethylic salts of (Otto), 1885, A., 537.

β-**Phenylsulphonepropionic acid** (Otto), 1888, A., 360.

Phenylsulphonepropionic acid, *p*-chloro-*α*-amido- (König), 1892, A., 1091.

Phenylsulphonetetrahydroquinoline (Schotten and Schlömann), 1892, A., 355.

Phenyltaurine and its salts (Andreasch), 1883, A., 664.
  preparation of (James), 1885, T., 369.
  anilide, and its hydrochloride (Leymann), 1885, A., 786.

Phenyltaurocyamine, formation of (James), 1885, T., 373.

Phenyltetrahydro-*α*- and -*β*-naphthabenzyl-carbamides and -thiocarbamides (Bamberger and Helwig), 1889, A., 1198.

2′-**Phenyltetrahydro-*α*-naphthaquinoline** (Doebner and Kuntze), 1889, A., 412.

Phenyl-*α*-tetrahydronaphthyl-carbamide and -thiocarbamide (Bamberger and Althausse), 1888, A., 960.

1-**Phenyl-Δ^2-tetrahydropicoline** (Lipp), 1892, A., 1244.

3′-**Phenyltetrahydroquinazoline** (Paal and Busch), 1890, A., 73.
  2′-thio- (Söderbaum and Widman), 1889, A., 973; (Busch), 1892, A., 1495.

2′-**Phenyltetrahydroquinoline** and its nitroso-derivative (Doebner and v. Miller), 1886, A., 722.
  m-amido- and *m*-nitro- (v. Miller and Kinkelin), 1885, A., 1145.

Phenyltetra-*m*-hydroxydiphenylmethane, *p*-nitro- (Siboni), 1892, A., 621.

Phenyltetra-*p*-hydroxydiphenylmethane, *o*-nitro- (Siboni), 1892, A., 621.

Phenyltetra-*p*-hydroxydiphenylmethanes, *m*- and *p*-nitro- (Bertoni and Zenoni), 1892, A., 620.

Phenyltetramethylenic *di*bromide and glycol (Marshall and Perkin), 1891, T., 890.

Phenyltetramethylpyrazolone (1-*ψ*-*cumylmethyloxyquinizine*) and its oxime (Haller), 1885, A., 818.

Phenyltetrazenylamidoxime (Bladin), 1889, A., 979.

Phenyltetrazolecarboxylic acid, amido- and nitro- (Bladin), 1892, A., 1009.

Phenyltetrazolecarboxylthiamide (Bladin), 1892, A., 638.

Phenyltetric acid (Moscheles and Cornelius), 1888, A., 1272.

Phenyltetrose (Fischer and Stewart), 1892, A., 1447.

m-**Phenylthiamidobenzoic acid** (Aschan), 1884, A., 907.

α-**Phenylthiazole** (Arapides), 1889, A., 414; (Popp), 1889, A., 725.

μ-**Phenylthiazole** (Hubacher), 1891, A., 221.

Phenylthiazoline (Hantzsch and Traumann), 1888, A., 573; (Gabriel and Heymann), 1890, A., 524.

Phenylthiazylamine (Traumann), 1889, A., 415.

Phenylthienylmethane (Peter), 1884, A., 1001.

α-**Phenyl*di*thiobiuret** (Hecht), 1892, A., 704; (Fromm), 1892, A., 844.

Phenyl*di*thiocarbamic thioanhydride (Losanitsch), 1892, A., 55.

Phenylthiocarbamide (Bertram), 1890, A., 1291; 1892, A., 465.
  action of benzylic chloride and of allylic bromide on (Werner), 1890, T., 295, 301.
  action of chlorosulphonic acid on (Pawlewski), 1889, A., 1165.
  action of hydrogen *per*oxide on (Hector), 1889, A., 872.
  action of silicon *tetra*bromide on (Reynolds), 1888, T., 856.
  compounds of, with metallic salts (Rathke), 1884, A., 1018.

Phenylthiocarbamide allylic, benzylic, ethylic, methylic and propylic cyanides (Hecht), 1890, A., 1104.

Phenylthiocarbamine*iso*butylcyamide (Hecht), 1892, A., 703.

Phenylthiocarbimide, preparation of (Werner), 1891, T., 398.
  and chloral-ammonia (Dixon), 1892, T., 529.
  action of acetic acid on (Cain and Cohen), 1891, T., 327; P., 70; (Werner), 1891, T., 544; P., 85.
  action of aldehyde- and of valeraldehyde-ammonia on (Dixon), 1888, T., 416, 417.
  action of, on amido-acids (Aschan), 1883, A., 1107.

- **Phenylthiocarbimide,** action of benzaldehyde and of benzoic acid on (Cohen), 1891, T., 67.
  - action of dimethylaniline on (Dixon), 1892, T., 538.
  - action of propionic acid on (Werner), 1891, T., 550.
  - action of thialdine on (Dixon), 1889, T., 627.
  - action of water on (Cain and Cohen), 1891, T., 328.
  - oxide (Helmers), 1887, A., 581.
  - *m*-nitro-, and its derivatives (Steudemann), 1883, A., 801; 1884, A., 306.
- **Phenylthiocarbimide-aldehyde-ammonia,** and action of silver nitrate on (Dixon), 1892, T., 518, 521.
- *α*-**Phenyl***di***thiodimethylketuret** (Fromm), 1892, A., 844.
- **Phenylthio-hydantoic acid** and **-hydantoin** (Aschan), 1884, A., 907.
- **Phenylthiophen** and its derivatives (Renard), 1890, A., 134.
- *α*-**Phenylthiophen,** synthesis of (Kues and Paal), 1887, A., 238.
- **Phenylthiophen-***di*- and -*tetra*-**sulphonic acids** (Renard), 1890, A., 134.
- **Phenylthiosalicylic acid.** See *o*-Phenoxybenzoic acid.
- *o*-**Phenylthio-uramidocinnamic acid** (Rothschild), 1890, A., 1123; 1891, A., 198.
- **Phenylthiouramido-***p***-tolylurethane** (*thiocarbanilotolyleneurethane*) (Schiff and Vanni), 1890, A., 1125; 1892, A., 600.
- **Phenylthiourethane** (Schiff and Vanni), 1892, A., 600.
  - oxidation of (Jacobson), 1886, A., 876.
  - nitro- (Losanitsch), 1883, A., 582.
- **Phenyltoluene.** See Methyldiphenyl-.
- **Phenyl-***m***-toluidine,** *tri*nitro-. See *tri*-Nitranilidotoluene.
- **Phenyl-***p***-toluidine** and its derivatives (Buch), 1885, A., 147; (Bonna), 1887, A., 927; (Reichold), 1890, A., 609.
  - *o*-amido- (Heidensleben), 1891, A., 307.

Phosphododecatungstic acid (Kehrmann and Freinkel), 1891, A., 1159.
Phosphohypophosphotungstates (Gibbs), 1886, A., 427.
Phosphoiodides (Moissan), 1892, A., 114.
Phosphomolybdic acid, solubility of, in ether and water (Parmentier), 1887, A., 547.
Phosphomolybdates, constitution of (Kehrmann), 1887, A., 777.
  Hypophospho-molybdates and **-tungstates** (Gibbs), 1884, A., 560.
Phosphonium bromide, dissociation of (Newth), 1892, A., 401.
  chloride, critical point of (Skinner), 1887, A., 882.
  sulphate (Besson), 1890, A., 9.
Phosphopalladious compounds (Fink), 1892, A., 1285.
Phosphoplatinous chloride (Pomey), 1887, A., 458.
Phosphorescence (Lommel), 1887, A., 410.
  theory of (Radziszewski), 1883, A., 763.
  and absorption of uranium compounds, relation between (Becquerel), 1886, A., 189.
Phosphoretted hydrogen. See Hydrogen phosphide.
Phosphoric acid. See under Phosphorus.
  dianilide (Jackson and Menke), 1885, A., 255.
*ortho***Phosphoric acid** mono- and dianilides (Michaelis and v. Soden), 1885, A., 1134.
Phosphoric anhydride or *pent***oxide.** See Phosphoric oxide under Phosphorus.
Phosphorite of Beauval, origin of (Nantier), 1889, A., 837.
  of Capo di Leuca (Giglioli), 1888, A., 1259.
  from the Rata Island, composition of (Anon.), 1884, A., 360.
  from Redonda, treatment of (Williams), 1885, A., 1018.
Phosphorites in the south-west of France, origin of (Dieulafait), 1885, A., 30.
  from the Government of Smolensk (Wernadski), 1890, A., 1071.
  in limestone districts (Dieulafait), 1884, A., 1272.

Phosphorites, iodine in (v. SANDBERGER), 1887, A., 222.
Phosphoroscope, modification of (CROOKES), 1887, A., 1066.
Phosphoroso-molybdates and **-tungstates** (GIBBS), 1884, A., 561; 1886, A., 427.
Phosphorosophospho-molybdates and **-tungstates** (GIBBS), 1886, A., 427.
Phosphorous acid. See under Phosphorus.
Phosphorous anhydride. See Phosphorous oxide under Phosphorus.
Phosphorsellinic acid, and its derivatives (SCHIFF), 1885, A., 795.
Phosphor-tin, estimation of phosphorus in (HEMPEL), 1890, A., 83.
Phosphorus in the blast furnace (HILGENSTOCK), 1885, A., 616.
  origin and distribution of, in coal and cannel coal (CARNOT), 1884, A., 1270.
  in pig-iron, influence of charcoal on the amount of (ANON.), 1883, A., 403.
  in the ores of the Ludington Mine, Michigan (BROWNE), 1889, A., 763.
  dissemination of, in masses of metal (WARREN), 1889, A., 13.
  atomic weight of (VAN DER PLAATS), 1885, A., 348.
  molecular weight of, in solution (PATERNÒ and NASINI), 1888, A., 1027; (BECKMANN), 1890, A., 447; (HERTZ), 1891, A., 260.
  valency of (MICHAELIS and LA COSTE), 1885, A., 1182.
  allotropic modification of (VERNON), 1891, P., 3.
  allotropic modifications of arsenic and, analogy between (ENGEL), 1883, A., 901.
  allotropic states of (PETERSEN), 1892, A., 405.
  amorphous, properties of (PEDLER), 1890, T., 599; P., 66.
  black (THENARD), 1883, A., 150.
  white (REMSEN and KEISER), 1884, A., 154.
  dispersion equivalent of (GLADSTONE), 1888, A., 389.
  vapour density of (BILTZ and MEYER), 1889, A., 673.
  vapour density of, at a white heat (MENSCHING and MEYER), 1887, A., 888.
  specific volume of (THORPE and TUTTON), 1890, T., 562.
  dilatation of, and its change of volume at the melting point (LEDUC), 1892, A., 7.
  odour of (THORPE and TUTTON), 1890, T., 573.
Phosphorus, action of light on (PEDLER), 1890, T., 599; P., 66.
  action of light on hydrogen bromide and iodide in presence of red moist (RICHARDSON), 1887, T., 806.
  action of amorphous, on solutions of silver and copper nitrates (SENDERENS), 1887, A., 332.
  action of sulphur on amorphous (ISAMBERT), 1885, A., 483.
  action of sulphuric anhydride on (ADIE), 1891, T., 231.
  combustion of, in dried oxygen (BAKER), 1889, A., 465.
  oxidation of (BAUMANN), 1884, A., 14, 1092; (LEEDS), 1884, A., 15, 660; (REMSEN and KEISER), 1884, A., 149, 711.
  oxidation of, at a low temperature (COWPER and LEWES), 1884, T., 10.
  behaviour of, with iron and slags (BRACKELSBERG), 1886, A., 426.
  influence of, on iron (SCHNEIDER), 1888, A., 421.
  analysis of a slag from the manufacture of, in electrical furnaces (CHORLEY), 1892, A., 1401.
  poisoning in man and in the dog (BLENDERMANN), 1883, A., 878.
    formation and migration of fat in (LEO), 1885, A., 1002.
    acute, gastric juice in (CAHN), 1886, A., 1053.
    the urine in a case of (STARLING and HOPKINS), 1892, A., 650.
Phosphorus bromides, combination of ammonia with (BESSON), 1891, A., 398.
  iridium bromides (GEISENHEIMER), 1890, A., 1383.
  chlorides, conversion of *tri*calcium phosphate into (RIBAN), 1883, A., 287.
    heat of formation of (THOMSEN), 1883, A., 544.
    combination of ammonia with (BESSON), 1891, A., 398.
  *tri*chloride, preparation of, from phosphorus oxychloride (RIBAN), 1883, A., 288.
    and oxychloride, method of distinguishing (DENIGÈS), 1890, A., 664.
    action of, on organic acids and water (BOTHAMLEY and THOMPSON), 1891, A., 170.
    action of bromine on (STERN), 1886, T., 815; P., 229.
  gold chloride (LINDET), 1884, A., 968; 1887, A., 227.

Phosphorus iridium chlorides (Geisenheimer), 1890, A., 1068.
  chlorobromides (Stern), 1886, T., 815.
  oxychloride. See Phosphoryl chloride.
  fluorides, action of red hot platinum on (Moissan), 1886, A., 592.
  *tri*fluoride (Moissan), 1885, A., 15; 1891, A., 264.
    preparation of (Moissan), 1885, A., 482.
    thermochemistry of (Berthelot), 1885, A., 328.
    action of fluorine on (Moissan), 1892, A., 12.
    action of the induction spark on (Moissan), 1885, A., 215.
    combination of bromine with (Moissan), 1885, A., 955.
  *tri*fluoro*di*chloride (Poulenc), 1891, A., 1417.
  *penta*fluoride (Moissan), 1886, A., 303; 1887, A., 212.
    action of, on heated spongy platinum (Moissan), 1891, A., 1433.
    combination of, with nitrogen peroxide (Tassel), 1890, A., 1052.
  oxyfluoride. See Phosphoryl fluoride.
  bromonitride (Besson), 1892, A., 1272.
  chloronitride (v. Hofmann), 1885, A., 15; (Besson), 1892, A., 1152, 1272.
Phosphorus oxides, compounds of, with sulphuric anhydride (Adie), 1891, T., 230; P., 19.
Phosphorus *sub***oxide** (Thorpe and Tutton), 1886, T., 834.
Phosphorous oxide (*phosphorous anhydride*), physical properties and chemical reactions of (Thorpe and Tutton), 1890, T., 545; P., 61; 1891, T., 1019; P., 156.
  crystalline (Cabell), 1885, A., 121.
  action of sunlight on (Irving), 1884, A., 156.
  alleged decomposition of, by sunlight (Cowper and Lewes), 1884, T., 10.
  action of sulphuric anhydride on (Adie), 1891, T., 230.
Phosphorus *tetr***oxide** (Thorpe and Tutton), 1886, T., 833; P., 235.
Phosphoric oxide (P_4O_{10}) (*phosphorus pentoxide; phosphoric anhydride*) in felspar (Lindström), 1887, A., 347.
  three modifications of (Hautefeuille and Perrey), 1884, A., 1258.
  action of hydrogen chloride on (Bailey and Fowler), 1888, T., 756.
Phosphoric oxide (P_4O_{10}), action of phosphoryl chloride on (Huntly), 1890, P., 178; 1891, T., 202.
  combination of, with sulphuric anhydride (Weber), 1887, A., 328.
Phosphorus sulphoxide (Thorpe and Tutton), 1891, T., 1023.
  Hypophosphorous acid, oxidation of, by spongy palladium (Engel), 1890, A., 690.
    estimation of (Amat), 1891, A., 243.
  Hypophosphites, elimination of, by the urine (Eymonnet), 1884, A., 1058.
    the molybdate test for (Millard), 1889, A., 548.
    estimation of (Moerk), 1890, A., 293.
  Phosphorous acid (Amat), 1889, A., 825.
    constitution of (Wedensky), 1889, A., 103.
    estimation of (Reitmair), 1891, A., 243.
    diamide of (Thorpe and Tutton), 1891, T., 1027.
    dihydrazide of (Michaelis and Oster), 1892, A., 1325.
    ethereal salts of (Jaehne), 1890, A., 858.
    fluoro- (Berthelot), 1885, A., 328.
  Pyrophosphites (Amat), 1888, A., 914.
  Hypophosphoric acid and its salts (Joly), 1886, A., 200; (Sänger), 1886, A., 419; (Salzer), 1886, A., 420; (Drawe), 1889, A., 341.
    thermochemistry of (Joly), 1886, A., 408.
    decomposition of (Joly), 1886, A., 593, 662.
    estimation of (Amat), 1891, A., 243.
    hydrates of (Joly), 1886, A., 303.
  Hypophosphates (Drawe), 1889, A., 341; (Rammelsberg), 1892, A., 403.
Phosphorus acids, titration of (Engel), 1886, A., 489.
  Phosphoric acids, electrolysis of (Janeček), 1888, A., 914.
    thio-, and their salts (Kubierschky), 1885, A., 632.
  Phosphates, thio-, reactions of (Kubierschky), 1885, A., 633.
  Phosphoric acid in urine (Carles), 1892, A., 1115.
    preparation of (Ziegeler), 1886, A., 201.
    pure, preparation of (Nicolas), 1891, A., 398.

Phosphoric acid, preparation of, by the oxidation of phosphorus with air in presence of moisture (Wenzell), 1883, A., 1050.
manufacture of (Runyon), 1884, A., 260.
electrical conductivity of solutions of (Crompton), 1888, T., 122.
crystallisation of (Huskisson), 1885, A., 347; (Joly), 1885, A., 482.
basicity of (Berthelot), 1892, A., 394.
reversion of, by heat (Phillips), 1885, A., 615.
saturation of, by bases (Joly), 1885, A., 348.
biological function of (Mairet), 1884, A., 1392.
elimination of, in the urine in insanity and epilepsy (Lailler), 1885, A., 73.
a derivative of boric acid and (Meyer), 1890, A., 108.
combination of, with silica (Hautefeuille and Margottet), 1883, A., 782.
combinations of, with titanic, zirconic and stannic acids (Hautefeuille and Margottet), 1886, A., 670.
glacial, sodium phosphate in (Bettendorff), 1888, A., 321.

Phosphoric acid, detection, estimation and separation:—
of mineral origin, detection of (Stoklasa), 1889, A., 1032; 1890, A., 83.
analysis of (Dugast), 1884, A., 1075; (Lasne), 1890, A., 293; (Jones), 1892, A., 99; (Vogel), 1892, A., 912.
estimation of (v. der Pfordten), 1883, A., 121; (Gladding), 1883, A., 240; (Mayer and v. Schmid), 1883, A., 241; (Broockmann; Kratschmer and Sztankovánzky), 1883, A., 380; (Ollech), 1883, A., 508; (de Gasparin), 1883, A., 619; (anon.), 1883, A., 620; (Täuber), 1883, A., 750; (Grete), 1883, A., 1031; (Ogston), 1884, A., 871; (Glaser), 1885, A., 837; (Mohr), 1886, A., 834; 1887, A., 864; (Bente), 1887, A., 397; 1888, A., 753; (Malot), 1887, A., 1063; (Isbert and Stutzer), 1888, A., 194; (Stutzer), 1889, A., 186; (Linossier), 1889, A., 308; (Burney), 1892, A., 1125.

Phosphoric acid, estimation and separation:—
estimations, calculation of (Mielcke), 1889, A., 439.
method for the valuation of (Thomson), 1883, A., 827.
estimation, volumetric, of (Caldwell), 1884, A., 110; (Bongartz), 1885, A., 438; (White), 1888, A., 751; (Schindler), 1888, A., 753; (Grete), 1888, A., 1341; (Spica), 1892, A., 912.
estimation of, as *tri*calcium phosphate (Tzschucke), 1889, A., 439.
estimation of, by the citrate method (Reitmair), 1890, A., 416; 1891, A., 243.
estimation of, by the molybdate method (Lindo), 1884, A., 493; (Thilo), 1887, A., 526; (Hundeshagen), 1889, A., 762; (Foerster), 1892, A., 1519.
estimation of: oxalic acid method as compared with the molybdic method (Lindo), 1884, A., 929.
estimation of, with silver nitrate (Clark), 1889, A., 307.
estimation of, in the presence of ammonium citrate (Seyfert), 1889, A., 548.
estimation of, in commercial products (Joulie), 1885, A., 931.
estimation of, in organic substances (Lange), 1889, A., 547.
estimation of, in rock analysis (Chatard), 1891, A., 768.
estimation of, in presence of silica (Preis), 1890, A., 825.
estimation of, in slags (Kosmann), 1886, A., 489; (Arth), 1890, A., 292; (Edwards), 1892, A., 382.
estimation of, in urine (Guillaume-Gentil), 1892, A., 619.
estimation of, in sweet wines (Fresenius), 1889, A., 547.
estimation of, in contaminated waters (Phipson), 1888, A., 533.
estimation of iron and aluminium in the presence of (Kretzschmar), 1886, A., 393; (Dyer; E. W. T. Jones), 1886, A., 491; (Thomson), 1887, A., 302; (R. Jones), 1891, A., 114; (Stutzer), 1891, A., 245; (v. Gruber), 1891, A., 501, 963; (Shepherd), 1891, A., 1138; (Meyer), 1892, A., 536; (Krug), 1892, A., 755.
separation of, from mercury and from nitric acid, sodium and chlorine (Haack), 1892, A., 530.

- **Phosphoric acid, separation:—**
  - separation of, from tungstic acid (Kehrmann), 1887, A., 866.
  - separation of vanadic acid from (Holverscheit), 1890, A., 1343.
  - See also Agricultural Chemistry.
- **Diphosphoric acid,** *mono-* and *di*imido- (Mente), 1889, A., 210.
- **Diphosphormonamic acid** (*diphosphaminic acid*), *di*imido- (Mente), 1889, A., 210.
- **Phosphates,** distribution of, in Bohemia (Stoklasa), 1885, A., 877.
  - arsenates and vanadates, analogous (Hall), 1886, P., 259; 1887, T., 94.
  - in urine in different diseases (Vanni and Pons), 1888, A., 621.
  - preparation of (Hautefeuille and Margottet), 1883, A., 782; (Grandeau), 1885, A., 872.
  - manufacture of, from basic slags, according to Scheibler's method (Hasenclever), 1885, A., 615.
  - methods for obtaining (anon.), 1885, A., 454.
  - raw, treating (Dietrich), 1886, A., 108.
  - magnetic rotation of (Perkin), 1890, P., 144.
  - thermochemistry of (Berthelot), 1887, A., 94.
  - decomposition of, by potassium sulphate at high temperatures (Grandeau), 1883, A. 151.
  - acid, of the alkaline earths, decomposition of, in presence of water (Joly), 1884, A., 556.
  - alkali, neutral (Filhol and Senderens), 1883, A., 151.
    - method for the valuation of (Thomson), 1883, A., 827.
  - alkaline (Berthelot), 1887, A., 877.
    - action of, on the alkaline earths (Ouvrard), 1888, A., 1033.
    - action of sulphur on (Filhol and Senderens), 1883, A., 783.
    - behaviour of, to various indicators (Tobias), 1883, A., 380.
  - aromatic, and reactions of (Kreysler), 1885, A., 1054, 1055.
  - colloidal and crystallised, thermochemistry of (Berthelot), 1887, A., 94.
  - crystallised (Hautefeuille and Margottet), 1883, A., 711.
- **Phosphates** of dyad, triad, and tetrad metals, double (Wallroth), 1883, A., 850.
  - dimetallic (Joly), 1887, A., 214; (Gounard), 1888, A., 429.
    - thermochemistry of (Joly), 1887, A., 202.
  - trimetallic, heat of formation of (Joly), 1887, A., 877.
  - of polyvalent metals (Johnson), 1889, A., 756.
  - metallic, electrolysis of, in acid solution (Smith), 1891, A., 1140.
  - estimation of calcium in (Vogel), 1892, A., 534.
  - natural, estimation of fluorine in (Lasne), 1889, A., 74; (Carnot), 1892, A., 1055.
  - See also Agricultural Chemistry.
- **Orthophosphoric acid** (Joly), 1886, A., 418.
  - neutralisation of (Blarez), 1886, A., 1057.
- **Metaphosphoric acid,** molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 593.
  - rate of transformation of (Sabatier), 1888, A., 404; 1889, A., 671.
- **Metaphosphates** (Tammann), 1892, A., 1050.
  - crystallised (Hautefeuille and Margottet), 1883, A., 711.
  - isomerism of (Tammann), 1891, A., 7.
  - molecular weight of (Jawein and Thillot), 1889, A., 674.
- **Nitroltrimetaphosphates** (Mente), 1889, A., 211.
- **Pyrophosphates** (v. Knorre and Oppelt), 1888, A., 413.
  - double, use of, in electrolytic estimations and separations (Brand), 1890, A., 294.
  - metallic, action of ammonium sulphide on (Buchner), 1884, A., 218.
- **Phosphorus sulphides** (Isambert), 1883, A., 901, 1049; (Dervin), 1884, A., 1259; (Rebs), 1888, A., 1155; (Mai), 1892, A., 14.
  - *tri*sulphide (Isambert), 1886, A., 768.
    - sulphur salts derived from (Lemoine), 1884, A., 555.
  - *penta*sulphide (Isambert), 1886, A., 767.
- **Phosphorus compounds,** organic (Heermann), 1892, A., 875.

Phosphorus, detection and estimation:—
- Mitscherlich's test for (Polstorff and Mensching), 1886, A., 919; (Mankiewicz), 1887, A., 526.
- estimation of carbon in (Remsen and Keiser), 1885, A., 482.
- estimation of, in iron (Tamm), 1884, A., 875; (Troilius), 1885, A., 597; (Kalmann; Wood), 1886, A., 280; (Mackintosh), 1886, A., 488; (v. Reis), 1886, A., 835; 1889, A., 648; (Huss), 1886, A., 1073; (Deane), 1887, A., 183; (Vorwerk), 1887, A., 299; (Meineke), 1887, A., 396; 1888, A., 1130; (Schneider), 1887, A., 527; (Wedding), 1887, A., 865; (Shimer), 1889, A., 76; (Jennings), 1889, A., 189; (Drown), 1889, A., 1245; (Bormann), 1890, A., 416; (Jones), 1891, A., 363; (Metz), 1891, A., 961; (Malot) 1892, A., 528; (Emmerton), 1892, A., 529; (Hamilton), 1892, A., 911; (Reinhardt), 1892, A., 912.
- estimation of, in organic compounds (Messinger), 1889, A., 81.
- estimation of, in phosphor-tin (Hempel), 1890, A., 83.
- estimation of, in urine (Chappelle), 1890, A., 825.
- estimation, colorimetric, of (Osmond), 1887, A., 999.

Phosphorus-trianhydropyruvic acid and its derivatives (Messinger and Engels), 1889, A., 36.

Phosphoryl chloride (*phosphorus oxychloride*), preparation of (Dervin), 1884, A., 155.
- preparation of, from phosphates (Oglialoro-Todaro), 1884, A., 392.
- heat of formation of (Thomsen), 1884, A., 250.
- action of nitric acid on (Williams), 1886, T., 224.
- action of, on phosphoric anhydride (Huntly), 1891, T., 202.
- reaction of, with sulphites and nitrites (Divers), 1885, T., 205.

Phosphoryl fluoride (*phosphorus oxyfluoride*) (Moissan), 1885, A., 15; 1886, A., 767; 1891, A., 264.
- preparation of (Thorpe and Hambly), 1889, T., 759; P., 132.
- thio-. See Thiophosphoryl fluoride.

Phosphorylphenylhydrazide, and thio- (Michaelis and Oster), 1892, A., 1325.

Phosphoryltolylhydrazide (Michaelis and Oster), 1892, A., 1325.

Phosphosiderite (Bruhns and Busz), 1890, A., 1073.

Phosphotrimetatungstic acid (Péchard), 1890, A., 704.

Phospho-tungstates, ortho-, meta-, and pyro- (Gibbs), 1886, A., 511.

Phosphotungstic acid (Drechsel), 1887, A., 703; (Kehrmann), 1888, A., 788; (Brandhorst and Kraut), 1889, A., 469; (Péchard), 1889, A., 1121.

Phosphotungstic acids (Kehrmann), 1887, A., 777; (Kehrmann and Freinkel), 1892, A., 1160.

Phosphovanadates (Gibbs), 1886, A., 205; (Friedheim and Szamatólski), 1890, A., 1067.

Phosphovanadicovanadates (Gibbs), 1886, A., 205.

Phosphovanadio-molybdates, -tungstates and **-vanadicotungstates** (Gibbs), 1884, A., 713.

Photoanethoil (de Varda), 1891, A., 1347.

Photobacterium phosphorescens (Wijsman), 1890, A., 998.

PHOTOCHEMISTRY—
- **Light**, absorption of, relation between molecular structure and the (v. Klobukoff), 1885, A., 1173.
  - absorption of, evidence afforded by, of the decomposition of molecular groups in solutions (Walter), 1889, A., 554.
  - absorption of, in the infra-red of the solar spectrum (Langley), 1883, A., 137; (Abney and Festing), 1883, A., 837.
  - absorption of, by the atmosphere (Langley), 1885, A., 319.
  - absorption of, by aqueous vapour (Abney and Festing), 1884, A., 241.
  - absorption of, by coloured salts (Magnanini), 1892, A., 757.
  - absorption of, and photographic sensitiveness, connection between (Eder), 1886, A., 405, 958.
  - separation of rays of, of high and low refrangibility (van Assche), 1884, A., 241.
  - spectroscopic study of compounds rendered phosphorescent by the action of, or by the electric discharge (Becquerel), 1885, A., 1098.
  - spectrographic investigations of different standards of; their use in measuring photographic sensitiveness (Eder), 1885, A., 1026.
  - electrochemical energy of (Griveaux), 1884, A., 382.

PHOTOCHEMISTRY—
Light, constant of electromagnetic rotation of, in carbon *di*sulphide (RAYLEIGH), 1885, A., 325.
electromagnetic rotation of the plane of polarisation of, by iron, nickel and cobalt (KUNDT), 1885, A., 5.
transformation of, into electricity in quartz (HANKEL), 1883, A., 412; 1885, A., 1187.
oscillations of the plane of, and polarisation of, by electric discharges (BICHAT and BLONDLOT), 1883, A., 4.
Radiation, comparative, of fused platinum and fused silver (VIOLLE), 1887, A., 1010.
from silver at the solidifying point (VIOLLE), 1883, A., 771.
solar, comparative action of heat and (DUCLAUX), 1887, A., 411.
Photometry (ANON.), 1885, A., 1260.
application of the pupil of the eye to (GORHAM), 1885, A., 320.
application of Algæ to (PHIPSON), 1884, A., 201.
application of oxalic acid to (DUCLAUX), 1887, A., 202.
measurement of light intensity by the expansion of chlorine (RICHARDSON), 1892, A., 253.
Colour-photometry (ABNEY), 1891, P., 150.
Diffusion photometer (CROVA), 1885, A., 320.
Electrochemical actinometer (GOUY and RIGOLLOT), 1888, A., 883.
Optical units (INTERNATIONAL CONFERENCE), 1885, A., 2.
Light, chemical action of (LEMOINE), 1884, A., 381; 1891, A., 965; (AMATO), 1884, A., 1237; (EDER), 1885, A., 1173; (DUCLAUX), 1887, A., 93.
reflection of actinic rays (DE CHARDONNET), 1883, A., 138.
concentration of the sun's rays for chemical reactions (BRÜHL), 1890, A., 1033.
action of, on chloric acid (PEDLER), 1890, T., 624; P., 65.
decomposition of chlorine-water in (POPPER), 1885, A., 631; 1886, A., 301; (v. PEBAL), 1886, A., 302.
rate of decomposition of chlorine water by (GORE), 1890, A., 849.
influence of hydrochloric acid on the decomposition of chlorine water by (RICHARDSON), 1891, T., 539.

PHOTOCHEMISTRY—
Light, action of chlorine on water in (PEDLER), 1890, T., 613; P., 65.
action of, on a mixture of chlorine and hydrogen (AMATO), 1884, A., 1237; (PRINGSHEIM), 1888, A., 205.
action of, on an explosive mixture of chlorine and hydrogen; a lecture experiment (MEYER), 1884, A., 552.
liberation of chlorine from hydrogen chloride by the action of, in presence of oxygen (MCLEOD), 1886, T., 608; (RICHARDSON), 1887, T., 802; (BERTHELOT), 1890, A., 6.
influence of water in promoting the interaction between oxygen and hydrochloric acid in presence of (ARMSTRONG), 1887, T., 806.
action of, on hypochlorous acid (POPPER), 1885, A., 631; (PEDLER), 1890, T., 622; P., 65.
action of, on hydrogen bromide and iodide in presence of red moist phosphorus (RICHARDSON), 1887, T., 806.
action of, on nitrogen iodide (GUYARD), 1884, A., 818.
use of nitrogen iodide to determine the chemical and mechanical equivalent of (GUYARD), 1884, A., 153.
action of, on a mixture of nitric acid and carbon *di*sulphide (TIFFEREAU), 1885, A., 1110.
action of, on moist oxygen (RICHARDSON), 1889, P., 134.
action of, on oxyhydrogen gas (ASKENASY and MEYER), 1892, A., 939.
action of, on phosphorus (PEDLER), 1890, T., 599; P., 66.
action of, on phosphorous oxide (COWPER and LEWES), 1884, T., 10; (IRVING), 1884, A., 156; (THORPE and TUTTON), 1890, T., 552; 1891, T., 1019; P., 156.
action of, on mercurous iodide (EDER), 1885, A., 1173; (YVON), 1886, A., 17.
action of, on potassium ferricyanide (EDER), 1885, A., 1173.
action of, on potassium iodide solutions (BERTHELOT), 1890, A., 7.
action of, on ruthenium peroxide (JOLY), 1892, A., 282.
action of, on silver salts in presence of reducing agents (LEA), 1888, A., 1.

Photochemistry—
Light, action of, on the haloid salts of silver (Griveaux), 1889, A., 199.
  action of, on silver bromide (Tommasi), 1883, A., 3.
  action of, on silver chloride (Newbury), 1885, A., 956; (Hitchcock), 1890, A., 213; 1891, A., 1155; (Richardson), 1891, T., 536; P., 81; (Guntz), 1891, A., 1420; (Baker), 1892, T., 728; P., 120; (Béchamp), 1892, A., 775.
  action of, on iodised silver plates in sulphuric acid (Borgmann), 1883, A., 625.
  action of, on some organic compounds (Klinger), 1886, A., 888; 1889, A., 405; (Klinger and Standke), 1891, A., 900.
  alteration of compounds of the benzene series when exposed to air and (Bidet), 1890, A., 1401.
  influence of, on the action of halogens on aromatic compounds (Schramm), 1885, A., 518, 767, 888; 1886, A., 451; 1887, A., 807; 1889, A., 240; 1891, A., 898; (Schramm and Zakrzewski), 1888, A., 9.
  influence of temperature and, on chlorination (Gautier), 1887, A., 922.
  influence of, on the decomposition of organic acids (de Vries), 1885, A., 964.
  action of, on acetic fermentation (Giunti), 1890, A., 1181.
  decomposition of glutaric and succinic acids by, in presence of an uranium salt (Wisbar), 1891, A., 1013.
  action of, on anethoil (de Varda), 1891, A., 1347.
  action of, on cane- and invert-sugar (Gladstone and Tribe), 1883, T., 341, 343.
  action of, on ethyl ether (Richardson), 1889, P., 134; 1890, P., 146; 1891, T., 51; (Dunstan and Dymond), 1890, T., 574, 988; P., 69.
  action of, on iodoform (Daccomo), 1886, A., 1000.
  action of, on alcoholic solutions of nitrobenzene (Ciamician and Silber), 1887, A., 240.
  action of, on 3-nitro-*n*-cuminic acid (Alexéeff), 1885, A., 794.
  oxidation of nitrosocamphor in presence of (Cazeneuve), 1889, A., 1203.

Photochemistry—
Light, oxidation of turpentine oil and terebenthene in (Armstrong), 1891, T., 311; (Armstrong and Pope), 1891, T., 315.
  action of, on water and oil colours used in dyeing and printing (Decaux), 1884, A., 700.
  decolouration and recolouration of litmus solutions by (Bellamy), 1889, A., 199.
  influence of, on oxidation in animals (Loeb), 1889, A., 172.
  production of oxygen by the action of, on *Protococcus pluvialis* (Phipson), 1884, A., 201.
Photographic methods and processes:—
Photography in natural colours (Vogel), 1886, A., 749.
Orthochromatic photography (Lohse), 1885, A., 612; (Eder), 1885, A., 936; (Bothamley), 1887, A., 874.
  oxalate developer for (Lord), 1886, A., 106.
photographs, transferring, on to porcelain or wood (Pavloffski), 1885, A., 612.
photographic films, expedient for rendering them sensitive to green, yellow, and red rays (Vogel), 1884, A., 1081.
  method, new (Green, Cross and Bevan), 1891, A., 138.
  paper, a new (Cros and Vergeraud), 1883, A., 752.
  copying-paper, new (Shawcross), 1886, A., 106.
  plate, measurement of the relative density of the deposit on (Abney and Edwards), 1890, A., 933.
  plates, borax in developers for (Mercier), 1891, A., 139.
  sensitisers (Bothamley), 1887, A., 874.
  sensitisers for rays of low refrangibility (Higgs), 1891, A., 1145.
silver bromide-gelatin-emulsion (Obernetter), 1883, A., 395.
  bromide, sensitising action of dyes on, relation between the absorption spectrum and (Vogel), 1886, A., 585.
  chloride and bromide, sensitising action of dyes on (Eder), 1886, A., 497.
  chloride, photochromatic properties of (Staats), 1887, A., 1071; 1888, A., 1001.

Photochemistry—
Photographic methods, *continued*:—
silver, haloid salts sensitised by dyes, photoelectric currents produced from (Moser), 1888, A., 9.
spectroscopic studies of dyes used as sensitisers (Messerschmitt), 1885, A., 1097.
application of the radiometer to the measurement of photographic action (Olivier), 1885, A., 319.
photo-salts, identity of, with the substance forming the invisible photographic image (Lea), 1888, A., 7.
  formation of (Lea), 1888, A., 1.
Polarisation:—
Rotatory power, explanation of (Fock), 1891, A., 513.
  laws of, and stereochemistry (Colson), 1892, A., 758; (Guye), 1892, A., 759.
  variation of (Oudemans), 1886, A., 406.
  change of, under the influence of various solvents (Bremer), 1885, A., 622; 1888, A., 1141.
  of singly-linked carbon atoms, limitation of free (Bischoff), 1890, A., 723.
  of carbon compounds, sign and variations of, and their chemical constitution (Guye), 1890, A., 722.
  of carbon compounds, relation between the constitution and (Sorokin), 1888, A., 768.
  and refractive power of chemical compounds, relation between (Kanonnikoff), 1891, A., 138.
  of optically active substances in very dilute solution (Přibram), 1887, A., 755.
  of optically active substances in mixtures of two solvents (Rimbach), 1892, A., 1137.
  and refractive power of certain carbohydrates, relation between (Kanonnikoff), 1889, A., 326.
  and refractive power of certain alkaloids, camphor, menthol, tartar emetic, quinic acid, and of terpene, relation between (Kanonnikoff), 1889, A., 453.
  of alkaloids, laws of variation of, under the influence of acids (Oudemans), 1883, A., 81.
  of aconitine (Dunstan and Ince), 1891, T., 281.
  of anhydroecgonine and ecgonine hydrochlorides (Einhorn), 1889, A., 1018.

Photochemistry—
Rotatory power of *apo*cinchonine and hydrochloro*apo*cinchonine under the influence of acids (Oudemans), 1883, A., 359.
  of cocaine and cocaine hydrochloride (Antrick), 1887, A., 506.
  of cupreine and its salts (Oudemans), 1889, A., 1019.
  of nicotine salts (Schwebel), 1883, A., 354.
  of papaverine (Goldschmiedt), 1888, A., 611.
  supposed, of picoline (Landolt), 1886, A., 368.
  of piperidine bases (Ladenburg), 1887, A., 164, 282.
  absence of, in amine salts (Le Bel), 1890, A., 228.
  of benzene derivatives (Lewkowitsch), 1888, T., 781; P., 87.
  of borneols and *iso*borneols, influence of solvents on (Haller), 1889, A., 1206; 1891, A., 575.
  of camphor, when dissolved in various oils (Chabot), 1890, A., 1427.
  of *d*-camphoric acid and its salts (Hartmann), 1888, A., 378.
  of terpene-derivatives (Wallach; Wallach and Conrady), 1889, A., 1071.
  of turpentine (Dunwody), 1891, A., 217.
  of turpentine, change of, on keeping (Marsh and Gardner), 1891, T., 726.
  of solutions of cellulose in Schweizer's solution (Levallois), 1884, A., 577, 833, 1288; 1885, A., 500; (Béchamp), 1885, A., 369.
  of pyroxylin (Béchamp), 1885, A., 237.
  of cane-sugar (Tollens), 1884, A., 1285.
  of cane-sugar in dilute solution (Nasini and Villavecchia), 1892, A., 801.
  of cane-sugar, influence of temperature on (Andrews), 1890, A., 579.
  of cane-sugar, action of inorganic salts on (Farnsteiner), 1891, A., 283.
  of dextrose (Tollens), 1885, A., 40.
  of grape-sugar, influence of inactive substances on (Wender), 1891, A., 1178.
  of invert-sugar (Gubbe), 1885, A., 1194.

Photochemistry—
Rotatory power of invert-sugar and of dextrose obtained from cane sugar by means of invertase (O'Sullivan), 1892, T., 408; P., 56.
of lactose (Denigès and Bonnans), 1888, A., 933.
of levulose (Jungfleisch and Grimbert), 1889, A., 479.
of levulose and invert-sugar (Tollens), 1891, A., 1178.
of compounds of mannitol with acid molybdates (Gernez), 1891, A., 1443.
of matezite and matezodambose (Combes; Girard), 1890, A., 471.
of compounds of perseitol with acid molybdates (Gernez), 1892, A., 800.
of rhamnose and of the saccharins (Schnelle and Tollens), 1892, A., 1420.
of xylose (Schulze and Tollens), 1892, A., 1420.
of galactonic, gluconic and rhamnonic acids (Weld, Lindsey, Schnelle and Tollens), 1891, A., 43.
of galactonic, gluconic and rhamnonic acids and their lactones (Schnelle and Tollens), 1892, A., 1431.
of glutamic acid (Scheibler), 1884, A., 1308.
of compounds of malic acid with normal lithium and magnesium molybdates (Gernez), 1890, A., 744.
of photosantonic acid (Nasini), 1884, A., 464.
of tartaric acid and its salts (Kanonnikoff), 1892, A., 1308.
of tartaric acid solutions (Thomsen), 1886, A., 12; (Gernez), 1887, A., 540; 1888, A., 97; (Přibram), 1887, A., 755; 1888, A., 1229; 1889, A., 378; (Long), 1889, A., 380; 1890, A., 313; 1891, A., 249.
of diacetyltartaric-derivatives (Le Bel; Colson), 1892, A., 669.
of leucine (Lewkowitsch), 1884, A., 1115.
of oils (Bishop), 1888, A., 388; (Peter), 1888, A., 766.
of quartz (Soret and Sarasin), 1883, A., 140.
of silk (Vignon), 1892, A., 254, 645.
Multi-rotation of sugars (Parcus and Tollens), 1890, A., 1084.

Photochemistry—
Multi-rotation of sugars, influence of ammonia on the (Schulze and Tollens), 1892, A., 1419.
of arabinose (Bauer), 1889, A., 1132.
of some glucoses and sucroses, with regard to their constitutional formulæ and the extent of affinity (Urech), 1886, A., 220.
of glucose and milk-sugar (Urech), 1884, A., 1112.
of milk sugar, rate of transition of the, into its normal rotation (Urech), 1883, A., 174; 1884, A., 36.
of rhamnose and of the saccharins (Schnelle and Tollens), 1892, A., 1420.
Polarimetric estimations (Landolt), 1888, A., 386.
sources of error in (Hölzer), 1883, A., 3; (Schmidt and Hänsch), 1885, A., 321.
influence of lead precipitate on (Sachs and de Barbieri), 1885, A., 694.
of dextrose, influence of inactive substances on the (Přibram), 1888, A., 1133.
of dextrose in urine (Worm-Müller), 1885, A., 702.
of lactose in milk (Wiley), 1885, A., 601; (Schmoeger), 1885, A., 693; (Vieth), 1889, A., 315.
of sugar in sweet wines (Borntrager), 1890, A., 426.
of a mixture of potassium and sodium chlorides (Schütt), 1888, A., 1341.
of quinine sulphate (Hooper), 1886, A., 1086.
rotation, left-handed, determining, with the Scheibler-Ventzke-Soleil polariscope (Eyster), 1884, A., 691.
Magnetic rotation of compounds in relation to their chemical constitution (Perkin), 1884, T., 421; (Ostwald), 1891, T., 198; P., 1.
of acetyltrimethylene (Freer and Perkin), 1887, T., 832.
of saturated and unsaturated dibasic acids and their derivatives (Perkin), 1887, P., 98; 1888, T., 561.
of the ethereal salts of tartaric and racemic acids (Perkin), 1887, T., 362; P., 29.
of allylacetic acid, diallylacetic acid, ethyl diallylmalonate and of undecylenic acid (Perkin), 1886, T., 205; P., 153.

PHOTOCHEMISTRY—
Magnetic rotation of compounds supposed to contain acetyl, or to be of ketonic origin (PERKIN), 1892, T., 800; P., 100.
of hydrated ethylic alcohol (PERKIN), 1886, T., 780.
of chloral, chloral hydrate and hydrated aldehydes (PERKIN), 1887, T., 808; P., 82.
of methyl *iso*butenyl ketone (*mesityl oxide*) (PERKIN), 1887, P., 98; 1888, T., 586, 591.
of water with some of the acids of the fatty series, with alcohol and with sulphuric acid (PERKIN), 1886, T., 777; P., 229.
of hydrochloric, hydrobromic and hydriodic acids (PERKIN), 1889, T., 702, 739; P., 130.
of saline solutions (PERKIN), 1890, P., 141; (OSTWALD), 1892, P., 12.
of solutions of ammonium and sodium salts of some fatty acids (PERKIN), 1891, T., 981; P., 125.
of nitrogen compounds (PERKIN), 1889, T., 680; P., 83, 130.
of phosphorous oxide (THORPE and TUTTON), 1890, T., 567; P., 61.
and the refraction and dispersion of light by carbon compounds containing nitrogen and by some acids, correspondence between (GLADSTONE and PERKIN), 1889, T., 750; P., 114.
constant of, of light in carbon disulphide (RAYLEIGH), 1885, A., 325.
Reflectometer, total (BRÜHL), 1891, A., 513.
Refraction, influence of the change of volume by admixture of two liquids on (BUCHKREMER), 1891, A., 2.
of liquids between wide limits of temperature (KETTELER), 1888, A., 541; 1889, A., 197.
of liquids, change of, by electric forces (QUINCKE), 1883, A., 948.
of chemical compounds (KANONNIKOFF), 1885, A., 949.
of carbon compounds (GLADSTONE), 1884, T., 241; (KANONNIKOFF), 1886, A., 335.
of carbon compounds in solution (KANONNIKOFF), 1883, A., 1041.
of carbon compounds at different temperatures (PERKIN), 1891, P., 115; 1892, T., 287.

PHOTOCHEMISTRY—
Refraction and molecular volume, new theory of (KETTELER), 1889, A., 326; (NASINI), 1892, A., 253.
relation between chemical constitution and (NASINI and BERNHEIMER), 1885, A., 1097.
and chemical constitution of gases and vapours (BRÜHL), 1891, A., 629.
of liquid carbon compounds, dependence of, on their chemical constitution (SCHRÖDER), 1883, A., 538.
density, molecular weight, and diathermanous power of substances, relation between (AYMONNET), 1892, A., 1.
and molecular heat of combustion of benzene compared with those of dipropargyl (BRÜHL), 1892, A., 1436.
in reference to the double bond (NASINI), 1885, A., 210.
of compounds, influence of simple and so-called multiple union of atoms on (BRÜHL), 1887, A., 1005.
of the hydrocarbon $C_{12}H_{20}$ (ALBITZKY), 1885, A., 211.
of the hydrocarbons, supposed influence of multiple bonds of union on (THOMSEN), 1887, A., 198; (BRÜHL), 1887, A., 200.
and compressibility of liquids, relations between (QUINCKE), 1892, A., 669.
and dispersion of carbon compounds (G. GLADSTONE), 1891, T., 290; P., 35; (J. H. and G. GLADSTONE), 1891, A., 774.
of carbon compounds of high dispersive power (BRÜHL), 1887, A., 191; (NASINI), 1887, A., 626.
and dispersion of light and magnetic rotation by carbon compounds containing nitrogen and by some acids, correspondence between (GLADSTONE and PERKIN), 1889, T., 750; P., 114.
and dispersive power of aromatic compounds with saturated lateral chains, relation between (COSTA), 1890, A., 1201.
and dispersive power of compounds supposed to contain acetyl or to be of ketonic origin (PERKIN), 1892, T., 800.
and dispersion of alums (GLADSTONE), 1886, A., 293.

Photochemistry—

- **Refraction** and dispersive power of essential oils (Gladstone), 1886, T., 609; P., 216.
  - and dispersion of sodium chlorate (Dussaud), 1892, A., 1.
  - and dispersion of silicon tetrabromide and tetrachloride and titanium tetrachloride (Gladstone), 1891, T., 299.
  - and dispersion equivalents of terpenes (Gladstone), 1886, T., 612.
  - and rotatory power of chemical compounds, relation between (Kanonnikoff), 1891, A., 138.
  - and rotatory power of certain carbohydrates, relation between (Kanonnikoff), 1889, A., 326.
  - and specific rotatory power of certain alkaloids, camphor, menthol, tartaric emetic, quinic acid, terpene and of Russian turpentine, relation between (Kanonnikoff), 1889, A., 453.
  - of allylbenzene- and propenylbenzene-derivatives (Eijkman), 1890, A., 748.
  - of allylthiocarbimide (Long), 1889, A., 86.
  - of alums (Soret), 1885, A., 109, 1097.
  - of boracite, determination of the (Mallard), 1886, A., 209.
  - of bromine, chlorine, iodine, hydrogen, oxygen and nitrogen (Gladstone), 1884, T., 256; (Brühl), 1887, A., 193.
  - of camphene (Wallach), 1889, A., 1069.
  - as a means of determining the constitution of the terpene-group (Wallach), 1888, A., 145.
  - of carbon (Gladstone), 1884, T., 251; (Brühl), 1887, A., 193.
  - of carbon dioxide (Chappuis and Rivière), 1886, A., 837.
  - of carbon disulphide derivatives (Nasini and Scala), 1887, A., 753.
  - of cyanogen (Chappuis and Rivière), 1886, A., 837; 1887, A., 753.
  - of *iso*cyanides and nitriles (Costa), 1892, A., 757.
  - of some bromo-derivatives of ethane and ethylene (Weegmann), 1888, A., 999.
  - of ethyl ether (Oudemans), 1886, A., 437.
  - of fluorine (Gladstone), 1886, A., 497.

Photochemistry—

- **Refraction** of fluorspar (Sarasin), 1886, A., 22.
  - of the isomerides fumaric and maleic acids, of citraconic, itaconic and mesaconic acids, and of thiophen (Knops), 1888, A., 938; 1889, A., 198.
  - of gases (Dale), 1890, A., 201.
  - of liquefied gases (Bleekrode), 1885, A., 467; (Dechant), 1885, A., 621.
  - of the halogen salts of lithium, sodium and potassium (Wegner), 1890, A., 549.
  - of levulose and invert sugar (Ost), 1891, A., 1000.
  - of metals (Kundt), 1888, A., 997; (Du Bois and Rubens), 1891, A., 373.
  - of three methylic acrylates (Kahlbaum), 1885, A., 1173.
  - of nickel carbonyl (Mond and Nasini), 1891, A., 1322.
  - of nitrogen compounds (Loewenherz), 1890, A., 1201; 1891, A., 373; (Bach), 1892, A., 933.
  - of certain oils (Long), 1889, A., 86.
  - of phosphorous oxide (Thorpe and Tutton), 1890, T., 564.
  - of pyrone (Brühl), 1891, A., 1195.
  - of certain salts crystallising in the regular system (Brauns), 1883, A., 1041.
  - of salts in solution (Walter), 1890, A., 202, 673; (Doumer), 1890, A., 433, 1033; (Bary), 1892, A., 929.
  - of normal salt solutions (Bender), 1890, A., 549.
  - of solids in their solutions, determination of (Schütt), 1890, A., 1033; 1892, A., 929.
  - of various substances in solution (Gladstone), 1891, T., 589; P., 103.
  - of sulphines (Nasini and Costa), 1891, A., 1305; 1892, A., 34.
  - of sulphur (Nasini), 1883, A., 264; 1884, A., 149; (Gladstone), 1884, T., 257.
  - of sulphur *di*chloride (Costa), 1891, A., 149.
  - of turbid media (Haschek), 1889, A., 197.
  - of water (Brühl), 1891, A., 629.
  - of water and quartz, variation of the, with the temperature (Dufet), 1883, A., 762.
  - of water, influence of pressure on the (Zehnder), 1888, A., 765.

Photochemistry—
  Refraction of water cooled below 0° (Pulfrich), 1888, A., 881.
    of ice (Meyer), 1887, A., 753.
  Atomic Refraction of the elements (Kanonnikoff), 1885, A., 1; (Le Blanc), 1890, A., 313.
    calculation of, for sodium light (Conrady), 1889, A., 661.
  Double refraction, electric liquid condenser for examining the phenomenon of (Quincke), 1883, A., 947.
    of liquids (Fleischl von Marxow), 1885, A., 318.
    of insulating liquids (Quincke), 1883, A., 946.
    of minerals, determination of (Michel-Lévy), 1885, A., 621.
  Molecular refraction (Wiedemann), 1883, A., 762; (Sutherland), 1889, A., 454; (Landolt), 1890, A., 1.
  Refractive index, measurement of, at high temperatures (Brühl), 1891, A., 513.
    estimation of glycerol in aqueous solution by means of its (Strohmer), 1884, A., 877.
    estimation of oils and fats by means of their (Jean), 1890, A., 89, 671; 1891, A., 625; (Amagat and Jean), 1890, A., 91; (Ellinger), 1891, A., 1305, 1401.
    estimation of the strength of solution by means of their (Ellinger), 1891, A., 1305.
    estimation of albumin in urine by means of its (Ellinger), 1891, A., 1403.
    of liquids, instrument for comparing (Sondén), 1891, A., 959.
  Dispersion, phenomena of (Gladstone), 1884, T., 258.
    formulæ, experimental examination of the older and more recent (Brühl), 1887, A., 195.
    anomalous, produced by glowing vapours (Winkelmann), 1888, A., 207.
    relation between chemical constitution and (Brühl), 1891, A., 774.
    influence of, on molecular refractive power (Brühl), 1887, A., 191.
    of certain elements (Gladstone), 1888, A., 389.
    of the diamond (Schrauf), 1885, A., 14.
    of phosphorous oxide (Thorpe and Tutton), 1890, T., 566; P., 61.

Photochemistry—
  Dispersion of sulphur (Schrauf), 1886, A., 406.
    of certain metals (Du Bois and Rubens), 1891, A., 373.
    of rock salt (Ketteler), 1887, A., 754.
    of sodium chromate (Wyruboff), 1885, A., 211.
    of aqueous solutions (Barbier and Roux), 1890, A., 673.
    of carbon compounds (Barbier and Roux), 1889, A., 805; 1890, A., 1353; 1891, A., 774; (Gladstone), 1891, T., 290; P., 35; (Nasini), 1891, A., 138.
    of acids of the acetic series (Barbier and Roux), 1890, A., 1353.
    of alcohols of the acetic series (Barbier and Roux), 1890, A., 1034.
    of allylbenzene- and propenylbenzene derivatives (Eijkman), 1890, A., 748.
    anomalous, of turpentine (v. Wyss), 1888, A., 542.
    crossed, of several rhombic substances (Wyruboff), 1884, A., 381.
    molecular, of various substances in solution (Gladstone), 1891, T., 589; P., 103.
    and molecular refractive energy of aromatic derivatives with saturated lateral chains, relation between (Costa), 1890, A., 1201.
    magnetic rotation and refraction, correspondence between, in carbon compounds containing nitrogen (Gladstone and Perkin), 1889, T., 750; P., 114.
  Dispersion, rotatory, of certain alkaloids, camphor, cholesterin, certain sugars and of essence of terebenthene (Grimbert), 1888, A., 329.
    of tartrates (Kümmell), 1891, A., 1145.
    anomalous, of iron, cobalt and nickel (Lobach), 1890, A., 673.
    new method of determining (v. Wyss), 1888, A., 542.
  Spectroscopy, radiant matter (Crookes), 1884, A., 241; 1887, A., 1066.
  Spectrum, production of white light by mixing the colours of the (Stroumbo), 1887, A., 1.
  Spectra, comparing (Love), 1888, A., 542.

Photochemistry—
Spectra and molecular aggregation, connection between (Stenger), 1888, A., 543.
  comparative effect of different parts of the, on silver salts (Abney), 1886, A., 749; (Abney and Edwards), 1890, A., 933.
  relation between the lines of various (Ames), 1891, A., 1; (Hartley), 1891, A., 773.
  reversal of metallic lines in over-exposed photographs of (Hartley), 1883, A., 263.
  method of investigating faint bands in (Deslandres), 1891, A., 773.
  spontaneously reversible lines in (Cornu), 1885, A., 853.
  of solar and terrestrial origin, distinction between lines of (Cornu), 1887, A., 313.
  fluorescence with well defined (Lecoq de Boisbaudran), 1887, A., 1008; 1888, A., 97; 1890, A., 435.
  of compounds rendered phosphorescent by the action of light or by the electric discharge (Becquerel), 1885, A., 1098.
  of coloured salts and electrolytic dissociation (Magnanini), 1892, A., 757.
  infra-red, observations of, by means of phosphorescence (Becquerel), 1883, A., 761.
  infra-red (Becquerel), 1884, A., 1.
  infra-red, of metallic vapours (Becquerel), 1884, A., 1237.
  ultra-red rays, incandescence by (Lommel), 1886, A., 5.
  ultra-violet rays, absorption of, by various substances (Liveing and Dewar), 1883, A., 837.
    activity of chlorophyll under the (Bonnier and Mangin), 1886, A., 387.
  disappearance of some lines of (Liveing and Dewar), 1883, A., 2.
  obtained with coils of low tension (Demarçay), 1887, A., 537.
  of thin metallic films (Dudley), 1892, A., 1037.
  of coated terminals (Brooks), 1891, A., 249.
  of the aurora borealis (Koch), 1890, A., 313.
  of meteorites (Lockyer), 1888, A., 638.
  of the elements (Rydberg), 1890, A., 674.

Photochemistry—
Spectra, ultra-violet, of elements (Liveing and Dewar), 1883, A., 262.
  of elements of the second periodic group (Kayser and Runge), 1891, A., 965.
  of gases at low temperatures (Sundell), 1887, A., 1066; (Koch), 1890, A., 313.
  of non-metals, influence of temperature on (van Monckhoven), 1883, A., 140.
  of ammonia (Magnanini), 1890, A., 97.
  of ammonia with a reversed induced current (Lecoq de Boisbaudran), 1885, A., 1025.
  of the ammonia-oxygen flame (Eder), 1891, A., 1305.
  of boron (Hartley), 1883, T., 397; 1884, A., 242.
  of carbon (Liveing and Dewar), 1883, A., 1, 261.
  of carbon, mathematical analysis of (Grünwald), 1888, A., 389, 882.
  of fluorine (Moissan), 1890, A., 329.
  of hydrogen (van Monckhoven), 1883, A., 139; (Lagarde), 1883, A., 537; (Liveing and Dewar), 1883, A., 838; (Hasselberg), 1885, A., 317; (Balmer), 1885, A., 1025; (Ames), 1891, A., 1; (Grünwald), 1892, A., 1381.
  of iodine solutions (Rigollot), 1891, A., 374.
  of nitric peroxide (Bell), 1885, A., 949.
  of nitrogen (Deslandres), 1886, A., 189, 957; (Ames), 1891, A., 1.
  of nitrosyl chloride (Magnanini), 1890, A., 97.
  of oxygen (Egoroff), 1886, A., 189; (Janssen), 1886, A., 749; 1888, A., 765; (Liveing and Dewar), 1889, A., 1; 1890, A., 675.
  of liquid oxygen (Olszewski), 1887, A., 625; 1891, A., 773.
  of ozone (Schöne), 1885, A., 713.
  of atmospheric air (Egoroff), 1883, A., 137; 1886, A., 189; (Janssen), 1886, A., 1; (Olszewski), 1887, A., 625.
  of silicon (Hartley), 1883, T., 397; 1884, A., 242.
  of silicon fluoride and hydride (Wesendonck), 1884, A., 649.
  of tellurium (Hartley), 1883, T. 399.

Photochemistry—
Spectra of thiophosphoryl fluoride (Thorpe and Rodger), 1889, T., 322.
of water (Liveing and Dewar), 1883, A., 140; (Soret and Sarasin), 1884, A., 701.
of water vapour (Janssen), 1883, A., 261.
ultra-violet, of water vapour, relation between the telluric bands, A, B, α, in the solar spectrum, and (Deslandres), 1885, A., 713.
of the oxyhydrogen flame (Liveing and Dewar), 1888, A., 637.
of metals (Lecoq de Boisbaudran), 1885, A., 949; (Trowbridge and Sabine), 1889, A., 1.
of metals, variations of, due to mixed vapours (Liveing and Dewar), 1883, A., 2.
emitted by metallic elements under varying conditions (Hartley), 1884, A., 137; (Wiedemann), 1884, A., 801.
of the metals produced by explosions (Liveing and Dewar), 1885, A., 317, 465.
of aluminium (Hartley), 1883, T., 396.
of phosphorescent alumina (Crookes), 1887, A., 1006, 1069; 1889, T., 281.
of beryllium (Hartley), 1883, T., 316.
of cadmium (Hartley), 1883, T., 395; (Grünwald), 1889, A., 455; (Ames), 1891, A., 1; (Kayser and Runge), 1891, A., 965.
ultra-violet, of cadmium (Bell), 1886, A., 957.
of caesium (Kayser and Runge), 1891, A., 137.
of the cerium-group (Schottländer), 1892, A., 686.
of chromic acid and alkaline chromates (Sabatier), 1886, A., 838; (Vogel), 1888, A., 1129.
ultra-violet, of cobalt (Liveing and Dewar), 1889, A., 89.
of cobalt compounds (Russell and Orsman), 1889, P., 14.
of dissolved cobaltous chloride (Russell), 1885, P., 67.
of copper (Hartley), 1883, T., 396.
of rare earths (Krüss and Nilson), 1887, A., 890; 1888, A., 208; (Bailey), 1888, A., 1, 208; (Kiesewetter and Krüss), 1888, A., 1038; (Crookes), 1889, T., 255.

Photochemistry—
Spectra of the rare earths present in gadolinite and samarskite (Crookes), 1887, A., 334.
of didymium (Demarçay), 1886, A., 837; 1887, A., 1008; (Becquerel), 1887, A., 537, 873; (Schottländer), 1892, A., 686.
of the didymium group (Becquerel), 1887, A., 873; (Crookes), 1889, T., 259; (Schottländer), 1892, A., 686.
of didymium salts, variations in the (Becquerel), 1887, A., 873.
of neodymium and praseodymium oxides and of luminous solids containing neodymium (Haitinger), 1892, A., 2.
of praseodymium (Lecoq de Boisbaudran), 1888, A., 97.
of erbium (Thalén), 1883, A., 954.
of the erbium group (Crookes), 1889, T., 265.
of erbia (Crookes), 1886, A., 749.
of epidote (Becquerel), 1889, A., 553.
of ferric chloride (Russell and Orsman), 1889, P., 14.
of gallium (Lecoq de Boisbaudran), 1888, A., 97; 1892, A., 930.
of gadolinium chloride (Lecoq de Boisbaudran), 1891, A., 2.
of germanium (Lecoq de Boisbaudran), 1886, A., 768; (Kobb), 1887, A., 313.
of gold (Krüss), 1887, A., 555; (Demarçay), 1888, A., 765.
of lanthana (Crookes), 1887, A., 1070.
of lithium (Kayser and Runge), 1891, A., 137.
of lithium, order of reversibility of the lines of (Liveing and Dewar), 1883, A., 839.
of magnesium (Hartley), 1883, T., 392; (Liveing and Dewar), 1883, A., 2; 1889, A., 89; (Ames), 1891, A., 1.
of magnesium, mathematical analysis of (Grünwald), 1888, A., 389, 882.
ultra-violet, of nickel (Liveing and Dewar), 1889, A., 89.
of potassium, wave length of the two red lines in (Deslandres), 1888, A., 637; (Kayser and Runge), 1891, A., 137.
of rubidium (Kayser and Runge), 1891, A., 137.

Photochemistry—
Spectra of samarium (Cleve), 1883, T., 366; (Lecoq de Boisbaudran), 1885, A., 621; 1892, A., 780; (Crookes), 1885, A., 1025; (Demarçay), 1886, A., 837; 1887, A., 1008.
of scandium (Thalén), 1883, A., 954.
of silver (Hartley), 1883, T., 396.
of sodium (Kayser and Runge), 1891, A., 137.
of the terbia earths (Lecoq de Boisbaudran), 1886, A., 293.
of thulium (Thalén), 1883, A., 954.
of ytterbium (Thalén), 1883, A., 954.
of yttrium (Crookes), 1885, A., 1025; (Lecoq de Boisbaudran), 1886, A., 838.
of yttria (Lecoq de Boisbaudran), 1889, A., 456; 1890, A., 566.
of phosphorescent yttria (Crookes), 1886, A., 853; 1887, A., 1066, 1070.
of yttrium and samarium, mutual extinction of (Crookes), 1885, A., 1025.
of the yttrium group (Crookes), 1889, T., 269.
of **$Z\alpha$** and **$Z\beta$** (Lecoq de Boisbaudran), 1885, A., 666.
of **$Z\beta$** (Lecoq de Boisbaudran), 1886, A., 958.
of zinc (Hartley), 1883, T., 394; (Ames), 1891, A., 1.
of zircons (Linnemann), 1885, A., 1173.
of carbon compounds (Liveing and Dewar), 1883, A., 261; (Wesendonck), 1883, A., 761.
ultra-violet, of carbon compounds (Deslandres), 1888, A., 637.
relation between the molecular structure of carbon compounds and their (Krüss and Oeconomides), 1883, A., 1041; (Hartley), 1885, T., 685; P., 59; 1886, P., 245; 1887, T., 152; 1888, T., 641; P., 66; (Krüss), 1885, A., 949; 1888, A., 1141; (Althausse and Krüss), 1889, A., 1093.
of hydrocarbons (Deslandres), 1891, A., 773.
of hydrocarbon flame, origin of (Liveing and Dewar), 1883, A., 641.
ultra-violet of the paraffin derivatives (Soret and Rilliet), 1890, A., 434.

Photochemistry—
Spectra, ultra-violet, of albuminoids (Soret), 1884, A., 242.
of albuminoids from grain (Hartley), 1886, P., 247; 1887, T., 58.
of albumin, casein, diastase, gelatin, invertase, maize-starch, serin, cane-sugar, and of glucose (Hartley), 1887, T., 59.
of alkaloids (Hartley), 1885, A., 1174.
of benzene, naphthalene, toluidines, xylenes, dipyridine, picoline, piperidine, pyridine, quinoline, and of tetrahydroquinoline and its hydrochloride (Hartley), 1885, T., 694.
of blue pigments (Pitcher), 1889, A., 325.
of colouring matters (Girard and Pabst), 1885, A., 1098.
relation between the composition and, of organic dyes (Vogel), 1888, A., 97.
of acid brown, amidoazo-α- and -β-naphthalenes, aurin, azobenzene, benzeneazo-β-naphtholsulphonic acid, Biebrich scarlet, Bismarck brown, chrysoidine, crocein-scarlet, cumeneazo-β-naphtholdisulphonic acid, dimethylamidobenzeneazobenzenesulphonic acid, "fast red," helianthin (*methyl-orange*), Hofmann's violet, iodine green, murexide, rosaniline, sulphoxyleneazo-β-naphtholdisulphonic acid, triphenylmethane and of tropœlins (Hartley), 1887, T., 167.
of cresols, *m*- and *p*-hydroxybenzoic acids, pyrocatechol, quinol and resorcinol (Hartley), 1888, T., 643.
of methyl derivatives of hydroxyanthraquinone (Liebermann and v. Kostanecki), 1887, A., 1.
of alkoxyanthraquinones (Liebermann), 1888, A., 1203.
of ζ-invertan (O'Sullivan and Tompson), 1890, T., 912.
of peppermint oil (Andres), 1891, A., 2.
influence of certain rays of, on the growth of plants (Griffiths), 1884, T., 74.
of bilberries and wine (Vogel), 1888, A., 1137.
of chlorophyll (Stenger), 1887, A., 693; (Hartley), 1890, P., 161; 1891, T., 106.

Photochemistry—

- **Spectra** of bile (Wertheimer and Meyer), 1889, A., 636.
    - of blood (Soret), 1884, A., 381; (Linossier), 1888, A., 1139.
    - of hæmatin, sensitiveness of (Janeček), 1892, A., 1369.
    - of acid methæmoglobin (Bertin-Sans), 1888, A., 858.
- **Absorption-spectra** thermograms (Abney and Festing), 1885, A., 1175.
- **Homologous spectra** (Hartley), 1883, T., 390.
- **Incandescence spectra** (Crookes), 1889, P., 267.
- **Invisible lunar and solar spectra** (Langley), 1889, A., 325.
- **Phosphorescence spectra** (Crookes), 1887, A., 1006, 1069; 1889, T., 267.
    - action of different earths on (Crookes), 1889, T., 275.
    - interference of (Crookes), 1889, T., 276.
- **Reversion spectra** (Crookes), 1889, T., 279.
- **Solar spectrum** (Langley), 1883, A., 137.
    - atmospheric absorption in the infra-red of the (Abney and Festing), 1883, A., 837.
    - distribution of heat in the ultra-red region of the (Desains), 1883, A., 143.
    - relation between the ultra-violet spectrum of water-vapour and the telluric bands, A, B, *a* in the (Deslandres), 1885, A., 713.
    - behaviour of the haloid salts of silver in the (Eder), 1885, A., 703, 936.
    - effect of dyes on the behaviour of silver bromide towards the (Eder), 1886, A., 405.
    - influence of certain rays of the, on root absorption and the growth of plants (A. B. and F. E. Griffiths), 1888, A., 623.
    - chlorophyll and the distribution of energy in the (Timiriazeff), 1883, A., 697.
- **Spectroscope**, absorption (de Thierry), 1886, A., 113.
    - universal (Krüss), 1887, A., 179.
    - for furnaces and for the Bessemer process (Zenger), 1886, A., 190.
- **Spectrum analysis** (Sundell), 1887, A., 1066.
    - influence of temperature on (Krüss), 1885, A., 209.

Photochemistry—

- **Spectrum analysis**, application of the method of high interference to (Ebert), 1888, A., 766.
    - application of, to chemical physiology (Lambling), 1889, A., 73.
    - application of photography to (Hartley), 1883, A., 263; 1885, A., 466; (Eder), 1887, A., 93.
    - lecture experiments on (Cleminshaw), 1885, A., 1035.
    - quantitative (Krüss), 1885, A., 835.
    - estimation of colouring matters by means of (Patterson), 1890, A., 1476.
    - quantitative estimation of lithium by means of (Bell), 1885, A., 1012; (Hofmann), 1886, A., 178.
    - observations of columns of liquids in (Vogel), 1888, A., 1129.
    - estimation of iron and thiocyanates by means of (Krüss and Moraht), 1889, A., 1247.
    - estimation of hæmoglobin in blood by means of (Branley), 1883, A., 394.
    - estimation of indican in urine by means of (MacMunn), 1884, A., 198.
    - estimation of the rate of consumption of oxygen in tissues by means of (Dennig), 1884, A., 1391.
    - of vapours evolved on heating metals, at atmospheric pressure (Parry), 1884, A., 801; 1885, A., 318.
    - methods of (Demarçay), 1885, A., 465.
    - coal-gas volatiliser for use in (Vogel), 1888, A., 1129.
    - method of studying reversal of spectral lines (Liveing and Dewar), 1883, A., 262.

Photography. See Photochemistry.

Photosantonic acid (Cannizzaro), 1886, A., 73.

- specific rotatory power of (Nasini), 1884, A., 464.

*iso***Photosantonic acid** (Cannizzaro and Fabris), 1887, A., 57.

Photosantonins, two isomeric (Villavecchia), 1886, A., 73.

Phthalacene (Gabriel), 1884, A., 1176.

- derivatives (Gabriel), 1884, A., 1189.

Phthalacenic acid (Gabriel), 1884, A., 1190.

Phthalaconecarboxylic acid and its derivatives (Gabriel), 1884, A., 1176.

- **Phthalaldehyde** (Münchmeyer), 1887, A., 482.
- *iso***Phthalaldehyde** (Meyer), 1887, A., 940.
- *o*-**Phthalaldehydic acid** (*aldehydobenzoic acid*) and its derivatives (Racine), 1886, A., 549; 1887, A., 951; 1888, A., 693; (Allendorff), 1891, A., 1369.
  - action of ortho-diamines on (Bistrzycki), 1890, A., 969; 1891, A., 746.
  - action of potassium cyanide on (Graebe and Landriset), 1891, A., 1225.
  - phenylmethylhydrazone of (Allendorff), 1891, A., 1371.
- **Phthalaldoxime** and *iso***phthalaldoxime** (Münchmeyer), 1887, A., 482.
- **Phthalamic acid** (Aschan), 1886, A., 705; (Auger), 1888, A., 953.
- **Phthalamide,** compounds of, with phenols (Ostersetzer), 1891, A., 65.
  - amido- (Pellizzari), 1886, A., 1025.
  - 4-sulpho- (Rée), 1886, T., 521.
  - 3- and 4-sulpho- (Remsen and Comstock), 1884, A., 320.
- *iso***Phthalamide,** thio- (Luckenbach), 1884, A., 1157.
- *iso***Phthalamidine,** and its salts (Luckenbach), 1884, A., 1158.
  - nitrite (Lossen), 1892, A., 53.
- **Phthalamidoacetic acid,** derivatives of (Reese), 1888, A., 148.
- **Phthalamidobenzanilide** (Piutti), 1883, A., 999.
- **Phthalamidobenzoic acid** (Pellizzari), 1885, A., 534.
  - action of aniline and *p*-toluidine on (Piutti), 1883, A., 999.
- **Phthalamidodiphenylamine** (Hencke), 1890, A., 609.
- **Phthalamidohexoic acid** (Reese), 1888, A., 149.
- **Phthalamidones** (Bistrzycki and Cybulski), 1892, A., 1248.
- **1-Phthalamidoquinoline** (Kyritz), 1890, A., 1324.
- **Phthalanilphenylic phenylcarbamate** (Leuckart), 1890, A., 761.
- **Phthaleins** (Meyer), 1891, A., 1029.
  - constitution of (Armstrong), 1888, P., 30.
  - compounds analogous to (Remsen), 1885, A., 539.
- *iso***Phthalenediamidoxime** (Goldberg), 1890, A., 147.
- **Phthalethimidylacetic acid** (Mertens), 1887, A., 51.
- **Phthalethylidene** (Roser), 1886, A., 243.
- **Phthalic acids,** constitution of (Nölting), 1886, A., 67.
  - reduction of (v. Baeyer), 1887, A., 370.
  - conversion of the three amidobenzoic acids into (Sandmeyer), 1885, A., 981.
  - brominated (Blümlein), 1885, A., 162.
  - *tetra*bromo- (Friedel and Crafts), 1886, A., 230.
- **Phthalic acid,** thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096.
  - specific heat of (Hess), 1889, A., 93.
  - action of ammonium and potassium thiocyanates on (Aschan), 1886, A., 704.
  - action of, on amido-acids (Drechsel), 1883, A., 1126; (Reese), 1888, A., 369.
  - reduction products of (v. Baeyer), 1890, A., 1275; 1892, A., 1211.
  - amidobenzoic acid derivatives of (Pellizzari), 1885, A., 533.
  - phenylhydrazine (Hötte), 1887, A., 669.
  - sodium salt of, action of phosphorus *tri*sulphide on (Volhard and Erdmann), 1885, A., 763.
- **Phthalic acid,** amido-, salts of (Landsberg), 1883, A., 476.
  - 3-bromo- (Guareschi), 1884, A., 843; 1886, A., 353; 1888, A., 1300; (Meldola), 1885, T., 511; (Stallard), 1886, T., 187; P., 138.
  - 4-bromo- (Carnelley and Thomson), 1885, T., 591; P., 88; (Nourrisson), 1887, A., 668.
  - 1:4-*di*bromo- (Guareschi), 1884, A., 842.
  - *tri*bromo-, and its salts (Flessa), 1884, A., 1186.
  - 3-chloro- (Guareschi), 1886, A., 353; 1887, A., 837.
  - 4-chloro- (Claus and Kautz), 1885, A., 972; (Graebe and Rée), 1886, T., 526; P., 211.
    - constitution of (Rée), 1886, A., 353.
  - 4:5-*di*chloro- (Claus and Kautz), 1885, A., 972; (Claus and Groneweg), 1891, A., 921.
    - (β-acid) (Claus and Schmidt), 1887, A., 270.
    - *o*-β-acid (Le Royer), 1887, A., 831.
  - *tri*chloro- (Claus and Kautz), 1885, A., 972.
  - *tetra*chloro-, and its derivatives (Graebe), 1887, A., 832.

- **Phthalic acid,** *tetra*chloro-, from *tetra*chlorobenzoic acid (TUST), 1888, A., 836.
  - preparation of (ANON.), 1885, A., 1274.
  - 4-chloro-5-bromo- (CLAUS and GRONEWEZ), 1891, A., 921.
  - 5:3- and 6:3-*di*nitro- (MERZ and WEITH), 1883, A., 344.
  - 3-sulpho- (REMSEN and COMSTOCK), 1884, A., 320; (STOKES), 1885, A., 540; (RÉE), 1886, T., 512; (MOULTON), 1891, A., 1064.
    - salts of (REMSEN and COMSTOCK), 1884, A., 320; (STOKES), 1885, A., 540.
  - 4-sulpho- (REMSEN and COMSTOCK), 1884, A., 320; (GRAEBE), 1885, A., 902; (RÉE), 1886, T., 510; P., 211.
    - from phthalic acid (RÉE), 1885, A., 1062.
    - salts of (REMSEN and COMSTOCK), 1884, A., 320.
- *iso***Phthalic acid** (*m-phthalic acid*), preparation of (KIPPING), 1888, T., 45.
  - thermochemistry of (STOHMANN, KLEBER and LANGBEIN), 1889, A., 1096.
  - 4-amido- (LOEWENHERZ), 1892, A., 1464.
  - *di*amido- (CLAUS and WYNDHAM), 1889, A., 143.
  - 4-bromo- (SCHÖPFF), 1892, A., 337.
  - *di*bromo- (CLAUS and WYNDHAM), 1889, A., 143.
  - 4-chloro- (CLAUS), 1892, A., 1201.
  - 4:6-*di*chloro-, and 2:4:6-*tri*chloro- (CLAUS and BURSTERT), 1890, A., 1106.
  - iodo-, and its salts (KLINGEL), 1886, A., 61; (HAMMERICH), 1890, A., 1107.
  - 4-nitro- (CLAUS and WYNDHAM), 1889, A., 142; (NOYES), 1889, A., 395.
  - *di*nitro- (CLAUS and WYNDHAM), 1889, A., 142.
  - 2:4-*di*sulpho- (WISCHIN), 1891, A., 73.
- *p*-**Phthalic acid.** See Terephthalic acid.
- **Phthalates,** heats of formation of (COLSON), 1885, A., 1104.
- **Phthalic alcohol,** oxidation of (HJELT), 1886, A., 455.
  - action of sulphuric acid on (HJELT), 1886, A., 791.
- **Phthalic anhydride,** thermochemistry of (STOHMANN, KLEBER and LANGBEIN), 1889, A., 1096.
- **Phthalic anhydride,** action of, on amido-acids (REESE), 1888, A., 148.
  - action of, on benzylic cyanide (GABRIEL), 1885, A., 902.
  - action of phenylhydrazine on (HÖTTE), 1885, A., 1221.
  - action of phosphoric chloride on (CLAUS and HOCH), 1886, A., 705.
  - action of, on secondary monamines (PIUTTI), 1884, A., 448.
  - reduction of, by zinc and glacial acetic acid (WISLICENUS), 1885, A., 57.
  - condensation products from (GABRIEL), 1884, A., 1176.
- **Phthalic anhydride,** bromo- (GUARESCHI), 1884, A., 843; 1888, A., 1300.
  - 3:6-*di*bromo- [m.p. 207·5°] (GUARESCHI), 1884, A., 842.
  - *di*bromo- [m.p. 208°] (BLÜMLEIN), 1885, A., 163.
  - *tri*bromo- (FLESSA), 1884, A., 1186.
  - *tetra*bromo- (BLÜMLEIN), 1885, A., 164; (FRIEDEL and CRAFTS), 1886, A., 230.
  - 4-chloro- (GRAEBE and RÉE), 1886, T., 528.
  - 4:5-*di*chloro- (CLAUS and GRONEWEG), 1891, A., 921.
  - *tetra*chloro-, preparation of (ANON.) 1885, A., 1274.
    - crystalline form of (SORET), 1886, A., 620.
  - 4-chloro-5-bromo-(CLAUS and GRONEWEG), 1891, A., 921.
  - 4-sulpho- (RÉE), 1886, T., 515.
  - thio- (GRAEBE and ZSCHOKKE), 1884, A., 1025; (RAYMAN), 1887, A., 951;
- **Phthalic chloride** (CLAUS and HOCH), 1886, A., 705; (AUGER), 1888, A., 953.
  - constitution of (NÖLTING and DE BECHI), 1884, A., 1024; (MEYER), 1884, A., 1187.
  - action of, on ethylic sodiomalonate (WISLICENUS), 1888, A., 149.
  - action of, on phenols (MEYER), 1891, A., 1485.
  - action of zinc ethyl and zinc methyl on (RJASANTZEFF), 1889, A., 1059.
  - 4-chloro- (GRAEBE and RÉE), 1886, T., 527.
- **Phthalic** *mono-* and *di-***chlorides,** 4-sulpho- (RÉE), 1886, T., 520.
- **Phthalic glycol** (COLSON), 1884, A., 1000.
- **Phthalic-sulphinide** (STOKES), 1885, A., 539.

Phthalic-sulphinide, derivatives of (Moulton), 1891, A., 1063.
  salts (Remsen and Comstock), 1884, A., 320.

Phthalide (Hjelt), 1886, A., 469.
  action of phenylhydrazine on (Meyer and Münchmeyer), 1886, A., 883; (Wislicenus), 1887, A., 489.
  action of potassium cyanide on (Wislicenus), 1885, A., 532.
  reduction of (Graebe), 1885, A., 165.
  derivatives of (Hönig), 1886, A., 242.

Phthalide, amido- [m.p. 167°] (Racine), 1887, A., 951.
  5-amido- [m.p. 178°] (Hönig), 1886, A., 242.
  bromo- (Racine), 1886, A., 549.
  *di*bromo- (Guareschi), 1884, A., 842.
  *di*chloro- (Le Royer), 1887, A., 832.
  3:6-*di*chloro- (Guareschi), 1886, A., 808.
  chlorobromo- (Guareschi and Biginelli), 1887, A., 1114.
  thio- (Graebe), 1889, A., 140.

Phthalidecarboxylic acid (Scherks), 1885, A., 533; (Juillard), 1888, A., 707.

Phthalidohydrazobenzene (Allendorff), 1891, A., 1370.

Phthalidomethylene (Gabriel), 1885, A., 165.

Phthalido-β-propionic acid, and its salts (Roser), 1885, A., 267.

Phthalimide (Landsberg), 1883, A., 475; (Bamberger and Müller), 1888, A., 950; (Auger), 1888, A., 953.
  action of hypobromites on (Hoogewerff and van Dorp), 1891, A., 1217.
  reduction of (Graebe), 1885, A., 165.
  isomeride of (Hoogewerff and van Dorp), 1891, A., 1218.
  derivatives of (Landsberg), 1883, A., 475; (Goedeckemeyer), 1888, A., 1294.

Phthalimide, 4-chloro- (Graebe and Rée), 1886, T., 529.
  4:5-*di*chloro- (Le Royer), 1887, A., 832.
  4-sulpho-ammonium derivative of (Rée), 1886, T., 519.

Phthalimides, substituted, and their conversion into the corresponding amines (Neumann), 1890, A., 890.

Phthalimidine (Graebe), 1885, A., 166, 979; 1889, A., 140; (Barbier), 1889, A., 253.
  derivatives of (Graebe), 1889, A., 140.

Phthalimidine, nitroso- (Graebe), 1885, A., 166.
  thio-, derivatives of (Day and Gabriel), 1890, A., 1250.

ψ-Phthalimidine (Gabriel), 1887, A., 1038.

Phthalimidines, substituted (Graebe and Pictet), 1889, A., 141.

Phthalimidobenzenesulphonic acid, sodium salt of (Pellizzari and Matteucci), 1888, A., 1302.

*iso***Phthalimido-ether, -*di*methyl ether** and **-*di*thiodiethyl ether** and their hydrochlorides (Luckenbach), 1884, A., 1157.

Phthalimido-isethionic acid and **-naphthalenesulphonic acid,** potassium salts of (Pellizzari and Matteucci), 1888, A., 1302.

Phthalimidopropiophenone (Schmidt), 1890, A., 372.

β-Phthalimidopropyl mercaptan (Seitz), 1891, A., 1473.

Phthalimidoxime (Müller), 1886, A., 803.

Phthalimidylacetic acid (Roser), 1885, A., 159; (Gabriel), 1885, A., 1228.

Phthalimidylbenzyl. See Benzylidenephthalimidine.

Phthalimidylpropiolactone and **β-phthalimidylpropionic acid** (Roser), 1886, A., 243.

Phthalobenzophenylhydrazides, α- and β- (Hötte), 1887, A., 670.

Phthalo-ψ-cumidamide and **-ψ-cumidide** (Fröhlich), 1884, A., 1318.

Phthalo-*m-iso*cymidide, and its nitro-compound (Kelbe and Warth), 1884, A., 47.

Phthalodiamide (Wislicenus), 1888, A., 150.
  action of hypochlorites and hypobromites on (Hoogewerff and van Dorp), 1891, A., 1216.

Phthalodiethylbenzidine (Schiff and Vanni), 1890, A., 1297.

Phthalodiphenylamineaspartides (Piutti), 1885, A., 797; 1886, A., 621.

Phthalodiphenylasparagines, two isomeric (Piutti), 1885, A., 797.

Phthalodiphenyldihydrazide and **α-phthalodiphenylhydrazide** (Hötte), 1887, A., 670.

Phthalodiphenyline (Reuland), 1890, A., 167.

Phthalodisarcosine (Reese), 1888, A., 369.

Phthalomethimidylacetic acid (Gabriel), 1885, A., 1228.

Phthalo-β-naphthylimide (Maschke), 1887, A., 839.

- *iso***Phthalonitrile,** preparation of (Goldberg), 1890, A., 147.
  - derivatives of (Luckenbach), 1884, A., 1157.
- *α*-**Phthalonitrosophenylhydrazide** (Hötte), 1887, A., 670.
- *iso***Phthalophenonedioxime** (Münchmeyer), 1886, A., 877.
- **Phthalophenyl-benzohydrazinic acid** and **-hydrazidamide** (Hötte), 1887, A., 670.
- *α*-**Phthalophenylhydrazide** (Hötte), 1886, A., 353; 1887, A., 670; (Pellizzari), 1886, A., 1025; 1888, A., 54.
  - *mono*- and *di*-nitro- and nitroso-derivatives of (Hötte), 1887, A., 670.
- *β*-**Phthalophenylhydrazide** (Pellizzari), 1886, A., 1025; 1888, A., 54; (Hötte), 1887, A., 670.
- **Phthalophenylmethylasparagine** (Piutti), 1886, A., 621.
- **Phthalotaurine** (Gabriel), 1891, A., 816.
- **Phthalotoluidides,** *o*-, *m*- and *p*- (Fröhlich), 1885, A., 155.
- **Phthaluric acid** and its salts (Drechsel), 1883, A., 1126.
- **Phthalyl derivatives** (Roser), 1885, A., 165, 267, 797; 1886, A., 243.
- **Phthalylacetic acid,** and its salts (Drechsel), 1883, A., 1126; (Roser), 1885, A., 165.
  - constitution of (Gabriel), 1883, A., 1127; 1885, A., 164.
  - action of amines on (Gabriel), 1885, A., 1228; 1887, A., 51.
- **Phthalylaspartic acid** and its derivatives (Piutti), 1885, A., 796; 1886, A., 621.
- **Phthalylchloracetic acid** (Zincke and Cooksey), 1890, A., 785.
- **Phthalyl-ψ-cumidic acid** and its salts (Fröhlich), 1884, A., 1319.
- **Phthalylcyanethine** (v. Meyer), 1889, A., 685.
- **Phthalyldiecgonine** (Einhorn and Klein), 1889, A., 283.
- *o*-**Phthalyldi-*d*-ecgonine** (Deckers and Einhorn), 1891, A., 476.
- **Phthalylglycocine.** See Phthalamido-acetic acid.
- **Phthalyl*iso*propylidene** (Roser), 1885, A., 268.
- **Phthalyltropeine** (Ladenburg), 1883, A., 672.
- **Phthisical patients,** sugar from the lungs and saliva of (Pouchet), 1883, A., 929.
- **Phycite.** See Erythritol.
- **Phycoerythrin,** isomeric modifications of (Schütt), 1889, A., 623.
- **Phycophæin** (Schütt), 1888, A., 496.
- **Phykopyrrin** (Schütt), 1890, A., 1173.
- **Phyllite** from Rimogens, in the Ardennes (Geinitz), 1883, A., 447.
- **Phyllites** of the Tyrolean Alps (Pichler), 1884, A., 274.
- **Phyllocyanic acid** (Tschirch), 1887, A., 1117; (Wollheim), 1888, A., 723.
- **Phyllocyanin** (Sachsse), 1885, A., 670; (Schunck), 1885, A., 1241; (Wollheim), 1888, A., 723.
- **Phyllorubin** (Wollheim), 1888, A., 723.
- **Phyllotaonin** (Schunck), 1889, A., 279.
- **Phylloxanthin** (Schunck), 1885, A., 1241.
- **Phylloxera.** See Agricultural Chemistry.
- **Phymatorusin** (Mörner), 1887, A., 168.
- **Physiological action,** relation between chemical constitution and (Brunton and Cash), 1884, A., 348; 1887, A., 985; 1891, A., 1279; (Gibbs and Hare), 1890, A., 280.
  - relation between chemical constitution of aromatic compounds and (Oddo), 1892, A., 366.
  - relation between chemical constitution of certain sulphones and (Baumann and Kast), 1889, A., 1232.
  - parallelism between optical properties of inorganic substances and (Blake), 1890, A., 813.
  - of acetaldehyde (Gaube), 1890, A., 188.
  - of paracetaldehyde (Cervello), 1884, A., 199; (Bockal), 1887, A., 391.
  - of acetanilide (Lépine), 1888, A., 184; (Jaffé and Hilbert), 1888, A., 735; (Mörner), 1889, A., 289; (Chittenden and Stewart), 1889, A., 533.
  - of acetic acid (Mallèvre), 1891, A., 344.

  - of atmospheric air deficient in oxygen (Wallace), 1883, A., 819; (Kempner), 1884, A., 344.

Physiological action of expired atmospheric air (Brown-Séquard and d'Arsonval), 1889, A., 629.
of rarefied atmospheric air (Fraenkel and Geppert), 1884, A., 470.
of air charged with petroleum vapour (Poincaré), 1884, A., 1057.
of some digestion products of albumin (Pollitzer), 1886, A., 377.
of albumose (Ott and Collmar), 1888, A., 1325.
of albumose from jequirity seeds (Martin), 1890, A., 398.
of albumoses and peptones (Neumeister), 1888, A., 516.
of alcohols (Gibbs and Reichert), 1891, A., 1393.
of tertiary alcohols (Thierfelder and v. Mering), 1885, A., 1002; (Schapiroff), 1887, A., 857.
of alcohols and artificial bouquets (Laborde and Magnan), 1888, A., 737.
of aldehyde-ammonia (Gibbs and Reichert), 1891, A., 1393.
of aldehydes (Cohn), 1892, A., 1504.
of alkaline earths (Brunton and Cash), 1884, A., 348; (Richet), 1886, A., 385; (Curci), 1888, A., 621.
of alkalis (Brunton and Cash), 1884, A., 348; (Curci), 1888, A., 621; (Dufourt), 1891, A., 758.
of alkalis and acids (Lehmann), 1885, A., 279.
of the alkaloid sulphates (Chittenden and Cummins), 1888, A., 77.
of alloxantin (Kowalewsky), 1887, A., 508.
of amides (Zuntz), 1884, A., 472; (Weiske and Schulze), 1885, A., 409; (Gibbs and Reichert), 1891, A., 1282.
of amidobenzoic acid (Gibbs and Hare), 1890, A., 280.
of certain amido-compounds (Bahlmann), 1887, A., 512.
of ammonia (Röhmann), 1887, A., 68; (Belky), 1887, A., 392.
of ammonium bases (Glause and Luchsinger), 1885, A., 415.
of *n*-amylic nitrite (Brunton and Bokenham), 1889, A., 433.
of anilides (Gibbs and Reichert), 1891, A., 1282.
of aniline (Müller), 1887, A., 514; (Falkenberg), 1891, A., 853.
of aniline-*p*-sulphonic acid (Ville), 1892, A., 903.
Physiological action of antharobin and chrysarobin (Liebermann), 1888, A., 518; (Weyl), 1889, A., 539.
of antipyrin (Chittenden and Cummins), 1888, A., 77; (Nebelthau), 1891, A., 1527.
of arbutin and of *Folia uvæ ursi* (Lewin), 1884, A., 915.
of certain aromatic substances (Klingenberg), 1891, A., 1529.
of arsenic and antimony (Chittenden and Blake), 1889, A., 537.
of arsenious oxide (Chittenden and Cummins), 1888, A., 77.
of *Arum italicum* (Spica and Biscaro), 1886, A., 94.
of asparagine (Weiske and Schulze), 1885, A., 409; (Munk; v. Voit), 1885, A., 412; (Weiske), 1888, A., 80; (König), 1891, A., 1525; (Graffenberger), 1892, A., 904.
of atropine (Hammerbacher), 1884, A., 1396; (Langley), 1888, A., 1216; 1890, A., 397.
of *iso*atropylcocaine (Hesse), 1889, A., 732.
of azoimide (Loew), 1892, A., 90.
of balsams (Stockman), 1891, A., 600.
of base $C_7H_{10}N_2$ (Wurtz), 1888, A., 622.
of hot baths (Formánek), 1892, A., 1503.
of hot and cold baths (Pletzer), 1884, A., 621.
of benzaldehyde (Cohn), 1890, A., 188.
of benzene and its derivatives (Brunton and Cash), 1891, A., 1279.
of benzoic anhydride (Salkowski), 1888, A., 864.
of boric acid (Forster), 1883, A., 1178; 1884, A., 782; (Johnson), 1886, A., 572.
of borneol (Stockman), 1888, A., 1216.
of bromostrychnine (Brunton), 1885, T., 143; P., 5.
of brucine (Brunton), 1885, T., 143; P., 5; (Mays), 1888, A., 312.
of butylchloral hydrate (Koch), 1887, A., 391.
of cacodylic acid (Marshall and Green), 1886, A., 730.
of caffeine (Maly and Andreasch), 1883, A., 1018; (Brunton and Cash), 1887, A., 985; 1888, A., 1217; (Coppola), 1888, A., 312; (Chittenden and Stewart), 1889, A., 534.

Physiological action of calcium salts (Irvine and Woodhead), 1889, A., 653; (Pekelharing), 1892, A., 87; (Griesbach), 1892, A., 1112.
of calcium β-naphthol-α-sulphonate (Stackler), 1892, A., 1116.
of calcium sulphate (Green), 1888, A., 306; (Irvine and Woodhead), 1889, A., 429.
of calomel (Wassilieff), 1883, A., 743.
of camphors and of their compounds with chloral (Schmitt), 1892, A., 227.
of carbohydrates (Albertoni), 1889, A., 1023.
of carbolic acid (Bischoff), 1883, A., 1021; (Zwaardemaker), 1891, A., 762.
of carbon tetrachloride (Regnauld and Villejean), 1885, A., 926.
of carbon disulphide (Ckiandi-Bey), 1885, A., 97; (Westberg), 1892, A., 1520.
of *tri*chloracetic acid (Hermann), 1885, A., 575.
of chloral (Kast), 1887, A., 613.
of chloral hydrate (Koch), 1887, A., 391; (Nebelthau), 1891, A., 1527.
of chlorates (Marchand), 1888, A., 977; (Cahn), 1888, A., 978; (Falkenberg), 1891, A., 853.
of *tri*chlorethylic alcohol (Külz), 1885, A., 283.
of *mono-* and *s-di*chlorethylic sulphides (Meyer), 1887, A., 857.
of chlorides (Girard), 1889, A., 1227.
of chlorine compounds (Kast), 1887, A., 612.
of *tri*chlorobutylic alcohol (Külz), 1885, A., 283.
of chloroform (Zeller), 1884, A., 1062; (Kast), 1887, A., 612.
of impure chloroform (Du Bois Reymond), 1892, A., 745.
of chloromethane (Regnauld and Villejean), 1885, A., 926.
of *di*chloromethane when compared with that of chloroform (Regnauld and Villejean), 1885, A., 285, 926.
of choline, neurine and allied compounds (Schmidt), 1892, A., 905.
of chrysarobin and antharobin (Liebermann), 1888, A., 518; (Weyl), 1889, A., 539.
of cinchonamine (Sée and Bochefontaine), 1885, A., 571, 682.
of three coal-tar yellows (Cazeneuve and Lépine), 1886, A., 273.
of cobalt salts (Chittenden and Norris), 1889, A., 538.

Physiological action of cocaine (Grasset), 1885, A., 285, 415; (Grasset and Jeannel), 1885, A., 571; (Richard), 1885, A., 1002; (Sighielli), 1888, A., 312; (Mosso), 1888, A., 864; 1891, A., 486.
of coffee (Fort), 1883, A., 745; (Couty), 1884, A., 1392.
of colchicine (Mairet and Combemale), 1887, A., 515, 614.
of β-collidine (Marcus and Oechsner de Coninck), 1883, A., 104.
of β-collidine hexahydride (Bochefontaine and Oechsner de Coninck), 1885, A., 681.
of convolvulin (Dragendorff), 1887, A., 291.
of copper (Ellenberger and Hofmeister), 1884, A., 474.
of copper compounds (Du Moulin), 1886, A., 483.
of copper sulphate (Chittenden and Cummins), 1888, A., 77.
of corn-cockle (*Agrostemma githago; Githago segetum*) (Lehmann and Mori), 1890, A., 1458; (Kornauth and Arche), 1892, A., 1018.
of the three cresols (Gibbs and Hare), 1890, A., 813.
of croton oil (Senier), 1884, A., 947.
of curare (Demant), 1886, A., 1054; (Nikolsky and Dogiel), 1891, A., 487.
of cyanuric acid (Gibbs and Reichert), 1891, A., 1393.
of cystein (Goldmann), 1885, A., 922.
of dihydroxynaphthalene (Lépine), 1888, A., 184.
of drugs (Stumpf), 1883, A., 818.
of artificial dyes (Weyl), 1888, A., 1122.
of ethylenic chloride (Dubois and Roux), 1888, A., 517.
of ethylic alcohol (Kuijper), 1884, A., 370; (Albertoni), 1888, A., 973; (Bodländer), 1888, A., 977; (Keller), 1889, A., 288; (Chittenden and Smith), 1891, A., 1272; (Klingemann), 1892, A., 365.
of ethylic carbamate (v. Jaksch), 1886, A., 572; (Mairet and Combemale), 1886, A., 640.
of ethylic lactate (Pellacani and Bertoni), 1888, A., 309.
of euxanthone (v. Kostanecki), 1887, A., 272.
of fibrin (Graffenberger), 1892, A., 904.
of fish (Atwater), 1887, A., 1130.

Physiological action of fluorobenzoic acids (Coppola), 1884, A., 446.
of *Folia uvæ ursi* and of arbutin (Lewin), 1884, A., 915.
of acidified food (Weiske), 1887, A., 855.
of formates (Gréhant and Quinquaud), 1887, A., 513.
of edible fungi (Dupetit), 1883, A., 611; 1884, A., 204; (Mörner), 1886, A., 1053.
of furfuraldehyde sodium hydrogen sulphite (Gibbs and Reichert), 1891, A., 1393.
of gallic and tannic acids (Mörner), 1892, A., 904.
of the products of incomplete combustion of illuminating gas (Gréhant), 1888, A., 517.
of gaseous poisons (Belky), 1887, A., 392.
of gelatin (Chittenden and Solley), 1891, A., 949; (Graffenberger), 1892, A., 904.
of glycerol (Arnschink), 1887, A., 509; (Ransom), 1887, A., 985; (v. Törring), 1889, A., 736; (Munk), 1891, A., 345.
of glycerolphosphoric acid (Eymonnet), 1884, A., 1058.
of glyceryl *tri*nitrate (*nitroglycerol*) (Hay), 1885, A., 681.
of guaiacol (Marfori), 1891, A., 99.
of heat (Senator), 1884, A., 1393; (Grandis), 1890, A., 1334.
of hydrazine (Loew), 1891, A., 239.
of hydrazines (Gibbs and Reichert), 1891, A., 1280.
of hydrochloric acid (White), 1892, A., 1117.
of hydrogen peroxide (Béchamp), 1883, A., 103, 227.
of hydrogen sulphide (Brouardel and Loye), 1885, A., 1151; (Belky), 1887, A., 392; (Müller), 1888, A., 178.
of hydroxylamine (Loew), 1885, A., 830; (Brunton and Bokenham), 1889, A., 630; (Gibbs and Reichert), 1891, A., 1393.
of derivatives of hydroxyquinolines (Fischer), 1883, A., 1147.
of *o*-hydroxyquinolinecarboxylic acid and its derivatives (Królikowski and Nencki), 1888, A., 864.
of hydroxytrimethylethylammonium hydroxide (Cervello), 1885, A., 925; 1888, A., 309.
of hyoscine hydrochloride (Gley and Rondeau), 1888, A., 182; (Pawloff), 1890, A., 1019.

Physiological action of iodine, dissolved in potassium iodide (Croft), 1883, A., 104.
of iodoform (Zeller), 1884, A., 1062; (Gründler), 1885, A., 413.
of iron (Bunge), 1885, A., 574; (Skvortzow), 1888, A., 1325; (Socin), 1891, A., 478.
of iron compounds (Landwehr), 1888, A., 176.
of jalapin (Dragendorff), 1887, A., 291.
of the active principle of jequirity (*Abrus precatorius*) (Martin), 1887, A., 990; 1889, A., 1026; 1890, A., 398; (Martin and Wolfenden), 1890, A., 398.
of kairin and kairoline (Filehne), 1884, A., 474; (Richter), 1891, A., 602; (Nebelthau), 1891, A., 1527.
of ketones and acetoximes (Paschkis and Obermayer), 1892, A., 1506.
of lactose (Voit), 1892, A., 903.
of lecithin (Hasebroek), 1888, A., 173.
of leech extract (Haycraft), 1885, A., 571; (Dickinson), 1891, A., 481.
of light (Loeb), 1889, A., 172.
of lupetidine and allied substances in relation to their chemical constitution (Gürber), 1891, A., 854.
of manganese (Maumené), 1885, A., 421.
of meat (Hönigsberg), 1883, A., 815; (Jessen), 1884, A., 470; (Atwater), 1887, A., 1130; (Schulze), 1890, A., 278; (Stutzer), 1892, A., 1367.
of meat-extract (Rubner), 1885, A., 409.
of Liebig's extract of meat (Lehmann), 1886, A., 89.
of meat-peptones (Zuntz), 1886, A., 378.
of mercury salicylate (Böhm), 1891, A., 351.
of methylal (Mairet and Combemale), 1887, A., 391, 684.
of micro-organisms from the mouth and of fæces (Vignal), 1887, A., 1059.
of morphine (Eliassor), 1885, A., 577; (Tauber), 1891, A., 479; (Guinard), 1891, A., 486; (Spitzer), 1891, A., 852.
of morphine and its derivatives (Stockman and Dott), 1890, A., 1178.
of naphthol (Desesquelle), 1891, A., 98.

Physiological action of α-naphthol (Lesnik and Nencki), 1886, A., 822; (Maximovitch), 1888, A., 621, 978.
of β-naphthol (Lesnik and Nencki), 1886, A., 822; (Bouchard), 1888, A., 183; (Maximovitch), 1888, A., 621, 978.
of narcotine, thebaine and their derivatives (Stockman and Dott), 1891, A., 762.
of neurine (Brieger; Marino-Zuco), 1884, A., 1056; (Ott and Collmar), 1888, A., 1325.
of commercial neurine (Cervello), 1885, A., 925.
of neurine, choline and allied compounds (Schmidt), 1892, A., 905.
of nickel salts (Gurkens), 1885, A., 681; (Laborde and Riche), 1888, A., 738; (Chittenden and Norris), 1889, A., 538.
of nickel carbonyl (McKendrick and Snodgrass), 1891, A., 1130; (Hanriot and Richet; Langlois), 1892, A., 365.
of nicotine (Rabot), 1885, A., 416; (Langley), 1890, A., 397; (Langley and Dickinson), 1890, A., 1178; (Colas), 1891, A., 96.
of nitranilines (Gibbs and Hare), 1890, A., 280.
of nitriles (Giacosa), 1884, A., 1061.
of nitrites (Brunton and Bokenham), 1889, A., 630.
of *o*-, *m*- and *p*-nitrobenzaldehydes (Sieber and Smirnow), 1887, A., 684.
of *di*nitrobenzene (Huber), 1892, A., 366.
of nitrobenzenes (Brunton and Cash), 1891, A., 1280; (Gibbs and Reichert), 1891, A., 1281.
of nitrobenzoic acid (Gibbs and Hare), 1890, A., 280.
of *di*nitro-*p*-cresol (Weyl), 1888, A., 520, 1122.
of nitromethane (Gibbs and Reichert), 1891, A., 1393.
of nitrophenols (Gibbs and Hare), 1890, A., 280; (Gibbs and Reichert), 1891, A., 1281.
of nitrosodiethylene (Gibbs and Reichert), 1891, A., 1393.
of nitroso-β-naphthol (Gibbs and Reichert), 1891, A., 1393.
of nitrothiophen (Meyer), 1885, A., 1051.
of opium (Spitzer), 1891, A., 852.
of ouabain (Gley), 1888, A., 1326.
of oxalic acid (Gaglio), 1888, A., 619.
Physiological action of oxamic acid (Gibbs and Reichert), 1891, A., 1393.
of oxygen (Richardson), 1887, A., 855; (Wurster), 1888, A., 863; (Berthelot), 1890, A., 274; (Hunter), 1891, A., 1267; (Werigo), 1892, A., 1369.
of ozone (Binz), 1883, A., 486; 1884, A., 95; (Labbé and Oudin), 1891, A., 1531.
of paraffinic nitrates (Cash and Dunstan), 1891, A., 1270.
of paraxanthine (Salomon), 1889, A., 293.
of pentoses (Ebstein), 1892, A., 1506.
of peptone (Ott and Collmar), 1888, A., 1325; (Shore), 1891, A., 481; (Graffenberger), 1892, A., 904.
of peptones and albumoses (Neumeister), 1888, A., 516.
of phenol (Bischoff), 1883, A., 1021; (Zwaardemaker), 1891, A., 762.
of dihydric and trihydric phenols (Gibbs and Hare), 1890, A., 1019.
of phenylacetic acid (Salkowski and Kotoff), 1888, A., 513.
of *p*- and *m*-phenylenediamine (Dubois and Vignon), 1889, A., 66.
of phenylhydrazine (Hoppe-Seyler), 1885, A., 574; (Beythien and Tollens), 1890, A., 582.
of phenylhydrazine derivatives (Heinz), 1891, A., 602.
of phosphorus (Blendermann), 1883, A., 878; (Leo), 1885, A., 1002; (Cahn), 1886, A., 1053; (Starling and Hopkins), 1892, A., 650.
of phosphorous oxide (Thorpe and Tutton), 1890, T., 573.
of pilocarpine (Hammerbacher), 1884, A., 1396; (Cornevin), 1892, A., 365.
of pituri (Langley and Dickinson), 1890, A., 1178.
of poisons and drugs (Hayem), 1884, A., 764.
of potassium bromide (Schulze), 1884, A., 850.
of potassium chlorate (v. Mering), 1885, A., 1002.
of potassium ferrocyanide (Combemale and Dubiquet), 1891, A., 99.
of potassium nitrite (Hénocque), 1885, A., 682.
of potato spirit (Brockhaus), 1883, A., 362.
of ptomaine (Brieger), 1887, A., 284.
of ptomaine hydrochloride (Guareschi and Mosso), 1884, A., 618.
of ptomaines (v. Anrep), 1885, A. 682.

Physiological action of pyridine, quinoline, etc. (Heinz), 1891, A., 602.
  of hydrogenised pyridine derivatives (Hoffmann and Koenigs), 1883, A., 1145.
  of pyrocatechol and of pyrogallol (Gibbs and Hare), 1890, A., 1019.
  of quinine (Nebelthau), 1891, A., 1527; (Binz), 1891, A., 1531.
  of quinol (Gibbs and Hare), 1890, A., 1019.
  of quinoline, pyridine, etc. (Heinz), 1891, A., 602.
  of quinone and its derivatives (Schulz), 1892, A., 1115.
  of resorcinol (Gibbs and Hare), 1890, A., 1019.
  of rosaniline sulphate (Cazeneuve and Lépine), 1886, A., 272.
  of safranine (Cazeneuve and Lépine), 1886, A., 272; (Weyl), 1888, A., 1122.
  of saline solutions and various drugs (Heinz), 1891, A., 601.
  of salts (Pfeiffer), 1885, A., 827; (Lewith), 1889, A., 424; (Loewy), 1889, A., 533.
  of salts of the alkalis and alkaline earths (Ringer and Sainsbury), 1890, A., 1176.

Piperazine (*pyrazine hexahydride*) (Majert and Schmidt; v. Hofmann), 1891, A., 169, 415; (Ladenburg), 1891, A., 416; (Bischler), 1891, A., 735; (Schmidt and Wichmann), 1892, A., 210.
  non-identity of spermine with (Majert and Schmidt; v. Poehl), 1891, A., 538.

Piperazine (*pyrazine hexahydride*) group, stereochemical studies in (BISCHOFF), 1890, A., 1331.
*di*chloro- (SCHMIDT and WICHMANN), 1892, A., 211.
*di*nitroso- (LADENBURG), 1891, A., 1333.
See also Diethylenediamine and Ethyleneimine.

"**Piperethylalkine bromide.**" See Vinylpiperidine, bromo-, hydrobromide of.

Piperhydronic acid. See Piperonylvaleric acid.

Piperic acid, synthesis of (GABRIEL), 1890, A., 1129.
oxidation of (DOEBNER), 1890, A., 1274.

Piperideine (*tetrahydropyridine*) (LELLMANN and SCHWADERER), 1889, A., 901; (WOLFFENSTEIN), 1892, A., 1484.
series (LADENBURG), 1887, A., 740.
derivatives, synthesis of, and conversion of, into piperidine derivatives (LIPP), 1892, A., 1243.

*iso***Piperideine** (HEUSLER), 1891, A., 556.

Piperidine (*hexahydropyridine*) (ANON.), 1884, A., 945; (LADENBURG), 1886, A., 139; (DENNSTEDT), 1890, A., 1429.
from pentamethylenediamine (LADENBURG), 1886, A., 269.
in pepper (JOHNSTONE), 1890, A., 95.
synthesis of (LADENBURG), 1884, A., 760, 1054; (LADENBURG and ROTH), 1884, A., 1202; (GABRIEL), 1892, A., 717.
introduction of bivalent radicles into (RÜGHEIMER), 1891, A., 1246.
equilibrium between, and other basic substances (BERTHELOT), 1890, A., 1363.
spectrum of (HARTLEY), 1885, T., 731.
magnetic rotatory power of (PERKIN), 1889, T., 699, 733, 736.
thermochemistry of (COLSON), 1890, A., 101, 1368; (BERTHELOT), 1890, A., 1363.
action of alcohol on (DENNSTEDT), 1890, A., 1429.
action of bromine on, in alkaline solution (V. HOFMANN), 1883, A., 789.
action of chlorine on (BALLY), 1888, A., 964.
action of phosphoric chloride on (WALLACH and LEHMANN), 1887, A., 384.

Piperidine (*hexahydropyridine*), action of picric chloride on (TURPIN), 1891, T., 716.
action of, on calcium chloride (COLSON), 1891, A., 377.
oxidation of (SCHOTTEN), 1883, A., 813; 1885, A., 176; (TAFEL), 1892, A., 1104.
oxidation of, by hydrogen *per*oxide (WOLFFENSTEIN), 1892, A., 1484.
condensation of furfuraldehyde and (DE CHALMOT), 1892, A., 1452.
conversion of, into δ-amidovaleric acid and into oxypiperidine (SCHOTTEN), 1888, A., 1104.
conversion of, into pyridine (V. HOFMANN), 1883, A., 813; (LELLMAN and GELLER), 1888, A., 970.

Piperidine, derivatives of (LELLMANN and JUST), 1891, A., 1244.
synthesis of (MERLING), 1887, A., 164; (PAAL and STRASSER), 1888, A., 62.
oxidation of (SCHOTTEN and SCHLÖMANN), 1892, A., 354.
benzyl derivatives of (LELLMANN and PEKRUN), 1891, A., 88.
chloriodide (PICTET and KRAFFT), 1892, A., 1357.
homologues, synthesis of (LADENBURG), 1884, A., 1054.
hydrochloride, magnetic rotatory power of (PERKIN), 1889, T., 716.
action of methylic alcohol on (LADENBURG), 1883, A., 1154.
hydroferrocyanide, crystalline form of (HIORTDAHL), 1886, A., 522.
isomeride of (LADENBURG), 1883, A., 910.
silver salts (VARET), 1892, A., 1483.
thiocyanate (V. HOFMANN and GABRIEL), 1892, A., 1110.
γ-truxillopiperidate (HERSTEIN), 1889, A., 1213.
nitro- (FRANCHIMONT and KLOBBIE), 1889, A., 1145.

Piperidine-bases (LADENBURG), 1887, A., 64; (LELLMANN and BÜTTNER), 1890, A., 1002.
from acetone and aldehyde-ammonia (DÜRKOPF), 1888, A., 1313.
conversion of pyridine bases into (LADENBURG), 1884, A., 760.
synthesis of (LADENBURG), 1884, A., 1195; 1885, A., 992; 1890, A., 67; 1891, A., 1092.
specific rotation of (LADENBURG), 1887, A., 164, 282.
behaviour of, towards aromatic halogen compounds (LELLMANN and JUST), 1891, A., 1245.

Piperidine-bases of the β-series (Stoehr), 1892, A., 628.
  phenylated (Bally), 1888, A., 65.
Piperidine-dyes (Lachowicz), 1888, A., 1314.
Piperidine*di***bromisatin** (Schotten), 1891, A., 1491.
Piperidinecarboxylic acid (Marino-Zuco), 1892, A., 85.
Piperidinecarboxylic acids (Ladenburg), 1891, A., 735; 1892, A., 1485, 1486; (Ladenburg and Karau), 1892, A., 1486.
Piperidinic acid (*γ-amidobutyric acid*) and its salts (Schotten), 1883, A., 813; (Gabriel), 1890, A., 360.
Piperidone (Schotten), 1888, A., 1105.
Piperidylacetoguanamine (Bamberger and Seeberger), 1892, A., 736.
Piperidylbenzylcarbamide (Kühn and Riesenfeld), 1892, A., 312.
Piperidylbenzylidenehydrazine (Knorr), 1884, A., 468.
Piperidylbenzylthiocarbamide (Dixon), 1891, T., 568.
Piperidylcarbamide (Franchimont and Klobbie), 1889, A., 1145.
Piperidyldiguanidine (Bamberger), 1891, A., 735; (Bamberger and Seeberger), 1891, A., 839; 1892, A., 735.
  copper salt of (Bamberger and Seeberger), 1891, A., 839.
Piperidylethylurethane, action of bromine on (Schotten), 1883, A., 814.
Piperidylformoguanamine (Bamberger and Seeberger), 1892, A., 735.
Piperidylfurfurylethyl alcohol (Klein), 1890, A., 1437.
Piperidylhydrazine, and its derivatives (Knorr), 1884, A., 467.
Piperidylmethylurethane and its nitrodehydro-derivative (Schotten), 1883, A., 814.
Piperidyloxamic acid (Wallach and Lehmann), 1887, A., 385.
Piperidylrhodamine (Lellmann and Büttner), 1890, A., 1003.
Piperidyl-semicarbazide, -semithiocarbazide and -thiocarbazide (Knorr), 1884, A., 468.
Piperidylthiocarbamides (Gebhardt), 1885, A., 384.
Piperidyl-1-thiocarbanilide (Lellmann and Just), 1891, A., 1245.
Piperidyl-thiosinamine and **-ψ-thiosinamine** (Avenarius), 1891, A., 549.
Piperno of the Collina del Vomero (Freda), 1889, A., 222.
Piperohydrolactone and **piperoketonic acid** (Weinstein), 1885, A., 664.
Piperon (Chodat and Chuit), 1890, A., 80.
Piperonal, derivatives of (Haber), 1891, A., 704.
  bromo-, derivatives of (Oelker), 1891, A., 1474.
Piperonalaldoxime (Marcus), 1892, A., 318.
  bromo- (Oelker), 1891, A., 1475.
Piperonaloxime, 6-amido- (Haber), 1891, A., 706.
Piperonalphenylhydrazone (Rudolph), 1889, A., 252.
  o-nitro- (Haber), 1891, A., 706.
Piperonenylamidoxime (Marcus), 1892, A., 318.
Piperonenylazoxime-ethenyl (Marcus), 1892, A., 318.
Piperonyl, some derivatives of (Perkin), 1891, T., 150; P., 27.
Piperonylacryl methyl ketone. See Piperonylvinyl methyl ketone.
Piperonylacrylic acid (Perkin), 1891, T., 152.
  action of nitric acid on (Perkin), 1891, T., 153.
  6-nitro-, 6-amido-, *tetra*bromo- and α- and β-*tri*bromo- (Perkin), 1891, T., 153, 158, 160, 163; P., 27.
Piperonylethylene, *tri*bromo- (Perkin), 1891, T., 161; P., 27.
Piperonylideneamidodimethylaniline (Nuth), 1885, A., 784.
Piperonylketonic acid (Ciamician and Silber), 1890, A., 966.
  hydrazone of (Garelli), 1891, A., 711.
Piperonyllactyl methyl ketone. See β-Hydroxypiperonylethyl methyl ketone.
Piperonylnitrile (Garelli), 1891, A., 711; (Marcus), 1892, A., 318.
  2-nitro- (Haber), 1891, A., 706.
Piperonyloin (Perkin), 1891, T., 164.
Piperonylpropionic acid, bromo- (Weinstein), 1885, A., 665.
Piperonylvinyl methyl ketone (*piperonylacryl methyl ketone*) (Haber), 1891, A., 705.
  bromo- (Oelker), 1891, A., 1475.
  o-nitro- (Haber), 1891, A., 705.
*iso***Piperonylvinyl methyl ketone** (Haber), 1891, A., 705.
Piperonylvaleric acid (*piperhydronic acid*) (Buri), 1883, A., 485.
  *di*bromo-, and its derivatives (Weinstein), 1885, A., 664.

Piperpropylalkine. See Hydroxypropylpiperidine.
Piperylene. See Pentinene.
Pipette for weighing fuming liquids (Lunge and Rey), 1892, A., 13.
  improved, for gas absorptions (Gill), 1892, A., 1124, 1374.
Pipitzahoic acid. See Perezone.
Piscidin, the active principle of Jamaica dogwood (Hart), 1884, A., 332.
Pistomesite from the coal-measures (Weiss), 1886, A., 775.
Pisum arvense, composition of (Nilson), 1892, A., 522.
  cultivation of (Märcker), 1884, A., 769.
Pisum sativum, composition of the seeds of (Schulze, Steiger and Maxwell), 1891, A., 1542.
  constituents of the seed pods of (Likiernik), 1891, A., 606.
  nitrogen assimilation by (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
  See also Agricultural Chemistry.
"**Pitch,**" brewer's, examination of (v. Milkowski), 1891, A., 512.
Pitch, coal-tar, nitrogen in (Smith), 1884, T., 146.
Pitchblende. See Uraninite.
Pitchstone-porphyrite (Teall), 1884, A., 413.
Pith parenchyma (Urbain), 1884, A., 861.
Pithecolobium bigeminum and *P. Saman,* alkaloids from (Greshoff), 1891, A., 336.
Pitticite from Utah (Genth), 1891, A., 275.
Pituri, physiological action of (Langley and Dickinson), 1890, A., 1178.
Piuri. See Purree.
Plagioclase from California (v. Chrustschoff), 1887, A., 20.
  from Chili, analysis of (Ziegenspeck), 1886, A., 214.
  from Parthalla Cove, Cornwall (Collins), 1887, A., 1022.
  from the Tynemouth dyke (Teall), 1887, A., 784.
  artificial formation of (Koziorowski), 1890, A., 718.
  and scapolite minerals, chemical resemblance between (Tschermak), 1884, A., 567.
Plant. See Agricultural Chemistry.
Plantago Psyllium, sugar obtained from (Bauer), 1889, A., 233.
Plasma and serum (Wright), 1892, A., 1113.
Plasmolysis (de Vries), 1884, A., 1065.
Plaster, method of hardening (Julhe), 1885, A., 707.
Plaster of Paris. See Calcium sulphate.
"**Plastering,**" influence of, on the composition of wine (Magnier de la Source), 1884, A., 646.
Plastin (Zacharias), 1884, A., 90.
Platinates of the alkalis and alkaline earths (Rousseau), 1889, A., 1125.

Platinibenzylsulphine and **platinibutylsulphine chlorides** (Löndahl), 1889, A., 368.
Platini*iso*butylsulphine salts (Löndahl), 1889, A., 369.
Platinic bromide and **chloride.** See Platinum *tetra*bromide and *tetra*chloride.
Platinidihydroxylamine salts (Alexander), 1888, A., 426.
Platiniferous nickel ore from Canada (Clarke and Catlett), 1889, A., 835.
Platinimethylsulphine salts (Enebuske), 1889, A., 230.
Platini-*iso*propylsulphine iodide and **platinipropylsulphine salts** (Rudelius), 1889, A., 368.
Platiniselenostannates (Schneider), 1892, A., 282.
Platinithiocyanates (Guareschi), 1892, A., 286.
  of the alkaloids and amines (Guareschi), 1892, A., 287.
Platinous chloride. See Platinum *di*chloride.
Platinum, atomic weight of (Halberstadt), 1885, A., 355; (Dittmar and McArthur), 1888, A., 425; (Seubert), 1888, A., 1043; 1891, A., 885.
  native, from Canada (Hoffmann), 1889, A., 109.
    new substance in (Wilm), 1883, A., 954.
  discovery of, in the sun (Hutchins and Holden), 1887, A., 1065.
  thallium in (Warren), 1887, A., 702.
  production of, in Russia (anon.), 1885, A., 942.
  preparation and assaying of pure (Mylius and Foerster), 1892, A., 789.
  fused, comparative radiation of fused silver and (Violle), 1887, A., 1010.
  electric properties of, when containing hydrogen (Fromme), 1883, A. 765.

- **Platinum,** electric resistance of (Le Chatelier), 1891, A., 5.
  - glowing, disintegration of (Kayser), 1888, A., 1014.
  - occlusion of hydrogen by (Neumann and Streintz), 1892, A., 567.
  - absorption of gases by (Berthelot), 1884, A., 702.
  - absorption of oxygen by (Neumann), 1892, A., 943.
  - action of chlorine and carbonic oxide on (Pullinger), 1891, T., 598.
  - action of incandescent, on gases and vapours (Hodgkinson and Lowndes), 1889, A., 20, 208.
  - action of nitrosyl chloride on (Sudborough), 1891, T., 663.
  - action of silicon on (Warren), 1889, A., 1125.
  - behaviour of, in chromic and nitric acids (Fromme), 1883, A., 698.
  - reducing action of hydrogen in presence of (Cooke), 1888, A., 1245.
  - obtaining very sensitive, spongy (Warren), 1891, A., 1321.
  - lowering of the freezing points of bismuth, cadmium and lead by (Heycock and Neville), 1892, T., 896, 901, 909.
- **Platinum-black,** preparation of very active (Loew), 1890, A., 453.
  - absorption of mercury vapour by (Ihmori), 1886, A., 766.
- **Platinum alloys,** certain generic, electrical relations of (Barus), 1889, A., 201.
  - with gold, liquation of (Matthey), 1890, A., 947.
  - with iron and copper (Maumené), 1887, A., 778.
  - with tin (Debray), 1887, A., 779.
- **Platinum** compounds, ammoniacal (Cossa), 1887, A., 642.
    - with arsenic (Tivoli), 1885, A., 728.
    - volatile (Pullinger), 1891, T., 598; P., 111.
  - bromonitro-compounds of (Vèzes), 1891, A., 807; 1892, A., 280.
  - carbides formed at comparatively low temperatures (Griffiths), 1885, A., 487.
  - iodonitro-compounds of (Vèzes), 1892, A., 280.
  - nitrogen compounds of (Vèzes), 1892, A., 1283.
  - salts, double, constitution of (Jörgensen), 1886, A., 857.
  - basic salts of (Prost), 1886, A., 987.
- **Platinum** *di*bromide, action of carbonic oxide on (Pullinger), 1891, T., 603.
  - *tetra*bromide (*platinic bromide*) and its compounds, heat of formation of (Pigeon), 1892, A., 3.
  - *di*chloride (*platinous chloride*) (Shenstone and Beck), 1892, T., 445; P., 70.
    - use of, as a source of chlorine (Shenstone and Beck), 1892, T., 445; P., 70.
  - *tetra*chloride (*platinic chloride*) (Engel), 1889, A., 20; (Pigeon), 1889, A., 834.
    - anhydrous (Pullinger), 1892, T., 422; P., 54.
    - testing the purity of (Holleman), 1892, A., 1526.
    - and its compounds, thermochemistry of (Pigeon), 1891, A. 966.
    - heat of formation of (Pigeon), 1890, A., 439.
    - electrolytic conductivity of (Hampe), 1888, A., 891.
    - decomposition of, in solution (Foussereau), 1886, A., 975.
    - compounds of, with hydrogen chloride (Pigeon), 1891, A., 1325.
  - *tetra*fluoride (Moissan), 1890, A., 217.
  - phosphorus fluoride (Moissan), 1891, A., 1433.
  - hydroxides (Prost), 1886, A., 987.
    - **Platinic hydroxide,** action of, on tungstates (Rosenheim), 1891, A., 1323.
- **Platinum** hydroxyarsenide (Tivoli), 1885, A., 728.
  - phosphides (Clarke and Joslin), 1884, A., 400.
  - potassium salts. See Potassium platinum salts.
  - silicide (Memminger), 1886, A., 124; (Miles), 1887, A., 450.
  - sodium salts. See Sodium platinum salts.
  - tin compounds (Schützenberger), 1884, A., 823.
  - thiocarbide (Schützenberger), 1891, A., 19.
  - thiocyanate (Guareschi), 1892, A., 286.
- **Platinum, estimation** and **separation**:—
  - native, analysis of (Wilm), 1886, A., 181.
  - estimation, electrolytic, of (Classen), 1885, A., 191; (Smith), 1891, A., 1140.

Platinum, separation:—
separation of, from antimony, arsenic and tin (Fresenius), 1886, A., 651.
separation of gold and, from antimony, arsenic and tin (de Koninck and Lecrenier), 1888, A., 1344.
separation, electrolytic, of, from cadmium, gold, silver, and from mercury (Smith and Muhr), 1891, A., 1396.
separation of, from the rare metals (Pirngruber), 1888, A., 656.
separation, electrolytic, of, from silver (Smith and Muhr), 1891, A., 1296.
Platinum-metals, atomic weights of (Seubert), 1891, A., 885.
chemistry of (Wilm), 1883, A., 1057.
alloy, explosive, with zinc (Sainte-Claire Deville and Debray), 1883, A., 19.
alloys, products of the action of acids on (Debray), 1887, A., 900.
detection and estimation of the, in presence of other metals (Joly and Leidié), 1891, A., 1554.
separation of, from gold (Bettel), 1887, A., 1084.
Platinum nugget, a remarkable (Collier), 1883, A., 426.
Platinum ore, magnetic property of (Wilm), 1883, A., 859.
Platinum thermometer. See Thermometer under Thermochemistry.
Platinum residues, a black powder obtained from (Wilm), 1883, A., 1057.
Platinum vessels, permeability of, to gases from flames (Morse and Burton), 1888, A., 652.
action of lithium carbonate on (Dittmar), 1884, A., 1071.
Platinum-water pyrometer (Hoadley), 1883, A., 769.
Platoso-ammonium carbonate, **-diammonium carbonate** and **-diammonium nitrate** (Drechsel), 1883, A., 28.
Platoso-benzylsulphine, **-butylsulphine** and **-*iso*butylsulphine salts** (Löndahl), 1889, A., 368.
Platoso-diethylenediamine chloride and **-ethylenediamine-amine chloride** (Jörgensen), 1889, A., 352.
Platosodihydroxylamine hydroxide and salts (Alexander), 1888, A., 426.
Platosodipyridine bromide and **chloride** (Foerster), 1892, A., 352.
Platoso-ethylmethylsulphine chloride, **-ethylpropylsulphine chloride** and **-ethylsulphine salts** (Blomstrand), 1889, A., 230.
Platosoethylpropylsulphine iodide (Rudelius), 1889, A., 368.
Platosomethyl-disulphine and **-sulphine salts** (Enebuske) 1889, A., 229.
Platoso-oxalic acid (Söderbaum), 1886, A., 532.
Platoso-propyl*iso*propylsulphine iodide, **-propylsulphine salts** and **-*iso*propylsulphine salts** (Rudelius), 1889, A., 367.
Platosopyridine *di*bromide and **chloride** (Foerster), 1892, A., 352.
Platososemiamine chloride (Cossa), 1890, A., 1218.
Platososemidiethylenediamine chloride (Jörgensen), 1889, A., 351.
Platososemipyridine chloride (Foerster), 1892, A., 352.
Plattnerite (Kinch), 1887, A., 451.
from Idaho (Wheeler), 1890, A., 339.
Pleochroic crystals, explanation of the colour phenomena of (Voigt), 1885, A., 621.
Pleonectite from Sweden (Igelström), 1890, A., 112.
Plessite from the Welland meteoric iron (Davison), 1892, A., 24.
Pleurasite (Igelström), 1890, A., 1076.
Pleurisy, nature of the effusion in (Halliburton), 1890, A., 1173.
Plumbo-aragonite from Leadhills (Collie), 1889, T., 95.
Plumbocalcite from Leadhills (Collie), 1889, T., 95.
from Wanlock Head (Lacroix), 1887, A., 557.
Plumboferrite from Sweden (Igelström), 1891, A., 1435.
Plumbonacrite. See Hydrocerussite.
Plum-gum, galactose from (Bauer), 1888, A., 1329.
Plums, sugar from the pectin of (Bauer), 1891, A., 413.
Plutonic rocks. See Rocks.
Plynthite, from Skye (Heddle), 1886, A., 130.
Pneumococcus of Friedländer, fermentations induced by (Frankland, Stanley and Frew), 1891, T., 253; P., 30.
Pneumonia, ptomaine of (Griffiths), 1892, A., 1258.
Poa pratensis, composition of (Wilson), 1889, A., 1078.
Podophyllic acid, **podophylloquercetin** and **podophyllotoxin** (Kürsten), 1891, A., 1133.
Pogonopus febrifugus, constituents of the bark of (Arata and Canzoneri), 1890, A., 404.

Poisons, distribution of, in the human organism in cases of poisoning (BISCHOFF), 1883, A., 1020.
gaseous, action of (BELKY), 1887, A., 392.
influence of temperature on the action of (HESS and LUCHSINGER), 1885, A., 578.
action of, on nerve fibres and peripheral nerve cells (LANGLEY and DICKINSON), 1891, A., 485.
vegetable, influence of, on the germination of seeds (CORNEVIN), 1892, A., 228.
organic and inorganic, detection and estimation of, in corpses (SEYDA), 1891, A., 117.
Poisons of batrachians (GAUTIER and ETARD), 1884, A., 764.
cobra (WOLFENDEN), 1886, A., 1057; (WARDEN), 1887, A., 170; (KANTHACK), 1892, A., 1118.
of *Mytilus Edulis* (SALKOWSKI), 1886, A., 568.
crystalline arrow, from the wood of ouabaio (ARNAUD), 1888, A., 848.
proteid (MARTIN), 1889, A., 1026.
quinine as a protoplasmic (BINZ), 1891, A., 1531.
rattlesnake, antidote for (CROFT), 1883, A., 104.
preventive inoculation with (SEWALL), 1888, A., 1326.
septic, origin of (ZWEIFEL), 1883, A., 937.
hæmoglobin crystals in (BOND), 1888, A., 181.
snake (WOLFENDEN), 1886, A., 1057.
of the tetrodon (EIJKMAN), 1886, A., 1049.
of "Timbo" (PFAFF), 1891, A., 938.
volatile, in urushi (YÔSHIDA), 1883, T., 475.
of Indian viper (WOLFENDEN), 1886, A., 1058.
Poisoning cases, destruction of organic matter in (MARINO-ZUCO), 1889, A., 653.
colchicine-like decomposition-product in suspected (BAUMERT), 1888, A., 636.
detection of coniine in (ANDREWS), 1891, A., 871.
methods of detecting lead, silver and mercury in the body in (LEHMANN), 1883, A., 687.
detection of mercuric cyanide in (VITALI), 1890, A., 198.
detection of morphine in (SCHEIBE), 1883, A., 1036; 1884, A., 373.
Poisoning cases, detection of strychnine and other alkaloids in (CHANDELON), 1885, A., 605.
localisation of arsenic in (GUARESCHI), 1884, A., 199.
estimation of arsenic in (BECKURTS), 1885, A., 439.
estimation of arsenic and copper in (GUCCI), 1888, A., 630.
Poisoning by antimony, distribution of antimony in the organs and tissues in (CHITTENDEN and BLAKE), 1888, A., 81.
with a barium salt, localisation of barium in the organism after (LINOSSIER), 1888, A., 183.
by canned goods (JOHNSON), 1885, A., 1016.
by carbonic oxide (BELKY), 1887, A., 392; (GRÉHANT), 1888, A., 622.
partial, elimination of carbonic oxide after (GRÉHANT), 1886, A., 641.
new test for the blood in (KATAYAMA), 1889, A., 88, 650; (RUBNER), 1891, A., 496; (BERTIN-SANS and MOITESSIER), 1891, A., 1522.
by caustic alkalis, detection of (VITALI), 1888, A., 1224.
by hydrocyanic acid (BISCHOFF), 1883, A., 1022; (BELKY), 1887, A., 392; (GRÉHANT), 1889, A., 1232.
applied to the surface of the eye (GRÉHANT), 1891, A., 99.
dextrose and lactic acid in (ZILLESSEN), 1891, A., 1126.
antidote for (KROHL), 1892, A., 1019.
by lead (LEHMANN), 1883, A., 1163; (ELLENBERGER and HOFMEISTER), 1885, A., 74.
distribution of lead in the brain in cases of (BLYTH), 1887, P., 71.
by mercuric chloride (FALKENBERG), 1891, A., 853.
by sausages (EHRENBERG), 1887, A., 392.
by tolylenediamine, formation and elimination of a ferruginous pigment in (ENGEL and KIENER), 1888, A., 81.
See also Physiological action and Toxicological investigations.
Polarisation. See Electrochemistry and Photochemistry.
Polei, oil of (BECKMANN; PLEISSNER), 1891, A., 936.
Pollen of *Coryllus Avellana* (SCHULZE and v. PLANTA), 1886, A., 736.
hazel, chemical composition of (v. PLANTA), 1885, A., 182.

Pollen of *Pinus sylvestris* (v. PLANTA), 1886, A., 91; (SCHULZE and v. PLANTA), 1886, A., 736; (KRESLING), 1892, A., 232.
ash of (FAMINTZIN and PRZYBYTEK), 1886, A., 172.
Pollucite from Hebron, Maine (WELLS), 1891, A., 993.
Polyacetylene-compounds (v. BAEYER), 1885, A., 759, 1198.
Polyarsenite. See Sarcinite.
Polyazo-compounds (WILLGERODT), 1890, A., 1118.
Polycarboxylic fatty acids, synthesis of (AUWERS), 1891, A., 546.
Polychrome varnish for white metal (PUSCHER), 1883, A., 896.
Polycoumarins (HANTZSCH and ZÜRCHER), 1887, A., 830.
Polycrase from California (HIDDEN and MACKINTOSH), 1890, A., 854.
of North and South Carolina (HIDDEN and MACKINTOSH), 1891, A., 1329.
Polydymite (LASPEYRES), 1892, A., 124.
Polygalic acid (FUNARO), 1890, A., 262.
Polygonic acid (RADEMAKER), 1886, A., 949.
Polyhydrite from St. Christoph mine, in Saxony (STARKL), 1883, A., 444.
Polyiodides (GEUTHER), 1887, A., 910.
crystallographic examination of (LUEDECKE), 1887, A., 910.
Polyketones, passivity of certain, to hydroxylamine and phenylhydrazine (HERZIG and ZEISEL), 1889, A., 254.
Polylithionite from Greenland (LORENZEN), 1886, A., 677.
Polymeric compounds, determination of the molecular weights of, by Raoult's method (MELDOLA and STREATFEILD), 1889, A., 1105.
Polymerism in mineral chemistry (HUNT), 1891, A., 258.
and isomerism, use of Raoult's method, to distinguish beween (ANSCHÜTZ), 1889, A., 754.
Polymethylenes and naphthenes (MARKOWNIKOFF), 1892, A., 1310.
Polymnestum (PRINGLE), 1887, A., 107.
Polyoxides, constitution of (GEUTHER), 1884, A., 1260.
Polyporus officinalis, constituents of (JAHNS), 1884, A., 353.
Polypus of the nose, analyses of (PATEIN), 1891, A., 852.
Polysulphides, constitution of (BÖTTGER; GEUTHER), 1884, A., 1260.
Polythionates (SPRING), 1892, P., 91.
formulæ of (DEBUS), 1888, T., 351.
Polythionates, action of sulphurous acid on (DEBUS), 1888, T., 331; P., 18.
general reactions of (DEBUS), 1888, T., 298.
Polythymoquinone, and its derivatives (LIEBERMANN and v. ILINSKI), 1886, A., 239.
Pomegranate, medicinal properties of the root bark of (KAMNITZER), 1885, A., 850.
Poplar wood, yellow colouring matter from (ANON.), 1886, A., 558.
Poppy cake, estimation of fat in (BAESSLER), 1890, A., 306.
Poppy oil, acids from (HAZURA and GRÜSSNER), 1888, A., 817.
Porcelain (WAGENER), 1883, A., 397.
Chinese, rocks used in the manufacture of (VOGT), 1890, A., 461.
constitution of (WERNADSKI), 1890, A., 1074.
moulding of (LAUTH), 1885, A., 307.
Porcelain enamels (WAGENER), 1883, A., 397; (LAUTH and DUTAILLY), 1889, A., 214.
Porous bodies, density of (FLEURY), 1885, A., 334.
Porpezite (*native palladium-gold*) from Taguaril, Brazil (SEAMON), 1883, A., 160.
Porphyrite, micaceous, of Morvan (MICHEL-LÉVY), 1883, A., 447.
Tuedian, from Stichill, analysis of (TEALL), 1884, A., 413.
Porphyrite-bosses in New Jersey (KEMP), 1890, A., 345.
Porphyrites, Cheviot (TEALL), 1884, A., 413.
of Gabian (DE ROUVILLE and DELAGE), 1889, A., 110.
Porphyritic obsidian, analysis of (BEAM), 1884, A., 28.
Porphyry from Horka, Prussia (STEGER), 1887, A., 223.
from the Lugano district (HARADA), 1883, A., 17.
tuff near Tryberg in the Black Forest (WILLIAMS), 1883, A., 725.
Porpoise, composition of the milk of the (PURDIE), 1885, A., 1253.
Portland cement, effect of magnesia in (LECHARTIER), 1886, A., 770.
testing of (ANON.), 1883, A., 753.
adulteration (MICHAELIS), 1883, A., 530; (R. and W. FRESENIUS), 1885, A., 616.
detection of adulteration in (FRESENIUS), 1884, A., 876.
Potable-waters. See under Water.

  molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 595.
  containing sulphur, heats of formation of (Berthelot), 1883, A., 706.
Potassium salts, organic, electrolysis of solutions of (Lassar-Cohn), 1889, A., 1056.
  action of ammonia on solutions of (Giraud), 1885, A., 1038.
  physiological action of (Richet), 1886, A., 88; (Blake), 1886, A., 385.
Potassium alum (*potash alum*) from felspar (Pemberton), 1883, A., 424.
  combination of, with water (Maumené), 1886, A., 981.
Potassium anhydrosulphite (Berthelot), 1883, A., 705.
  antimonate (v. Knorre and Olschewsky), 1888, A., 231.
    electrolysis of, with carbon electrodes (Bartoli and Papasogli), 1883, A., 590; 1889, A., 559.
  arsenate, action of, on *sesqui*oxides (Lefèvre), 1890, A., 1377.
    behaviour of, with indicators (Thomson), 1884, A., 869.
  aluminium, chromium, and iron arsenates (Lefèvre), 1890, A., 1378.
  cadmium, cobalt, magnesium, manganese, nickel and zinc arsenates (Lefèvre), 1890, A., 562.
  arsenite, behaviour of, with indicators (Thomson), 1884, A., 870.
  beryllate (Krüss and Moraht), 1890, A., 698.
  bismuthate (André), 1892, A., 414.
  bromate, testing of (Vulpius), 1884, A., 218.
  bromide, chlorine in (Weigle), 1885, A., 723.
    action of sulphuric acid on (Addyman), 1891, P., 168; 1892, T., 94.
    influence of, on nutrition (Schulze), 1884, A., 850.
    as indicator in chlorimetry (Denigès), 1891, A., 615.
    and chloride, solubility of mixed (Etard), 1890, A., 443.
    and iodide, solubility of mixed (Etard), 1890, A., 443.
    and iodide, compounds of arsenious anhydride with (Schiff and Sestini), 1885, A., 723.
  gold bromide (*aurobromate*) (Schottländer), 1883, A., 854; 1887, A., 1079.
      preparation of pure (Thorpe and Laurie), 1887, T., 868.
  lead bromide (Herty), 1892, A., 780.
  magnesium bromide (Lerch), 1884, A., 262; (Feit), 1889, A., 827.

Potassium antimony chlorobromide (Atkinson), 1883, T., 289.
crystallography of (Solly), 1883, T., 293.
carbonate (Flückiger), 1883, A., 902.
reduction of, by magnesium (Winkler), 1890, A., 332.
pure, action of silver nitrate on (Bohlig), 1885, A., 1111.
testing (Bohlig), 1888, A., 1224.
copper carbonate solution, estimation of sugars with (Ost), 1890, A., 1031; 1891, A., 125, 1298; (Schmoeger), 1892, A., 387.
hydrogen carbonate, conversion of potassium chloride into (Muller), 1885, A., 1038.
sensitive test for, in presence of carbonate (Bohlig), 1885, A., 1111.
estimation of, in presence of normal carbonate (Thomson), 1884, A., 869.
silver carbonate (de Schulten), 1888, A., 110.
sodium carbonate (Hugounenq and Morel), 1888, A., 786.
*sesqui*carbonate (Rammelsberg), 1883, A., 646.
chlorate (Beckurts), 1886, A., 664.
preparation of (Muspratt and Eschellmann), 1885, A., 17.
electrolysis of (Tommasi), 1886, A., 408.
crystals, crystalline reflection in (Stokes), 1885, A., 1175.
solubility of, influence of potassium salts on the (Blarez), 1891, A., 1319.
and thallium chlorate, solubility of mixed crystals of (Roozeboom), 1892, A., 266.
and iodine, interaction of (Thorpe and Perry), 1892, T., 925, P., 161.
iodine and water, interaction of (Bassett), 1890, T., 760; P., 113.
decomposition of, by heat (Teed), 1885, P., 105; 1886, P., 141; 1887, T., 285; P., 23; (Maumené), 1886, A., 594; (Frankland and Dingwall), 1887, T., 274; P., 14; (Mills), 1887, A., 767.
decomposition of, by heat in presence of manganese *per*oxide (McLeod), 1889, T., 184; P., 26.
decomposition of, in contact with metallic oxides (Hodgkinson and Lowndes), 1889, A., 343.

Potassium chlorate, influence of different oxides on the decomposition of (Fowler and Grant), 1890, T., 272; P., 20.
physiological action of (v. Mering), 1885, A., 1002.
poisoning with (Bischoff), 1883, A., 1021.
arsenic in (Garnier), 1886, A., 99.
estimation of, in organic mixtures (Schacht; Schwarz), 1886, A., 179.
*per*chlorate, action of heat on (Mills), 1887, A., 767.
decomposition of, by heat (Frankland and Dingwall), 1887, T., 274; P., 14.
chloride, doubly refracting crystals of (Ben Saude), 1886, A., 206.
electrical conductivity of solutions of (Bouty), 1886, A., 653.
expansion, compressibility and specific heat of solutions of (Drecker), 1888, A., 1010.
compressibility of aqueous solutions of (Röntgen and Schneider), 1888, A., 1019.
action of carbonic anhydride on, in presence of various amines (Muller), 1885, A., 1038.
action of crude methylamine carbonate on, influence of pressure and temperature on the (Muller), 1887, A., 771.
as a plant poison (Munro), 1886, A., 389.
use of, in agriculture (Zolla), 1885, A., 588.
crude, estimation of small quantities of sodium chloride in (Röttger and Precht), 1885, A., 1263.
and bromide, solubility of mixed (Etard), 1890, A., 443.
and iodide, solubility of mixed (Etard), 1890, A., 443.
and copper *di*chloride, saturated solutions of compounds of (Meyerhoffer), 1890, A., 584.
and sodium chloride, solubility of mixed (Etard), 1890, A., 103, 442.
and sodium chlorides, polaristrobometric analysis of a mixture of (Schütt), 1888, A., 1341.
See also Sylvite.
aluminium chloride (Neumann), 1888, A., 655.
bismuth chloride (Brigham), 1892, A., 788.
chromium chloride (Godefroy), 1884, A., 660.

Potassium copper chloride, reversible transformation of (Meyerhoffer), 1889, A., 819.
  - and its solutions, vapour pressure of (Vriens), 1891, A., 783.
- gold chloride, anhydrous (Lainer), 1890, A., 1217.
- iridium chloride (Joly), 1890, A., 1068.
- manganese chloride (Saunders), 1892, A., 781.
- osmium chloride (Seubert), 1888, A., 922.
- rhodium chloride (Leidié), 1890, A., 1382; (Seubert and Kobbé), 1890, A., 1383.

  - molybdoiodate, sulphatoiodate and tungstoiodate (Blomstrand), 1890, A., 107.
  - iodide, vapour density of (Mensching and Meyer), 1887, A., 550.
    - solubility of (Etard), 1890, A., 443.
    - reaction between ferric chloride and (Carnegie), 1889, A., 1113.
    - action of sulphuric acid on (Jackson), 1883, T., 339.
    - solutions, decomposition of, by oxygen and light (Berthelot), 1890, A., 7.
    - removal of iodate from (Morse and Burton), 1888, A., 1246.
    - and bromide, solubility of mixed (Etard), 1890, A., 443.
    - and bromide, compounds of arsenious anhydride with (Schiff and Sestini), 1885, A., 723.
    - and starch solution, permanent (Reinhardt), 1886, A., 486.
    - commercial, assay of (Lenz), 1884, A., 366.
    - titration of (Carles; Falières), 1885, A., 1011.
    - estimation of iodates in (Gigli), 1892, A., 657.
  - bismuth iodides (Astre), 1890, A., 708, 1067.
  - lead iodide (Herty), 1892, A., 779.
    - heat of formation of (Berthelot), 1883, A., 275.
- **Potassium** lead iodide, equilibrium of, with its aqueous solution (Schreinemakers), 1892, A., 560.
  - magnesium iodide (Lerch), 1884, A., 262.
  - hypoiodite (van Deventer and van't Hoff), 1888, A., 911.
  - manganate, preparation of (Jolles), 1888, A., 556.
    - decomposition of, by ammonium salts (Retgers), 1891, A., 1159.
    - use of, in analysis (Jolles), 1889, A., 798.
  - *per*manganate, decomposition of, by heat (Rousseau), 1887, A., 552.
    - action of some acids on (Salzer), 1888, A., 996.
    - action of hydrogen arsenide on (Tivoli), 1890, A., 1210.
    - action of, on a manganous salt (anon.), 1885, A., 1265.
    - influence of, on the decomposition of potassium chlorate (Fowler and Grant), 1890, T., 280.
    - action of, on sodium thiosulphate (Gläser), 1885, A., 957; 1887, A., 336; (Hönig), 1885, A., 1111.
    - action of sulphuric acid on (Franke), 1887, A., 893.
    - action of, on certain sulphur-compounds (Nasini), 1884, A., 151.
    - solution, stability of (Grützner), 1892, A., 1524.
    - standardising solutions of (Krüss), 1885, A., 1013; (Jahoda), 1890, A., 196.
    - solutions, titrations with (Lenz), 1885, A., 598.
    - estimation of, by means of hydrogen *per*oxide (Lunge), 1885, A., 1162; 1890, A., 1468.
  - manganites (Rousseau), 1887, A., 892.
    - hydrated (Rousseau), 1892, A., 569.
  - manganite (Jolles), 1888, A., 229.
  - *hepta*manganite (Rousseau), 1887, A., 552.
  - *per*molybdate (Péchard), 1891, A., 988.
- **Potassium** nitrate (*nitre; saltpetre*) (Beckurts), 1886, A., 664.
    - deposits (Sacc), 1884, A., 1271; 1885, A., 359.
    - and sodium nitrate, conductivity of a fused mixture of (Bouty and Poincaré), 1888, A., 1231.
    - influence of, on the decomposition of potassium chlorate (Fowler and Grant), 1890, T., 282.

Potassium nitrate (*nitre; saltpetre*), action of chlorosulphonic acid on (Williams), 1886, T., 225.
  action of sulphuryl *di*chloride on (Williams), 1886, T., 226.
  effect of, on the growth of potatoes (Dehérain), 1884, A., 361.
  absorption of, by plants (Berthelot and André), 1888, A., 740.
  manuring with (Fleischer), 1888, A., 1223.
  compared with ammonium sulphate as a manure (Märcker), 1886, A., 954.
  nitrogen estimation in, by potassium xanthate (Grete), 1883, A., 1031.
  earth from Turkestan, investigation of (Ljubavin), 1885, A., 128.
silver nitrate (Ditte), 1886, A., 122.
sodium hydrogen imidosulphonate nitrate (Divers and Haga), 1892, T., 964.
nitrite, preparation of (Warren), 1891, A., 1321.
  action of, on blood (Hénocque), 1885, A., 682.
lead copper nitrite (van Lessen), 1891, A., 1157.
rhodium nitrite (Leidié), 1890, A., 1382; 1891, A., 808.
ruthenium nitrites (Joly and Vèzes), 1890, A., 17.
hyponitrite solution, preparation of (Divers and Haga), 1884, T., 85.
platino- and platoso-bromo-, -chloro- and -iodo-nitrites (Vèzes), 1891, A., 808; 1892, A., 281, 1284.
palladiochloronitrite (Vèzes), 1892, A., 1284.
nitrosoplatinochloride (Vèzes), 1890, A., 709.
nitrosoplatinoiodide (Vèzes), 1892, A., 281.
osmiamate, preparation of (Joly), 1891, A., 1433.
oxide (Beketoff), 1888, A., 1244.
*per*oxide (Bolton), 1886, A., 768.
phosphate, method for the valuation of (Thomson), 1883, A., 827.
barium phosphate (de Schulten), 1883, A., 711; (Ouvrard), 1888, A., 1033.
cadmium, calcium, cobalt, magnesium, manganese, nickel, strontium and zinc phosphates (Ouvrard), 1888, A., 1033, 1035.
thorium and zirconium phosphates (Troost and Ouvrard), 1886, A., 853.
manganese pyrophosphate (Schjerning), 1892, A., 1052.

Potassium phosphite (Amat), 1888, A., 915.
plumbate (Carnegie), 1890, A., 109.
polysulphides, constitution of (Spring and Demarteau), 1889, A., 1110.
polythionates, behaviour of, in aqueous solution (Debus), 1888, T., 319.
  behaviour of, with acids (Debus), 1888, T., 316.
pyrosulphite, and hydrates of (Berthelot), 1883, A., 705.
pyroxy*hexa*thiovanadate (Krüss and Ohnmais), 1890, A., 1381.
rutheniate and *per*-rutheniate (Debray and Joly), 1888, A., 920.
selenate, solubility of (Etard), 1888, A., 645.
selenides (Fabre), 1886, A., 505, 589.
aluminium silicates (Gorgeu), 1886, A., 667; 1890, A., 13.
silicofluoride (Preis), 1890, A., 694.
silicozirconate (Ouvrard), 1891, A., 1431.
stannichloride, hydrate of (Morel), 1891, A., 1160.
stannite, action of nitric oxide on (Divers and Haga), 1885, T., 362.
stannochlorides (Richardson), 1892, A., 785.
platinoselenostannate (Schneider), 1892, A., 281.
sulphur compounds, conductivity of, in solution (Bock), 1887, A., 758.
sulphate, artificial formation of twin crystals of, by increase of temperature (Baumhauer), 1886, A., 17.
  preparation of (Müller), 1885, A., 1268.
  heat of solution of (Pickering), 1885, T., 98; 1886, T., 306.
  supposed isomorphism of sodium sulphate and (Retgers), 1891, A., 147.
  influence of potassium halides on the solubility of (Blarez), 1891, A., 974.
  reduction of, by hydrogen and by carbon (Berthelot), 1890, A., 1053.
  absorption of, by plants (Berthelot and André), 1888, A., 740.
  estimation, volumetric, of (Dubernard), 1885, A., 1262.
  See also Glaserite.
chromosulphate (Recoura), 1892, A., 784.
copper cobalt and copper magnesium sulphates (Roy), 1887, P., 53.
copper sulphate, modifications and heat of solution of (Pickering), 1886, T., 1.

Potassium copper sulphate, anhydrous, heat of solution of (Pickering), 1886, T., 300.
hexahydrated, heat of solution of (Pickering), 1886, T., 301.
anhydrous, specific heats of three modifications of (Pickering), 1886, T., 14.
hydrogen sulphate, dimorphism of (Wyruboff), 1886, A., 665.
hydrate of (Senderens), 1890, A., 450.
iridium sulphate (Lecoq de Boisbaudran), 1883, A., 905.
magnesium sulphate, preparation of (anon.), 1885, A., 98.
modifications and heat of solution of (Pickering), 1886, T., 7.
anhydrous, heat of solution of (Pickering), 1886, T., 297.
hexahydrated, heat of solution of (Pickering), 1886, T., 298.
instability of (Dittmar), 1888, A., 554.
mercuric sulphates (Fock and Klüss), 1891, A., 879.
nickel cobalt sulphate (Roy), 1887, P., 53.
*per*sulphate (Marshall), 1891, T., 772; A., 982.
sulphide, action of cupric sulphide and of mercuric sulphide on (Ditte), 1884, A., 963, 964.
aluminium sulphide (Gratama), 1885, A., 350.
antimony sulphide (Ditte), 1886, A., 429.
copper and mercury sulphides (Ditte), 1884, A., 963, 964.
iron sulphide, action of cuprous chloride on (Schneider), 1889, A., 354.
thallium sulphide, action of hydrogen on (Schneider), 1891, A., 16.
sulphites (Hartog), 1889, A., 1106.
ammonium sulphite (Hartog), 1889, A., 1106.
manganese sulphite (Gorgeu), 1883, A., 718.
sodium sulphite (Schwicker), 1889, A., 942; (Hartog), 1889, A., 1106.
hydrogen tartrate. See Argol and Tartaric acid.
*hexa*tellurite (Klein), 1886, A., 767.
thiocarbonate, analysis of (Guyot-Dannecy), 1883, A., 241.
*tri*thionate, decomposition of an aqueous solution of (Debus), 1888, T., 313.
*tetra*thionate (Fock and Klüss), 1890, A. 1210.
Potassium *tetra*thionate, decomposition of an aqueous solution of (Debus), 1888, T., 311.
*penta*thionate (Debus), 1888, T., 291; (Fock and Klüss), 1890, A., 1210.
decomposition of an aqueous solution of (Debus), 1888, T., 311.
*hexa*thionate (Debus), 1888, T., 303.
thioplatinosate (Schneider), 1892, A., 944.
platinum thiostannate, reduction of (Schneider), 1892, A., 944.
thiosulphates (Berthelot), 1883, A., 707.
thiosulphate, reaction of, with sulphurous acid (Debus), 1888, T., 343.
ammonium and magnesium thiosulphates (Fock and Klüss), 1890, A., 564.
cadmium thiosulphates (Fock and Klüss), 1890, A., 1057.
calcium and strontium thiosulphates (Fock and Klüss), 1892, A., 12.
copper and silver thiosulphates (Cohen), 1887, T., 38.
sodium thiosulphate (Schwicker), 1889, A., 943.
thiotungstates (Corleis), 1886, A., 510.
tungstates (Feit), 1888, A., 344.
phosphotungstates (Kehrmann and Freinkel), 1892, A., 1160.
tungstovanadates (Rothenbach), 1891, A., 18.
vanadates (Ditte), 1887, A., 639.
Potassium organic compounds:—
Potassium alcoholate. See Ethoxide, potassium.
carbonylthiocyanoplatinite (Mylius and Foerster), 1891, A., 1165.
cyanate, action of ethylic chlorocarbonate on (Wurtz and Henninger), 1885, A., 968.
seleniocyanate, action of chlorine on (Verneuil), 1886, A., 1002.
action of iodine on (Verneuil), 1884, A., 1109.
cyanide, decomposition of (Wilkes), 1885, A., 495; (Manning), 1888, A., 930.
oxidation of, with potassium permanganate (Volhard), 1891, A., 160.
action of acids on (v. der Pfordten), 1885, A., 1120.
chromo- and chromi-cyanides (Christensen), 1885, A., 737; (Moissan), 1885, A., 738.
iron cyanogen compound (Mahla), 1889, A., 359.
ferricyanide, preparation of (Kassner), 1890, A., 352.

- **Potassium** ferricyanide, action of light on (Eder), 1885, A., 1173.
    - action of bromine on (Reynolds), 1888, T., 767; P., 87.
    - reactions of (Prud'homme), 1891, A., 410.
    - reduction of, by potassium cyanide (Bloxam), 1884, A., 35.
    - preparation of oxygen by aid of (Kassner), 1890, A., 352.
    - use of, in gasometry (Quincke), 1892, A., 526.
    - estimation of (Quincke), 1892, A., 526.
    - estimation, volumetric, of (Kassner), 1890, A., 834.
    - volumetric analyses by means of (Luckow), 1892, A., 1129, 1527.
  - ferrocyanide, production of (Zulkowski), 1884, A., 501.
    - physiological action of (Combemale and Dubiquet), 1891, A., 99.
    - non-poisonous nature of (Carles), 1890, A., 281.
    - estimation of (Zulkowski), 1884, A., 501.
    - volumetric analyses by means of (Luckow), 1892, A., 1129, 1527.
  - ferrous ferricyanide (*Prussian blue, soluble*) (Guignet), 1889, A., 475.
  - manganese cyanides (Christensen), 1885, A., 737.
  - platinocyanides (Wilm), 1886, A., 604, 605; 1888, A., 931; 1889, A., 951.
  - thiocyanate, nitrification of, by soil (Munro), 1886, T., 637.
  - iron thiocyanates (Krüss and Moraht), 1889, A., 1129.
  - platinothiocyanate (Guareschi), 1892, A., 286.
- **Potassium, detection, estimation** and **separation**:—
  - detection of (Pauly), 1887, A., 1138.
  - detection, spectroscopic, of (Gooch and Hart), 1892, A., 913.
  - estimation of (Kretzschmar), 1886, A., 490; (Gooch and Hart), 1892, A., 913.
  - estimation, volumetric, of (White), 1888, A., 1130.
  - estimation of, by reduction of the platinochloride (Woussen), 1888, A., 89.
  - estimation of, in ashes and minerals (Kretzschmar), 1887, A., 864.
  - estimation of, in presence of lithium (Kraut), 1888, A., 195.
- **Potassium, estimation** and **separation**:
  - estimation of, in silicates (Chatard), 1885, A., 296.
  - estimation of, in silicates by Lawrence Smith's method (Holland), 1887, A., 181.
  - estimation of, in soils (Raulin), 1890, A., 668; (van Bemmelen), 1890, A., 833.
  - estimation of, in urine as hydrogen potassium tartrate (Robin), 1890, A., 187.
  - estimation of, in water (Muck), 1890, A., 299.
  - separation of, from lithium, magnesium and calcium (Gooch), 1887, A., 528.
  - See also Agricultural Chemistry.

  - fluorescence spectra of (Lecoq de Boisbaudran), 1888, A., 97.

Precipitates, apparatus for washing (Forbes), 1892, A., 1513.
  washing and drying, without exposure to the carbonic acid of the atmosphere (Jolles), 1886, A., 1070.
  change of, from the amorphous to the crystalline form (Watson), 1891, A., 875.
  metallic, crystalline (Warren), 1890, A., 851.
Precipitation (Watson), 1890, A., 847; 1891, A., 875.
  theory of fractional (Hood), 1887, A., 325.
Prehnidine and its derivatives (Töhl), 1888, A., 584.
Prehnite (Schubert), 1883, A., 35.
  from Cornwall, Lebanon Co., Pa. (Genth), 1884, A., 266.
  from Monte Catini (Bechi), 1883, A., 442.
  from Silesia (Beutell), 1887, A., 223.
  from Tuscany, etc. (Corsi; Bechi), 1883, A., 441.
Prehnitene (1:2:3:4-*durene;* 1:2:3:4-*tetramethylbenzene*), and its derivatives (Jacobsen), 1886, A., 694; (Kelbe and Pathe), 1886, A., 805; (Töhl), 1888, A., 584.
  synthesis of (Jacobsen), 1889, A., 39.
  bromo-, action of sulphuric acid on (Töhl), 1892, A., 968.
  mono- and *di*-chloro- (Töhl), 1892, A., 967.
Prehnitenedicarboxylic acid (Jacobsen), 1889, A., 874.
Prehnitenesulphonic acid (Jacobsen), 1886, A., 694.
Prehnitic acid (1:2:3:4-*benzenetetracarboxylic acid*) (Jacobsen), 1885, A., 166; (Töhl), 1888, A., 585.
Prehnitol (1:2:3:4-*tetramethylphenol*) (Limpach), 1888, A., 464; (Töhl), 1888, A., 585.
Prehnitylenediamine (Töhl), 1888, A., 585.
Prehnitylene-ethenylamidine hydrochloride (Töhl), 1888, A., 585.
Prehnitylic acid (Jacobsen), 1886, A., 695.
Press-cake, new process for preparing, from maize, etc. (Burow), 1883, A., 695.
Pressure, chemical decomposition produced by (Spring and van't Hoff), 1888, A., 341.
  effect of, on chemical action (Judd), 1890, T., 408.
  influence of, on the condition of carbon in iron (Hempel), 1888, A., 557.
Pressure, effect of, on the decomposition of dissolved chlorides (Foussereau), 1887, A., 697.
  influence of, on dissociation (Pawlewski), 1891, A., 381.
  influence of, on the electrical conductivity of liquids (Barus), 1891, A., 250.
  influence of, on the resistance of electrolytes (Fink), 1886, A., 586.
  influence of, on the expansion of water by heat (Puschl), 1892, A., 1382.
  influence of, on the reaction between sodium sulphate and barium carbonate (Spring), 1887, A., 332.
  influence of, on the temperature of volatilisation of solids (Ramsay and Young), 1884, A., 252.
  and boiling point, relations between (Schumann), 1885, A., 1176; (Kahlbaum), 1886, A., 590.
  volume and temperature, relation of, in the case of liquids (Barus), 1890, A., 321.
  constant, apparatus for maintaining, when distilling under reduced pressure (Perkin), 1888, T., 689; P., 74.
  critical. See Critical pressure.
  produced during the combustion of gaseous mixtures (Mallard and Le Chatelier), 1883 A., 542.
    estimation of (Vieille), 1883, A., 542.
  osmotic. See Osmotic pressure under Diffusion.
  unequal, equilibrium of chemical systems under (Spring), 1892, A., 1148.
  estimation of, n closed tubes (Reychler), 188 , A., 1014.
Pressure-curves of fluids at their critical points (v. Wroblewski), 1886, A., 964.
Pressure variations of certain high temperature boiling points (Barus), 1891, A., 9.
Pressure-tubes (Warren), 1888, A., 646.
Priceite (*pandermite*) (Whitfield), 1888, A., 347.
  colemanite, and pandermite, identity of (Kenngott), 1885, A., 1117.
Primuline, history of (Gattermann and Jacobson), 1889, A., 868.
  constitution of (Green), 1889, T., 227 ; P., 46 ; (Pfitzinger and Gattermann), 1889, A., 867.
  nature of (Gattermann), 1889, A., 602.
  photographic printing of (Green, Cross and Bevan), 1891, A., 139,

Primuline base and its constitution (GREEN), 1889, T., 233.
action of potash on (PFITZINGER and GATTERMANN), 1889, A., 868.
Primuline-group, dyes of the (TRAUTMANN), 1891, A., 195.
Printing, use of antimony oxalate in (JAQUET), 1885, A., 1276.
new blue for (ULLRICH), 1886, A., 187.
fixing perthiocyanogen in (SCHMID), 1884, A., 796.
Printing ink, process for preparing (ANON.), 1883, A., 896.
Prismatine (SAUER), 1888, A., 34.
Prisms, use of carbon *di*sulphide in (DRAPER), 1885, A., 853.
Prochlorite. See Ripidolite.
Propaldehyde, polymeric modifications of (SPRING and TART; ORNDORFF), 1890, A., 955.
action of ammonia on (WAAGE), 1883, A., 39; 1884, A., 172.
action of, on alcohols (NEWBURY and BARNUM), 1891, A., 284.
condensation of, with aniline (V. MILLER and PLÖCHL), 1892, A., 1191.
action of glycol on (LOCHERT), 1888, A., 671.
condensation of, with succinic acid (FITTIG and DELISLE), 1890, A., 587.
action of zinc and ethylic chloracetate on (REFORMATSKY), 1892, A., 1300.
action of aniline on a mixture of acetaldehyde and (ROHDE), 1887, A., 974.
action of aniline on a mixture of methylal and (V. MILLER and KINKELIN), 1887, A., 975.
and propaldehyde-ammonia, pyridine derivatives from (DÜRKOPF and GÖTTSCH), 1890, A., 794, 1002.
Propaldehyde, β-bromo- (LEDERER), 1891, A., 37.
2:2-*di*bromo- (ETARD), 1892, A., 809.
2:2:3-*tri*bromo- (NIEMILOWICZ), 1890, A., 861.
2:2-*di*chloro- (SPRING and TART), 1890, A., 955.
Metapropaldehyde (ORNDORFF), 1890, A., 955.
Parapropaldehydes (ORNDORFF), 1890, A., 955; (REFORMATSKY), 1892, A., 1300.
Propaldehydeaniline (V. MILLER and PLÖCHL), 1892, A., 1191.
Propane, preparation of (FRANKLAND), 1885, T., 238,
Propane, illuminating power of (FRANKLAND), 1885, T., 235; P., 31.
and oxygen, explosion of, under diminished pressure (MEYER and SEUBERT), 1884, T., 584, 592.
derivatives (WINSSINGER), 1888, A., 243.
hydrate (VILLARD), 1890, A., 1386.
Propane, bromo-. See Propylic bromide.
*di*bromo-. See Propylenic bromide.
1:2:3-*tri*bromo-. See Tribromhydrin.
1:2:2:3-*tetra*bromo- (*isoallylene tetrabromide*) (GUSTAVSON and DEMJANOFF), 1889, A., 30.
*tri*bromonitro- (ASKENASY and MEYER), 1892, A., 1064.
*tetra*bromo-1:3-*di*nitro- (KEPPLER and MEYER), 1892, A., 1062.
tri- and *tetra*-chloro- (SPRING and WINSSINGER), 1883, A., 659.
1:2:3-*tri*chloro-. See Trichlorhydrin.
s-*hexa*chloro- (LEVY and CURCHOD), 1889, A., 1136.
1-nitro-, magnetic rotatory power of (PERKIN), 1889, T., 688, 727.
action of alcoholic potash on (SOKOLOFF), 1889, A., 365.
action of alkalis on (DUNSTAN and DYMOND), 1891, T., 431.
action of zinc ethyl on (BEWAD), 1889, A., 1127.
*iso*nitro-, action of alkalis on (SOKOLOFF), 1889, A., 365.
action of methylic iodide and chloroform on (KISSEL), 1892, A., 1290.
action of zinc ethyl on (BEWAD), 1889, A., 1127.
1:3-*di*nitro-, and its sodium derivative (KEPPLER and MEYER), 1892, A., 1061, 1415.
2:2-*di*nitro- (BREDT), 1883, A., 176.
*tri*nitroso- (V. PECHMANN and WEHSARG), 1889, A., 34.
Propanebisazo-. See Azo-.
1:2-Propanedisulphonic acid and its salts (MONARI), 1885, A., 970.
1:3-Propanedisulphonic acid (*trimethylenedisulphonic acid*) and its salts (MONARI), 1885, A., 970.
Propanesulphonic acid (*propylsulphonic acid*) (WINSSINGER), 1888, A., 243.
action of chlorine on (SPRING and WINSSINGER), 1883, A., 659.
γ-amido- (LAUER), 1890, A., 1090.
chloro- (SPRING and WINSSINGER), 1883, A., 659.
β-Propanesulphonic acid, potassium salt of (STUFFER), 1891, A., 180.
Propanetetracarboxylic acid (EMERY), 1891, A., 424.

Propanetetracarboxylic acid (*isoallylenetetracarboxylic acid*) and its salts (Bischoff), 1883, A., 46.
(*dicarboxyglutaric acid; methylenedimalonic acid*) (Perkin), 1886, A., 691; (Kleber), 1888, A., 1057.
Propanetricarboxylic acid (*propenyltricarboxylic acid*) and its ethereal salts (Bischoff), 1883, A., 45.
(*carboxyglutaric acid*) (Emery), 1891, A., 547.
See also Tricarballylic acid.
Propargylamine and its derivatives (Paal and Hermann), 1890, A., 229; (Paal and Heupel), 1892, A., 30.
"**Propargylenetetracarboxylic acid**" and its ethylic salt, synthesis of (Schacherl), 1885, A., 1125.
Propargylic acid. See Propiolic acid.

constitution of (Reissert), 1888, A., 954.

Pyranilpyroinlactone (Reissert and Tiemann), 1886, A., 551; (Anschütz), 1888, A., 1092; (Reissert), 1890, A., 1102.
constitution of (Reissert), 1888, A., 695, 954.
and citraconanil, identity of (Anschütz), 1890, A., 774; 1891, A., 73.
See also Citraconic acid, phenylimide of.

Pyrargyrite (*red silver ore*) and proustite (Miers), 1891, A., 273.
from Kajénel, Transylvania (Traube), 1890, A., 1070.
decomposition of, by air containing bromine (Jannasch), 1889, A., 1243.

Pyrazine (*p-diazine; piazine*) derivatives (Mason), 1888, P., 107; 1889, T., 97; (Abenius), 1890, A., 268, 525.
hexahydride. See Piperazine.

Pyrazines, hydrogenated, of the aromatic series (Bischoff), 1889, A., 1010.

Pyrazole (Knorr and Laubmann), 1889, A., 409.
synthesis of (Balbiano), 1890, A., 1009.
bases, compounds of alloxan with (Pellizzari), 1889, A., 517; 1890, A., 645.

Pyrazole derivatives (Knorr), 1887, A., 678; (Balbiano), 1887, A., 1054; (Claisen and Roosen), 1891, A., 1106; (Knorr and Duden), 1892, A., 731.
formation of, from the dichlorhydrins and tribromhydrin (Alvisi), 1892, A., 884.
monosubstituted derivatives of, and hydrogenated compounds derived therefrom (Balbiano), 1889, A., 1215.

Pyrazolebenzoic acids, *o*- and *p*- (Balbiano), 1890, A., 799.

β-**Pyrazole-4:5-dicarboxylic acid** (Maquenne), 1890, A., 1439.

β-**Pyrazoledicarboxylic acids** (Maquenne), 1891, A., 330.

*meta***Pyrazoles** (Pinner and Lifschütz), 1887, A., 1055.

Pyrazolines (Knorr and Laubmann), 1888, A., 725.
See also Hydantoins.

Pyrazolone derivatives from ethylic benzoylacetate (Knorr and Klotz), 1887, A., 1121.
synthesis of (Lederer), 1892, A., 634.
constitution of (Nef), 1892, A., 145.

Pyrazolones (Knorr), 1887, A., 601.
nomenclature of (Lederer), 1892, A., 1004.

m-**Pyrazolones** (Pinner and Lifschütz), 1887, A., 1055; (Grimaux), 1889, A., 56.

Pyrene (Bamberger and Philip), 1886, A., 718, 948; 1887, A., 271.
constitution of (Bamberger and Philip), 1887, A., 496.
formula of (Armstrong), 1890, P., 103.
action of chlorine on (Goldschmiedt and Wegscheider), 1883, A., 1001.
ketone (Bamberger and Philip), 1886, A., 948; 1887, A., 272.
derivatives (Goldschmiedt and Wegscheider), 1883, A., 1001.
*di*amido- (Jahoda), 1888, A., 161.
cyano-, and *di*cyano- (Goldschmiedt and Wegscheider), 1883, A., 1003.

Pyrenecarboxylic acid and its salts (Goldschmiedt and Wegscheider), 1883, A., 1004.

Pyrenedisulphonic acid and its salts (Goldschmiedt and Wegscheider), 1883, A., 1001.

Pyrenepicric acid, chloro- and cyano- (Goldschmiedt and Wegscheider), 1883, A., 1001, 1004.

Pyrenequinol and its diacetyl-derivative (Goldschmiedt), 1883, A., 870.
Pyrenequinone, and its derivatives (Goldschmiedt), 1883, A., 869.
Pyrenic acid and its anhydride and imide (Bamberger and Philip), 1886, A., 718.
  constitution of (Bamberger and Philip), 1886, A., 949.
Pyrenin (Schwartz), 1888, A., 984.
Pyrenoline (Jahoda), 1888, A., 164.
Pyrethrosin (Thoms), 1892, A., 349.
Pyridanthrilic acid (Weidel and Strache), 1886, A., 950; (Weidel and Wilhelm), 1887, A., 979.
Pyridine (Hantzsch), 1883, A., 85; (Weidel and Russo), 1883, A., 483; (Oechsner de Coninck), 1883, A., 739.
  formation of, from amidoazonaphthalene (v. Buchka and Sprague), 1889, A., 728.
  Hantzsch's synthesis of (Beyer), 1891, A., 1090.
  preparation of, from piperidine (v. Hofmann), 1883, A., 813.
  conversion of anhydroecgonine into (Einhorn), 1889, A., 909.
  constitution of (Hantzsch), 1884, A., 1193; (Ruhemann), 1887, T., 409; (Ladenburg), 1890, A., 1432; (v. Pechmann and Baltzer), 1892, A., 210.
  spectrum of (Hartley), 1885, T., 711.
  magnetic rotatory power of (Perkin), 1889, T., 700, 734.
  thermochemistry of (Colson), 1890, A., 101, 1368; (Berthelot), 1890, A., 1363.
  equilibrium between other bases and (Berthelot), 1890, A., 1364.
  action of acetic chloride on (Dennstedt and Zimmermann), 1886, A., 368.
  action of chlorine on (Keiser), 1887, A., 277; (Bally), 1888, A., 964.
  action of chloromethylic alcohol on (v. Hemmelmayr), 1892, A., 504.
  action of phthalic anhydride on (Jacobsen and Reimer), 1884, A., 335.
  behaviour of, with metallic salts (Oechsner de Coninck), 1885, A., 671.
  relation between benzene and (Böttinger), 1884, A., 758.
  physiological action of (Heinz), 1891, A., 602.
  fate of, in the organism (Oechsner de Coninck), 1888, A., 514.
Pyridine alkaloids (Oechsner de Coninck), 1886, A., 476.
Pyridine bases (Oechsner de Coninck), 1883, A., 738.
  from acetone and aldehyde-ammonia (Dürkopf), 1888, A., 1313.
  from cinchonine, hydrates of (Oechsner de Coninck), 1883, A., 220.
  from coal-tar (Goldschmidt and Constam), 1884, A., 611; (Mohler), 1888, A., 727.
  preparation of (Dürkopf), 1887, A., 499.
  synthesis of (Ladenburg), 1884, A., 1195.
  action of alcoholic iodides on (Oechsner de Coninck), 1884, A., 612; (Ladenburg), 1884, A., 759.
  action of, on sulphites (Denigès), 1892, A., 1103.
  Anderson's reaction for (Oechsner de Coninck), 1884, A., 612.
  hydrated, oxidation of (Schotten), 1891, A., 722.
  phenylated (Bally), 1888, A., 65.
  of the β-series (Stoehr), 1891, A., 579; 1892, A., 628.
  betaines of (Krüger), 1890, A., 1431; 1891, A., 941, 1388.
  carboxylic acids from synthetically prepared (Michael), 1885, A., 60.
  compounds of, with acids of the acetic series (Gardner), 1890, A., 1156.
  halogen derivatives of, preparation of, from pyridinecarboxylic acids (Pfeiffer), 1887, A., 844.
  platinochlorides of, action of boiling water on (Oechsner de Coninck), 1884, A., 612.
  reaction for (v. Hofmann), 1884, A., 1438.
  detection of (Weppen and Lüders), 1888, A., 1136.
  titration of (Schulze), 1888, A., 539.
  estimation of, in gas-liquor (Kinzel), 1890, A., 1349.
  process for preparing dye-stuffs from (Jacobsen), 1884, A., 798.
Pyridine compounds (anon.), 1884, A., 944.
  with copper oxalate (Seubert and Rauter), 1892, A., 1431.
  with mercury salts (Groos), 1890, A., 643.
  with metallic salts (Lang), 1888, A., 850; (Varet), 1891, A., 732, 838.

- **Pyridine derivatives** (Böttinger), 1884, A., 758; (Fischer and Renouf), 1884, A., 1048; (Koenigs and Geigy), 1884, A., 1195, 1368; (Weidel and Blau), 1886, A., 76.
  - and their relations to quinoline, *iso*quinoline and the alkaloids (Edinger), 1890, A., 794.
  - from anilidopyrotartaric acid (Reissert), 1890, A., 642.
  - from brucine, constitution of (Oechsner de Coninck), 1885, A., 273.
  - from coumalinic acid, constitution of (v. Pechmann), 1885, A., 558.
  - formation of, from malic acid (v. Pechmann and Welsh), 1885, T., 145; P., 5.
  - from *m*-nitrobenzaldehyde (Lepetit), 1887, A., 1053.
  - from propaldehyde and propaldehyde-ammonia (Dürkopf and Göttsch), 1890, A., 794, 1002.
  - conversion of pentamethylene derivatives into (Hantzsch), 1890, A., 129.
  - conversion of pyrroline into (Ciamician), 1887, A., 678.
  - formation of (v. Pechmann and Welsh), 1885, A., 174.
  - synthesis of (v. Pechmann), 1885, A., 175; (Stokes and v. Pechmann), 1887, A., 155; (Paal and Strasser), 1888, A., 62.
  - synthesis of, from ethylic acetoacetate, aldehydes and ammonia (Hantzsch), 1883, A., 82; (Michael), 1885, A., 1244.
  - synthesis of, from derivatives of α-pyrone (Guthzeit and Dressel), 1891, A., 939.
  - preparation of, from citric acid (Ruhemann), 1887, T., 403; P., 44.
  - preparation of, from the lactone of triacetic acid (Collie and Myers), 1892, T., 721; P., 131.
  - synthetical (Jaeckle), 1888, A., 1103.
  - synthetical, constitution of (Hantzsch), 1885, A., 1078.
  - hydrogenised, physiological action of (Hoffmann and Koenigs), 1883, A., 1145.
  - condensation of (Böttinger), 1884, A., 758.
  - hydroxylation of (Messinger), 1886, A., 368.
  - decomposition-products of (Hantzsch), 1885, A., 397.
- **Pyridine**, benzyl derivatives of (Lellmann and Pekrun), 1891, A., 88.

Pyrotartrylfluorescein (HJELT), 1884, A., 1019.
ψ-**Pyroterebic acid.** See Hexenoic acid.
Pyro*di***thiomolybdates** (KRÜSS), 1884, A., 1268.
Pyrotritaric acid (*pyrotritartaric acid; uvic acid; dimethylfurfurancarboxylic acid*) (PAAL), 1885, A., 249.
 preparation of (FITTIG and PARKER), 1892, A., 814.
 constitution of (PAAL), 1887, A., 657.
 action of bromine on (BÖTTINGER), 1884, A., 993.
 barium salt of (FEIST), 1889, A., 593.
 barium and calcium salts of, water of crystallisation of (BÖTTINGER), 1888, A., 1274.
 ketone obtained from (PAAL), 1885, A., 249.
 bromo- and chloro-derivatives of (DIETRICH and PAAL), 1887, A., 658.
Pyroxene. See Augite.
Pyroxenite from S. Vicente, analysis of (DOELTER), 1883, A., 722.
Pyroxenites of Morbihan (BARROIS), 1889, A., 109.
Pyroxylin, rotatory power of (BÉCHAMP), 1885, A., 237.
Pyroxylin. See also Guncotton and Cellulose under Carbohydrates.
Pyrrhoarsenite (HÖGBOM), 1889, A., 217; (IGELSTRÖM), 1888, A., 565; 1889, A., 218.
Pyrrhotite (*magnetic pyrites*), synthesis of (DOELTER), 1888, A., 430.
 analyses of (BODEWIG), 1883, A., 1061.
 See also Ferroso ferric sulphide under Iron.
Pyrrodiazole and **pyrrodiazolecarboxylic acid** (ANDREOCCI), 1892, A., 636.
 See also Triazole.
Pyrrole (*pyrrhol*). See Pyrroline.
Pyrrolidine (*tetrahydropyrroline*) (CIAMICIAN and MAGNAGHI), 1885, A., 1243; (LADENBURG), 1887, A., 499; (PETERSEN), 1888, A., 498.
 synthesis of (GABRIEL), 1892, A., 131.
α-**Pyrrolidone** (GABRIEL), 1890, A., 360.
 derivatives of (KÜHLING), 1889, A., 1211.
  preparation and properties of (KÜHLING), 1890, A., 793.
Pyrroline (*pyrrole; pyrrhol*), extraction of, from animal oil (CIAMICIAN and DENNSTEDT), 1887, A., 59.
 from coal-gas (WILLIAMS), 1885, A., 369.
 conversion of furfuran into (CANZONERI and OLIVERI), 1887, A., 470.
 synthesis of, from succinimide (CIAMICIAN and SILBER), 1887, A., 273.
 constitution of (CIAMICIAN), 1886, A., 626; 1887, A., 273; (BAMBERGER), 1891, A., 1090.
 action of paracetaldehyde on (DENNSTEDT and ZIMMERMANN), 1886, A., 1043.
 action of acetone on (DENNSTEDT and ZIMMERMANN), 1887, A., 598, 1052; (DENNSTEDT), 1890, A., 999.
 condensation of, with acetone (V. BAEYER), 1886, A., 1043.
 action of alkaline hypochlorites and hypobromites on (CIAMICIAN and SILBER), 1884, A., 1367.
 action of alloxan on (CIAMICIAN and MAGNAGHI), 1886, A., 367; (CIAMICIAN and SILBER), 1886, A., 897.
 action of halogens on, in presence of caustic alkalis (CIAMICIAN and SILBER), 1885, A., 1077.

Pyrroline (*pyrrole; pyrrhol*), action of hydroxylamine on (Ciamician and Dennstedt), 1885, A., 246; (Ciamician and Zanetti), 1889, A., 1208.
  action of methylic alcohol on (Dennstedt), 1891, A., 1501.
  action of nascent hydrogen on (Ciamician and Dennstedt), 1883, A., 82, 1142.
  action of organic anhydrides on (Ciamician and Dennstedt), 1884, A., 289, 1044; 1885, A., 378.
  boiling, action of potash on (Ciamician and Dennstedt), 1886, A., 367.
  action of propionic anhydride on (Dennstedt and Zimmermann), 1887, A., 844.
  and carbazole, similar reactions of (Hooker), 1889, A., 260.
  and its derivatives, behaviour of, as regards Raoult's law (Magnanini), 1889, A., 901.
  conversion of, into its homologues (Dennstedt), 1890, A., 1428.
  conversion of, into pyridine (Dennstedt and Zimmermann), 1886, A., 367; (Ciamician), 1886, A., 810.
  conversion of, into pyridine derivatives (Ciamician), 1887, A., 678.
  conversion of, into tetramethylenediamine (Ciamician and Zanetti), 1889, A., 1208; (Ciamician), 1890, A., 1242.
  furfuryl and thiophen groupings, reciprocal transformation of (Canzoneri and Oliveri), 1885, A., 1144.
  bases derived from (Ciamician and Magnaghi), 1885, A., 1242.
  bases formed by the action of hydrochloric acid on (Dennstedt and Zimmermann), 1888, A., 849.
  bases, synthesis of (Dennstedt and Zimmermann), 1887, A., 598.
  colouring matters (Ciamician and Silber), 1884, A., 740; (Meyer and Stadler), 1884, A., 1045.
Pyrroline derivatives (Paal and Braikoff), 1890, A., 263.
  from anilidopyrotartaric acid (Reissert), 1890, A., 642.
  method of formation of (Hantzsch), 1890, A., 1155.
  formation of, from acetophenoneacetone (Erlenmeyer), 1885, A., 753.
Pyrroline derivatives, synthesis of (Knorr), 1884, A., 1368; (Paal), 1885, A., 516, 1205; (Lederer and Paal), 1886, A., 75; (Paal and Schneider), 1887, A., 273.
  constitution of (Ciamician and Silber), 1888, A., 61.
  molecular weight of (Magnanini), 1890, A., 906.
  action of hydroxylamine on (Ciamician and Zanetti), 1890, A., 264, 1155; 1891, A., 1502.
  action of methylic iodide on (Ciamician and Anderlini), 1889, A., 58.
  conversion of, into indole derivatives (Dennstedt), 1889, A., 400.
  conversion of, into pyridine derivatives (Ciamician and Silber), 1887, A., 378.
  potassium-derivative of (Ciamician and Dennstedt), 1886, A., 367.
    action of carbonyl chloride on (Ciamician and Magnaghi), 1885, A., 809.
    action of cyanogen chloride on (Ciamician and Dennstedt), 1883, A., 599.
    action of ethylic and propylic iodides on (Zanetti), 1890, A., 907.
  tertiary (de Varda), 1890, A., 389; (Zanetti), 1890, A., 1430.
Pyrroline, homologues of, direct synthesis of (Ciamician and Zanetti), 1889, A., 727.
    determination of the constitution of (Zanetti), 1892, A., 74.
Pyrroline, *tetra*chloro-, and its synthesis (Ciamician and Silber), 1884, A., 292, 293.
  *tetr*iodo- (*iodole*) (Ciamician and Dennstedt), 1883, A., 350; (Ciamician), 1887, A., 597.
    molecular weight of (Magnanini), 1890, A., 906.
  *di*nitro- (Ciamician and Silber), 1885, A., 993; 1886, A., 718.
Pyrrolineazo-. See Azo-.
Pyrrolinecarbamide (*tetrolcarbamide*) (Ciamician and Dennstedt), 1883, A., 350; (Ciamician and Magnaghi), 1885, A., 809.
Pyrroline-α-carboxylic acid (*α-carbopyrrolic acid*) and its derivatives (Ciamician and Silber), 1884, A., 1044; 1885, A., 246.
  method for the formation of, from pyrroline (Ciamician and Silber), 1884, A., 1193.

Pyrroline-α-carboxylic acid (*α-carbopyrrolic acid*), molecular weight of (Magnanini), 1890, A., 906.
  dehydration of (Ciamician and Silber), 1884, A., 585.
  α- and β-nitro- (Anderlini), 1890, A., 66.

Pyrrolinedicarboxylic acid (Ciamician and Silber), 1886, A., 719.

Pyrroline-group (Meyer), 1884, A., 586.

Pyrrolinehydrophthalide (Dennstedt and Zimmermann), 1888, A., 849.

Pyrrolinehydroxylamine, preparation of (Ciamician and Dennstedt), 1885, A., 246; (Ciamician and Zanetti), 1889, A., 1208.

Pyrrolineketonedicarboxylic acid (*carbopyrrylglyoxylic acid*) (Ciamician and Silber), 1886, A., 719, 938.

Pyrrolinephthalide (Ciamician and Dennstedt), 1885, A., 379.
  *di*bromo- and nitro- (Anderlini), 1889, A., 58.

Pyrroline-series, determination of position in the (Ciamician and Silber), 1887, A., 597.
  compounds of the (Ciamician and Dennstedt), 1883, A., 350.
  decomposition-products of the (Hantzsch), 1884, A., 1045.

Pyrrolineurethane (*tetrolurethane*) (Ciamician and Dennstedt), 1883, A., 350.

Pyrrolylene. See Butinene.

Pyrrone (*dipyrryl ketone*) (Ciamician and Magnaghi), 1885, A., 809.

Pyrroylpyrroline (Ciamician and Magnaghi), 1885, A., 1143.

Pyrroylpyruvic anhydride (Angeli), 1890, A., 1156.
  action of *o*-phenylenediamine on (Angeli), 1890, A., 1243.

Pyrryl methyl ketone (*ψ-acetylpyrroline*) (Ciamician and Dennstedt), 1884, A., 289, 1044; 1885, A., 378.
  action of bromine on (Ciamician and Dennstedt), 1884, A., 291.
  action of ethylic oxalate on (Angeli), 1890, A., 1156, 1243.
  action of nitric acid on (Ciamician and Silber), 1885, A., 810, 992.

Pyrryl methyl pinacone (Dennstedt and Zimmermann), 1886, A., 1042.

Pyrryl phenyl ketone. See Phenyl pyrryl ketone.

Pyrrylalloxan (Ciamician and Magnaghi), 1886, A., 367; (Ciamician and Silber), 1886, A., 897.

Pyrrylene dimethyl diketone (*di-ψ-acetylpyrroline*) (Ciamician and Dennstedt), 1885, A., 378; (Ciamician and Silber), 1885, A., 808, 993; 1886, A., 74.
  nitro- (Ciamician and Silber), 1885, A., 993; 1886, A., 718.

Pyrrylmethylketonesulphonic acid (Ciamician and Silber), 1885, A., 810.

Pyruvacetic acid, mono- and *di*-thio- (Bongartz), 1886, A., 938.

Pyruvaldehydephenylhydrazone (*benzeneazoacetone; pyruvaldehydrazone*) (v. Richter and Münzer), 1884, A., 1342.
  introduction of monad radicles into (Japp and Klingemann), 1888, T., 525.
  action of phenylhydrazine on (Japp and Klingemann), 1888, T., 531.
  o-nitro- (Bamberger), 1885, A., 157.

Pyruvic acid (*pyroracemic acid*), magnetic rotation of (Perkin), 1892, T., 807, 836.
  condensation of, with ethylic acetoacetate (Dietzel), 1889, A. 593.
  condensation of, with sodium succinate (Fittig and Parker), 1889, A., 1146; 1890, A., 1102; 1892, A., 814.
  chlorination of (Seissl), 1889, A., 489.
  pyrogenic decomposition of (Hanriot), 1886, A., 224.
  compound of, with hippuric acid (Hoffmann), 1887, A., 44.
  condensation-products of (Böttinger), 1885, A., 758.
  derivatives of (Baumann), 1885, A., 513; (Gerson), 1887, A., 260.
  hydrazines of (Fischer and Jourdan), 1884, A., 52.
  indogenide of (v. Baeyer), 1884, A., 76.
  formation of uvitonic acid from (Böttinger), 1884, A., 759.
  phenylhydrazone of (Fischer and Jourdan), 1884, A., 52; (Fischer), 1884, A., 1151.
    action of heat on (Japp and Klingemann), 1888, T., 541.
    ethyl derivative of (Fischer and Jourdan), 1884, A., 52.
  phenylmethylhydrazone of (Fischer and Jourdan), 1884, A., 53.
  quinolylhydrazone of (Dufton), 1892, T., 786.

Pyruvic acid, *di*bromo-, action of hydroxylamine on (Söderbaum), 1892, A., 815.
  compounds of, with hydrazines (Nastvogel), 1889, A., 237.

Pyruvic acid, chloro-, phenylhydrazone of (PERATONER and STRAZZERI), 1891, A., 1333.
o-chloro-, phenylhydrazone (HEWITT), 1891, T., 210.
*di*chloro-, and *di*chlorobromo- (HANTZSCH), 1890, A., 132.
p-nitro-, phenylhydrazone (FISCHER and ACH), 1890, A., 41.
thio-, phenylhydrazone (RUHL), 1892, A., 1326.
Pyruvic anilide and its hydrazone and imidochloride (NEF), 1892, A., 1440.
toluidide (NEF), 1892, A., 1441.
Pyruvin (ERHART), 1885, A., 1201; (DE CLERMONT and CHAUTARD), 1888, A., 45.
Pyruvinureide, *di*bromo- (FISCHER), 1887, A., 918.
Pyruvyl benzoate, and the action of benzoic anhydride on (VAN ROMBURGH), 1883, A., 63.
Pyruvylglyoxylic acid (*diacetylglyoxylic acid*), *tri*chloro- (HANTZSCH), 1888, A., 1192.
*tetra*chloro- (HANTZSCH), 1890, A., 132.
Pyvuramide, *di*bromo- (FISCHER), 1887, A., 918.
Pyvurin, *tri*bromo- (FISCHER), 1887, A., 918.

Q.

Qualitative and **quantitative analysis.** See Analysis.
Quartz (KUNZ), 1892, A., 1055.
from Arizona (KUNZ), 1888, A., 346.
from Burke, N. Carolina (VOM RATH), 1886, A., 27.
fibrous, from the Cape (RENARD and KLEMENT), 1886, A., 603.
blue, from Nelson Co., Virginia (ROBERTSON), 1885, A., 129.
artificial production of (V. CHRUSTSCHOFF), 1887, A., 559.
synthesis of (BRUHNS), 1890, A., 112.
velocity of light in (EXNER), 1886, A., 653.
circular polarisation of (SORET and SARASIN), 1883, A., 140.
variation of the indices of refraction of water and, with the temperature (DUFET), 1883, A., 762.
pyroelectricity of (HANKEL), 1883, A., 412, 950; 1885, A., 1187; (FRIEDEL and CURIE), 1883, A., 897.
expansion of (LE CHATELIER), 1890, A., 1372.
alteration of, into talc (WEINSCHENK), 1888, A., 1259.
Quartz, crystals with basal plane (HIDDEN and DES CLOIZEAUX), 1887, A., 119.
Babel, association of, with fluorspar (GONNARD), 1888, A., 561.
pseudomorphs after spodumene (KUNZ), 1889, A., 24.
pseudomorphous, after stibnite (GENTH), 1891, A., 155.
estimation of, in siliceous rocks and soils (HAZARD), 1884, A., 872.
Quartz conglomerate from Witwatersrand, Transvaal (HOLLAND), 1888, A., 568.
Quartz-felsites from the Cheviot district (TEALL), 1886, A., 520.
Quartz-mica-diorite, analysis of (TELLER and JOHN), 1883, A., 1069.
Quartz-porphyry near Tryberg in the Black Forest (WILLIAMS), 1883, A., 724.
Quartz-rock (SCHUBERT), 1883, A., 36.
Quartz-trachyte covered with a deposit from the Echinus Geyser, pebble of (BEAM), 1884, A., 28.
Quartzine (MICHEL-LÉVY and MUNIER-CHALMAS), 1890, A., 712.
Quartzite (HOLLAND), 1887, A., 451.
Dumont's (RENARD), 1883, A., 958.
sand and kaolin from (DANA), 1885, A., 360.
Quassia amara, constituents of (MASSUTE), 1890, A., 791.
Quassic acid (OLIVERI and DENARO), 1884, A., 1193; (OLIVERI), 1888, A., 1312.
dioxime of (OLIVERI), 1888, A., 1312.
Quasside (OLIVERI and DENARO), 1884, A., 1192; 1885, A., 907.
Quassin (OLIVERI and DENARO), 1884, A., 1192; 1885, A., 907; (MASSUTE), 1890, A., 792.
constitution of (OLIVERI and DENARO), 1884, A., 1192; (OLIVERI), 1888, A., 1311; 1889, A., 278.
preparation of (ADRIAN and MOREAUX), 1884, A., 908.
derivatives of (OLIVERI and DENARO), 1885, A., 907.
Quebrachisulphuric acid (TANRET), 1890, A., 226.
Quebrachite (TANRET), 1890, A., 226.
Quebracho, sugar from (TANRET), 1890, A., 226.
wood, red, and its analysis (COUNCLER), 1885, A., 948.
Quercetin and its derivatives (HERZIG), 1884, A., 846; 1886, A., 251; 1888, A., 1309; 1890, A., 64; 1891, A., 1386; (LIEBERMANN), 1884, A., 1365; 1886, A., 366.

Quercetin, molecular weight of (HERZIG), 1888, A., 1309.
Quercetyl phenylcarbamate (TESMER), 1886, A., 50.
Quercin, a new carbohydrate from acorns (VINCENT and DELACHANAL), 1887, A., 909.
  crystalline form of (FRIEDEL), 1887, A., 1026.
Quercitannic acid (ETTI), 1883, A., 995. See also Tannic acid.
Quercitol (KILIANI and SCHEIBLER), 1889, A., 581.
  constitution of (KANONNIKOFF), 1886, A., 335.
  heats of combustion and formation of (BERTHELOT and RECOURA), 1887, A., 1011.
  thermochemistry of (STOHMANN and LANGBEIN), 1892, A., 764.
Quercitrin, in Virginia creeper (*Cissus qinquefolia*) (PHIPSON), 1885, A., 1255.
  and rutin, supposed identity of (SCHUNCK), 1888, T., 262; P., 12.
Quercus rubra, analyses of white and green leaves of (CHURCH), 1886, T., 839; P., 236.
Quercyl pentaphenylcarbamate (TESMER), 1886, A., 49.
Querlactone (BÖTTINGER), 1891, A., 1062.
Quicksilver. See Mercury.
Quillajic acid (KOBERT), 1889, A., 55.
Quina morada, constituents of the bark of (ARATA and CANZONERI), 1890, A., 404.
Quinaldine. See 2′-Methylquinoline.
Quinaldinic acid. See Quinoline-2′-carboxylic acid.
Quinalizarin. See 1:2:1′:4′-Tetrahydroxyanthraquinone.
Quinamyline (GRIMAUX and ARNAUD), 1892, A., 1253.
Quinanisoil. See Methoxyquinoline.
Quinazole. See Methylindazine.
Quinazoline, derivatives of, synthesis of (PAAL and BUSCH), 1890, A., 71.
  βδ-*di*chloro- (ABT), 1889, A., 610.
Quinazolines (WEDDIGE; KÖRNER), 1887, A., 1044; (GABRIEL and JANSEN), 1890, A., 1442; 1892, A., 217; (PAAL and BODEWIG), 1891, A., 943.
  thio-, new synthesis of (BUSCH), 1892, A., 1495.
Quince-juice, a sugar from (BAUER), 1892, A., 128.
Quince mucus (GANS and TOLLENS), 1889, A., 541.
Quinenine (*chinine*). See Alkaloids.
*apo***Quinenine** (COMSTOCK and KOENIGS), 1885, A., 911.
Quinethyline and its derivatives (GRIMAUX and ARNAUD), 1891, A., 1518.
Quinic acid, constitution of (EIJKMAN), 1891, A., 921.
  specific rotatory and refractive powers of (KANONNIKOFF), 1889, A., 453.
  heats of combustion and formation of (BERTHELOT and RECOURA), 1887, A., 1011.
  heat of solution of (BERTHELOT), 1885, A., 1178.
  decomposition of, by dilute hydrochloric acid (CHODOUNSKÝ), 1888, A., 1298.
  acetyl-derivatives of (ERWIG and KOENIGS), 1889, A., 991.
Quinicine, oxidation of (SKRAUP and WÜRSTL), 1889, A., 1074.
Quinidine (*conquinine*). See Alkaloids.
*iso***Quinidine** (*isoconquinine*) (HESSE), 1888, A., 380.
*iso***Quinidinesulphonic acid** (*isoconquininesulphonic acid* (HESSE), 1892, A., 514.
1-Quinindole-α-carboxylic acid (DUFTON), 1891, T., 758.
4-Quinindole-α-carboxylic acid. (DUFTON), 1892, T., 787.
Quinine. See Alkaloids.
*iso***Quinine** (HESSE), 1888, A., 379; (LIPPMANN and FLEISSNER), 1892, A., 82.
*isoapo***Quinine** (LIPPMANN and FLEISSNER), 1892, A., 82.
Quinine- and *iso***quinine-sulphonic acids** (HESSE), 1892, A., 514.
Quininic acid (3-*methoxyquinoline*-4′-*carboxylic acid*) (SKRAUP), 1884, A., 86.
Quinisatic acid (*o-amidobenzoylglyoxylic acid*) and its salts (v. BAEYER and HOMOLKA), 1884, A., 79.
Quinisatin (v. BAEYER and HOMOLKA), 1884, A., 78, 1029.
ψ-Quinisatin (FRIEDLÄNDER and MÜLLER), 1887, A., 978.
Quinisatoxime. See 3′-Nitroso-4′-hydroxycarbostyril.
Quinitol (v. BAEYER), 1892, A., 833.
Quinizarin (1:4-*dihydroxyanthraquinone*) (LIEBERMANN), 1888, A., 716.
  diethyl ether. See 1:4-Diethoxyanthraquinone.
  ethyl ether. See Hydroxyethoxyanthraquinone.
Quinizine. See Phenylpyrazolone.
Quinoidine, oxidation of (STRACHE), 1890, A., 179.

- **Quinol** (*benzoquinol; 1:4-dihydroxybenzene; hydroquinone*) (Baessler), 1887, A., 364.
  - formation of (Ciamician), 1886, A., 695.
  - preparation of (Nietzki), 1883, A., 465; 1886, A., 790; (Seyda), 1883, A., 1115.
  - absorption spectra of (Hartley), 1888, T., 654.
  - thermochemistry of (Stohmann and Langbein), 1892, A., 764.
  - heat of combustion of (Berthelot and Luginin), 1887, A., 762.
  - action of aniline on (Calm), 1884, A., 591.
  - action of phosphorus *penta*chloride on (Scheid), 1884, A., 429.
  - action of *o*-toluidine on (Philip), 1886, A., 941.
  - fusion of, with soda (Barth and Schreder), 1883, A., 60; 1885, A., 520.
  - physiological action of (Gibbs and Hare), 1890, A., 1019.
  - benzenesulphonate of (Georgescu), 1891, A., 569.
  - compounds of, with amines (Hebebrand), 1883, A., 60.
  - compound of, with phenylhydrazine (Seyewitz), 1892, A., 49.
  - derivatives (Baessler), 1887, A., 364.
  - derivatives of the benzene series (de Clermont and Chautard), 1886, A., 696.
  - mixed ethers of (Fiala), 1884, A., 1138.
  - phenylcarbamate (Snape), 1885, T., 772.
  - sodium compounds of (de Forcrand), 1892, A., 1184, 1185.
- **Quinol**, amido-, dimethyl ether (Baessler), 1884, A., 1329; 1887, A., 364.
  - 2:3-*di*amido-, hydrochloride, and its derivatives (Nietzki and Preusser), 1886, A., 1024.
  - 2:5-*di*amido- (Nietzki and Schmidt), 1889, A., 968.
    - diethyl ether of. See Diethoxyphenylenediamine.
  - *tri*amido-, sulphate (Nietzki and Schmidt), 1889, A., 968.
  - bromo-, dimethyl ether (Nölting and Werner), 1891, A., 209.
  - 2:6-*di*bromo- (Ling), 1892, T., 562.
  - chloro- (Scheid), 1884, A., 429.
  - 2:5-*di*chloro- (Kehrmann and Tiesler), 1890, A., 242.
- **Quinol**, 2:3:5-*tri*chloro-, and *tetra*chloro-, compounds of, with aniline (Niemeyer), 1885, A., 1065.
  - *tetra*chloro- (Sutkowski), 1887, A., 42.
  - 2:3:6-chlor*di*amido-, hydrochloride of (Kehrmann and Tiesler), 1890, A., 243.
  - 2:6-chlorobromo- (Ling), 1892, T., 562.
  - chloro*tri*bromo- (Ling), 1887, T., 784; (Ling and Baker), 1892, T., 592.
  - 2:5- and 2:6-*di*chlorobromo- (Ling), 1892, T., 565, 578.
  - 2:5-*di*chloro-3:6-*di*bromo-, and its diacetyl derivative (Levy), 1885, A., 1210; (Ling), 1892, T., 578.
    - crystalline form of (Leiveh), 1886, A., 543.
  - *tri*chlorobromo- (Ling and Baker), 1892, T., 593.
  - chlor*di*imido- (Kehrmann and Tiesler), 1890, A., 242.
  - 2:6-*di*iodo- (Metzeler), 1888, A., 1278.
  - 2:5-*di*nitro- (Nietzki), 1883, A., 465.
    - constitution of (Nietzki and Preusser), 1887, A., 574.
  - *tri*nitro-, derivatives of (Nietzki and Kaufmann), 1892, A., 314.
  - 3:2:5-nitr*di*imido- (Nietzki and Schmidt), 1889, A., 968.
  - thio-, and ethylxanthate of (Leuckart), 1890, A., 603.
- **Quinol-*p*-azodiphenylsulphonic acid,** sodium salt of (Carnelley and Schleselmann), 1886, T., 382.
- **Quinoldiammonium** (Curtius and Thun), 1891, A., 1360.
- **Quinoldicarboxylic acid.** See 3:6-Dihydroxyterephthalic acid.
- **Quinoldisulphonic acid** and its salts (Seyda), 1883, A., 1115.
  - *di*bromo- (Graebe and Weltner), 1891, A., 1029.
- **Quinoleic acid** (*pyridine-2:3-dicarboxylic acid*). See Quinolinic acid.
- **Quinolepidine,** synthesis of (Beyer), 1885, A., 1246.
- **Quinolformic acid** and **anhydride** (Mylius), 1886, A., 706.
- **Quinolglycuronic acid** (Külz), 1890, A., 1286.
- **Quinolhydrocyanic acid** (Mylius), 1886, A., 706.
- **Quinolic acid** (Hoffmann and Koenigs), 1883, A., 1145.
- **Quinoline** (*leucoline*) (Oechsner de Coninck), 1883, A., 739; (anon.), 1884, A., 756; (Abt), 1889, A., 1214.

Quinoline (*leucoline*) from cinchonine (Oechsner de Coninck), 1883, A., 88.
- ring formation (Marckwald), 1890, A., 1004.
- synthesis of (Bornemann), 1886, A., 1045.
- constitution of (Knorr and Antrick), 1885, A., 273.
- spectrum of (Hartley), 1885, T., 722.
- vapour-pressures of (Young), 1889, T., 483; P., 104.
- action of chloroform and iodoform on (Rhoussopoulos), 1883, A., 600.
- action of, on copper sulphate (Borsbach), 1890, A., 796.
- action of ethylic chloracetate on (Rhoussopoulos), 1883, A., 96.
- action of ethylic chlorocarbonate on (v. Meyer), 1885, A., 140.
- action of haloid ethereal salts on (Claus and Stegelitz), 1884, A., 1050.
- action of halogens on the halogen-alkyl-derivatives of (Claus), 1885, A., 908.
- action of hypochlorous acid on (Einhorn and Lauch), 1888, A., 501.
- and substituted quinolines, products of the action of hypochlorous acid on (Erlenmeyer and Rosenhek), 1886, A., 559.
- action of iodine chloride and of phosgene gas on (Ostermayer), 1885, A., 672.
- action of phthalic anhydride on (Traub), 1883, A., 667; (Jacobsen and Reimer), 1883, A., 812, 922.
- reactions of (Weidel), 1887, A., 847.
- oxidation of (v. Miller), 1891, A., 1095.
- reduction of (Bamberger), 1890, A., 1302.
- reduction products of (Bamberger and Lengfeld), 1890, A., 1318.
- nitration of (Dufton), 1892, T., 782.
- sulphonation of (v. Georgievics), 1888, A., 296; (Fulda), 1891, A., 391.
- coal-tar, method of recognising (Traub and Schärges), 1885, A., 173.
  - and from the cinchona alkaloids and its oxidation by potassium *per*manganate (Hoogewerff and van Dorp), 1883, A., 89.
  - dyes obtained by the action of phthalic anhydride on (Jacobsen and Reimer), 1883, A., 922.
- physiological action of (Heinz), 1891, A., 602.

Quinoline-bases, formation of (Lellmann and Lippert), 1891, A., 1509.
- colouring matters derived from (Spalteholz), 1883, A., 1150; 1885, A., 400; (Oechsner de Coninck), 1886, A., 82.
- process for preparing dye-stuffs from (Jacobsen), 1884, A., 798, 944.
- methochlorides of (Ostermayer), 1885, A., 813.

Quinoline-derivatives (Skraup), 1883, A., 92; (Rhoussopoulos), 1883, A., 96; (Oechsner de Coninck), 1883, A., 738; (anon.), 1884, A., 756, 944; (Fischer and Renouf), 1884, A., 1048; (v. Miller and Kinkelin), 1886, A., 560; (Rügheimer and Schramm), 1887, A., 738; (Weidel and Bamberger), 1888, A., 966.
- formation of, from meta-substituted amines (Meyer), 1886, A., 161.
- from meta-substituted amines, constitution of (Gattermann and Kaiser), 1886, A., 79.
- from β-diketones (Beyer), 1887, A., 849.
- from ethylic *o*-nitrobenzoylmalonate (Bischoff), 1889, A., 519.
- from isatinic acid (Pfitzinger), 1886, A., 370; 1889, A., 412.
- formation of, by the action of phosphoric chloride on the malonates of primary aromatic bases (Rügheimer), 1886, A., 161.
- synthesis of (Rügheimer), 1884, A., 1050; (Knorr), 1884, A., 1198; 1887, A., 847.
- synthesis of, by means of alkylic acetoacetates (Conrad and Limpach), 1887, A., 679; 1892, A., 78.
- constitution of (Skraup and Brunner), 1886, A., 810; (Freydl), 1888, A., 296.
- appearance of colour in (Armstrong), 1892, T., 789; P., 143.
- action of hypochlorous acid on (Einhorn and Lauch), 1886, A., 370; 1888, A., 501.
- oxidation of (v. Miller), 1891, A., 1094; (v. Georgievics), 1891, A., 1389.
- regularities in the oxidation of (v. Miller), 1890, A., 1324.
- reduction of (Bamberger), 1889, A., 518.
- methiodides of (Decker), 1891, A., 1247.

Quinoline, additive-products of (Claus and Tosse), 1883, A., 1008.

Quinoline, alkyl haloids, action of alkalis on (Decker), 1891, A., 736; 1892, A., 879.
alkyl hydroxides (Decker), 1892, A., 880.
alkylammonium hydroxides, oxidation of (Decker), 1891, A., 736.
ammonium bases derived from (Bernthsen), 1884, A., 1357; 1885, A., 814; (Bernthsen and Hess), 1885, A., 558.
amylic bromide (Claus and Tosse), 1883, A., 1009.
arsenious bromide (Landau), 1889, A., 211.
benzylic chloride, and its oxidation (Claus and Glyckherr), 1883, A., 1009.
carbonylchloroplatinite hydrochloride (Mylius and Foerster), 1891, A., 1163.
cerium nitrate (Williams), 1889, A., 281.
chloriodide (Dittmar), 1886, A., 158; (Pictet and Krafft), 1892, A., 1357.
ethiodide, oxidation of (Decker), 1892, A., 730.
ethobromide (Claus and Tosse), 1883, A., 1008.
action of nascent hydrogen on (Claus and Stegelitz), 1884, A., 1051.
ethochloride (Claus and Tosse), 1883, A., 1009.
ethonitrate (Claus and Tosse), 1883, A., 1009.
homologue of (Beyer), 1885, A., 672.
transformation of homologues of indole into (Magnanini), 1887, A., 1113.
hydrogen diaminechromium thiocyanate (Christensen), 1892, A., 1001.
iodides (La Coste), 1885, A., 814.
second *per*iodide of (Dafert), 1883, A., 980.
methylated derivatives of, condensation-products of (Jacobsen and Reimer), 1884, A., 335.
methyl hydroxide, oxidation of (Decker), 1892, A., 729.
methylpicrate (Ostermayer), 1885, A., 672.
propiobromide and its *di*bromide, *di*iodide, *di*chloride, and *tetr*iodide (Claus and Collischonn), 1887, A., 60.
propiochloride and its *di*bromide, *di*chloride and *di*iodide (Claus and Collischonn), 1887, A., 61.
Quinoline, propiodide and its *di*bromide, *di*chloride, *di*iodide, *tetra*bromide, *tetra*chloride and *tetr*iodide (Claus and Collischonn), 1887, A., 61.
double salts of (Borsbach), 1890, A., 643.
silicon chloride (Harden), 1887, T., 47.
substitution derivatives of (Friedländer and Weinberg), 1883, A., 351.
substitution derivatives of, preparation of (Friedländer and Göhring), 1883, A., 1148.
substitution derivatives of, synthesis of (Buddeberg), 1890, A., 1142.
substitution derivatives of, reduction of (Bamberger), 1890, A., 1302.
existence of two series of 4-substituted derivatives of (Lellmann), 1887, A., 973.
Quinoline, 2-amido- (Freydl), 1888, A., 296.
4-amido- (Dufton), 1892, T., 785.
2′-amido-, preparation of (Ephraim), 1891, A., 1509.
3′-amido- (Riemerschmied), 1883, A., 1148.
4′-amido- (Hoogewerff and van Dorp), 1892, A., 725.
α- and β-*di*amido- (Claus and Kramer), 1885, A., 908.
bromo-, action of hypochlorous acid on (Welter), 1891, A., 1248.
1-bromo-, and its derivatives (Claus and Tornier), 1888, A., 163.
2-bromo-, and its derivatives (Claus and Tornier), 1888, A., 164; (Claus and Vis), 1889, A., 280; 1890, A., 173.
3-bromo-, and its derivatives (Claus and Tornier), 1888, A., 163.
4-bromo-, and its derivatives (Claus and Tornier), 1888, A., 164; (Claus and Vis), 1890, A., 173.
2′-bromo- (Claus and Pollitz), 1890, A., 521.
4′-bromo-, and its derivatives (Claus and Collischonn), 1887, A., 158; (Claus and Tornier), 1888, A., 163; (Claus and Decker), 1889, A., 728; (Decker), 1892, A., 630; (Claus), 1892, A., 875.
La Coste's, constitution of (Claus and Welter), 1890, A., 173.
*di*bromo- [m.ps. 166° and 125°—126°] (Claus and Tornier), 1888, A., 163.
1:2-*di*bromo-, and its derivatives (Claus and Vis), 1890, A., 173.
1:3-*di*bromo-, and its derivatives (Claus and Geisler), 1890, A., 172.

Quinoline, 1:4-*di*bromo-, and its derivatives (Metzger), 1884, A., 757; (Claus and Geisler), 1890, A., 172.
2:3- and 2:4-*di*bromo-, and their derivatives (Claus and Geisler), 1890, A., 172.
3:4-*di*bromo-, and its derivatives (Claus and Geisler), 1890, A., 173.
1:4′-*di*bromo-, and its derivatives (Claus and Welter), 1890, A., 1320.
2:2′-, 3:2 - and 4:2′-*di*bromo- (Welter), 1891, A., 1248.
2:4′-*di*bromo- (Claus and Welter), 1890, A., 174.
3:4′-*di*bromo-, and its derivatives (Claus and Welter), 1890, A., 173.
4:4′-*di*bromo-, and its derivatives (Claus and Decker), 1889, A., 729; (Claus and Welter), 1890, A., 173.
*tri*bromo- [m.p. 169°] (Claus and Welter), 1890, A., 173.
[m.ps. 170° and 198°] (Claus and Küttner), 1887, A., 278.
[m.p. 205°] (Claus), 1888, A., 729.
[m.p. 247°] (Claus and Pollitz), 1890, A., 522.
1:3:4′- and 3:4:4′-*tri*bromo- (Claus and Heermann), 1891, A., 82.
1:4:4′-*tri*bromo- (Claus and Welter), 1890, A., 1321; (Claus and Heermann), 1891, A., 83.
1:3:4:4′-*tetra*bromo- (Claus and Welter), 1890, A., 1321; (Claus and Heermann), 1891, A., 83.
2:2′-bromamido- [m.p. 62°] (Claus and Vis), 1889, A., 281.
3:4-bromamido- [m.p. 164°] (La Coste), 1883, A., 90; (Claus and Zuschlag), 1890, A., 267.
2-bromonitro- [m.ps. 244°, 146° and 111°] (Claus and Pollitz), 1890, A., 521.
2:2′- and 2:3′-bromonitro- (Claus and Vis), 1889, A., 281.
3:4-bromonitro- (La Coste), 1883, A., 90; (Claus and Zuschlag), 1890, A., 267.
3′:4-bromonitro-, methylhydroxide of (Decker), 1892, A., 881.
1:4′-*di*bromonitro- and 1:4:4′-*tri*bromonitro- [m.ps. 215° and 195°] (Claus and Welter), 1890, A., 1320.
1-chloro-, action of acetamide on (Muhlert), 1887, A., 848.
2-chloro- and its derivatives (La Coste and Bodewig), 1884, A., 1196; (La Coste), 1886, A., 159.
Quinoline, 2-chloro-, methylic chloride, methylformyl-*o*-chloramidobenzoic acid and methyl-ψ-chlorisatin from (La Coste and Bodewig), 1885, A., 792.
1:4-*di*chloro- (Ostermayer), 1885, A., 672.
2′:3′-*di*chloro- (v. Baeyer and Bloem), 1883, A., 197.
*tri*chloro- [m.p. 68°] (Claus and Posselt), 1890, A., 523.
[m.p. 108°], synthesis of (Rügheimer), 1884, A., 1050.
1-cyano- (Fischer), 1883, A., 92; (Lellmann and Reusch), 1889, A., 905.
2-cyano- (Fischer), 1883, A., 92.
3-cyano- (Fischer and Wittmack), 1884, A., 1051.
*di*cyano- (La Coste and Valeur), 1887, A., 379.
2′-iodo- and its derivatives (Friedländer and Weinberg), 1885, A., 989.
1-nitro- (La Coste), 1883, A., 811; (Claus and Kramer), 1885, A., 908.
2-nitro- (Claus and Kramer), 1885, A., 908; (Claus and Stiebel), 1888, A., 295.
3-nitro- (La Coste), 1883, A., 811.
α- and β-*di*nitro- (Claus and Kramer), 1885, A., 908.
α-thio- (Roos), 1888, A., 500.
*iso***Quinoline** and its derivatives (Hoogewerff and van Dorp), 1886, A., 78; 1887, A., 505; (Gabriel), 1886, A., 265; 1887, A., 61; (Le Blanc), 1888, A., 1114; (Goldschmiedt), 1889, A., 165.
preparation of, from naphthalene (Bamberger and Kitschelt), 1892, A., 882.
synthesis of (Gabriel), 1886, A., 812.
pyrogenic synthesis of (Pictet and Popovici), 1892, A., 730.
oxidation of (Hoogewerff and van Dorp), 1886, A., 478.
sulphonation of (Claus, Howitz, Massan and Raps), 1892, A., 876.
substitution products of (Edinger and Bossung), 1891, A., 580.
salts of (Hoogewerff and van Dorp), 1886, A., 78.
benzylic chloride (Goldschmiedt), 1889, A., 165.
homologues of (Gabriel), 1887, A., 739, 1112.

*iso***Quinoline** methiodide (Gabriel), 1887, A., 62; (Claus and Edinger), 1889, A., 415.
  oxidation of (Decker), 1892, A., 730.

*iso***Quinoline,** bromo-, derivatives of (Edinger and Bossung), 1891, A., 580.
  *di*bromo- (Edinger and Bossung), 1891, A., 581.
  bromamido- (Edinger and Bossung), 1891, A., 581.
  bromonitro-, and its derivatives (Edinger and Bossung), 1891, A., 580.
  mono- and *di*-chloro- (Gabriel), 1886, A., 812; 1887, A., 61.

Quinolinebenzocarboxylic acids, oxidation of (v. Georgievics), 1891, A., 1389.

Quinolinebenzylbetaine (Claus and Muchall), 1885, A., 561.

Quinoline-betaine (Rhoussopoulos), 1883, A., 96.

Quinoline-blue. See Cyanine.

Quinoline-2-carboxylic acid and its salts (Fischer and van Loo), 1884, A., 1372; (Skraup and Brunner), 1886, A., 811; 1887, A., 160.
  synthesis of (Tortelli), 1887, A., 503.
  some derivatives of (Fischer and Körner), 1884, A., 1197.

Quinoline-3-carboxylic acid (Fischer and Wittmack), 1884, A., 1052.

Quinoline-4-carboxylic acid, 1-bromo- (Lellmann and Alt), 1887, A., 502.

Quinoline-2′-carboxylic acid (*quinaldinic acid*) and its salts (Doebner and v. Miller), 1884, A., 185; (Weidel and Strache), 1886, A., 950.
  preparation and oxidation of (v. Miller), 1891, A., 1096.
  nitro- (Doebner and v. Miller), 1883, A., 602.

Quinoline-3′-carboxylic acid and its salts (Riedel), 1883, A., 1152; (Doebner and v. Miller), 1885, A., 1079.
  2′-chloro- (Friedländer and Göhring), 1884, A., 1020.

Quinoline-4′-carboxylic acid. See Cinchonic acid.

ψ-Quinoline-4-carboxylonitrile (Lellmann and Reusch), 1888, A., 499.

Quinoline-α-dicarboxylic acid (La Coste and Valeur), 1887, A., 379.

Quinoline-1:4-dicarboxylic acid (Skraup and Brunner), 1886, A., 811.

Quinoline-2′:4′-dicarboxylic acid (Doebner and Peters), 1890, A., 176.

"Quinoline-dioximeanhydride" and **"-dioximes"** (v. Kostanecki and Reicher), 1891, A., 580.

Quinoline-α-disulphonic acid and its derivatives (La Coste and Valeur), 1886, A., 628; 1887, A., 379, 973.

Quinoline-β-disulphonic acid (La Coste and Valeur), 1886, A., 629; 1888, A., 297.

Quinolinedisulphonic acids, preparation of (anon.), 1885, A., 945.

Quinoline-group, attempted synthesis of a nitramine of the (Simon-Thomas), 1892, A., 725.

Quinolinephenacylic bromide (Bamberger), 1888, A., 301.

*iso***Quinolinephenacylic bromide** (Goldschmiedt), 1889, A., 165.

Quinolinequinol (Fischer and Renouf), 1884, A., 1371.

Quinolinequinones and their derivatives (Fischer and Renouf), 1884, A., 1370; (Mathéus), 1888, A., 965.

Quinoline-red and *iso***quinoline-red** (v. Hofmann), 1887, A., 380.

Quinoline-series, syntheses in the (Just), 1886, A., 161, 811, 812.
  syntheses in the, by means of acetylacetone (Combes), 1888, A., 504.
  molecular migrations in the (Ziegler), 1888, A., 609.
  transition from the coumaric series to the (v. Miller and Kinkelin), 1889, A., 990.
  quaternary ammonium bases of the (Claus), 1892, A., 1358.
  carboxylic acids of the, colour reactions for determining the constitution of (Skraup), 1886, A., 898.
  ketones of the (Berend and Thomas), 1892, A., 1488.
  β-lactone of the (Einhorn and Lehnkering), 1888, A., 1208.
  methochlorides of the (Ostermayer), 1885, A., 672.

Quinoline-3-sulphobenzylbetaine (Claus and Stegelitz), 1886, A., 628.

Quinoline-1-sulphonamide and **-sulphonbromamide** (Hoogewerff and van Dorp), 1889, A., 981.

Quinoline-4-sulphonamide, 1-chloro- (Claus and Posselt), 1890, A., 522.

Quinolinesulphonic acid, 2′-bromo- (Claus and Pollitz), 1890, A., 521.

Quinoline-1-sulphonic acid, oxidation of (Fischer and Renouf), 1884, A., 1049; (Zürcher), 1888, A., 378.
derivatives of (Claus and Stegelitz), 1886, A., 628.
3-bromo- (Claus and Zuschlag), 1890, A., 267.
4-bromo- (Claus and Würtz), 1890, A., 267.

Quinoline-2-sulphonic acid, 4′-bromo- (Claus and Schmeisser), 1890, A., 266.

Quinoline-3-sulphonic acid and its derivatives (Happ), 1884, A., 757; (Fischer and Wittmack), 1884, A., 1051; (Claus and Muchall), 1885, A., 561; (Claus and Stegelitz), 1886, A., 628.
homologues of (Fischer and Wittmack), 1884, A., 1051.
4-bromo- (Claus and Würtz), 1890, A., 267.

Quinoline-4-sulphonic acid (Lellmann and Lange), 1887, A., 737.
1-bromo- (Lellmann and Lange), 1888, A., 296.
4′-bromo- (Claus and Schmeisser), 1890, A., 266.
1-chloro- (Claus and Posselt), 1890, A., 523.

Quinolinesulphonic acids (Claus and Küttner), 1887, A., 278; (Fischer), 1887, A., 601; (v. Georgievics), 1888, A., 501; (Claus), 1888, A., 728.
bromo-, and their salts (La Coste), 1883, A., 96; (Claus), 1890, A., 265.

Quinoline-4-sulphonic bromide, bromo- (Claus and Posselt), 1890, A., 522.

Quinoline-4-sulphonic chloride, 1-chloro- (Claus and Posselt), 1890, A., 522.

Quinolinic acid (*quinoleic acid; pyridine-2:3-dicarboxylic acid*) and its salts (Hoogewerff and van Dorp), 1883, A., 89; (Nölting and Collin), 1884, A., 1048.
5-bromo- (Claus and Collischonn), 1887, A., 159; (Srpek), 1890, A., 177.

Quinolinic anhydride (Bernthsen and Mettegang), 1887, A., 737.

Quinolsulphonic acid and its salts (Seyda), 1883, A., 1115.

Quinoltetracarboxylic acid (*dihydroxypyromellitic acid*) (Nef), 1888, T., 453.
pyrazolone derivative of (Nef), 1890, A., 984.

Quinoltetracarboxylic anhydride (Nef), 1890, A., 984.

2′-Quinolyl disulphide, mercaptan and ethylic sulphide (Roos), 1888, A., 500.

2′-Quinolylacetaldehyde (Einhorn), 1886, A., 264, 721; (v. Miller and Spady), 1886, A., 265, 370; (Carlier and Einhorn), 1891, A., 83.

2′-Quinolyl-acetic acid and **-acetylene** (Carlier and Einhorn), 1891, A., 84.

2′-Quinolylacrylic acid (v. Miller and Spady), 1886, A., 264; (Einhorn and Lehnkering), 1888, A., 1208.

2′-Quinolyl-β-bromopropionic acid (Einhorn and Lehnkering), 1888, A., 1208.

2′-Quinolyl-*di*bromethylene, -*di*bromopropionic acid and **-dihydroxypropionic acid** (Carlier and Einhorn), 1891, A., 84.

2:2′-Quinolyldiacrylic acid (Eckhardt), 1889, A., 523.

2′-Quinolyldiphenylcarbamide (Goldschmidt and Meissler), 1890, A., 501.

2′-Quinolylethylene (Einhorn and Lehnkehring), 1888, A., 1209.

Quinolyl-ethylene-quinoline (CH=2- and 3-) (Bulach), 1889, A., 528.

1-Quinolylhydrazine (Dufton), 1891, T., 756.

4-Quinolylhydrazine (Dufton), 1892, T., 784.

Quinolylhydrazines (Böttiger), 1892, A., 212.

2′-Quinolylhydroxypropionic acid (Einhorn), 1886, A., 721.

2′-Quinolyl-β-hydroxypropionic acid, lactone of (Einhorn and Lehnkering), 1888, A., 1208.

Quinolyl-lactamide and **-β-lactic acid** (Einhorn and Lehnkering), 1888, A., 1209.

Quinolyl-*p*-methenylamidoxime and its derivatives (Biedermann), 1890, A., 175.

Quinolyl-*p*-methenylbenzenylazoxime-*p*-carboxylic acid (Biedermann), 1890, A., 176.

Quinolyl-*p*-methenyl-carbonylamidoxime, -ethenylazoxime and **-uramidoxime** (Biedermann), 1890, A., 176.

1:3-Quinolylmethylpyrazolone (Dufton), 1892, T., 788.

Quinolylphenyldimethylthiocarbamide (Marckwald), 1890, A., 1005.

2′-Quinolylpropionic acid (Carlier and Einhorn), 1891, A., 84.

1-Quinolylsemicarbazide (Dufton), 1891, T., 758.
4-Quinolylsemicarbazide (Dufton), 1892, T., 786.
o-**Quinone**, derivatives of (Zincke), 1887, A., 808.
  *tetra*bromo- and *tetra*chloro- (Zincke), 1887, A., 808.
Quinone ($C_{18}H_{16}O_2$) obtained in the destructive distillation of teak (Romanis), 1887, T., 870.
Quinone (*benzoquinone*) (Meldola), 1883, T., 433.
  preparation of (Nietzki), 1886, A., 790.
  constitution of (Nef), 1890, A., 1270; 1891, A., 1348; (Kehrmann), 1891, A., 432.
  heat of combustion of (Berthelot and Recoura; Berthelot and Luginin), 1887, A., 762.
  action of acetic chloride on (Hesse), 1884, A., 430.
  action of ethylic acetoacetate on (v. Pechmann), 1889, A., 42; (Ikuta), 1892, A., 608.
  action of hydroxylamine hydrochloride on (Goldschmidt), 1884, A., 735.
  action of various substances on (Scheid), 1884, A., 429.
  behaviour of, towards sulphuric acid (Liebermann), 1885, A., 802.
  physiological action of (Schulz), 1892, A., 1115.
  compounds of, with nitranilines (Hebebrand), 1883, A., 60.
  compounds of, with phenols (Nietzki), 1883, A., 465.
  derivatives (Nietzki), 1884, A., 58.
    constitution of (Hantzsch), 1887, A., 719.
    influence of the presence of halogens and alkyl-groups on the replacement of oxygen by the *iso*nitroso-group in (Kehrmann), 1889, A., 243.
    physiological action of (Schulz), 1892, A., 1115.
  carboxyl-derivatives of (Nef), 1888, T., 428; P., 38.
  di- and *tetra*-bromides (Nef), 1890, A., 1272.
  di- and *tetra*-chlorides and *di*chloride-*di*bromide (Nef), 1891, A., 1348.
  halogen derivatives of (Ling), 1887, T., 782; 1890, P., 32; 1892, T., 558; P., 105; (Ling and Baker), 1892, T., 589; P., 106.
Quinone, bromo-derivatives of (Levy), 1883, A., 1117.
Quinone, 2:6-*di*bromo- (Heinichen), 1890, A., 165; (Ling), 1892, T., 561.
  *tetra*bromo- (*bromanil*) (Ling), 1887, T., 148; (Graebe and Weltner), 1891, A., 1028.
  2:6:3-*di*bromonitro- (Guareschi and Daccomo), 1885, A., 891.
  chloro- (Kollrepp), 1886, A., 1018.
  chloro-derivatives of (Levy), 1883, A., 1117.
  2:5-*di*chloro- (Levy), 1883, A., 1117; (Ling), 1892, T., 558.
    oxime of (Kehrmann), 1889, A., 244.
  2:6-*di*chloro- (Ling), 1892, T., 559.
    bromination of (Ling), 1892, T., 576, 580.
    derivatives of (Kehrmann and Tiesler), 1890, A., 241.
  *tri*chloro- (Andresen), 1884, A., 431.
  *tetra*chloro- (*chloranil*) (Andresen), 1884, A., 431; (Istrati), 1890, A., 882; (Graebe), 1891, A., 1027.
    action of phosphorus chlorides on (Graebe), 1891, A., 1028.
    action of sodium thiosulphate on (Purgotti), 1890, A., 1419.
  2:6- and 2:5-chlorobromo- (Nef), 1891, A., 1348; (Ling), 1892, T., 562.
  chloro*tri*bromo- (Ling), 1887, T., 783; (Ling and Baker), 1892, T., 590.
  2:5:3- and 2:6:3-*di*chlorobromo- (Ling), 1892, T., 563, 566.
  2:5-*di*chloro*di*bromo- (Levy), 1883, A., 1117; 1885, A., 1210; (Ling), 1892, T., 572.
    crystalline form of (Leiveh), 1886, A., 543.
  2:6-*di*chloro*di*bromo- (Ling), 1892, T., 578.
  *tri*chlorobromo- (Ling and Baker), 1892, T., 592.
  2:6:3-chlorobromonitro- (Garzino), 1890, A., 1108.
  2:6:3-dichloronitro- (Guareschi and Daccomo), 1885, A., 891.
  2:5-*di*iodo- (Metzeler), 1888, A., 1278.
  2:6-*di*iodo- (Seifert), 1884, A., 431; (Kehrmann), 1888, A., 841.
  nitro-derivatives of (Nietzki), 1883, A., 465.
  Etard's nitro-, probable non-existence of (Henderson and Campbell), 1890, T., 255.
  3:6:2:5-*di*nitr*di*amido- (Nietzki), 1887, A., 930.

- **Quinones** (Nietzki), 1883, A., 465.
  - formation of, from *p*-methylamines (Nölting and Baumann), 1885, A., 892.
  - preparation of (Nölting and Baumann), 1885, A., 390; (Schniter), 1887, A., 1036.
  - constitution of (Scheid), 1884, A., 429.
  - action of, on amidophenols (Zincke and Hebebrand), 1885, A., 257.
  - action of amines on (Zincke and Brauns), 1883, A., 209; (Zincke), 1883, A., 1117; 1885, A., 787.
  - action of yellow ammonium sulphide on (Willgerodt), 1887, A., 1045.
  - action of bleaching powder and of hypochlorous acid on (Zincke), 1892, A., 720, 859, 970.
  - action of, on *o*-diamines, *o*-nitraniline and nitro-*p*-toluidine (Leicester), 1890, A., 1445.
  - orientation by conversion of *p*-*di*-nitro-derivatives into (Claus, Raps, Herfeldt and Berkefeld), 1891, A., 1199.
  - secondary and tertiary (Nietzki and Kehrmann), 1887, A., 473.
  - halogen-derivatives of, action of alkali nitrites on (Kehrmann), 1888, A., 940.
  - halogen-derivatives of, action of alkalis and ammonia on (Kehrmann), 1889, A., 707; 1890, A., 136; 1891, A., 903.
  - phenylhydrazine-derivatives of (Zincke), 1883, A., 1135.
- **Quinones**, amido- (Kehrmann), 1890, A., 756, 1265.
  - chlorinated, aniline- and nitraniline-derivatives of (Niemeyer), 1885, A., 1065.
  - iodo- (Kehrmann), 1889, A., 993, 1184.
- **Quinonecarboxylic acids** (Nef), 1887, A., 255; (Stieglitz), 1891, A., 455.
- **Quinonechlorimide** (Fogh), 1888, A., 593.
  - 2:6-*di*bromo-, preparation of (Möhlau), 1884, A., 594.
  - 2-chloro- (Kollrepp), 1886, A., 1019.
  - *tri*chloro- (Andresen), 1884, A., 431.

nitro-, and its derivatives (Hazura), 1883, A., 1114.
Resorcyl *o*-acetate (Heiber), 1892, A., 309.
allophanate (Traube), 1889, A., 394, 965.
benzenesulphonate (Georgescu), 1891, A., 569.
mixed ethers of (Spitz), 1885, A., 381.
diethyl ether. See 1:3-Diethoxybenzene.
dimethyl ether (1:3-*dimethoxybenzene*) 4-amido-, and its derivatives (Bechhold), 1889, A., 1155.
dimethyl ether, 2:4-*di*nitro- (Jackson and Warren), 1891, A., 1025.
Resorcylaldehydephenylhydrazone (Rudolph), 1889, A., 252.
β-Resorcyl-*mono*- and -*di*-aldoximes (2:4-*dihydroxybenzaldoxime*) (Marcus), 1892, A., 317.
Resorcyldialdehydephenylhydrazone (Rudolph), 1889, A., 252.
α-Resorcylic acid (3:5-*dihydroxybenzoic acid*), action of chlorine on (Zincke and Fuchs), 1892, A., 1461.
β-Resorcylic acid (2:4-*dihydroxybenzoic acid*), thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096.
β-Resorcylonitrile (Marcus), 1892, A., 317.
Resorufamine (Nietzki and Maeckler), 1890, A., 764.
Resorufin (*diazoresorufin*) (Fèvre), 1883, A., 733; (Brunner and Kraemer), 1884, A., 1333; (Ehrlich), 1888, A., 145; (Nietzki, Dietze and Maeckler), 1890, A., 156.
Respiration, chemical effect of, and muscular activity, relation between (Hanriot and Richet), 1887, A., 1058.
air vitiated by (Haldane and Smith), 1892, A., 1502.
effects of alkalis and acids on (Lehmann), 1885, A., 279.
influence of, on elimination (Penzoldt and Fleischer), 1884, A., 91.
influence of sleep on (de Saint-Martin), 1888, A., 305.
estimation of the carbonic anhydride expired and oxygen absorbed in (Hanriot and Richet), 1887, A., 507.
in compressed air (Suchowsky), 1885, A., 677.
in a superoxygenated atmosphere (de Saint-Martin), 1884, A., 911.
experiments on the horse (Zuntz, Lehmann and Hagemann), 1889, A., 911; (Smith), 1890, A., 392; (Zuntz and Lehmann), 1890, A., 1170.
human (Marcet), 1890, A., 914.
air being re-breathed (Marcet), 1891, A., 1270.
of entozoic worms (Bunge), 1890, A., 274.
See also Agricultural Chemistry and Metabolism, gaseous.
Respiration apparatus (Haldane), 1892, A., 1257.
Respiratory changes, effect of acetic acid on (Mallèvre), 1891, A., 344.
influence of diet on (Hanriot and Richet), 1888, A., 615.
influence of variations in the percentage composition of air on the intensity of (Fredericq), 1885, A., 407.
exchange in animals (Chapman and Brubaker), 1891, A., 592.
of gases (Marcet), 1891, A., 1270.
value of hæmocyanin (Cuénot), 1892, A., 1370.
Retene (*retistene, methylpropylphenanthrene*) and its derivatives (Bamberger), 1884, A., 1040; 1885, A., 549; (Bamberger and Hooker), 1885, A., 905.

Retene (*retistene, methylpropylphenanthrene*), from resin oil (Kelbe), 1888, A., 605.
  constitution of (Bamberger and Hooker), 1885, A., 1070.
  boiling point of (Schweitzer), 1891, A., 1240.
  ketone (Bamberger), 1884, A., 1040.
    distillation of, with zinc-dust (Bamberger and Hooker), 1885, A., 905.
  dodecahydride (*dehydrofichtelite*) (Liebermann and Spiegel), 1889, A., 720; (Bamberger and Strasser), 1890, A., 385.
Retenediphenic acid (Bamberger), 1885, A., 550.
Retenefluorene (Bamberger and Hooker), 1885, A., 905.
  alcohol (Bamberger), 1884, A., 1040.
Reteneglycollic acid (Bamberger), 1884, A., 1040.
Retene-quinhydrone and **-quinol** (Bamberger), 1885, A., 549.
Retenequinone (Bamberger), 1884, A., 1040; (Bamberger and Hooker), 1885, A., 905.
  oxidation of (Bamberger and Hooker), 1885, A., 1070.
  bromine derivatives of (Bamberger and Hooker), 1885, A., 905.
Retene-quinoxaline and **-quinoxime** (Bamberger), 1885, A., 549.
Retinal rods, chemistry of (Dreser), 1886, A., 375.
Retinellite (Harrington), 1892, A., 573.
Retinole (*rosolene*) (Serrant), 1886, A., 185.
Retort, safety, for preparing gases (v. Klobukoff), 1888, A., 1244.
Retort-furnaces with gaseous fuel (Fischer), 1884, A., 509.
Rezbanyite (*cosalite*) (Frenzel), 1884, A., 266; (König), 1886, A., 515.
  from Colorado (Hillebrand), 1884, A., 826.
Rhabdite, in the Cranbourne meteorite (Flight), 1884, A., 417.
Rhabdophane (*scovillite*) (Hartley), 1884, T., 167; (Brush and Penfield), 1884, A., 26, 827.
Rhamnetin (Herzig), 1886, A., 252; 1888, A., 1309; (Liebermann), 1886, A., 366.
  glucoside of (Herzig), 1890, A., 64.
Rhamnitol (Fischer and Piloty), 1891, A., 31.
Rhamnoctonic acid and **lactone** (Fischer and Piloty), 1891, A., 32.
Rhamnoctose, **rhamnoheptose** and **rhamnohexitol** (Fischer and Piloty), 1891, A., 32.
Rhamnodiazine (Raýman and Chodounský), 1889, A., 485; (Raýman and Pohl), 1890, A., 355.
Rhamnoheptonic acid and **hydrazide** (Fischer and Piloty), 1891, A., 32.
Rhamnohexonic acid (Fischer and Tafel), 1888, A., 806; (Fischer and Piloty), 1891, A., 31.
  reduction of (Fischer), 1889, A., 1149.
  phenylhydrazide (Fischer and Passmore), 1890, A., 154.
Rhamnohexose (Fischer and Piloty), 1891, A., 31.
  from frangulin (Thorpe and Miller), 1892, T., 7.
Rhamnolactone, polarisation phenomena of (Schnelle and Tollens), 1892, A., 1431.
Rhamnonic acid, rotatory power of (Weld, Lindsey, Schnelle and Tollens), 1891, A., 44.
  polarisation phenomena of (Schnelle and Tollens), 1892, A., 1431.
Rhamnose. See *iso*Dulcitol under Carbohydrates.
Rhamnosecarboxylic acid. See Rhamnohexonic acid.
Rhamnosediphenylhydrazone (Stahel), 1890, A., 1260.
Rhamnoseoxime (Jacobi), 1891, A., 664.
Rhamnosone (Fischer), 1889, A., 484.
Rhamnus Frangula, constituents of the bark of (Schwabe), 1889, A., 68.
  frangulin from (Thorpe and Robinson), 1890, T., 38.
Rhamnus Purshiana, constituents of the bark of (Schwabe), 1889, A., 68.
  cascarin from (Leprince), 1892, A., 1483.
Rhinanthin (Phipson), 1888, A., 1310.
Rhinoliths (Berlioz), 1891, A., 1279.
Rhizoma podophylli, constituents of (Kürsten), 1891, A., 1133.
Rhizopods, digestion in (Greenwood), 1886, A., 1053; 1888, A., 79.
Rhodanic acid (Nencki and Bourquin), 1885, A., 40; (Ginsburg and Bondzyński), 1886, A., 325; (Andreasch), 1889, A., 960.
  synthesis of (Freydl), 1889, A., 961.
  constitution of (Miolati), 1891, A., 943.
  derivatives of (Nencki and Bourquin), 1885, A., 40.

Rhodanic acid, homologue of (Berlinerblau), 1886, A., 326.
Rhodinaldehyde and **rhodinolic acid** (Eckart), 1892, A., 203.
Rhodinol (Eckart), 1892, A., 203, 625.
Rhodium, atomic weight of (Jörgensen), 1883, A., 1060; (Seubert and Kobbé), 1891, A., 646; (Seubert), 1891, A., 885.
  colour reaction of (Demarçay), 1886, A., 125.
  alloy of, with tin (Debray), 1887, A., 779.
  compounds (Debray), 1884, A., 400; (Vincent), 1885, A., 1116; 1886, A., 310.
Rhodammonium compounds (Jörgensen), 1883, A., 1058; 1887, A., 114; 1890, A., 1213; 1891, A., 1325; 1892, A., 783.
Rhodium salts (Wilm), 1884, A., 660; 1885, A., 355; (Leidié), 1888, A., 1256.
    some reactions of (Lecoq de Boisbaudran), 1883, A., 715.
  double salts of (Seubert and Kobbé), 1890, A., 1383.
Rhodium *sesqui*chloride (Leidié), 1888, A., 790.
    electrolytic conductivity of (Hampe), 1888, A., 890.
  potassium chloride (Leidié), 1890, A., 1382; (Seubert and Kobbé), 1890, A., 1383.
  sodium chloride, decomposition of, in solution (Foussereau), 1886, A., 975.
  nitrites (Leidié), 1890, A., 1382.
  ammonium, barium, potassium and sodium nitrites (Leidié), 1890, A., 1382; 1891, A., 808.
  sulphate (Leidié), 1888, A., 1257.
  *sesqui*sulphide (Leidié), 1888, A., 919.
  sodium sulphite (Seubert and Kobbé), 1890, A., 1383.
  Luteorhodium salts (Jörgensen), 1891, A., 1325, 1327.
  Nitratopurpureorhodium salts (Jörgensen), 1887, A., 114.
  Purpureorhodium compounds, chloro-, bromo-, and iodo- (Jörgensen), 1883, A., 1058.
  Roseorhodium salts (Jörgensen), 1887, A., 113; 1891, A., 1327.
  Xanthorhodium salts (Jörgensen), 1887, A., 114.
Rhodium, estimation, electrolytic, of (Joly and Leidié), 1891, A., 141.
Rhodium-black, action of, on hydrogen peroxide (Hoppe-Seyler), 1883, A., 849.
Rhodizite (Damour), 1883, A., 956.
Rhodizonic acid (*dihydroxydiquinoyl*) and its salts (Nietzki and Benckiser), 1885, A., 781.
  constitution of (Nietzki), 1891, A., 189.
  formula of (Nietzki and Kehrmann), 1888, A., 263.
  hexahydroxybenzene derivatives and their relation to (Nietzki and Benckiser), 1885, A., 779.
Rhodochrosite from Colorado (Kunz), 1888, A., 346.
  from Franklin Furnace, New Jersey (Browning), 1891, A., 527.
  See also Manganese carbonate.
Rhodogen, from sugar-beet, and its oxidation-product (Reinke), 1883, A., 881.
Rhodonite, artificial production of (Gorgeu), 1884, A., 164; (Bourgeois), 1884, A., 565; 1886, A., 214.
  fowlerite variety of, from New Jersey (Pirsson), 1891, A., 530.
  from Långban and Pajsberg (Flink), 1886, A., 778.
  from Viù (Fino), 1884, A., 164.
  products of the alteration of (Chester), 1888, A., 795.
  See also Manganese silicate.
Rhodope, trachyte region of (Pelz and Hussak), 1884, A., 414.
Rhodopsin (Dreser), 1886, A., 375.
Rhodosochromium salts. See Chromammonium salts.
Rhodotilite. See Inesite.
Rhubarb, English (Elborne), 1885, A., 582.
Rhus vernicifera, and the milky secretion of (Yôshida), 1883, T., 473.
Rhyncodia (*Cercocoma*) ***macrantha,*** alkaloid from (Greshoff), 1891, A., 337.
Rhyolites from Sweden (Holst), 1891, A., 1437.
  minerals in hollow spherulites of (Iddings and Penfield), 1892, A., 23.
Ribonic acid (*tetrahydroxyvaleric acid*) (Fischer and Piloty), 1892, A., 438.
Ribose and its derivatives (Fischer and Piloty), 1892, A., 439.
Rice, system on which, may be used in brewing (Markl), 1884, A., 235.
  See also Agricultural Chemistry.
Rice-starch (Sostegni), 1886, A., 221; 1888, A., 126.
  estimation of (Salomon), 1883, A., 124.
Richellite (Cesaro and Despret), 1884, A., 1102; (Cesaro), 1886, A., 127.

Ricin (Stillmark), 1890, A., 535.
Ricinelaidic acid (Krafft), 1888, A., 1271.
oxidation of (Mangold), 1892, A., 1304.
Ricinic acid (Krafft), 1888, A., 1271.
"**Ricinisolic acid**" and "**ricinolic acid.**" See Trihydroxystearic acid.
Ricinoleic acid (Krafft), 1888, A., 1270.
oxidation of (Diëff and Reformatsky), 1887, A., 716; (Diëff), 1889, A., 1147; (Mangold), 1892, A., 1304.
polymerides of (Scheurer-Kestner), 1891, A., 1454.
Ricotta from sheep's milk (Sartori), 1891, A., 952.
Riebeckite (Sauer), 1889, A., 109.
from Michigan (Lane, Keller, and Sharpless), 1892, A., 793.
Ring formation with elimination of hydrogen bromide or nitrous acid (Lellmann and Schmidt), 1888, A., 289.
Rings closed, nomenclature of (Armstrong), 1892, P., 127.
hydrogenation of (Stohmann and Kleber), 1891, A., 376, 1146; 1892, A., 1040.
containing five atoms, constitution of (Bamberger), 1891, A., 1090.
six membered, theory of (Bamberger), 1890, A., 1299.
Rinkite from Kangerluardsak, Greenland (Lorenzen), 1886, A., 676.
Ripidolite (*prochlorite*) from Columbia (Clarke and Chatard), 1885, A., 492; (Merrill), 1886, A., 520.
from Mt. Blanc, analysis of (Brun), 1884, A., 403.
See also Chlorite.
River-waters. See Water.
Robinia Pseudacacia, assimilation of nitrogen from the air by (Frank), 1891, A., 764.
nitrogen assimilation of (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
Rock crystal, thermo- and actino-electricity of (Hankel), 1883, A., 412, 950; 1885, A., 1187; (Friedel and Curie), 1883, A., 897.
electrolytic conductivity of (Warburg and Tegetmeier), 1889, A., 91.
Rock salt from Torda and from Vizakna (Loczka), 1892, A., 1654.
radiation of, at various temperatures (Baur), 1883, A., 702.
dispersion in (Ketteler), 1887, A., 754.
Rock salt, electric properties of (Braun), 1888, A., 9.
compressibility of (Braun), 1887, A., 436; 1888, A., 214, 404; (Röntgen and Schneider), 1888, A., 22, 1019.
blue (Wittjen and Precht), 1883, A., 1051; (Ochsenius), 1886, A., 515.
Roumanian (Istrati), 1890, A., 217.
See also Sodium chloride.
Rocks from Colorado, containing sodium amphibole, astrophyllite, pyrochlore and zircon (Lacroix), 1889, A., 1054.
from the Congo (Klement), 1888, A., 34.
from Corsica (Rupprecht), 1891, A., 1440.
Italian (Cossa), 1883, A., 446.
Japanese (Kotô), 1887, A., 564.
of the Jiwaara, in Finland (Ramsay and Berghell), 1892, A., 1058.
from the shore at Nice (Montemartini), 1889, A., 223.
Norwegian (Jannasch), 1887, A., 562.
of Noyang (Howitt), 1884, A., 972.
of Pigeon Point, Minnesota (Bayley), 1889, A., 473.
from the Volcano Yate (Ziegenspeck), 1884, A., 973.
from Vulture and Melfi, composition of (Ricciardi), 1887, A., 1087.
of the Vulsinian volcanoes (Ricciardi), 1889, A., 224.
of the Yellowstone Park (Beam), 1884, A., 28.
artificial formation of (Fouqué and Michel-Lévy), 1883, A., 448; (Kaziorowski), 1890, A., 718.
formation of, and the compression of the moist powder of solid substances (Spring), 1888, A., 1243.
decay of, geologically considered (Hunt), 1884, A., 567.
disintegration of (Müntz), 1890, A., 1183.
function of the nitric ferment in the disintegration of (Müntz), 1887, A., 1135.
used in the manufacture of Chinese porcelain (Vogt), 1890, A., 461.
acid, reproduction of (Le Chatelier), 1892, A., 23.
acidic, volcanic, and solfataras, relation between (de Lapparent), 1889, A., 474.
calcareous from Tevere (Verri and Trottarelli), 1888, A., 120.
soft calcareous, hardening of, by means of fluosilicates of insoluble bases (Kessler), 1883, A., 940.

Rocks, massive crystalline, metamorphism of (DANA), 1883, A., 562.
  metamorphic and plutonic, at Omeo (HOWITT), 1889, A., 222.
  supposed Pre-Cambrian, of St. David's (GEIKIE), 1884, A., 411.
  Silurian, of Christiana (BRÖGGER), 1883, A., 723.
  spherulitic, from Co. Down (HYLAND), 1891, A., 1169.
  trachytic, from the island of San Pietro (EIGEL), 1887, A., 904.
  volcanic (DOELTER), 1883, A., 723.
    of Assab (RICCIARDI), 1886, A., 993.
    from the lake of Bracciano (STRÜVER), 1887, A., 21.
    from the Cabo de Gata (OSANN), 1891, A., 26.
    of the Cape Verde Islands (DOELTER), 1883, A., 720.
    of Elba, the more recent (NESSIG), 1884, A., 567.
    of Jablonica (JOHN), 1891, A., 652.
    from Krzeszowice, Cracow (ZUBER), 1887, A., 563.
    basic, of Mâconnais and Beaujolais (MICHEL-LÉVY), 1884, A., 414.
    of Monte Somma (MIERISCH), 1888, A., 434.
    Persian (DRASCHE), 1887, A., 223.
    of the Rhone (LENK), 1890, A., 115.
    near Tryberg in the Black Forest (WILLIAMS), 1883, A., 723.
    composition of (RICCIARDI), 1887, A., 1023.
  analysis of, separation of titanium, chromium, aluminium, iron, barium and phosphoric acid in (CHATARD), 1891, A., 768.
Rodents, hæmoglobin and methæmoglobin crystals of (HALLIBURTON), 1886, A., 637.
Rodna, bluish-grey mineral crusts from (MEDGYESY), 1886, A., 515.
Römerite (BLAAS), 1884, A., 269; (MACKINTOSH), 1890, A., 454.
Roessler's method for the separation of gold, silver, lead, and copper from sulphides by air-blast (ANON.), 1883, A., 400.
Roots. See Agricultural Chemistry.
Rosa canina, vanillin from (SCHNEEGANS), 1890, A., 1270.
Rosa centifolia, flowers of, analyses of (NIEDERSTADT), 1884, A., 97.
Rosaginin (PIESZCZEK), 1890, A., 1316.
Rosamines (HEUMANN and REY), 1890, A., 157.
Rosaniline (*triamidodiphenyltolylcarbinol*), formation of (GOLDBERG), 1892, A., 340.
  formation of, by the nitrobenzene process (LANGE), 1885, A., 1130.
  manufacture of, by the arsenic acid process (MÜHLHÄUSER), 1888, A., 472.
  and its congeners, constitution of (ARMSTRONG), 1888, P., 30.
  spectrum of (HARTLEY), 1887, T., 169.
  decomposition of, by water (LIEBERMANN), 1883, A., 1097.
  colouring matters (MELDOLA), 1883, A., 807.
  blue colouring matters from (NÖLTING and COLLIN), 1884, A., 1048.
  yellow colouring matter, preparation of (MACHENHAUER), 1885, A., 310.
  derivatives (NÖLTING), 1883, A., 54.
  salts, constitution of (v. RICHTER), 1888, A., 1185.
  salts and sulphonated rosaniline, detection of (LIEBMANN and STUDER), 1887, A., 405.
  aurinate (DALE and SCHORLEMMER), 1883, T., 186; (DYSON), 1883, T., 472.
  hydrochloride, detection of, in wine by means of stearin (WOLFF), 1883, A., 384.
  phenate (DALE and SCHORLEMMER), 1883, T., 186; (DYSON), 1883, T., 470.
  sulphate, physiological action of (CAZENEUVE and LÉPINE), 1886, A., 272.
  Pararosaniline (*triamidotriphenylcarbinol*), synthesis of (ZIMMERMANN and MÜLLER), 1885, A., 386.
    condensation of, with aldehyde (v. MILLER and PLÖCHL), 1891, A., 1071.
    di-o-chloro- (HEUMANN and HEIDLBERG), 1886, A., 942.
Rosanilines, possible number of homologous and isomeric (ROSENSTIEHL and GERBER), 1884, A., 739.

  chloriodo- (SMITH and KNERR), 1886, A., 704.
  3- and 5-nitro- (SMITH and KNERR), 1886, A., 704.
  sulpho- (HEDRICK), 1888, A., 280; (PISANELLO), 1889, A., 1063.
  *di*sulpho- (PISANELLO), 1889, A., 1062.
Salicylic acid, detection, estimation and separation:—
  detection of (CURTMAN), 1887, A., 185.
  detection of, in beer (RÖSE), 1886, A., 924; (ELION; SNIJDERS), 1889, A., 195; (HOORN), 1889, A., 446.
  detection of, in dietetic substances (ANON.), 1884, A., 372.

Salicylic acid, detection, estimation and separation:—
detection of, in wine (RÖSE), 1886, A., 924; (MEDICUS), 1890, A., 1475.
estimation of (WEIGERT), 1889, A., 446.
estimation of, in beer (BARRAL), 1884, A., 778; (ELION; SNIJDERS), 1889, A., 195.
estimation of, in milk and butter (RÉMONT), 1883, A., 522.
estimation of, in wine (RÉMONT), 1883, A., 245; (BARRAL), 1884, A., 778.
separation of, from benzoic acid (SCHAAP), 1892, A., 1532.
Salicylic alcohol. See Saligenin.
Salicylic anhydrides, products of the distillation of (GOLDSCHMIEDT), 1883, A., 664.
Salicylic compounds, melting points of (PERKIN), 1889, T., 549; P., 105.
Salicylic phenylcarbamate, methyl-derivative of (SNAPE), 1885, T., 775.
Salicylidenebenzenylamidoxime (ZIMMER), 1890, A., 254.
Salicylidene-*m*-phenylenediamine and **-*m*-tolylenediamine** (SCHIFF and VANNI), 1890, A., 139.
"**Salicyllactic acid**" (*o-hydroxyphenyllactic acid*) (PLÖCHL and WOLFRUM), 1885, A., 899.
Salicylonitrile (AHRENS; MEYER), 1888, A., 266; (TIEMANN), 1888, A., 276; (HERZIG and ZEISEL), 1889, A., 255.
preparation of (SPILKER), 1890, A., 141; (MILLER), 1890, A., 146.
polymeride of (MILLER), 1890, A., 146.
"**Salicyloxyacetic acid**" (*o-carboxyphenylglycollic acid*) and its salts (RÖSSING), 1885, A., 388; 1886, A., 66.
Salicylphenol (2:4′-*dihydroxybenzophenone*) and its derivatives (MICHAEL), 1884, A., 311.
Salicylphosphorous chloride (ANSCHÜTZ and EMERY), 1887, A., 946; 1890, A., 53.
Salicylpiperidine (SCHOTTEN), 1888, A., 1106.
Salicylresorcinol. See Trihydroxybenzophenone.
Salicylthiamide and *di*bromo- (SPILKER), 1890, A., 141.
Salicyltropeine (LADENBURG), 1883, A., 671.
Saligenin (*saligenol; o-hydroxybenzylic alcohol; salicylic alcohol*), synthesis of (GREENE), 1885, A., 53.
heat of solution of (BERTHELOT), 1885, A., 1177.
Saligeninoxyacetic acid (BIGINELLI), 1891, A., 309.
Saline hydrates, formation of, at high temperatures (ROUSSEAU), 1892, A., 119.
dissociation of (LESCŒUR), 1889, A., 815.
powders, origin of (MARGUERITE-DELACHARLONNY), 1889, A., 945.
solutions. See Solutions.
sublimates at Vesuvius (FREDA), 1890, A., 571.
Saliva, alkalinity of (CHITTENDEN and ELY), 1883, A., 488.
influence of temperature on (BIERNACKI), 1891, A., 1272.
action of, on starch (BOURQUELOT), 1887, A., 354.
diastatic action of (CHITTENDEN and ELY), 1883, A., 488; (CHITTENDEN and SMITH), 1886, A., 638; (SCHLESINGER), 1891, A., 1522.
ferments in (GOLDSCHMIDT), 1886, A., 726; (KRAWKOFF), 1888, A., 862.
parotid, gases of (KÜLZ), 1887, A., 287.
hydrogen *per*oxide in (WURSTER), 1887, A., 298.
nitrites in (MUSGRAVE), 1883, A., 227.
formation of nitrous and nitric acids in, from formaldehyde and ammonia (WURSTER), 1889, A., 1228.
detection of nitrous acid in (ILOSVAY), 1890, A., 278.
secretion of (LANGLEY and FLETCHER), 1889, A., 534.
Salivary secretion, influence of atropine and nicotine on (LANGLEY), 1888, A., 1216; 1890, A., 397.
Salol. See Phenylic salicylate.
Salsify, cooked, composition of (WILLIAMS), 1892, T., 227.
Salt, a, displacement of, from its solution by another salt (lecture experiment) (RUDÖRFF), 1885, A., 869.
common. See Sodium chloride.
Glauber's. See Mirabilite and Sodium sulphate.
Salt-cake. See Sodium sulphate.
Saltpetre. See Potassium nitrate.
Chili. See Sodium nitrate.
Salts, formation of (ARMSTRONG), 1891, P., 118.

Salts, containing chromium and urea, series of (Sell), 1883, A., 178; 1889, A., 695.
containing water of crystallisation, dissociation and constitution of (Müller-Erzbach), 1884, A., 952; 1886, A., 10; 1887, A.,207; 1890, A., 206.
water of crystallisation of (Salzer), 1884, A., 806; 1892, A., 581.
crystallisation of, during the electrolysis of their solutions (Pagliani), 1888, A., 892.
magnetic rotation of dissolved (Ostwald), 1892, P., 12.
temperature of decomposition of, apparatus for the determination of (Bailey), 1886, P., 205.
heat of solution of, in different liquids (Pickering), 1888, T., 871, 875.
heat of solution of, in water (Scholz), 1892, A., 676.
influence of temperature on the heat of solution of (Tilden), 1886, A., 499; (Pickering), 1887, T., 290; P., 66.
heat of formation of, in alcoholic solution (van Deventer and Reicher), 1890, A., 553; 1892, A., 262.
relation between the heat of formation of, and the initial rate of their formation (Potilizin), 1886, A., 116.
heat of hydration of (Pickering), 1884, A., 803; 1886, T., 417; P., 257; 1887, T., 75.
thermal relationships between water and (Illingworth and Howard), 1885, A., 339.
constancy of the heat produced by the reaction of certain, on each other (Pickering), 1888, A., 333.
electrolysis of (Renard), 1886, A., 115, 407.
conduction of electricity by the vapours of heated (Arrhenius), 1891, A., 515.
electrical conductivity of (Kohlrausch), 1886, A., 114; (Ostwald), 1888, A., 331; (Jäger), 1888, A., 397.
electrical conductivity of, in the Bunsen flame (Arrhenius), 1891, A., 5.
electrical conductivity of fused (Poincaré), 1889, A., 457; (Graetz), 1890, A., 1037.
electrical conductivity of solid (Graetz), 1890, A., 1037.
Salts, electrical conductivity of mixtures of (Bouty), 1886, A., 839.
determination of the electrolytic dissociation of, by means of solubility experiments (Noyes), 1891, A., 142; 1892, A., 1143.
coloured, electrolytic dissociation of, and absorption of light by (Magnanini), 1892, A., 757.
electrical resistance of, in the Bunsen flame (Arrhenius), 1891, A., 5.
electrical transport of dissolved (Chassy), 1889, A., 665.
voltaic energy of, dissolved (Gore), 1890, A., 317.
molecules of, determination of the size of, from the electrical conductivity of their aqueous solutions (Jäger), 1888, A., 217; (Walden), 1888, A., 891, 1008.
osmose of (Enklaar), 1883, A., 420.
melting points of (Maumené), 1884, A., 3.
capillary constants of, at their melting points (Traube), 1892, A., 7.
cryohydrates of mixtures of (Mazzotto), 1891, A., 388.
dissociation of, in very dilute solutions (Wiedemann), 1888, A., 1021; (Planck), 1888, A., 1144; (Mendeléeff), 1890, A., 325.
chemical neutrality of, and the use of different indicators in acidimetry (Berthelot), 1885, A., 472.
deliquescence and efflorescence of, in relation to the maximum vapour tensions of their saturated solutions (Lescœur), 1887, A., 208.
variation of density with the concentration of weak aqueous solutions of (McGregor), 1891, A., 254.
specific gravity of aqueous solutions of certain (McGregor), 1887, A., 209.
specific gravity of soluble (Retgers), 1889, A., 812, 1101.
solubility of (Etard), 1884, A., 887; (Le Chatelier), 1889, A., 671.
solubility of mixtures of (Rüdorff), 1885, A., 865; (Etard), 1890, A., 442, 443.
mixed, solubility of, in water (Bodländer), 1891, A., 795.
mutual solubility of, in water (Nicol), 1892, A., 8; (Trevor), 1892, A., 264.
solubility of, in water at various temperatures (Raupenstrauch), 1885, A., 1181.

Salts, solubility of, in water at high temperatures (Tilden and Shenstone), 1884, A., 254.
sudden changes in the solubility of, caused by the formation of two layers in the liquid (Roozeboom), 1890, A., 4.
reciprocal influence on the solubility of (Nernst), 1890, A., 3.
relation between the solubility of salts and their melting points (Etard), 1889, A., 460.
solubility curves of (Etard), 1884, A., 807.
solubility curves of pairs of (Roozeboom), 1892, A., 1384.
conditions of equilibrium between solid and liquid compounds of water with (Roozeboom), 1889, A., 752.
general law of diminution of volume of, by solution in water (Heritsch), 1889, A., 461.
change of volume on dissolving, in water (Schmidt), 1890, A., 844.
decompositions of, by fused substances (Ditte), 1883, A., 11.
decomposition of, by water (Le Chatelier), 1884, A., 807; 1885, A., 630.
stability of, alone and in presence of water (Berthelot), 1890, A., 1361.
dehydrating action of (Tommasi), 1884, A., 1251.
substitution of, in mixed solutions (Etard), 1890, A., 443.
absorption of, by plants (Berthelot and André), 1888, A., 739.
comparative nitrifying effect of (Pichard), 1884, A., 924, 1417.
influence of, on certain digestive processes (Pfeiffer), 1885, A., 827.
action of, on heat coagulation (Ringer and Sainsbury), 1891, A., 954.
precipitation of colloid substances by (Nasse), 1889, A., 99.
estimation of water and carbonic acid in (Chatard), 1890, A., 417.

Salts, alkali, freezing points of solutions of (Raoult), 1884, A., 701.
alkali, influence of alkaline bases and of the hydroxides on the solubility of (Engel), 1891, A., 1318.
of the alkalis and alkaline earths, influence of, on clotting (Ringer and Sainsbury), 1890, A., 1176.
of ammonium, the amines, the alkali metals and the alkaline earths, physiological action of (Brunton and Cash), 1884, A., 348.
basic, constitution of (Pickering), 1888, A., 111.

Salts, basic, investigation of (Habermann), 1885, A., 351.
double, formed by fusion (Berthelot and Ilosvay), 1883, A., 11; 1884, A., 704.
  heat of formation of (Pickering), 1886, T., 287.
  electrical conductivity of (Klein), 1886, A., 407; (Kistiakowski), 1891, A., 6.
  action of water on (Raoult), 1885, A., 122.
  solubility of (Meyerhoffer), 1892, A., 1145.
  solutions of (Trevor), 1891, A., 973.
  basic (Klinger), 1883, A., 904.
double and acid, existence of, in aqueous solutions (Thomsen), 1886, A., 925.
double and simple, refractive power of (Doumer), 1890, A., 433.
double and complex (Kistiakowski), 1891, A., 6.
Epsom. See Magnesium sulphate.
ethereal. See Ethereal salts.
hydrated, constitution of (Wiedemann), 1883, A., 780.
  melting points, and their relation to the solubility of (Tilden), 1884, T., 266.
  electrolysis of (Gladstone and Tribe), 1884, A., 654.
  dissociation of (Frowein), 1888, A., 337.
  rate of dissociation as a measure of the vapour tension of (Schulze), 1888, A., 104.
  tension of aqueous vapour of (Müller-Erzbach), 1885, A., 213; (Tammann), 1885, A., 862.
  crystalline, constant vapour pressure of (Andreae), 1891, A., 781.
  double (Roozeboom), 1888, A., 1164.
inorganic, residual affinity of (Lachowicz), 1890, A., 444.
inorganic, influence of, on the development of frogs' spawn (Ringer), 1890, A., 393.
metallic, electromotive force of (Speyers), 1890, A., 843; 1892, A., 255.
  action of sodium thiosulphate on (Jochum), 1886, A., 17.
  action of sulphur on (Vortmann and Padberg), 1890, A., 9.
  organic liquids as solvents for (Etard), 1892, A., 558.
  relative toxic power of (Blake), 1883, A., 745.

Salts of divalent metals, freezing points of solutions of (RAOULT), 1884, A., 808.
  mineral, estimation of, in wine (SCHNEIDER), 1891, A., 371.
  neutral, influence of, on chemical reactions (SPOHR), 1888, A., 1025.
    relative absorption of, in the human stomach (JAWORSKI), 1884, A., 193.
    bases of, mutual displacement of, in homogeneous systems (MENSCHUTKIN), 1883, A., 550, 708.
  photo-. See Photo-salts under Photochemistry.
  See also Solution.
Salt-works of Giraud in France (LUNGE), 1884, A., 513.
Samarium (BRAUNER), 1883, T., 286; (CLEVE), 1883, T., 362.
  atomic weight of (CLEVE), 1883, T., 365; (BETTENDORFF), 1891, A., 985.
  spectrum of (CLEVE), 1883, T., 366; (LECOQ DE BOISBAUDRAN), 1885, A., 621; 1892, A., 780; (DEMARÇAY), 1886, A., 837; 1887, A., 1008.
  and yttrium, mutual extinction of the spectra of (CROOKES), 1885, A., 1025.
  separation of (CLEVE), 1883, T., 363.
  compounds of (CLEVE), 1883, T., 362; 1885, A., 636.
  oxide (BETTENDORFF), 1891, A., 985.
  oxides, new fluorescences of (LECOQ DE BOISBAUDRAN), 1890, A., 435.
Samarskite from Berthier Co., Quebec (DONALD), 1884, A., 894.
  from Colorado (HILLEBRAND), 1892, A., 416.
  elements in (CROOKES), 1887, A., 334.
  analysis of (SMITH), 1884, A., 111.
Sand, siliceous, of Monte Soratte (GIORGIS), 1892, A., 23.
Sandal wood, essence of (CHAPOTEAUT), 1883, A., 76.
  essence of, adulteration of (MESNARD), 1892, A., 1379.
  red, homopterocarpin and pterocarpin from (CAZENEUVE and HUGOUNENQ), 1889, A., 160.
Sandmeyer's reaction (LELLMANN and REMY), 1886, A., 625; (AHRENS), 1888, A., 266.
  improvement in (TOBIAS), 1890, A., 1149.
  use of sodium hypophosphite in (ANGELI), 1892, A., 305.

Scolecite from Striegau (Traube), 1887, A., 903.

Scopolamine (Schmidt), 1892, A., 1255; (Ladenburg), 1892, A., 1498.

Scopoleine (Eijkman), 1885, A., 404.

Scopoletin (Eijkman), 1885, A., 404; (Takahashi), 1889, A., 255.

Scopolia atropoides, constituents of (Siebert), 1890, A., 658.
  root constituents of (Schmidt), 1891, A., 228.

Scopolia carniolica, chemical constituents of (Dunstan and Chaston), 1890, A., 402.

Scopolia Hlardnackiana (*Hladnikiana*), alkaloids of (Schmidt), 1888, A., 856.

Scopolia japonica, alkaloids of (Schmidt and Henschke), 1888, A., 856.
  poisonous constituents of (Eijkman), 1885, A., 404.

Scopolia-root, constituents of (Henschke), 1888, A., 82.

Scopoline (*oscine*) (Eijkman), 1885, A., 404; (Hesse), 1892, A., 1498.

Scorodite from Utah (Chester), 1887, A., 783.
  deposited from the arsenical waters of the Yellowstone Park (Hague), 1888, A., 122.

Scovillite. See Rhabdophane.

Scutellarin (Takahashi), 1890, A., 64.

Sea-kale, cooked, composition of (Williams), 1892, T., 227.

Sea-mud. See Mud, marine.

Seas, silica and siliceous remains of organisms in (Murray and Irvine), 1891, A., 995.

Sea-water. See Water.

Seaweed, dye from (Nettlefold), 1888, A., 1313.

Sebacamide (Phookan and Krafft), 1892, A., 1180.

Sebaceo*di*nitranilide (Gehring), 1887, A., 935.

Sebacic acid (*ipomic acid*), boiling points of (Krafft and Noerdlinger), 1889, A., 691.
  thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1097.
  heat of combustion of (Luginin), 1889, A., 5.
  oxidation of (Carette), 1886, A., 335.
  derivatives of (Phookan and Krafft), 1892, A., 1180.
  *di*bromo-, and its derivatives (Claus and Steinkauler), 1888, A., 133; (Auwers and Bernhardi), 1891, A., 1191.

Sebacyldibenzamic acid (Pellizzari), 1885, A., 534.

Secondary batteries. See Accumulators under Electrochemistry.

Seeds. See Agricultural Chemistry.

Selenazole, derivatives of (Hantzsch), 1888, A., 574; (Hofmann), 1889, A., 726.

Selenazylamine (Hofmann), 1889, A., 727.

Selenious anhydride. See Selenium *di*oxide.

Selenium (Kalischer), 1888, A., 99; (Hinsberg), 1891, A., 393.
  in meteoric iron (Warren), 1888, A., 435.
  minerals, from Cacheuta (Bertrand), 1884, A., 406.
    from Honduras (Dana and Wells), 1891, A., 153.
  allotropic states of (Petersen), 1892, A., 405.
  sulphur and tellurium, isomorphism of (Muthmann), 1891, A., 1417.
  extraction of, from a waste product (Kienlen), 1883, A., 16.
  preparation of, on a large scale (Bornträger), 1883, A., 852.
  electromotive force produced by the action of light on (Kalischer), 1887, A., 693; 1888, A., 99; 1889, A., 3; 1890, A., 97; (v. Uljanin), 1888, A., 883; 1889, A., 202; (Righi), 1889, A., 555.

Selenium, influence of light on the heat conductivity of (Bellati and Lussana), 1888, A., 98.
  heat of transformation of vitreous into metallic (Fabre), 1886, A., 840.
  boiling point of (Troost), 1883, A., 17.
  action of the vapour of, on red-hot charcoal (Gore), 1885, A., 120.
  action of, on aqueous silver nitrate (Senderens), 1887, A., 331.
  alums (Fabre), 1887, A., 1014.
Selenium chlorides, electrolytic conductivity of (Hampe), 1888, A., 889.
    thermochemical investigations on the (Thomsen), 1883, A. 543.
    vapour densities of (Chabrié), 1890, A., 558.
    dissociation of (Ramsay), 1891, A., 11.
  *mono*chloride, action of heat on (Evans and Ramsay), 1884, T., 62.
  *tetra*chloride, action of heat on, and vapour density of, at various temperatures (Evans and Ramsay), 1884, T., 65.
    compound of auric chloride with (Lindet), 1886, A., 310.
  bromo*tri*chloride, chloro*tri*bromide and *di*chloro*di*bromide (Evans and Ramsay), 1884, T., 68.
  selenochloride (Divers and Shimosé), 1884, T., 195, 198.
    relation between sulphur *tri*oxide and (Divers and Shimosé), 1884, T., 197.
  Hydrogen selenide. See Hydrogen selenide.
  Selenides from the Andes (Heusler and Klinger), 1886, A., 22.
    of the alkaline earths (Favre), 1886, A., 840.
Selenium *di*oxide (*selenious anhydride*), solubility of (Etard), 1888, A., 645.
    compounds of ammonia with (Cameron and Macallan), 1889, A., 103.
  Selenious acid, crystals of (Hinsberg), 1891, A., 393.
    molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 593.
    action of sulphurous acid on (Schulze), 1886, A., 302.
    reactions of, with hydrogen sulphide (Divers and Shimidzu), 1885, T., 441; P., 52.
    saturation of, by bases (Blarez), 1887, A., 106.
  Selenious acid, physiological action of (Chabrié and Lapicque), 1890, A., 542.
  Selenites (Boutzoureanu), 1888, A., 220; 1891, A., 262.
    relation of, to sulphites (Divers and Shimidzu), 1886, T., 584.
  Selenic acid, preparation, properties and reactions of (Cameron and Macallan), 1890, A., 688.
    molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 593.
  Selenates, crystallised, formation of, in the dry way (Michel), 1888, A., 650.
Selenium sulphoxide (Divers and Shimosé), 1883, T., 329; 1884, T., 194, 201; (Divers and Shimidzu), 1886, T., 583.
    compound of (Weber), 1887, A., 212.
  sulphoxychloride (Divers and Shimosé), 1884, T., 196.
  sulphide, nature of (Divers and Shimidzu), 1885, T., 446; (Rathke), 1885, A., 954.
  Selenosulphuric acid, detection of nitrogen compounds in (Lunge), 1887, A., 998.
  Selenothiostannic acid, salts of (Ditte), 1883, A., 156.
Selenium selenocyanate (Verneuil), 1886, A., 1002.
  Selenious cyanide (Hinsberg), 1891, A., 393.
Selenium, detection, estimation, and separation:—
  microchemical test for (v. Haushofer), 1887, A., 301.
  estimation of (Warren), 1888, A., 435; (Boutzoureanu), 1891, A., 262.
  simple method for the quantitative separation of tellurium from (Divers and Shimosé), 1885, T., 439; P., 53.
*di***Selenobisethylamine hydrochloride** (Coblentz), 1891, A., 1216.
*di***Selenobispropylamine** (Coblentz), 1891, A., 1216.
Selenocyanacetic acid (Hofmann), 1889, A., 726.
Selenocyan-acetone and **-acetophenone** (Hofmann), 1889, A., 726.
β-Selenocyanethylphthalimide (Coblentz), 1891, A., 1216.
Selenocyanogen derivatives (Hofmann), 1889, A., 726; (Hagelberg), 1890, A., 949.
γ-Selenocyanpropylphthalimide (Coblentz), 1891, A., 1216.

Seleno-diethylaniline and **-dimethylaniline** (Godchaux), 1891, A., 696.
Selenohydantoin (Hofmann), 1889, A., 727.
Selenophenol (Chabrié), 1889, A., 1167.
Seleno-phthalide and **-phthalimidine** (Drory), 1891, A., 1460.
Selenoxylen (Paal), 1885, A., 1207.
"**Selentellurium**" (Dana and Wells), 1891, A., 153.
Sellaite (Sella), 1888, A., 657.
Seminose (Fischer and Hirschberger), 1889, A., 687; (Reiss), 1889, A., 687; 1891, A., 356.
Semithiocarbazides and the relations between their solubilities and melting points (Dixon), 1890, T., 257, 264; P., 25.
  disubstituted (Dixon), 1892, T., 1012; P., 153.
Semseyite (Sipöcz), 1886, A., 313.
Senarmontite crystals, pseudomorphic (Hintze), 1883, A., 430.
  See also Antimonous oxide.
Senegin. See Saponin under Glucosides.
Seneginin (Funaro), 1890, A., 262.
Senna leaves, active principle of (Stockman), 1885, A., 991.
Sensitisers, photographic. See Photochemistry.
Separators (cream), comparison of (Fjord), 1884, A., 1447.
  Danish, experiments with (Schmoeger), 1886, A., 290.
Sepia officinalis, blood of (Griffiths), 1892, A., 648.
Sepiaic acid (Nencki and Sieber), 1888, A., 976.
Sepine (Niementowski), 1886, A., 933.
Sepsin, Panum's, ptomaines and their genesis in relation to (Wyborn), 1889, A., 421.
Septadecyl-. See Heptadecyl-.
Sericite from the quartz-phyllite of Wiltau, analysis of (Senhofer), 1885, A., 736.
  rocks in ore deposits (v. Groddeck), 1883, A., 168; 1888, A., 795.
Sericoin (Weyl), 1888, A., 857.
Serin, absorption spectrum of (Hartley), 1887, T., 59.
Serpentine (Schubert), 1883, A., 36.
  from the Alps (Hussak), 1883, A., 562.
  of Borzanasca (Montemartini), 1892, A., 1058.
  from Canada (Harrington), 1891, A., 647.
  of Colle di Cassimoreno and Monte Ragolo (Montemartini), 1889, A., 111.
Serpentine from Finland (Tschajtschinsky), 1890, A., 715.
  from Franklin, New Jersey (König), 1887, A., 646; 1888, A., 565.
  from Montville, New Jersey (Merrill), 1890, A., 716.
  of the Onondaga salt-group at Syracuse (Williams), 1888, A., 120.
  electrical conductivity of (Wiechert), 1886, A., 113.
  See also Magnesium silicate.
Serpentine-chlorite group, minerals of (Wartha), 1887, A., 783.
Serpentines from Porthalla Cove, Cornwall (Collins), 1887, A., 1022.
Serum and plasma (Wright), 1892, A., 1113.
  colouring matter of (Halliburton), 1886, A., 1050.
  proteids of (Halliburton), 1885, A., 571.
  proteids of, action of salts on the (Lewith), 1889, A., 424.
  toxicity of (Charrin), 1892, A., 228.
  albumin. See Albumin.
  blood-, new constituent of (Wooldridge), 1887, A., 983.
  blood-, new proteid from (Chabrié), 1892, A., 224.
  fibrinogen (Wooldridge), 1887, A., 983.
  lutein (Halliburton), 1886, A., 1050.
  milk-, analyses of (Söldner), 1889, A., 635.
Sesame cake, albuminoids in (Ritthausen), 1883, A., 360.
Sesame oil. See Oil.
Sesame seed, properties of, and behaviour of, in the animal system (Langlebert), 1884, A., 852.
"**Seshime-urushi**" (Yōshida), 1883, T., 473.
Sesqui-magnesia alum (Darapsky), 1887, A., 558.
Sesquiterpene. See Terpene.
Sèvres blue, manufacture of (Lauth), 1884, A., 644.
Sewage, filtration of, through peat (Müller), 1885, A., 1268.
  methods used for the disposal of (Müller), 1884, A., 642.
  use of carbolic acid in the disinfection of (Kellner), 1884, A., 697.
  utilisation of (Engler), 1884, A., 1418.
  estimation of ammonia in (Hazen), 1890, A., 1024.
  estimation of nitrogen in (Nichols and Allen), 1886, A., 1072.
  estimation of, in water. See Water.

Sewers, air of (Carnelley and Haldane), 1888, A., 532.
Sewer gases (Fischer), 1883, A., 886.
Shaking, apparatus for (Tafel), 1889, A., 934.
"**Shale spirit,**" composition of (Miller and Baker), 1887, P., 97.
"**Shale-tar,**" relation between petroleum and the hydrocarbons of (Kraemer and Böttcher), 1887, A., 648.
Sheep. See Agricultural Chemistry.
Shellac (Benedikt and Ehrlich), 1888, A., 846; (Benedikt and Ulzer), 1888, A., 1308.
 refining of (Andés), 1884, A., 380.
Shells, organic basis of (Engel), 1891, A., 236.
 solubility of, in sea water (Thoulet), 1889, A., 682.
Sherry, sulphuric acid in (Borgmann), 1883, A., 829.
 pure, analyses of (Borgmann and Fresenius), 1889, A., 476.
Shikimene, shikimin and **shikimipicrin** (Eijkman), 1886, A., 95.
Shikimic acid (Eijkman), 1886, A., 95; 1887, A., 497; 1891, A., 919.
 *di*bromide (Eijkman), 1891, A., 920.
Shikimolactone, bromo- (Eijkman), 1891, A., 920.
Shikimole. See Safrole.
Shot, analysis of (Hardaway), 1887, A., 446.
Siderite, analysis of a variety of (Claassen), 1883, A., 559.
 from Carinthia (Brunlechner), 1888, A., 233.
 See also Sapphirine.
Siderolithic horizon, origin and formation of masses of calcium phosphate in sedimentary rocks and their relation to the iron ores and clays of (Dieulafait), 1884, A., 1272; 1885, A., 127.
Sideronatrite from Chili (Genth and Penfield), 1891, A., 274.
Siegburgite (Klinger and Pitschke), 1885, A., 220.
Siemens' mercury unit, reproduction of (Strecker), 1885, A., 1027, 1099.
Siemens' pyrometer, modification of (Spohr), 1886, A., 112.
Siemens-Martin process (Jungck), 1885, A., 98.
Siennas (Hurst), 1889, A., 678.
Sigterite, a new felspar from Sigterö (Rammelsberg), 1891, A., 22; (Tenne), 1891, A., 1438.
Silage. See Agricultural Chemistry.
Silent discharge. See under Electrochemistry.
Silfbergite (Weibull), 1884, A., 409; 1886, A., 34.
Silica. See Silicon *di*oxide.
Siliceous earth from Morris Co., New Jersey (McKelvey), 1885, A., 361.
Silicobromoform (Besson), 1891, A., 642.
 preparation of (Gattermann), 1889, A., 342.
Silicocarbonate, crystalline, from soda liquors (Rammelsberg), 1887, A., 12.
Silicochloroform, preparation of (Gattermann), 1889, A., 342.
Silico-di-β-naphthyldiamide, -diphenyldiamide, -2-ditolyldiamide and **-dixylyldiamide,** *di*chloro- (Harden), 1886, P., 251; 1887, T., 40.
Silicoformic acid, preparation of (Gattermann), 1889, A., 343.
Silicon (Schützenberger and Colson) 1883, A., 15; (Warren), 1891, A., 799.
 atomic weight of (Thorpe and Young), 1887, T., 576; P., 60.
 preparation of (Warren), 1888, A., 415; 1889, A., 212; (Rawson) 1889, A., 211; (Gattermann), 1889, A., 342; (Harris), 1890, A., 108.
 preparation of, by electrolysis (Hampe), 1889, A., 103.
 spectrum of (Hartley), 1883, T., 397; 1884, A., 242.
 electro-deposition of (Gore), 1885, A., 110.
 electrolysis of fused compounds of (Minet), 1891, A., 1321.
 influence of, on the condition of carbon in cast-iron (Gautier), 1887, A., 220.
 apparent volatilisation of, at 440° (Hautefeuille and Perrey), 1885, A., 872.
 action of, on gold, silver, platinum and mercury (Warren), 1889, A., 1125.
 influence of, on the properties of iron and steel (Turner), 1885, T., 577, 902; P., 85, 100; 1886, T., 130; P., 133, 266; 1887, T., 129, 141; 1888, T., 844; (Jordan and Turner), 1886, T., 215; (Osmond), 1890, A., 567; 1892, A., 19.
 action of magnesium on (Winkler), 1890, A., 1373; 1891, A., 801.
 graphitoidal, reducing action of (Warren), 1892, A., 115.
 alloy of, with titanium and aluminium (Lévy), 1888, A., 423.
Silicon *tetra*bromide, preparation of (Gattermann), 1889, A., 342.

Silicon *tetra*bromide, molecular refraction and dispersion of (Gladstone), 1891, T., 299.
  action of, on thiocarbamide (Reynolds), 1887, T., 202.
  compounds of, with ammonia and hydrogen phosphide (Besson), 1890, A., 559.
 bromiodides (Besson), 1891, A., 1419.
 bromochlorides (Besson), 1891, A., 981.
 carbide (Schützenberger), 1892, A., 1050.
 *tetra*chloride, preparation of (Gattermann), 1889, A., 342; (Warren), 1890, A., 108.
  molecular refraction and dispersion of (Gladstone), 1891, T., 299.
  action of hydrogen bromide on (Besson), 1891, A., 981.
  action of hydrogen iodide on (Besson), 1891, A., 800.
  action of, on substituted phenylamines (Reynolds), 1892, T., 453; P., 73.
  reactions of (Rauter), 1892, A., 1273.
  combination of ammonia and hydrogen phosphide with (Besson), 1890, A., 559.
 *sesqui*chloride, combination of ammonia and hydrogen phosphide with (Besson), 1890, A., 690.
 thiochloride (Besson), 1892, A., 404.
 phosphoric chloride (Stokes), 1891, A., 815.
 pyrophosphoryl chloride (Stokes), 1891, A., 1171.
 chloriodides (Besson), 1891, A., 801, 1418.
 chlorobromide (Reynolds), 1887, T., 590; P., 72.
 *tetra*fluoride, spectra of (Wesendonck), 1884, A., 649.
  heat of formation of (Guntz), 1884, A., 1246.
  temperature of solidification of (Olszewski), 1884, A., 817.
  combination of hydrogen phosphide with (Besson), 1890, A., 448.
  compounds of, with organic bases (Jackson and Comey), 1887, A., 243; (Comey and Smith), 1888, A., 1283.
 hydride, preparation of, as a lecture experiment (Mermet), 1887, A., 769.
  spectra of (Wesendonck), 1884, A., 649.
 *tetr*iodide, preparation of (Gattermann), 1889, A., 342.

Silicon iodochlorides (Besson), 1891, A., 800.
 nitride (Harris), 1890, A., 108.
 *di*oxide (*silica*), amorphous (Lindo), 1884, A., 1258.
  colloidal (van Bemmelen), 1888, A., 1158.
  crystallised (Michel-Lévy and Munier-Chalmas), 1890, A., 712.
  crystallised, artificial production of (v. Chrustschoff), 1887, A., 559.
  fibrous, from serpentines (Terreil), 1885, A., 490.
  hydraulic, and its functions in hydraulic cements (Landrin), 1883, A., 754; (Le Chatelier), 1883, A., 755.
  vitreous (Lindo), 1884, A., 1258.
  preparation of soluble (Grimaux), 1884, A., 958.
  and the siliceous remains of organisms in seas (Murray and Irvine), 1891, A., 995.
  expansion of (Le Chatelier), 1890, A., 1371.
  artificial pseudomorphism of (Gorgeu), 1884, A., 895.
  action of, on haloid salts of the alkalis (Gorgeu), 1886, A., 664.
  action of hydrofluoric acid on (Mackintosh), 1886, A., 979.
  action of different varieties of, on lime-water (Landrin), 1883, A., 712.
  action of magnesium on (Winkler), 1890, A., 1374; 1891, A., 801.
  action of, on potassium chlorate (Fowler and Grant), 1890, T., 276.
  behaviour of, in fused microcosmic salt (Hirschwald), 1890, A., 825.
  combination of phosphoric acid with (Hautefeuille and Margottet), 1883, A., 782.
  See also Lussatite, Quartz, and Tridymite.
 Silicic acid, molecular weight of (Sabanéeff), 1890, A., 1216.
  as a culture medium for organisms (Kühne), 1890, A., 1338.
  heat of coagulation of (Wiedemann and Luedeking), 1885, A., 1031.
  dehydration of, by heat (Carnelley and Walker), 1888, T., 66, 80.
  decomposition of, by leaves (Denaro), 1887, A., 70.
  colloidal solutions of (Picton and Linder), 1892, T., 154.
  crystalline (Hager), 1888, A., 915.
  nitro-, existence of (Rousseau and Tite), 1892, A., 684.

Silicic acids in minerals (BECKER), 1890, A., 342.

Silicate, a crystallised hydrated, artificial production of (DE SCHULTEN), 1883, A., 33.
  containing copper and silver (JACQUEMIN), 1891, A., 275.
  fibrous, from Nelson Co., Virginia (PATTERSON), 1886, A., 131.

Silicates, amorphous, from Budapest (KOCH), 1891, A., 1438.
  isomorphous (RAMMELSBERG), 1886, A., 30.
  undetermined, from the Kaiserstuhl (KNOP), 1891, A., 650.
  formation of (LEMBERG), 1885, A., 1187; 1890, A., 113; (GORGEU), 1890, A., 13.
  artificial production of (BOURGEOIS), 1884, A., 564.
  formulæ of (GOLDSCHMIDT), 1890, A., 219.
  natural, chemical structure of (CLARKE), 1888, A., 659; (SCHNEIDER), 1889, A., 23.
  natural, constitution of (CLARKE and SCHNEIDER), 1891, A., 529.
  action of ammonium chloride at its dissociation temperature on (SCHNEIDER and CLARKE), 1892, A., 772.
  action of hydrofluoric acid on (MACKINTOSH), 1886, A., 979.
  behaviour of, in fused microcosmic salt (HIRSCHWALD), 1890, A., 825.
  behaviour of, when fused with phosphates (V. HAUSHOFER), 1890, A., 84.
  method for decomposing (JANNASCH), 1891, A., 619.
  decomposition of, for analysis (JOHNSTONE), 1889, A., 440.
  in soil, decomposition of, by lime and gypsum (DE MARNEFFE), 1891, A., 1135.
  ethereal, action of phosphorus oxychloride on (STOKES), 1891, A., 814.
  alteration of (LEMBERG), 1885, A., 1187.
  analysis of (KNOP), 1883, A., 379; (HUTCHINGS), 1887, A., 181; (BURGHARDT), 1890, A., 1027; (CLARKE), 1892, A., 945.
  analysis of, containing tin and titanium (HILGER and HAAS), 1890, A., 666.
  estimation of alkalis in (CHATARD), 1885, A., 296; (HOLLAND), 1887, A., 181.

Silicates, estimation of ferrous oxide in insoluble (CHESTER and CAIRNS), 1888, A., 196.
  estimation of titanium in natural (HOLLAND), 1889, A., 443.
  estimation of water in (JANNASCH), 1889, A., 546.
  separation, quantitative, of potash and soda from alumina, ferric oxide, lime and magnesia in (KNOP), 1884, A., 110.
  Hydrofluosilicic acid. See under Fluorine.

Silicon phosphate (HAUTEFEUILLE and MARGOTTET), 1885, A., 120; 1887, A., 329.
  selenide (SABATIER), 1891, A., 1419.
  calcium stannate (BOURGEOIS), 1887, A., 333.
  sulphides (SABATIER), 1883, A., 15.
  calcium zirconate (OUVRARD), 1891, A., 1432.

Silicon, estimation:—
  estimation of (CRAIG), 1890, A., 194.
  estimation of, in aluminium (HUNT, CLAPP, and HANDY), 1892, A., 1130.
  estimation of, in fluorides (HAMPE), 1892, A., 1127; (REGELSBERGER), 1892, A., 1128.
  estimation of, in iron and steel (ANON.), 1883, A., 883; (TURNER), 1884, T., 260; 1887, A., 1140; 1888, A., 195; (BLUM), 1886, A., 835; (STRICK), 1887, A., 527; (MORGAN), 1887, A., 1140; 1888, A., 195; (LECLERE), 1891, A., 1397.
  estimation of, in ores (AUSTEN and WILBER), 1884, A., 493.
  estimation of, in organic compounds (POLIS), 1886, A., 649.
  estimation of, in silicates (GILBERT), 1890, A., 1026.
  estimation of, in soils (VAN BEMMELEN), 1890, A., 833.

Silicon-bronze, Weiller's (MÜLLER), 1885, A., 308.

Silico-tetrabenzyl, -tetraphenyl and **tetratolyl** and their derivatives (POLIS), 1885, A., 973; 1886, A., 618.

Silicotetra-α-and-β-naphthylamides and *-o-* and *-p-***tolylamides** (REYNOLDS), 1889, T., 478.

Silicotetraphenylamide (REYNOLDS), 1889, T., 475; A., 504.

Silk (WEYL), 1888, A., 857.
  rotatory power of (VIGNON), 1892, A., 254, 645.
  thermochemical properties of (VIGNON), 1890, A., 553.

- **Silk**, specific gravity of (Vignon), 1892, A., 1036.
  - chemical process which takes place in dyeing, with basic coal-tar dyes (Knecht), 1888, A., 832.
  - absorption of different acids by, from different mixtures of acids and of weak reagents by (Mills and Takamine), 1883, T., 142, 149.
  - action of boiling dilute sulphuric acid on (Weyl), 1888, A., 857.
  - behaviour of different ferric oxide mordants with (Liechti and Suida), 1885, A., 315.
  - process for finishing, with amber (Thümmel), 1884, A., 799.
  - nitrated (Vignon and Sisley), 1892, A., 1111.
  - yellow, the colouring matter of, and its relation to carrotene (Dubois), 1891, A., 98.
  - estimation of, in tissues (Rémont), 1885, A., 96.
- **Silk-tissue**, detection of vegetable fibre in (Fubino), 1892, A., 667.
- **Silkworms.** See Agricultural Chemistry.
- **Sillimanite**, production of (Wernadski), 1890, A., 1074.
  - synthesis of (Meunier), 1891, A., 22.
- **Silver**, atomic weight of (Meyer and Seubert), 1885, T., 434; (Shaw), 1887, A., 444; (Richards), 1888, A., 916; (Stas), 1890, A., 561; (Seubert), 1891, A., 885.
  - molecular weight of (Ramsay), 1889, T., 532.
  - (metal) a remarkable nugget of (Kunz), 1888, A., 346.
    - native, from the French Congo (Jannettaz), 1891, A., 647.
    - in volcanic dust (Mallet), 1887, A., 454; 1891, A., 277.
    - containing bismuth (Gowland and Koga), 1887, T., 410; P., 45.
    - Chaldean (Berthelot), 1887, A., 443.
    - allotropic or colloidal (Lea), 1890, A., 210, 334; 1891, A., 803; 1892, A., 15, 116; (Pranger), 1891, A., 266; (Schneider), 1892, A., 117, 941; (Petersen), 1892, A., 405.
    - pure, preparation of (Schneider), 1892, A., 775.
    - extraction of, from ores by means of sodium thiosulphate (anon.), 1884, A., 1084.
    - purification of, by electrolysis (anon.), 1885, A., 941.
    - pure, properties of (Brauner), 1889, T., 399.
- **Silver** (metal), ductility of, effects produced by small quantities of bismuth on (Scully), 1888, A., 108.
  - spectrum of (Hartley), 1883, T., 396.
  - fused, and fused platinum, comparative radiation of (Violle), 1887, A., 1010.
  - specific heat of (Naccari), 1888, A., 1236.
  - electrical resistance of (Le Chatelier), 1891, A., 5.
  - electrochemical equivalent of (F. and W. Kohlrausch), 1884, A., 1089; (Rayleigh and Sidgwick), 1885, A., 469.
  - electrolysis of (Gray), 1887, A., 315.
  - permeability of, to oxygen (Troost), 1884, A., 961.
  - absorption of oxygen by (Neumann), 1892, A., 943.
  - (*of Stas*) occlusion of oxygen in (Brauner), 1889, T., 400.
  - lowering of the freezing-points of bismuth, cadmium, and lead by (Heycock and Neville), 1892, T., 895, 900, 907; P., 145.
  - influence of, on the freezing-point of gold (Roberts-Austen), 1891, A., 1161.
  - effect of, on the freezing-point of sodium (Heycock and Neville), 1889, T., 674.
  - effect of, on the freezing-point of tin (Heycock and Neville), 1890, T., 377.
  - action of bromine on (Gautier and Charpy), 1892, A., 118.
  - action of chlorine on (Cowper), 1883, T., 154; (Gautier and Charpy), 1892, A., 118.
  - action of hydrogen sulphide on (Cabell), 1885, A., 124.
  - action of nitric acid on (Divers), 1883, T., 456; 1885, T., 230; (Montemartini), 1892, A., 1403.
  - action of nitric *per*oxide on (Divers and Shimidzu), 1885, T., 632.
  - action of nitrosyl chloride on (Sudborough), 1891, T., 659.
  - action of potassium *per*manganate on (Friedheim), 1887, A., 1079; 1888, A., 415.
  - action of silicon on (Warren), 1889, A., 1125.
  - oxidation of (v. der Pfordten), 1888, A., 221; (Le Chatelier), 1888, A., 651.
  - toughening, in the melting crucible (Booth), 1884, A., 1445.

- **Silver** (metal), amalgamation process, use of bromine in (Arnold), 1883, A., 399.
  - Mexican amalgamation process, reactions in (Huntington), 1883, A., 134.
  - deposition of, on glass, etc. (James), 1885, A., 616.
  - phosphorised, properties of (Warren), 1887, A., 1079.
  - slags, estimation of bismuth in (Hampe), 1892, A., 919.
  - solutions, red, formation of, by reduction (v. der Pfordten), 1885, A., 955.
- **Silver alloy** with cadmium, analysis of (Heycock and Neville), 1892, T., 913.
  - with lead and zinc (Wright and Thompson), 1891, A., 267.
  - with mercury, from Oberlahnstein (v. Dechen), 1885, A., 219.
  - with mercury, from the Sala mines (Nordström), 1883, A., 426.
  - with zinc and with zinc and bismuth (Wright and Thompson), 1891, A., 1158.
- **Silver,** lowest compounds of (Muthmann), 1887, A., 636; (Drechsel), 1887, A., 699; (v. der Pfordten), 1887, A., 699; 1888, A., 221; (Guntz), 1891, A., 983.
  - compounds, with sulphur, arsenic and phosphorus (Poleck and Thümmel), 1884, A., 156.
- **Silver salts,** molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 596.
  - comparative effect of different parts of the spectrum on (Abney), 1886, A., 749; (Abney and Edwards), 1890, A., 933.
  - electromotive dilution constants of (Miesler), 1887, A., 1072.
  - coefficients of solubility of (Longi), 1883, A., 1172.
  - action of light and reducing agents on (Lea), 1888, A., 1.
  - action of dyes and other substances in increasing the sensibility of (Eder), 1885, A., 703.
  - action of sodium thiosulphate on (Fogh), 1890, A., 694.
  - combinations of, with colouring matters (Lea), 1885, A., 350, 611.
  - compounds of thiocarbamide with (Reynolds), 1892, T., 249; P., 14.
  - of organic acids, dry distillation of (Kachler), 1892, A., 38; (Koenigs), 1892, A., 293; (Lieben), 1892, A., 811.
- **Silver salts,** haloid, behaviour of, in the solar spectrum (Eder), 1885, A., 703, 936.
  - effect of the spectrum on (Abney and Edwards), 1890, A., 933.
  - decomposition of, by light (Griveaux), 1889, A., 199.
  - electrical conductivity of (Kohlrausch), 1883, A., 769.
  - precipitation of (Schneider), 1885, A., 1010.
- **Argentammonium** compounds (Reychler), 1884, A., 1261; 1885, A., 18.
  - organic (Reychler), 1884, A., 721.
  - antimonate (Beilstein and v. Bläse), 1889, A., 1124.
  - bromide, crystallised (Terreil), 1885, A., 18.
  - chloride, crystallised (Terreil), 1884, A., 890; 1885, A., 18.
  - iodide (Longi), 1883, A., 1052.
    - crystallised (Terreil), 1884, A., 890.
  - nitrate (Reychler), 1883, A., 902; 1884, A., 261; (Ditte), 1886, A., 122; (Draper), 1887, A., 331.
  - phosphate (Widman), 1885, A., 18.
- **Silver** antimonate (Beilstein and v. Bläse), 1889, A., 1124; (Ebel), 1890, A., 216.
  - arsenates (Joly), 1887, A., 215.
  - bromide, modifications of (Vogel), 1883, A., 936; 1885, A., 846; (de Pitteurs), 1885, A., 349, 611.
    - modification of colour sensitiveness of (Lohse), 1885, A., 612.
    - action of light on (Tommasi), 1883, A., 3.
    - relation between the absorption spectrum and sensitising action of dyes on (Vogel), 1886, A., 585.
    - sensitising action of dyes on (Eder), 1886, A., 497.
    - action of iodine on (Julius), 1884, A., 393, 556.
    - combination of, with colouring matters (Lea), 1885, A., 350, 611.
  - photobromide (Lea), 1888, A., 5.
  - carbonate (Johnson), 1886, A., 980.
    - action of magnesium on (Winkler), 1890, A., 333.
  - potassium carbonate (de Schulten), 1888, A., 110.
  - chlorate, electrolysis of (Gore), 1885, A., 110.
    - and the chlorates of the alkali metals, isomorphism of (Retgers), 1890, A., 1208.

- **Silver** *per*chlorate, electrolysis of (Gore), 1885, A., 110.
  - *sub*chloride (Guntz), 1891, A., 983, 1322.
    - attempt to prepare (Newbury), 1885, A., 956; 1886, A., 770.
  - chloride, modifications of (Vogel), 1883, A., 936.
    - photochromatic properties of (Staats), 1887, A., 1071; 1888, A., 1001.
    - darkened, not an oxychloride (Lea), 1890, A., 335.
    - darkened, examination of, for oxygen (Richardson), 1891, T., 543.
    - electrolysis of, dissolved in sodium thiosulphate (Aslanoglou), 1890, A., 1204.
    - vapour density of (Biltz and Meyer), 1889, A., 674.
    - action of light on (Amato), 1884, A., 1238; (Newbury), 1885, A., 956; (Hitchcock), 1890, A., 213; 1891, A., 1155; (Richardson), 1891, T., 536; P., 81; (Guntz), 1891, A., 1420; (Baker), 1892, T., 728; P., 120; (Béchamp), 1892, A., 775.
    - action of bromine and iodine on (Julius), 1884, A., 393, 556.
    - action of carbonic oxide on (Bloxam), 1886, A., 17.
    - sensitising action of dyes on (Eder), 1886, A., 497.
    - displacement of chlorine by bromine in (Humpidge), 1884, A., 1245.
    - filtering of (Osborne), 1888, A., 1351.
    - solution of, in aqueous ammonia (Bodländer), 1892, A., 1154.
    - combination of, with colouring matter (Lea), 1885, A., 350, 611.
    - combination of, with metallic chlorides (Lea), 1888, A., 109.
    - cyanide, thiocyanate, ferricyanide and ferrocyanide, analysis of a mixture of (Teissier), 1889, A., 83.
    - photochloride (Lea), 1888, A., 2.
  - chromate, solubility of, in ammonium nitrate (Carpenter), 1887, A., 216.
  - chromates (Jäger and Krüss), 1889, A., 1121.
  - chromiodate (Berg), 1890, A., 1378.
  - *sub*fluoride (Guntz), 1890, A., 1055; 1891, A., 983.
  - fluoride (Moissan), 1891, A., 1421.
    - electrolysis of (Gore), 1885, A., 110.
  - hydroxide (Bruce), 1885, A., 124.
- **Silver** hydroxide, dehydration of, by heat (Carnelley and Walker), 1888, T., 64, 79.
  - imidosulphonates (Divers and Haga) 1892, T., 974.
  - *per*iodates (Kimmins), 1887, T., 358; 1889, T., 152.
  - iodide from New Mexico (Genth and vom Rath), 1886, A., 26.
    - dimorphism of (Mallard and Le Chatelier), 1884, A., 16, 1260.
    - fused and solid, transfer of ions in (Lehmann), 1890, A., 317.
    - and its alloys with cuprous and lead iodides, specific heat and heat of transformation of (Bellati and Romanese), 1883, A., 274.
    - as a blowpipe reagent (Casamajor), 1885, A., 1157.
    - action of bromine on (Julius), 1884, A., 393, 556.
    - combination of, with colouring matter (Lea), 1885, A., 350, 611.
  - photoiodide (Lea), 1888, A., 6.
  - *per*manganate, decomposition of (Gorgeu), 1892, A., 942.
  - *per*molybdate (Péchard), 1892, A., 1160.
  - nitrate, constancy of the heat produced by the reaction of, with solutions of metallic chlorides (Richards), 1888, A., 400.
    - isomorphism of, with the alkali nitrates (Retgers), 1890, A., 328.
    - action of certain metallic compounds on (Pillitz), 1883, A., 288.
    - action of metals on solutions of (Senderens), 1887, A., 550.
    - action of non-metals on solutions of (Senderens), 1887, A., 331.
    - reaction of, with hydrogen arsenide (Marchlewski), 1891, A., 1154.
    - reaction of, with mercuric cyanide, in presence of ammonia (Bloxam), 1884, A., 168.
    - reaction of, with sodium thioarsenate (Preis and Raýman), 1887, A., 889.
    - and ammonia, compound of (Reychler), 1883, A., 902; 1884, A., 261, 721; (Draper), 1887, A., 331.
    - compound of, with alkali nitrates (Ditte), 1886, A., 122.
    - testing of (anon.), 1883, A., 381.
  - nitride (Raschig), 1886, A., 850; (Curtius), 1892, A., 112.
    - action of nitric acid on (Divers) 1885, T., 230.

Silver nitrite, action of nitric *per*oxide, and of heat on (DIVERS and SHIMIDZU), 1885, T., 634.
  and ammonia (REYCHLER), 1884, A., 157.
 hyponitrite, composition of (DIVERS and HAGA), 1884, T., 78.
  heat of formation of (BERTHELOT and OGIER), 1883, A., 423.
 *sub*oxide (PILLITZ), 1883, A., 288; (BAILEY and FOWLER), 1887, T., 416; P., 54; (V. DER PFORDTEN), 1887, A., 700; 1888, A., 221, 1029; (BAILEY), 1887, A., 771; (FRIEDHEIM), 1887, A., 1079; 1888, A., 415.
 oxide, action of, on magnesium (WINKLER), 1890, A., 333.
  action of, on potassium chlorate (FOWLER and GRANT), 1890, T., 279.
  and lead oxide, compounds of (ASTON), 1891, T., 1093; P., 133.
 phosphates (JOLY), 1887, A., 214, 215.
 hypophosphate (PHILIPP), 1883, A., 1052.
 ruthenate (DEBRAY and JOLY), 1888, A., 921.
 silicate (HAWKINS), 1890, A., 849.
 nitrosilicate (ROUSSEAU and TITE), 1892, A., 684.
 *sub*sulphide (*argentous sulphide*) (V. DER PFORDTEN), 1887, A., 700.
 hydrosulphide (LINDER and PICTON), 1892, T., 132.
 sulphite (SODEAU), 1892, A., 684.
 potassium thiosulphate (COHEN), 1887, T., 39.
 sodium thiosulphate (SCHWICKER), 1889, A., 943.
 barium phosphotungstate (KEHRMANN and FREINKEL), 1892, A., 1160.
Silver organic compounds:—
Silver acetylide (PLIMPTON), 1892, P., 109; (KEISER), 1892, A., 1416.
 cyanide, action of cupric salts on (VARET), 1890, A., 464.
  action of nitric acid and of sodium carbonate on (BLOXAM), 1885, A., 133.
  action of, on sulphur chloride (SCHNEIDER), 1885, A., 1193.
  reactions with, and detection of (BLOXAM), 1884, A., 118.
 ferricyanide and ferrocyanide, reactions with (BLOXAM), 1884, A., 118.
 nitrocyanide (BLOXAM), 1884, A., 168; 1885, A., 133.
 organosol of (SCHNEIDER), 1892, A., 775.
Silver, detection, estimation and separation:—
 containing bismuth, assay of (SCULLY), 1888, A., 108.
 method of detecting, in the body, in cases of poisoning (LEHMANN), 1883, A., 687.
 detection of, in presence of lead (JOHNSTONE), 1890, A., 826.
 detection, electrolytic, of (KOHN), 1892, A., 541.
 microchemical test for (V. HAUSHOFER), 1887, A., 300.
 estimation of (FÖHR), 1885, A., 84.
 estimation of, in base metals (WHITEHEAD), 1892, A., 1525.
 estimation of, in lead flux (HEPPE), 1891, A., 1292.
 estimation of, in burnt pyrites (THILO), 1887, A., 79.
 estimation of, in alloys of silver and copper (RÖSSLER), 1888, A., 755.
 estimation of copper and, in the same solution (QUESSAUD), 1885, A., 441.
 estimation of gold and, when contained in potassium cyanide solutions (OPIFICIUS), 1889, A., 189.
 estimation of, by means of hydroxylamine hydrochloride (LAINER), 1892, A., 662.
 estimation, electrolytic, of (BRAND), 1890, A., 294; (SMITH), 1890, A., 1029.
 estimation, volumetric, of (CARNOT), 1889, A., 1246.
 separation of, from alloys (SOLTHIEN), 1883, A., 243.
 separation of, from lead (BENEDIKT and GANS), 1892, A., 1522.
 separation of, from sulphides by air blast (ANON.), 1883, A., 400.
 separation of, from zinc and lead in galena and blende (AUBIN), 1892, A., 1378.
 separation, electrolytic, of, from cobalt, copper, nickel and zinc (SMITH and FRANKEL), 1890, A., 664.
 separation, electrolytic, of, from arsenic, molybdenum and tungsten (SMITH and FRANKEL), 1890, A., 1029.
 separation, electrolytic, of, from osmium (SMITH and WALLACE), 1892, A., 920.
 separation, electrolytic, of, from platinum (SMITH and MUHR), 1891, A., 1296.
Silver-bismuth-glance, artificial (SCHNEIDER), 1890, A., 710.

Silver bromide-gelatin-emulsion (OBERNETTER), 1883, A., 395.
Silver coins, German standard, presence of gold in (ANON.), 1883, A., 629.
Silvering of glass and mirrors (HERZOG), 1885, A., 1020.
Silver-lead thiobismuthite (FOSTER), 1886, A., 515.
Silver ore (WARREN), 1892, A., 1404.
  red. See Pyrargyrite and Proustite.
Sinapanpropionic acid (LANGLET), 1892, A., 441.
Sinapic acid, and its salts (REMSEN and COALE), 1884, A., 1387.
Sinapine (REMSEN and COALE), 1884, A., 1387.
Sinapis alba, composition of, during various stages of growth (HORNBERGER), 1885, A., 1087.
"**Sinidor**" (*basic magnesium acetate*) (ANON.), 1883, A., 396.
Siphon for hot liquids or for those evolving gases or vapours (ESSNER), 1892, A., 270.
Sipylite, crystalline form of (MALLET), 1883, A., 435.
Sismondine, crystalline form and optical characters of (DES CLOIZEAUX), 1885, A., 1118.
Skatole. See 3′-Methylindole.
Skeletins (KRUKENBERG), 1886, A., 481.
Skim milk. See Milk under Agricultural Chemistry.
Skimmetin and **Skimmin** (EIJKMAN), 1885, A., 553.
Skimmia japonica, active constituents of (EIJKMAN), 1885, A., 553.
Skin, excretion of nitrogen from (POWER), 1883, A., 227.
  secretion of perspiration by, after taking alcohol (BODLÄNDER), 1888, A., 977.
Skrivanoff's cell (ANON.), 1883, A., 840; (MONNIER), 1884, A., 881.
Slag, basic (*Thomas-slag*), process for the recovery of (ANON.), 1884, A., 1226.
    working-up (SCHÜCHTERMANN), 1885, A., 940.
    crystalline appearance of (ANON.), 1884, A., 1085.
    crystals in (STEAD and RIDSDALE), 1887, T., 601; P., 65.
    basicity of the silicate in (HILGENSTOCK), 1888, A., 223.
    influence of the ferrous oxide in, on the growth of plants (MUNRO), 1887, A., 178.
    behaviour of, with water charged with carbonic anhydride (v. REIS), 1886, A., 663; 1888, A., 222.
Slag, basic (*Thomas-slag*), detection of foreign raw phosphates in (BLUM), 1891, A., 109.
    estimation of phosphoric acid in (KLEIN), 1886, A., 740; (BRUNNEMANN), 1887, A., 527; (KENNEPOHL), 1888, A., 321; (VOGEL), 1888, A., 991; (v. REIS), 1889, A., 439.
    See also Agricultural Chemistry.
  crystalline (FOUQUÉ), 1888, A., 794.
  furnace, gehlenite in (DILLER), 1889, A., 681.
  Thomas. See Slag, basic.
Slags, formation and use of (ANON.), 1884, A., 1226.
  composition of (VOGT), 1891, A., 651.
  bismuth and lithium in (WARREN), 1888, A., 1256.
  crystallised, presence of tetragonal minerals in (VOGT), 1888, A., 1259.
  decomposition and analysis of (ILES), 1885, A., 192.
  estimation of, in wrought iron (BARROWS and TURNER), 1892, T., 551; P., 122.
  estimation of alumina in (KOSMANN), 1886, A., 489.
  siliceous, estimation of antimony and tin in (WARREN), 1888, A., 632.
  silver, estimation of bismuth in (HAMPE), 1892, A., 919.
  estimation of metallic iron in (KOSMANN), 1886, A., 489; (NEUMANN), 1887, A., 1140.
  estimation of phosphoric acid in (KOSMANN), 1886, A., 489; (ARTH), 1890, A., 292; (EDWARDS), 1892, A., 382.
  soluble, estimation of sulphur in (CAMPBELL), 1887, A., 526.
Sleep, influence of, on the activity of respiratory combustion (DE SAINT-MARTIN), 1888, A., 305.
Sleepers, railway, solution for the preservation of (WRIGHT), 1884, A., 1233.
  railway, pickled, estimation of zinc and nitrogen in (GRITTNER), 1891, A., 620.
Sludge, sea, and its absorptive power for lime and potash (MÜLLER), 1889, A., 1241.
Smaltite (*smaltine; cobalt arsenide*), action of acids on (VOLLHARDT), 1888, A., 1257.
  in Colorado (ILES), 1883, A., 559.
  from Schneeberg (MCCAY), 1884, A., 1100.

Smell, sensitiveness of the sense of (FISCHER and PENZOLDT), 1887, A., 983.
Smilax glycyphylla, sweet principle of (RENNIE), 1886, T., 857; P., 239.
Smithsonite from Pelsöcz Ardó (LOCZKA), 1885, A., 730.
Smoke, acid, influence of, on vegetation (v. SCHROEDER), 1885, A., 76.
Snake poison (WOLFENDEN), 1886, A., 1057.
Snakes, organic basis of shells of eggs of (ENGEL), 1891, A., 236.
Snow, fallen, influence of, on the temperature of the air (BILLWILLER), 1883, A., 500.
Soap lyes, estimation of glycerol in (HEHNER), 1890, A., 425.
solution, standard (GARNIER), 1884, A., 1072; (TEED), 1890, A., 421; (NEUGEBAUER), 1891, A., 116.
solution, standard, preparation of (NELSON), 1890, A., 198.
solution, use of (ELLIS), 1886, A., 1076.
varnishes (ANDRES), 1884, A., 648.
Soaps, preparation of, from oil seeds (SEEMANN), 1885, A., 1023.
as constituents of blood plasma and chyle (HOPPE-SEYLER), 1885, A., 573.
basic salts in (DECHAN and MABEN), 1886, A., 186.
adulterated (ANON.), 1883, A., 893.
use of, in dyeing (LAUBER and STEINHEIL), 1883, A., 894.
analysis (LEEDS), 1884, A., 223; (VALENTA), 1885, A., 696; (GAWALOWSKI), 1885, A., 844; (PINETTE), 1892, A., 550.
estimation of fatty acids in (SCHULZE), 1887, A., 307; (BAUR), 1887, A., 401; (SAMELSON), 1889, A., 194; (SAUPE), 1890, A., 1475.
estimation of combined alkali in (WILSON), 1892, A., 384.
estimation of free alkali in (WILSON), 1889, A., 448, 1037.
estimation of cane sugar in (WILSON), 1891, A., 1558.
estimation of resin in (HEINER), 1885, A., 933; (WRIGHT and THOMPSON), 1886, P., 175; (GRITTNER and SZILASI), 1886, A., 747; (WILLIAMS), 1891, A., 131.
separation of, from the lyes by centrifugal means (ANON.), 1885, A., 310.
carbolic, assay of (ALLEN), 1887, A., 185.
curd, preparation of (EICHBAUM), 1885, A., 944.
toilet, cheap cocoa-nut, preparation of (EICHBAUM), 1885, A., 944.
Sobrerol and **Sobrerone**. See under Terpenes.
Soda. See Sodium hydroxide.
"**Soda caustique**," Renz's (BELLMER), 1884, A., 1088.
Soda-ammonia process, removal of the ammonium salts in the sodium hydrogen carbonate obtained by (ANON.), 1885, A., 1269.
recovery of hydrochloric acid as a bye-product in (MOND), 1885, A., 199.
Soda-ash, estimation of the relative amounts of hydroxide and carbonate in (HART), 1888, A., 99.
estimation of sodium hydroxide in (WILLIAMS), 1888, A., 89.
Soda industry (LUNGE), 1883, A., 524; (SCHEURER-KESTNER), 1883, A., 887; 1884, A., 643, 1442; (ANON.), 1885, A., 455, 1269.
Soda-lime, preparation of (DREYFUS), 1884, A., 639.
true rôle of, in the estimation of nitrogen (QUANTIN), 1889, A., 306.
Soda liquor, causticised, estimation of caustic in (UPWARD), 1886, A., 1074.
Soda liquors, a crystalline silicocarbonate from (RAMMELSBERG), 1887, A., 12.
Soda-lyes, crude, vanadium, fluorine, and phosphorus in (SCHEURER-KESTNER), 1883, A., 887.
crude, examination of (KALMANN and SPÜLLER), 1887, A., 1063.
Soda-potash-felspar, triclinic (*anorthoclase; microclase*) (WIIK), 1884, A., 970.
Soda-potash-felspars of Silesia (BEUTELL), 1885, A., 31.
Soda solutions, concentrated, specific heat of (BLÜMCKE), 1885, A., 1101.
Soda waste, decomposition of, by means of carbonic anhydride (KEMP), 1885, A., 1017.
recovery of sulphur from (GROUVEN), 1885, A., 614.
Sodalite, Canadian (HARRINGTON), 1888, A., 431.
from Litchfield, Maine (CLARKE), 1886, A., 677.
formation of (C. and G. FRIEDEL), 1890, A., 1080.
Sodalite syenite of South Greenland, minerals in (LORENZEN), 1883, A., 960.
Sodamide (JOANNIS), 1891, A., 642.
"**Sodionitrallyl**" (ASKENASY and MEYER), 1892, A., 1062.
Sodium, molecular weight of (RAMSAY), 1889, T., 527, 530, 533.
(metal) production of, by electrolysis (FISCHER), 1885, A., 942.

- **Sodium** (metal), spectrum of (Kayser and Runge), 1891, A., 137.
  - boiling point of (Perman), 1889, T., 326; P., 78.
  - preservation and properties of (Rosenfeld), 1891, A., 982.
  - lowering of the freezing point of, by the addition of other metals (Heycock and Neville), 1889, T., 666; P., 127.
  - lowering of the freezing point of bismuth, of cadmium and of lead by (Heycock and Neville), 1892, T., 892.
  - effect of, on the freezing point of tin (Heycock and Neville), 1890, T., 380.
  - action of bromine and iodine on (Merz and Holzmann), 1889, A., 755.
  - action of chlorine on (Cowper), 1883, T., 155.
  - action of chromic fluoride on (Evans), 1892, A., 19.
  - action of, on the ethylic salts of the higher fatty acids (Wohlbrück), 1887, A., 1099.
  - loss of, in caustification, and in the Le Blanc process (Scheurer-Kestner), 1883, A., 888.
  - as a plant food (Atterberg), 1892, A., 1508.
- **Sodium alloys** with bismuth, antimony and lead (Joannis), 1892, A., 773.
  - with gold, properties of (Heycock and Neville), 1889, T., 670.
  - with mercury (Joannis), 1892, A., 275.
  - with potassium (Joannis), 1888, A., 1238.
  - with tin (Bailey), 1892, A., 572.
- **Sodium alum** (Augé), 1890, A., 1059.
  - monosymmetrical (Soret), 1886, A., 595.
- **Sodammonium** (Joannis), 1890, A., 210, 560; (Roozeboom), 1890, A., 450; (Moutier), 1890, A., 679.
  - heat of formation of (Joannis), 1890, A., 319.
  - action of, on metals (Joannis), 1892, A., 275, 773.
  - tungstates, two (Gibbs), 1886, A., 206.
- *di***Sodammonium** chloride (Joannis), 1891, A., 642.
- **Sodium** salts, magnetic rotation of (Perkin), 1890, P., 142.
  - molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 596.
  - action of aqueous soda on (Thomsen), 1887, A., 440.
- **Sodium** salts, reaction of (Hager), 1885, A., 441.
  - haloid salts of, molecular refraction of the (Wegner), 1890, A., 549.
  - haloid salts of, action of air, silica and kaolin on (Gorgeu), 1886, A., 664.
  - oxygen compounds, reduction of (Rosenfeld), 1891, A., 150.
- **Sodium** aluminate (Lyte), 1885, A., 638; (Bayer), 1889, A., 213; 1891, A., 864; (Lunge), 1891, A., 365.
  - arsenates (Joly and Dufet), 1886, A., 769; (Hall), 1887, T., 95, 97; (Preis), 1890, A., 1053.
  - arsenate, action of, on *sesqui*oxides (Lefèvre), 1890, A., 1377.
    - reduction of, with oxalic acid (Naylor and Braithwaite), 1883, A., 513.
    - hydrates of (Lescœur), 1887, A., 698.
    - and arsenite, behaviour of, with indicators (Thomson), 1884, A., 869, 870.
  - aluminium, chromium and iron arsenates (Lefèvre), 1890, A., 1378.
  - cadmium, cobalt, magnesium, manganese, nickel and zinc arsenates (Lefèvre), 1890, A., 563.
  - copper arsenates (Hirsch), 1891, A., 644.
  - strontium arsenates (Joly), 1887, A., 637.
  - biborate (*borax*) from California and Nevada (Ayres), 1884, A., 260; (anon.), 1885, A., 957.
    - action of polyhydric alcohols on (Dunstan), 1884, A., 278.
    - action of, in photographic developers (Mercier), 1891, A., 139.
    - physiological action of (Vigier), 1884, A., 1061; (Johnson), 1886, A., 572.
    - as an internal disinfectant (de Cyon), 1884, A., 1440.
  - bromate, use of, in volumetric analysis (Kratschmer), 1886, A., 280.
  - bromide, action of sulphuric acid on (Addyman), 1891, P., 168; 1892, T., 94, 101, 102.
    - compound of arsenious acid with (Rüdorff), 1889, A., 103.
  - stannibromide (Leteur), 1892, A., 121.
  - carbonate, artificial, history of the preparation of, from common salt (Dumas), 1884, A., 16.
    - crystalline, direct preparation of, from sodium chloride (Hempel), 1890, A., 10.

Sodium carbonate, preparation of (CASTNER), 1887, A., 107.
alleged reaction for preparing (SMITH and HART), 1887, A., 330.
anhydrous, heat of solution of (PICKERING), 1887, T., 73.
vapour pressure of solutions of (ANDREAE), 1891, A., 782.
dissociation of (KISSLING), 1891, A., 364.
decomposition of, by fusion (PICKERING), 1887, T., 72.
and sodium hydrogen carbonate, solubility of, in solutions of sodium chloride (REICH), 1892, A., 116.
limits of the conversion of, into sodium hydroxide by lime (LUNGE and SCHMID), 1886, A., 203.
action of chlorine on solutions of (DUNSTAN and RANSOM), 1883, A., 647.
reduction of, by magnesium (WINKLER), 1890, A., 332.
test for, in milk (BACHMEYER), 1883, A., 385.
and hydroxide, volumetric estimation of, in caustic soda (GOEBEL), 1890, A., 293.
See also Trona.
calcium carbonate from the crude soda solution of Leblanc's process (SCHEURER-KESTNER), 1884, A., 1442.
calcium carbonate from the soda manufacture (REIDEMEISTER), 1887, A., 12.
hydrogen carbonate, preparation of (GASKELL and HURTER), 1884, A., 712.
particular case of the formation of (DE MONDÉSIR), 1887, A., 699.
obtained by the ammonia soda process, removal of the ammonium salts in (ANON.), 1885, A., 1269.
scale formed in the manufacture of (LEIGHTON), 1887, A., 108.
action of polyhydric alcohols on mixtures of boric acid and (JEHN), 1887, A., 790; 1888, A., 1172.
detection of thiosulphate in (BRENSTEIN; SALZER), 1887, A., 79; (MUSSET), 1891, A., 498.
detection and estimation of, in milk (PADÉ), 1889, A., 1244.

Sodium hydrogen carbonate, estimation of, in presence of normal carbonate (THOMSON), 1884, A., 869.
potassium carbonate (HUGOUNENQ and MOREL), 1888, A., 786.
chlorate, preparation of (MUSPRATT and ESCHELLMANN), 1885, A., 17.
refraction and dispersion of (DUSSAUD), 1892, A., 1.
pyroelectricity of (FRIEDEL and CURIE), 1884, A., 3.
*per*chlorate, properties of (POTILIZIN), 1890, A., 333.
chloride (*common salt*) in plants (LESAGE), 1892, A., 651.
in rain-water (BELLUCI), 1889, A., 299.
molecular refraction of, in water (SCHÜTT), 1890, A., 1033.
doubly refracting crystals of (BEN SAUDE), 1886, A., 206.
electrolysis of (NAUDIN and BIDET), 1884, A., 541.
electrolysis of, and its industrial applications (ROTONDI), 1884, A., 248.
solutions, dilute, cryoscopy of (PICKERING), 1892, A., 1045.
solid, compressibility of (BRAUN), 1887, A., 436; 1888, A., 214, 404; (RÖNTGEN and SCHNEIDER), 1888, A., 22, 1019.
measurement of the vapour pressures of solutions of (EWAN and ORMANDY), 1892, T., 773.
and potassium chloride, simultaneous solubility of (ETARD), 1890, A., 103, 442.
blue or violet flame produced by, in a coal fire (LEONARD), 1889, A., 336; (SMITH), 1890, A., 1202.
combination of, with ammonia (JOANNIS), 1891, A., 643.
effect of, on digestion (STUTZER), 1891, A., 752.
influence of, on nitrogenous excretion (DUBELIR), 1892, A., 904.
as a manure (HECQUET D'ORVAL; PAGNOUL), 1884, A., 866; (ANON.), 1884, A., 926.
and potassium chloride, polaristrobometric analysis of a mixture of (SCHÜTT), 1888, A., 1341.
estimation of, in presence of potassium chloride (RÖTTGER and PRECHT), 1885, A., 1263; (LAUBE), 1886, A., 920.
estimation of, in wine (GONDOIN), 1891, A., 1398.
See also Rock-salt.

Sodium rhodium chloride, decomposition of, in solution (Foussereau), 1886, A., 975.

- **Sodium** sulphide, manufacture of (Weldon), 1883, A., 627.
  - preparation of (Damoiseau), 1885, A., 349.
  - hydrated (Göttig), 1886, A., 980.
  - conductivity of solutions of (Bock), 1887, A., 758.
  - influence of heat on the combination of water with (Göttig), 1887, A., 331.
  - commercial, technical analysis of (Šetlík), 1890, A., 84.
- *di*sulphide, compound of alcohol with (Demont), 1891, A., 1170.
- *penta*sulphide, action of lead hydroxide and silver oxide on an aqueous solution of (Geuther), 1885, A., 217.
- *poly*sulphides (Böttger), 1884, A., 1260.
- chromium, cobalt, iron, manganese and nickel sulphides (Brunner), 1890, A., 215.
- hydrogen sulphide, action of iodine on (Spring and Bourgeois), 1892, A., 681.
- yttrium sulphide (Duboin), 1888, A., 1250.
- *hydro*sulphide, manufacture of (Claus), 1885, A., 937.
- sulphites (Hartog), 1889, A., 1106.
- sulphite, neutral, thermochemical researches on (Berthelot), 1883, A., 705.
  - normal and acid, heat of solution of (de Forcrand), 1884, A., 803.
  - comparative oxidation of solutions of sulphurous acid and (Reese), 1885, A., 217.
- manganese sulphite (Gorgeu), 1883, A., 718.
- mercury sulphite (Divers and Shimidzu), 1886, T., 538; P., 140.
- platosammonium sulphite (Haberland and Hanekop), 1888, A., 790.
- potassium sulphite (Schwicker), 1889, A., 942; (Hartog), 1889, A., 1106.
- rhodium sulphite (Seubert and Kobbé), 1890, A., 1383.
- hyposulphite. See Sodium thiosulphate.
- thioarsenate, decomposition of, by silver nitrate (Preis and Rayman), 1887, A., 444, 889.
- zinc thioarsenate (Preis), 1890, A., 1053.
- thiosulphate (*sodium hyposulphite*), preparation of (Manzoni), 1885, A., 723.

- **Sodium** thiosulphate (*sodium hyposulphite*), dimorphism of (Parmentier and Amat), 1884, A., 819.
  - dissociation of crystallised (Müller-Erzbach), 1888, A., 213.
  - action of lead hydroxide and silver oxide on an aqueous solution of (Geuther), 1885, A., 217.
  - action of, on metallic salts (Jochum), 1886, A., 17; (Vortmann), 1889, A., 1107; (Vortmann and Padberg), 1890, A., 12.
  - action of potassium *per*manganate on (Gläser), 1885, A., 957; 1887, A., 336; (Hönig), 1885, A., 1111.
  - action of, on silver salts (Fogh), 1890, A., 694.
  - action of sulphurous acid on (Villiers), 1889, A., 568.
  - behaviour of, with acids (Vaubel), 1889, A., 943; 1890, A., 10; (Vortmann), 1889, A., 1107.
  - behaviour of, with bases (Vaubel), 1890, A., 10.
  - as a substitute for hydrogen sulphide (Vortmann), 1886, A., 1071.
  - change proceeding in an acidified solution of, where the products of change are retained in the system (Colefax), 1892, T., 176.
- cadmium thiosulphates (de Schulten), 1890, A., 12; (Fock and Klüss), 1890, A., 1057.
- cobalt, iron, manganese, thallium and zinc thiosulphates (Vortmann and Padberg), 1890, A., 12.
- lead thiosulphate (Vortmann and Padberg), 1890, A., 12; (Fogh), 1890, A., 700.
- potassium and silver thiosulphates (Schwicker), 1889, A., 943.
- *di*thio*per*sulphate (Villiers), 1888 A., 912.
- *tri*thionate (Villiers), 1888, A., 915.
- tungstates (v. Knorre), 1883, A. 651; (Feit), 1888, A., 344.
- *per*tungstate (Péchard), 1891, A., 988.
- *para*tungstate, decomposition of, in aqueous solution (v. Knorre), 1885 A., 1184.
- tungstovanadates (Rothenbach), 1891, A., 18.
- vanadates (Baker), 1885, T., 353; P., 47; (Hall), 1887, T., 96; (Ditte), 1887, A., 640.

Sodium organic compounds:—

Sodium ferrocyanide, water of crystallisation of (v. Pebal), 1886, A., 860.
- carbonylferrocyanide (Muller), 1890, A., 117.
- fulminates (Scholvien), 1885, A., 39; (Ehrenberg), 1885, A., 1191.
- iron *tetra*cyanide (Etard and Bémont), 1885, A., 234.

Sodium, detection, estimation and separation:—
- microchemical test for (Streng), 1884, A., 366.
- estimation of (Kretzschmar), 1886, A., 490.
- estimation of, in presence of lithium (Kraut), 1888, A., 195.
- estimation of, in silicates (Chatard), 1885, A., 296; (Holland), 1887, A., 181.
- estimation of, in water (Muck), 1890, A., 299.
- estimation of lithium and, in mixtures of their carbonates (Holdermann), 1887, A., 864.
- estimation, volumetric, of (White), 1888, A., 1130.
- separation of, from lithium, magnesium and calcium (Gooch), 1887, A., 528.
- separation of, from mercury and phosphoric and arsenic acids (Haack), 1892, A., 530.

Sodium amphibole in a rock from Colorado (Lacroix), 1889, A., 1054.

Sodium felspar from Krageröe, Norway (Bischof), 1887, A., 453.

Soil. See Agricultural Chemistry.

Soja bean and *Soja hispida.* See Agricultural Chemistry.

Solanaceæ, alkaloids of (Schütte), 1892, A., 231.

Solaneine and **solanidine** (Firbas), 1890, A., 75.

Solanidine in potato-shoots (Jorissen and Grosjean), 1890, A., 1182; 1891, A., 473.

Solanine (Firbas), 1890, A., 75.
- amount of, in diseased potatoes (Kassner), 1887, A., 860.
- reaction of (Brociner), 1890, A., 310; (Ferreira da Silva), 1891, A., 1562.

Solanum grandiflorum, alkaloid from (Freire), 1888, A., 166.

Solanum lycopersicum, composition of the fruit of (Briosi and Gigli), 1891, A., 955; (Passerini), 1891, A., 956.

Solanum nigrum, alkaloids of (Schütte), 1892, A., 232.

Solanum tuberosum, alkaloids of (Schütte), 1892, A., 232.

Solanum tuberosum, bases contained in the young shoots of (Firbas), 1890, A., 75.

Solar heat, measurement of (Fröhlich), 1885, A., 326.

Solar radiation and heat, comparative action of (Duclaux), 1887, A., 411.

Solar spectrum. See Spectrum under Photochemistry.

Solar temperature, approximate estimation of (Abney and Festing), 1884, A., 241.

Soldering mixture, harmless (anon.), 1885, A., 852.

Solfataras and acidic eruptive rocks, relation between (de Lapparent), 1889, A., 474.

Solidification (Reyer), 1885, A., 1180.
- extension of the law of (Raoult), 1886, A., 763.
- of bodies in a state of superfusion, velocity of (Gernez), 1883, A., 546.

Solidifying points, determination of (Loviton), 1886, A., 417.

Solids, molecular weight of liquids and (evidence deducible from the study of salts) (Pickering), 1886, A., 198.
- determination of the specific gravity of, by means of the specific gravity bottle (Pagliani), 1884, A., 213.
- chemical action between (Hallock), 1889, A., 817.
- cohesion of (Bartoli), 1885, A., 866.
- compression of the moist powder of, and the formation of rocks (Spring), 1888, A., 1243.
- so-called critical pressure of (v. Richter), 1886, A., 656.
- perfect elasticity of (Spring), 1884, A., 256.
- solubility of, in water at various temperatures (Andreae), 1884, A., 1090.
- influence of pressure on the temperature of volatilisation of (Ramsay and Young), 1884, A., 252.
- determination of the molecular heat of, for their solutions in water and other liquids (Wiedemann), 1883, A., 704.
- electrical conductivity of, at high pressure (Graetz), 1887, A., 5.
- unipolar conductivity of (Braun), 1883, A., 769.
- homogeneous, spontaneous change of form of, induced by internal energy (Lehmann), 1885, A., 1033.
- condensation of water vapour by (Ihmori), 1888, A., 24.

Solids, dissolved, and a substance immersed in the solution, attraction between (Thoulet), 1885, A., 476, 866.
in dilute solutions and water, attraction between (de Vries), 1884, A., 1065.
and liquids and gases, relation between (Spring), 1884, A., 256.
Solubility. See Solution.
Solution (Alexéeff), 1886, A., 847; (Ramsay), 1891, A., 793; (Wanklyn and Cooper), 1891, A., 1412; (Wanklyn, Johnstone and Cooper), 1892, A., 264; (Wanklyn), 1892, A., 935.
and pseudosolution (Nicol), 1885, A., 115; (Picton and Linder), 1892, A., 148.
and suspension, connection between (Picton and Linder), 1891, P., 177; 1892, T., 151, 165.
nature of (Goodwin), 1883, A., 550; 1885, A., 865; (Nicol), 1884, A., 253; 1886, A., 300; (Pickering), 1887, T., 593; P., 77; 1889, P., 86, 106; A., 941, 1101; 1890, T., 64, 331, 845; 1891, P., 105, 109; (Setschenoff), 1889, A., 1044; (Wanklyn and Johnstone), 1892, A., 108.
nature of, as elucidated by the heat evolved on the dilution of calcium chloride solutions (Pickering), 1888, P., 35.
physical nature of, theory of residual chemical affinity as an explanation of the (Pickering), 1892, A., 559.
theory of (Mendeléeff), 1887, T., 779; (Durham), 1888, A., 21; (Pickering), 1888, A., 21, 22; (Duhem), 1888, A., 1016; (Ostwald), 1888, A., 1020; (Nernst), 1890, A., 3; (Pagliani), 1890, A., 845; (British Association Report), 1891, A., 786; (Walker), 1892, A., 264; (van't Hoff), 1892, A., 1045.
isohydric, theory of (Arrhenius), 1888, A., 1144.
isohydric and nonisohydric, of acids, velocity of reaction in mixtures of (Moore), 1892, A., 936.
law of thermodynamical coincidence and its application to the theory of (Natanson), 1892, A., 557.
association *versus* dissociation in (Pickering), 1891, A., 972; (Lupton), 1891, A., 973.
dissociation hypothesis of (Pickering), 1891, P., 105; A., 972; (Traube), 1891, A., 255, 638, 874; (Arrhenius), 1891, A., 521; (Sack), 1891, A., 966; (Kümmell), 1891, A., 1145; (Le Blanc), 1891, A., 1405.
Solution, strong, and the dissociation hypothesis (Pickering), 1892, A., 108.
electrolytic theory of (Le Blanc), 1891, A., 1405.
objection raised to the hypothesis of electrolytic dissociation in (Arrhenius), 1891, A., 1148.
dissociation of salts in (Wiedemann), 1888, A., 1021; (Planck), 1888, A., 1144; (Mendeléeff), 1890, A., 325.
the question of free ions in (Mendeléeff), 1890, A., 325.
dilute, kinetic molecular theory of (Lorentz), 1891, A., 637.
deduction from the gaseous theory of (Masson), 1891, A., 791; (Pickering), 1891, A., 793.
kinetics of substances in (Loeb and Nernst), 1889, A., 327.
dilute, applications of gaseous laws to (Arrhenius), 1892, A., 935.
exceptions to the gaseous laws in (Noyes), 1890, A., 442.
molecular constitution of (Planck), 1888, A., 895; (Gore), 1890, A., 207.
saline, molecular volumes of (Nicol), 1884, A., 658; 1885, A., 334.
evidence afforded by fluorescence and absorption of the decomposition of molecular groups in solution (Walter), 1889, A., 554.
electrical conductivity of (Crompton), 1888, T., 116; (Pickering), 1889, P., 86.
freshly prepared, change of electrical conductivity in (Pfeiffer), 1890, A., 204.
dilute, electrical conductivity of (Bouty), 1884, A., 1241.
saline, electrical conductivity of (Bouty), 1886, A., 753; (Jäger), 1888, A., 397, 398; (Chrustschoff), 1889, A., 808, 809; (Chrustschoff and Pashkoff), 1889, A., 809; 1891, A., 141.
influence of water of crystallisation on the electrical conductivity of (Trötsch), 1891, A., 141.
electrical conductivity of, in mixtures of alcohol and water (Stephan), 1883, A., 769.
alteration of the conductivity of, by addition of a non-electrolyte (Holland), 1892, A., 1382.

Solution, behaviour of substances in, under the influence of the electric current (Picton and Linder), 1892, T., 160.
  voltaic energy of aqueous (Gore), 1890, A., 941.
  voltaic energy of saline (Gore), 1890, A., 317.
  stoichiometry of (Jäger), 1892, A., 1382.
  thermal effect of (Alexéeff), 1884, A., 1244.
  thermal effect of mixing (Konowaloff), 1884, A., 1244.
  dilute, thermal potential of (Riecke), 1891, A., 786.
  saline, thermal properties of (Moser), 1886, A., 925.
  application of thermodynamics to (Planck), 1892, A., 395.
  heat capacities of (Pickering), 1889, P., 86.
  saline, thermal expansion of (Nicol), 1887, A., 760; (Decker), 1888, A., 1010; (Tschernai), 1889, A., 204, 330, 1101; 1890, A., 318; (Bremer), 1889, A., 329.
  specific heats of (Timoféeff), 1891, A., 1406.
  saline, specific heat of (Arons), 1885, A., 1101; (Mathias), 1889, A., 4.
    molecular heat of (Gerlach), 1888, A., 894.
  heat of dilution of (Mendeléeff), 1886, A., 414.
  saline, heat of dilution of (Arons), 1885, A., 1101.
  relation between heat of solution and coefficient of (Le Chatelier), 1885, A., 340, 473; 1887, A., 548; (Chancel and Parmentier), 1887, A., 632; (van Deventer and van de Stadt), 1892, A., 559.
  homogeneous, equilibrium in, when unequally heated (van Berchem), 1890, A., 444.
  cryoscopy of (Raoult), 1885, A., 858; 1888, A., 1242; 1892, A., 935; (Arrhenius), 1888, A., 1242; 1891, A., 1148; (Pickering), 1891, A., 971; 1892, A., 678, 1045; (Traube), 1892, A., 8.
  cryoscopy of; abnormal depression of the freezing point (van Bijlert), 1891, A., 1411.
  lowering of the freezing point of (Pickering), 1890, A., 846.
  mechanical, physical, and chemical lowering of the freezing points of (Pickering), 1889, P., 150.
Solution, law of the freezing points of (Raoult), 1883, A., 278; 1884, A., 952; (Pickering), 1889, P., 149; 1890, P., 9.
  alcoholic, dilute, cryoscopy of (Pickering), 1892, A., 1045.
  alkaline, cryoscopy of (Raoult), 1884, A., 254.
  saline, cryoscopy of (Raoult), 1884, A., 1248.
  cryoscopy of double salts in (Rüdorff), 1890, A., 1044.
  saline, boiling points of (Nicol), 1885, A., 331; (Gerlach), 1887, A., 1012.
    temperature of steam arising from (Sakurai), 1892, T., 495; P., 92.
  vapour pressure of (Tammann), 1889, A., 668; (Emden), 1890, A., 323; (Charpy), 1890, A., 1364; (Raoult), 1891, A., 386; (Ewan and Ormandy), 1892, T., 769; P., 141.
  in acetic acid, vapour pressures of (Raoult and Recoura), 1890, A., 554.
  alcoholic, vapour pressures of (Raoult), 1889, A., 7.
  ethereal, vapour pressures of (Raoult), 1887, A., 207; 1888, A., 1145.
  ethereal, influence of concentration on the vapour pressure of (Raoult), 1887, A., 631.
  saline, vapour pressures of (Emden), 1887, A., 764.
    vapour pressures of, at 0° (Dieterici), 1891, A., 783.
    vapour pressure of water from (Tammann), 1885, A., 862; (Nicol), 1887, A., 321.
  chemical equilibrium in (Thomsen), 1886, A., 12, 925; 1887, A., 440; (Planck), 1888, A., 780.
  saline, cohesion of, and of their admixtures (Rother), 1884, A., 1251.
  of salts under pressure (Braun), 1887, A., 436.
  relation between the compressibilities of, and of their component parts (Braun), 1888, A., 214.
  saline, compressibility of (Röntgen and Schneider), 1888, A., 22; (Gilbault), 1892, A., 766.
  contraction of (Charpy), 1889, A., 1102.
  considered as a process of diffusion (Stefan), 1891, A., 384.
  aqueous, diffusion of (Scheffer), 1883, A., 1047; 1888, A., 1144; (Arrhenius), 1892, A., 1265.

Solution, saline, diffusion of (Wiedeburg), 1891, A., 383.
  diffusion of double salts in (Rüdorff), 1888, A., 342, 899; 1889, A., 98.
  measurement of the osmotic pressure of (Tammann), 1892, A., 556.
  osmotic pressure of salts in (Adie), 1891, T., 344; P., 25.
  and gases, osmotic pressure in the analogy between (van't Hoff), 1888, A., 778.
  aqueous, of organic substances, capillary constants of (Traube), 1891, A., 1408.
  saline, constants of capillarity of (Chervet), 1885, A., 1105.
  rise of, in capillary tubes (Goldstein), 1890, A., 684.
  saline, rise of, in capillary tubes (Goldstein), 1889, A., 205.
  passage of substances in, through mineral filters and capillary tubes (Chabrié), 1892, A., 1267.
  dilute aqueous, viscosity of (Arrhenius), 1888, A., 336.
  saline, aqueous, viscosity of (Lauenstein), 1892, A., 1044.
    variation of density with the concentration of (McGregor), 1887, A., 209; 1891, A., 254.
  specific gravity of (Pickering), 1889, P., 86; (Gerlach), 1889, A., 814, 1044; (Charpy), 1892, A., 765.
  saline, specific gravity of (Bender), 1884, A., 144, 251; (Gerlach), 1888, A., 894; (Bremer), 1889, A., 329.
  specific gravity of mixtures of potassium and sodium chloride solution (Charpy), 1892, A., 1146.
Gases, kinetic theory of, and osmotic pressure (Boltzmann), 1891, A., 389, 638.

- **Stalactite**, a, formation of, by vapour (Brown), 1885, A., 1034.
- **Stalagmometer** (Traube), 1888, A., 91, 198; 1892, A., 543.

Stannous and **Stannic.** See Tin.

Star-anise, composition of the fruit and seeds of (Oswald), 1891, A., 957.
products of the distillation of the leaves and fruits of the (Eijkman), 1886, A., 95; 1887, A., 497.
oil of (Umney), 1889, A., 659.
tree, cultivation of, and the preparation of the oil in Annam (anon.), 1885, A., 1275.

Starch. See Carbohydrates.

Starch factories, waste water from (Schütze), 1886, A., 1066.

Starch refuse as fodder (Saare), 1885, A., 1155.

Starch sugar. See Dextrose under Carbohydrates.

Starch syrup, composition of (Sieben), 1885, A., 693.

Star-fish, manurial value of (Mayer), 1889, A., 1085.

Starvation, influence of, on the glycogen of the liver and muscle (Aldehoff), 1889, A., 427.
See also Hunger.

Stassfurt liquors, working up of (Fischer), 1887, A., 1079.
occurrence of hydrogen sulphide and sulphur in (Pfeiffer), 1890, A., 336.

Stassfurt salts as absorbents in stables (Märcker), 1884, A., 491.

Stassfurt salt mines, minerals from (Luedecke), 1887, A., 1085.

Stature, influence of, on the interchange of matter and energy (Rubner), 1884, A., 1393.

Staurolite (*staurotide*) (Colorianu), 1886, A., 319.
chemical constitution of (Friedl), 1886, A., 32.
crystallographical examination of (Primics), 1885, A., 733.

Steam, specific heat of, at high temperature (Berthelot and Vieille), 1885, A., 7.
superheated, experimental determination of the ratio of the specific heats of (Cohen), 1890, A., 205.
arising from boiling salt solutions, temperature of (Sakurai), 1892, T., 495; P., 92.
dissociation of (v. Hofmann), 1891, A., 143.
action of carbonic oxide on (Maquenne), 1883, A., 860; (Naumann and Pistor), 1886, A., 120.
action of induction sparks on carbonic oxide and (Dixon), 1886, T., 103.
use of, in chemical laboratories (Walter), 1885, A., 482.

Stearic acid (*hexadecylacetic acid*) (Krafft), 1884, A., 1280.
conversion of oleic acid into (de Wilde and Reychler), 1889, A., 1140.
action of bromine on (Krafft and Beddies), 1892, A., 695.
oxidation of (Carette), 1886, A., 611.
and naphthalene, solidification of different mixtures of (Courtonne), 1883, A., 176.
derivatives of (Hell and Sadomsky), 1891, A., 1335.

Stearic acid, amido- [m.p. 63°] (Gautier and Etard), 1884, A., 89.
α-amido- [m.p. 221°] (Hell and Sadomsky), 1891, A., 1336.
α-bromo- (Piotrowski), 1890, A., 1396; (Hell and Sadomsky), 1891, A., 1336.
mono- and *di*-chloro- (Piotrowski), 1890, A., 1396.
α-cyano- (Hell and Sadomsky), 1891, A., 1451.
oxime of (Claus and Pfeiffer), 1891, A., 541.

Stearin, preparation of (Hundeshagen), 1884, A., 280.
stearic acid, paraffin, wax and, analysis of a mixture of (Jean), 1891, A., 1400.

α-Stearinsulphuric acid (*sulphohydroxystearic acid*) (Benedikt and Ulzer), 1887, A., 914; (Geitel), 1888, A., 578.

Stearocutic acid (Urbain), 1884, A., 859.

Stearolic acid, oxidation of (Hazura and Grüssner), 1889, A., 375.
*di*iodo- (Liebermann and Sachse), 1892, A., 470.

Stearolic phenylhydrazide (Holt), 1892, A., 1428.

Stearone, preparation of (Kipping), 1890, T., 537.

Stearoneoxime (Spiegler), 1884, A., 1115; (Kipping), 1890, T., 539.

Stearopten, from *Barosma crenata* (Spica), 1885, A., 1142.
from essence of patchouli (Maisch), 1885, A., 394.

Stearyl chloride (Krafft and Bürger), 1884, A., 1126; (Schweizer), 1885, A., 509.

Stearyl-diglycerol and **-glycerolphosphoric acid** (Hundeshagen), 1884, A., 282.

Steatite (*saponite*), variety of (Dobbie), 1885, A., 229.

Steenstrupite, analysis of (Lorenzen), 1883, A., 960.

Stephanite, crystal of, from Wheal Newton (Lewis), 1884, A., 405.

Stercobilin. See Hydrobilirubin.
Sterculia acuminata (*Kola nuts*) (Natton), 1885, A., 712.
Stereochemical isomerism of asymmetrical *mon*oximes (Hantzsch), 1890, A., 1263.
  models of organic molecules (Eiloart), 1892, A., 679.
  studies (Loschmidt), 1890, A., 602.
    results and aims of (Meyer), 1890, A., 719.
    in the piperazine group (Bischoff), 1890, A., 1331.
Stereochemistry and the laws of rotatory power (Colson), 1892, A., 758; (Guye), 1892, A., 759.
  and the oximes (Claus), 1892, A., 50.
Sterilisation of liquids and the use of plaster filters for (Gautier), 1885, A., 287; (Cazeneuve), 1885, A., 288.
  of organic liquids, use of liquefied carbonic anhydride for (d'Arsonval), 1891, A., 854.
Stibiatil (Igelström), 1890, A., 1076.
Stibnite (*antimonite*) from Czerwenitza (v. Foullon), 1886, A., 22.
  from Felsöbánya and from Magurka (Loczka), 1892, A., 1054.
  from Japan (Dana), 1884, A., 22; (Krenner), 1885, A., 221.
  from Valdagno (Luzzatto), 1887, A., 1084.
  pseudomorph of (Hintze), 1883, A., 430.
  See also Antimony *tri*sulphide.
α-Stilbazole. See α-Styrylpyridine.
Stilbazoline. See α-Phenethylpiperidine.
Stilbene (*s-diphenylethylene; toluylene*), formation of (v. Miller and Rohde), 1890, A., 978.
  formation of, from the polymeric thiobenzaldehyde (Baumann and Klett), 1892, A., 184.
  attempted formation of a geometrical isomeride of (Aronstein and Holleman), 1889, A., 51.
  heat of combustion of (Ossipoff), 1889, A., 6, 460.
  reaction of (Errera), 1887, A., 53.
  substitution products of (Kopp), 1892, A., 718.
  derivatives of (Redzko), 1890, A., 783.
  alcohol. See Hydrobenzoin.
Stilbene, *di*amido-derivatives of (Grossmann), 1889, A., 1191.
  *di*amido-, sulphide (Anschütz and Schultz), 1889, A., 602.
    See also Dehydrothiotoluidine.
Stilbene, *o-di*amido-, azo-dyes from (Bischoff), 1888, A., 1094.
  *p-di*amido- (Bender and Schultz), 1887, A., 268.
  2-*di*chloro-4-*di*nitro- (Witt), 1892, A., 444.
  *di*cyano- (Chalaney and Knoevenagel), 1892, A., 618.
  nitro- (*nitrodiphenylethylene*) (Anschütz and Romig), 1885, A., 768.
  *o-di*nitro- (Bischoff), 1888, A., 1094.
  *p-di*nitro-, bromide (Elbs and Bauer), 1887, A., 151.
  o-nitramido- (Bischoff), 1888, A., 1094.
Stilbenes, substituted, formation of (Elbs; Elbs and Bauer), 1887, A., 151.
*iso***Stilbene,** derivatives of (Redzko), 1890, A., 783.
Stilbene-αα′-dicarboxylic acid. See Diphenylmaleic acid.
Stilbenedi-*o*-carboxylic acid (Hasselbach), 1888, A., 486.
Stilbene-group, isomerism in the (Wislicenus and Blank), 1889, A., 261; (Walden and Kernbaum), 1890, A., 1299; (Sudborough), 1892, A., 1224.
Stilbenesulphonic acid, *di*amido- (Bender and Schultz), 1887, A., 268.
Stilbite (*desmine*) (Heddle), 1883, A., 411; (Cross and Hillebrand), 1883, A., 957.
  from Berks Co., Pa. (Smith), 1885, A., 960.
  from the French Creek mines (Eyerman), 1890, A., 113.
  from the Viesch Glacier (Brun), 1884, A., 402.
  and heulandite groups, relations between minerals of the (Rinne), 1892, A., 417.
Stomach, amount of acid in the, on an amylaceous diet (Rosenheim), 1888, A., 617, 972.
  formation of hydrochloric acid in the (Frerichs), 1886, A., 639.
  normal, digestion of flesh in the (Cahn and v. Mering), 1888, A., 859.
  relative absorption of neutral salts in the (Jaworski), 1884, A., 193.
  action of acids on the functional activity of the (Jaworski), 1888, A., 616.
  behaviour of carbonic anhydride, oxygen and ozone in the (Jaworski), 1885, A., 280.
  function of animal gum in the (Landwehr), 1888, A., 176.

Stomach, reaction of the living mucus-lining of the (EDINGER), 1883, A., 815.
alteration of cane-sugar in the (v. LEUBE), 1884, A., 91.
dehydration of glucose in the (CHITTENDEN), 1888, A., 79.
conversion of starch in the (ZECHNISSEN), 1889, A., 631.
decomposition of bromides and iodides by the (KÜLZ), 1887, A., 508; (DRECHSEL), 1889, A., 426.
horse's, sugar contents of the (ELLENBERGER and HOFMEISTER), 1889, A., 176.
horse's, absorption in the (GOLDSCHMIDT), 1887, A., 743.
estimation of hydrochloric acid in the (GÜNZBURG), 1888, A., 617; (SJÖQUIST), 1889, A., 302; (GRAFFENBERGER), 1892, A., 236; (LANGERMANN), 1892, A., 1125.
estimation of peptones in the (RIVA-ROCCI), 1892, A., 1136.
Stone, artificial, preparation of (ANON.), 1884, A., 379.
Stone-fruit, ratio of flesh to stone in (WILHELM), 1884, A., 477.
Stones, waterproof paint for (ANON.), 1883, A., 760.
building, decay of (WALLACE), 1883, A., 1036.
Stoneware (WAGENER), 1883, A., 397.
Stone-work, process for preserving and colouring (KEIM and THENN), 1884, A., 880.
Stony concretions in animals (SCHUBERG), 1884, A., 348.
Storage batteries. See Accumulators under Electrochemistry.
Storax, American (FLÜCKIGER; v. MILLER), 1883, A., 407.
Stramonium seed, preparation of daturine from (HARTZ), 1885, A., 820.
Stratiotes aloides, constituents and properties of, and its use as a manure (NIEDERSTADT), 1884, A., 108.
Straw. See Agricultural Chemistry.
Strawberries. See Agricultural Chemistry.
Straw-gum (HÉBERT), 1890, A., 1460.
Strengite, artificial production of (DE SCHULTEN), 1885, A., 1043.
Striking distance and potential difference, relation between, in various gases (PASCHEN), 1889, A., 806.
Stromeyerite from California (MELVILLE and LINDGREN), 1892, A., 1407.
from Mexico (KÖNIG), 1887, A., 643; 1888, A., 560.
Strontia. See Strontium oxide.
Strontia-sugar. See Carbohydrates.
Strontianite from Altahlen (VRBA), 1889, A., 837.
from the Kaiserstuhl (BECKENKAMP), 1888, A., 659.
from Leadhills (COLLIE), 1889, T., 95.
in Westphalia (VENATOR), 1883, A., 431.
artificial production of (BOURGEOIS), 1883, A., 31.
See also Strontium carbonate.
Strontium compounds, recovery of (MUCK), 1884, A., 394.
salts, pure, preparation of (BARTHE and FALIÈRES), 1892, A., 1277.
removal of barium from (ADRIAN and BOUGAREL), 1892, A., 776.
physiological action of (LABORDE), 1891, A., 99; 1892, A., 227.
Strontium arsenates (LEFÈVRE), 1889, A., 826.
sodium arsenates (JOLY), 1887, A., 637.
carbonate, preparation of (MEBUS and DECASTRO), 1885, A., 1269.
action of potassium sulphate on (KOUKLIN), 1892, A., 1276.
See also Strontianite.
chlorate and the velocity of its decomposition by heat (POTILIZIN), 1890, A., 696.
chloride, preparation of (WACKENRODER), 1885, A., 19.
vapour pressure of solutions of (ANDREAE), 1891, A., 782.
solubility of (ETARD), 1892, A., 398.
application of, in purifying syrups (KOTTMANN), 1883, A., 252.
lead and mercury oxychlorides (ANDRÉ), 1887, A., 446, 447.
chromate, solubility of, in dilute alcohol (FRESENIUS and RUPPERT), 1892, A., 914.
hydrates (NIEWERTH), 1884, A., 712; (CLAUS), 1884, A., 1224; 1885, A., 937; (MAUMENÉ), 1886, A., 421; (HEYER), 1887, A., 108, 217; (SCHEIBLER; FINKENER), 1887, A., 217; (MÜLLER-ERZBACH), 1887, A., 765.
hydride (WINKLER), 1891, A., 1156.
hyponitrite (MAQUENNE), 1889, A., 945.
manganite (ROUSSEAU), 1886, A., 425.
formation and dissociation of (ROUSSEAU), 1886, A., 507.
nitrate, solubility of, in alcohol (HILL), 1889, A., 345.
nitride (MAQUENNE), 1892, A., 566, 776.

Strontium oxide (*strontia*), crystalline (Brügelmann), 1890, A., 850.
phosphorescence of (Crookes), 1887, A., 1068.
action of magnesium oxide on (Winkler), 1890, A., 452.
phosphates (Barthe), 1892, A., 1156.
potassium phosphates (Ouvrard), 1888, A., 1034.
sodium phosphates (Joly), 1887, A., 637; (Ouvrard), 1888, A., 1034.
plumbate (Kassner), 1890, A., 561.
selenate (Michel), 1888, A., 650.
silicofluoride, solubility of (Fresenius), 1890, A., 925.
sulphate, solubility of, in acids (Ostwald), 1884, A., 813.
process for working up (anon.), 1884, A., 1225.
See also Celestite.
sulphide, phosphorescent, preparation of (Becquerel), 1889, A., 198.
oxysulphide (Geuther), 1884, A., 1263.
thiosulphate (Fock and Klüss), 1890, A., 330.
cadmium thiosulphates (Fock and Klüss), 1890, A., 1058.
potassium thiosulphate (Fock and Klüss), 1892, A., 13.
titanate (Bourgeois), 1886, A., 985.
tungstate (v. Knorre), 1885, A., 486.
tungstovanadates (Rothenbach), 1891, A., 18.
vanadates (Manasse), 1887, A., 339.
zirconate (Ouvrard), 1891, A., 1432.
Strontium organic compound:—
acetylhyponitrite (Maquenne), 1889, A., 945.
Strontium, detection, estimation and **separation:—**
microchemical test for (v. Haushofer), 1887, A., 301.
detection of (Ransom), 1883, A., 509.
detection of, in presence of barium (Luedeking), 1891, A., 364.
estimation, volumetric, of (Vitali), 1892, A., 1521.
separation of, from barium (Fresenius), 1890, A., 826, 924; 1891, A., 110.
separation of, from barium and calcium (Russmann), 1888, A., 629; 1891, A., 111; (Kupfferschläger), 1889, A., 77; (Fileti), 1892, A., 660.
separation of, from calcium (Sidersky), 1883, A., 509; 1884, A., 497; (Bogomoletz), 1884, A., 1077; (Browning), 1892, A., 915.
Strontium, separation of, from calcium as chromates (Fresenius and Ruppert), 1892, A., 914.
Strophanthidin (Fraser), 1887, A., 1116; 1888, A., 607.
Strophanthin. See Glucosides.
Strophanthus (Gerrard), 1887, A., 970; (Elborne; Merck), 1887, A., 1116.
crystalline compound from glabrous (Arnaud), 1889, A., 407.
seeds, constituents of (Elborne), 1887, A., 991.
Strophanthus hispidus (Fraser), 1890, A., 262.
Structural formulæ of alkylene oxide, acetaldehyde and its polymerides, trimethylene and benzene (Brühl), 1891, A., 633.
several, possibility of, for the same chemical compound (Laar), 1885, A., 722.
Struvite (MacIvor), 1887, A., 709.
Strychnic acid (*strychnol*) (Plugge), 1884, A., 188; (Loebisch and Schoop), 1886, A., 814; (Tafel), 1891, A., 1262.
nitro- (Loebisch and Schoop), 1886, A., 814.
*iso***Strychnic acid** (*dihydrostrychnine*), and its methiodide (Loebisch and Schoop), 1886, A., 815; (Tafel), 1891, A., 1262.
nitroso- (Tafel), 1892, A., 1012.
Strychnine. See Alkaloids.
Strychninedisulphonic acid (Stoehr), 1886, A., 269.
Strychninesulphonic acids (Stoehr), 1886, A., 269; 1888, A., 73; (Guareschi), 1887, A., 853.
Strychnos Nux vomica, glucoside from (Dunstan and Short), 1885, A., 395.
indigenous to Ceylon, chemistry and botany of (Dunstan and Short), 1885, A., 583.
Strychnos toxifera, curarine from (Villiers), 1885, A., 997.
Stüvenite (Darapsky), 1887, A., 558.
Stylophorum diphyllum, alkaloids of the root of (Selle), 1890, A., 649.
Styphnic acid (2:4:6-*trinitroresorcinol*), constitution of (Henriques), 1883, A., 329; (v. Kostanecki and Feinstein), 1889, A., 130.
derivatives of (Nölting and Collin), 1884, A., 1004.
Stypticite. See Fibroferrite.
Styrene (*cinnamene; phenylethylene; styrol; styrolene*) in coal tar (Kraemer and Spilker), 1891, A., 206.

Styrene (*cinnamene; phenylethylene; styrol; styrolene*), molecular refraction and dispersion of (Gladstone), 1891, T., 295.
  condensation of, with methylbenzene derivatives (Kraemer and Spilker), 1891, A., 206.
  condensation of, with phenols (Koenigs), 1891, A., 208; (Koenigs and Carl), 1892, A., 446.
  derivatives of (Bernthsen and Bender), 1883, A., 70.
  derivatives of aromatic hydrocarbons and their conversion into anthracenes and methylanthracenes (Kraemer, Spilker and Eberhardt), 1891, A., 207.
Styrene, *p*-amido- (Bernthsen and Bender), 1883, A., 70.
  p-bromo-, *di*bromide and glycol (Schramm), 1891, A., 898.
  *di*bromo-, action of bromine vapour on (Kinnicutt and Palmer), 1884, A., 603.
  ω-chlor-*o*-amido- and ω-chloro-*o*-nitro- (Lipp), 1884, A., 1030.
  *tri*iodo- (Liebermann and Sachse), 1892, A., 470.
  ω-nitro-, and its derivatives (Priebs), 1884, A., 313; 1885, A., 160; (Erdmann), 1884, A., 906.
    preparation of (Erdmann), 1891, A., 1483.
  o-nitro-, action of sulphuric acid on, and its *di*bromide (Einhorn), 1884, A., 66.
  m-nitro- and its *di*bromide (Prausnitz), 1884, A., 1175.
  p-nitro- and its *di*bromide (Basler), 1884, A., 604.
  4:ω-*di*nitro- (Friedländer and Mähly), 1885, A., 1138.
  nitro-*p*-amido-ω-nitro- (Friedländer and Lazarus), 1885, A., 1139.
Styrogallol (*o-dihydroxyanthracoumarin*) (Jacobsen and Julius), 1888, A., 56; (v. Kostanecki), 1888, A., 292.
Styrolene. See Styrene.
Styrolene alcohol. See Dihydroxyethylbenzene.
Styryl methyl ketone (*benzylideneacetone*) (Claisen and Ponder), 1884, A., 1166.
  phenylhydrazone (Knorr), 1887, A., 678.
  m-amido- (v. Miller and Rohde), 1890, A., 1138.
  5-chloro-2-nitro- (Eichengrün and Einhorn), 1891, A., 1099.
Styryl methyl ketone (*benzylideneacetone*), *o*-nitro- (v. Baeyer and Drewsen), 1883, A., 341; (Fischer and Kuzel), 1883, A., 587.
  p-nitro- (v. Baeyer and Becker), 1883, A., 1120.
Styryl methyl ketoxime (Jacoby), 1886, A., 800.
  action of dehydrating agents on (Zelinsky), 1887, A., 666.
Styryl nitrosomethyl ketone (Claisen and Manasse), 1889, A., 585.
Styrylacrylic acid (*cinnamenylacrylic acid*), oxidation of (Doebner), 1890, A., 1274.
  o-amido- and *o*-nitro- (Diehl and Einhorn), 1885, A., 1222.
Styrylangelic acid, preparation of (Edeleanu), 1891, A., 1225.
Styrylbenzaldazine (Curtius and Thun), 1891, A., 1357.
α-**Styrylcinchonic acid** (Doebner and Peters), 1890, A., 176.
Styryldimethylglyoxaline (Wadsworth), 1890, T., 11.
4-**Styryl-2**:6-**dimethylpyridine-3**:5-**dicarboxylic acid** (Epstein), 1886, A., 258.
Styryldiphenyleneoxazole (Wadsworth), 1890, T., 12.
2-**Styryl-5-ethyloctohydropyridine** (*ethyloctohydrostilbazole*) (Plath), 1889, A., 164.
Styrylglyoxylic acid, nitro-. See Nitrocinnamoylformic acid.
Styrylhydantoin (*styrylmetapyrazolone*), preparation of, and its *di*bromide (Pinner and Lifschütz), 1887, A., 1055; (Pinner and Spilker), 1889, A., 704.
Styryl-ψ-hydantoin and its *di*bromide (Pinner and Spilker), 1889, A., 704.
Styrylhydantoinamide (Pinner and Spilker), 1889, A., 705.
μ-**Styryl-β-methyloxazoline** (Elfeldt), 1892, A., 215.
Styrylmethylpyridine (*methylstilbazole*), and its reduction products (Bachér), 1889, A., 162.
α-**Styryl-α-** and **-β-naphthacinchonic acids** (Doebner and Peters), 1890, A., 1007.
α-**Styryl-α-** and **-β-naphthaquinolines** (Doebner and Peters), 1890, A., 1008.
μ-**Styryl-oxazoline** and **-pentoxazoline** (Elfeldt), 1892, A., 215.
Styrylpropionic acid, oxidation of (Fittig), 1888, A., 595.
  o-amido- (Diehl and Einhorn), 1887, A., 485.
  See also Hydrostyrylacrylic acid.

Styryl*meta*pyrazole (Pinner and Lifschütz), 1887, A., 1055.
Styryl*meta*pyrazolone. See Styrylhydantoin.
α-Styrylpyridine (*α-stilbazole*), and its reduction products (Baurath), 1888, A., 65, 608.
  m-amido-, and *m*-nitro-, and its reduction products (Schuftan), 1890, A., 1437.
Styryltetrahydroketo-naphthaquinoxaline and **-quinoxaline** (Georgescu), 1892, A., 886.
Styrylvinyl methyl ketone (*phenylbutinene methyl ketone*) and its derivatives (Diehl and Einhorn), 1885, A., 1221.
  o-nitro- (Diehl and Einhorn), 1885, A., 1222.
  p-nitro- (Einhorn and Gehrenbeck), 1890, A., 162.
Styryl-. See also Cinnamenyl- and Cinnamyl-.
Subercolic acid and its salts (Hell and Rempel), 1885, A., 756.
Suberic acid, thermochemistry of (Luginin), 1889, A., 5; (Stohmann, Kleber and Langbein), 1889, A., 1097; (Stohmann and Kleber), 1892, A., 1041.
  boiling points of (Krafft and Noerdlinger), 1889, A., 691.
  derivatives of (Hell and Rempel), 1885, A., 755; (Hempel), 1885, A., 756.
  chloro-, action of potassium cyanide and potassium hydroxide on (Bauer), 1883, A., 970.
Suberin (Urbain), 1884, A., 860; (Gilson), 1891, A., 465.
Suberinic acid (Gilson), 1891, A., 465.
Suberonyl alcohol and **suberonylene** (Markownikoff), 1890, A., 728.
Suberoxime (Nägeli), 1883, A., 728.
Sublimation apparatus (Richter), 1884, A., 364; (Brühl), 1889, A., 463.
Submersion figures (Tomlinson), 1887, A., 209.
Substances, apparatus for drying, under diminished pressure (Sidersky), 1890, A., 1185.
  viscid, determination of the specific gravity of (Scheibler), 1891, A., 520; (Brühl), 1891, A., 520, 1147.
Substitution, explanation of the laws which govern, in benzenoid compounds (Armstrong), 1887, T., 258, 583; P., 8, 44, 62; (Morley), 1887, T., 579.
Substitution, dependence of, on the atomic or molecular weights of certain atoms or groups (Kehrmann), 1890, A., 484.
  in the aromatic series (Lobry de Bruyn), 1891, A., 428.
  in the fatty series (Meyer and Müller), 1892, A., 577, 1414.
Substitution-derivatives, formation of (Gordon), 1891, P., 62.
Succinaldoxime (Ciamician and Zanetti), 1889, A., 1208.
Succinamic acid (Serda and Wiedemann), 1891, A., 175.
  nitrile of (Drouin), 1889, A., 686.
*iso***Succinamic acid,** α-amido- (Körner and Menozzi), 1888, A., 133.
s-**Succinamide** (Henry), 1885, A., 886.
  imido- (Hell and Poliakoff), 1892, A., 820.
  *as-di*iodo- (Curtius and Lang), 1892, A., 453.
*iso***Succinamide** (Franchimont and Klobbie), 1889, A., 1143.
  α-amido- (Körner and Menozzi), 1888, A., 133.
Succinamidine hydrochloride (Pinner), 1883, A., 731.
Succinamidobenzoic acid (Pellizzari), 1885, A., 534.
Succinamidotrimethylphenylammonium (Griess), 1885, A., 1220.
Succinanil, *di*bromo- (Anschütz and Wirtz), 1887, A., 934.
Succinazone (Ciamician and Zanetti), 1889, A., 1208; 1891, A., 1502.
Succinenylazoxybenzene (Sembritzki), 1888, A., 935.
Succinenyldiamidoxime and its derivatives and ethyl ether (Sembritzki), 1888, A., 935; 1890, A., 125.
  formation of (Garny), 1892, A., 137.
Succinenyldiazoximedibenzenyl (Sembritzki), 1890, A., 125.
Succinenyl-diuramidoxime and **-imidodioxime** (Sembritzki), 1888, A., 935; 1890, A., 125.
Succinenylimidoxime (Tiemann), 1892, A., 135; (Garny), 1892, A., 136.
Succinethylenephenylhydrazide (Burchard), 1890, A., 250.
Succinic acid (Schmidt), 1886, A., 869; (Guinochet), 1890, A., 238; (Demuth and Meyer), 1890, A., 595.
  thermochemistry of (Luginin), 1889, A., 5; (Stohmann, Kleber and Langbein), 1889, A., 1097; (Massol), 1891, A., 968; (Stohmann and Kleber), 1892, A., 1041.

Succinic acid, heat of solution of (Tanatar), 1890, A., 320.
- specific heat of (Hess), 1889, A., 93.
- boiling points of (Krafft and Noerdlinger), 1889, A., 690.
- solubility of (Miczynski), 1886, A., 935.
- pyrogenic decomposition of (Hanriot), 1886, A., 224.
- decomposition of, by sun-light in presence of an uranium salt (Wisbar), 1891, A., 1013.
- and acetaldehyde, condensation of (Fittig and Fränkel), 1890, A., 584.
- and anisaldehyde, condensation of (Fittig and Politis), 1890, A., 770.
- and butaldehyde, condensation of (Fittig and Schmidt), 1890, A., 588.
- and *iso*butaldehyde, condensation of (Fittig and Zanner), 1890, A., 589.
- and chloral, condensation of (Fittig and Miller), 1890, A., 586.
- action of ethylenediamine on (Mason), 1889, T., 10.
- and ethylic acetoacetate, condensation of (v. Eynern), 1889, A., 592.
- and ethylic benzoylacetate, condensation of (Schloesser), 1889, A., 594.
- and propaldehyde, condensation of (Fittig and Delisle), 1890, A., 587.
- and valeraldehyde, condensation of (Fittig and Schneegans), 1890, A., 590.
- bromination of (Auwers and Imhäuser), 1891, A., 1191.
- separation of malic acid from (Micko), 1892, A., 1531.
- ferment and its action on cane-sugar (Teixeira-Mendes), 1885, A., 1152.
- derivatives, explanation of isomerism in (Bischoff), 1891, A., 892.
- derivatives, action of hydroxylamine on (Garny), 1892, A., 136.
- alkyl derivatives of, synthesis of (Brown and Walker), 1891, A., 1193.
- potassium salt of, heat of formation of (Tanatar), 1890, A., 320.
- potassium salt of, normal and acid, water of crystallisation of (Salzer), 1884, A., 584.
- potassium hydrogen salt of, dry distillation of (Wisbar), 1891, A., 1012.

Succinic acid, sodium salt of, heat of formation of (Tanatar), 1890, A., 320.
- substitution derivatives of (Bischoff), 1891, A., 891.

Succinic acid, amido-. See Aspartic acid.
- *di*amido- (Claus), 1883, A., 43.
- bromo- (Volhard), 1888, A., 129; (Anschütz and Bennert), 1890, A., 363; (Auwers and Imhäuser), 1891, A., 1191.
- *mono*- and *di*-bromo-, electrolysis of (Lassar-Cohn), 1889, A., 1056.
- *s-di*bromo- (Claus), 1883, A., 43; (Guinochet), 1889, A., 588; (Demuth and Meyer), 1890, A., 595.
  - preparation of (Gorodetzky and Hell), 1888, A., 820.
  - action of aniline on (Reissert), 1886, A., 791.
  - action of sodium ethylate on the sodium salt of (Mulder and Hamburger), 1883, A., 312.
- *isodi*bromo- (Demuth and Meyer), 1888, A., 360.
- bromamido- (Claus), 1883, A., 43.
- chloro- (Anschütz and Bennert), 1890, A., 363.
- *mon*oximido- (Cramer), 1891, A., 823; (Piutti), 1891, A., 1191.
- α-oximido- and its salts (Ebert), 1885, A., 1123.
- β-oximido- (Cramer), 1891, A., 824.
- ββ-*di*oximido- and its salts (Müller), 1884, A., 584.
- αα- and ββ-*di*oximido- (Söderbaum), 1891, A., 825.

*iso***Succinic acid** (*methylmalonic acid*), preparation of (Lassar-Cohn), 1889, A., 1056.
- thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1097; (Massol), 1892, A., 1140.
- heat of solution of (Tanatar), 1890, A., 320.
- specific heat of (Hess), 1889, A., 93.
- action of nitric acid on (Franchimont), 1887, A., 466.
- condensation-products formed by benzaldehyde with (Stuart), 1883, T., 403.
- derivatives of (Körner and Menozzi), 1888, A., 132.

*iso***Succinic acid**, α-amido- (Körner and Menozzi), 1887, A., 801.
- *mono*- and *di*-bromo-, electrolysis of (Lassar-Cohn), 1889, A., 1057.
- bromo-, action of alcoholic potash on (Tanatar), 1890, A., 1238; 1892, A., 1305.

Succinic acids, substituted (BISCHOFF and WALDEN), 1889, A., 959; (BISCHOFF), 1890, A., 237, 742.
electrical conductivity of (BISCHOFF and WALDEN), 1890, A., 1038.
anhydride-formation and intramolecular change of (AUWERS and MEYER), 1890, A., 479; (BISCHOFF), 1890, A., 741; 1891, A., 892; (BISCHOFF and MINTZ), 1890, A., 744.
*di*bromo-, action of phosphorus sulphides on (OSSIPOFF), 1889, A., 237.
Succinates and *iso***succinates,** solubilities of (MICZYŃSKI), 1886, A., 935.
Succinic aldehyde diphenyldihydrazone (*succinazone*) (CIAMICIAN and ZANETTI), 1889, A., 1208; 1891, A., 1502.
Succinic anhydride, β-oximido- (CRAMER), 1891, A., 825.
thio- (ZANETTI), 1889, A., 960.
*iso***Succinic-ureide** (FRANCHIMONT and KLOBBIE), 1888, A., 1181.
Succinimide and its derivatives (LANDSBERG), 1883, A., 476.
thermochemistry of (BERTHELOT and FOGH), 1890, A., 1360.
action of ammonia on (RUBZOFF), 1886, A., 141.
action of hypobromites on (HOOGEWERFF and VAN DORP), 1891, A., 1216.
bromo- (KUSSEROW), 1889, A., 1064.
*iso***Succinimide,** alkyl derivatives of (COMSTOCK and WHEELER), 1892, A., 701.
Succinimidine hydrochloride (PINNER), 1883, A., 731, 1088.
Succinimidine nitrite (LOSSEN), 1892, A., 53.
Succinimidobenzenesulphonic acid, sodium salt of (PELLIZZARI and MATTEUCCI), 1888, A., 1302.
Succinobenzimide (PINNER), 1890, A., 69.
Succinobenzyl-. See Benzylsuccin-.
Succinodibenzamic acid (PELLIZZARI), 1885, A., 533.
Succinodiphenylhydrazide (ZANETTI), 1889, A., 960.
Succinonitrile (*ethylenic cyanide*) (HENRY), 1885, A., 646.
preparation of (FAUCONNIER), 1889, A., 227.
heats of combustion and formation of (BERTHELOT and PETIT), 1889, A., 812.
action of aniline hydrochloride on (BLOCHMANN), 1887, A., 931.
Succinonitrile (*ethylenic cyanide*), action of, on hydrochloric acid and alcohol (PINNER), 1883, A., 730.
Succinophenone (AUGER), 1888, A., 952.
Succinophenyldicarbizine (FREUND and GOLDSMITH), 1888, A., 1187.
α-Succinophenylhydrazide [m.p. 156°] (HÖTTE), 1886, A., 354; 1887, A., 671.
β-Succinophenylhydrazide [m.p. 199°] (MICHAELIS and HERMENS), 1892, A., 1494.
Succinophenylhydrazide [m.p. 208°] (FREUND and GOLDSMITH), 1888, A., 1187.
Succinyl compounds, action of phosphorus *penta*chloride on (KAUDER), 1885, A., 651.
Succinyl chloride (AUGER), 1888, A., 953.
constitution of (EMERY), 1890, A., 236.
magnetic rotatory power of (PERKIN), 1888, T., 563, 590.
action of phosphorus *penta*chloride on (KAUDER), 1884, A., 40.
action of zinc ethyl on (RJASANTZEFF), 1889, A., 1059.
Succinylsuccinic acid (V. BAEYER and NOYES), 1889, A., 1147.
constitution of (GEUTHER), 1888, A., 579.
Succirubra bark, natural and renewed, analysis of (HODGKIN), 1884, A., 919.
Succus entericus, human (TUBBY and MANNING), 1892, A., 1368.
Sucrose (*saccharose*) and its derivatives. See Carbohydrates.
Suet and other fats, recognition of suint in (MEYER), 1883, A., 750.
Sugar-cane, researches on (KNOP), 1884, A., 1212.
artificial manuring of (RIFFARD), 1883, A., 506.
percentage of ash in (KNOP), 1883, A., 110.
fermentation of the juice of (MARCANO), 1889, A., 915.
analysis of the juice of (CRAMPTON), 1887, A., 751.
healthy and diseased, analyses of (STUTZER), 1892, A., 1372.
Sugars. See Carbohydrates.
Suint, composition of (BUISINE), 1886, A., 902; (MAUMENÉ), 1886, A., 1055.
volatile acids of (BUISINE), 1888, A., 673.
amines in (BUISINE), 1887, A., 792.
glycollic acid and pyrotartaric acid in (A. and F. BUISINE), 1889, A., 178.
malic acid in (A. and P. BUISINE), 1888, A., 976.

- **Suint,** recognition of, in suet and other fats (Meyer), 1883, A., 750.
- **"Sulfuraires,"** reduction of sulphates by (Plauchud), 1883, A., 610.
- **Sulphacetic acid** and its derivatives (Franchimont), 1888, A., 1175.
  - alkyl salts of (Mauzelius), 1888, A., 821.
  - chloro- (Andreasch), 1886, A., 786.
- *o*-**Sulphamido-benzanilide** and -*o*- and -*p*-**benzotoluidides** (Remsen and Dohme), 1889, A., 992.
- **Sulphamidobenzeneazo-compounds.** See Azo-.
- *o*-**Sulphamidobenzoic acid** (Noyes), 1886, A., 804; (Fahlberg and List), 1887, A., 835.
  - *p*-nitro- (Noyes and Wiley), 1889, A., 711.
- *m*-**Sulphamidobenzoic acid** (Eitner), 1892, A., 714.
- *o*-**Sulphamidocarboxylic acids,** formation of (Fahlberg and List), 1888, A., 367.
- **Sulphamidocuminic acid** and its salts (Remsen and Day), 1884, A., 456.
- **Sulphamido*iso*durylic acids** (Jacobsen), 1883, A., 53.
- **Sulphamidohemimellithylic acids,** α- and β- (Jacobsen), 1887, A., 36.
- 3-**Sulphamido-*p*-propylbenzoic acid** and its salts (Remsen and Keiser), 1884, A., 457.
- **Sulphamidoterephthalic acid** (Noyes and Walker), 1887, A., 728.
- 3-**Sulphamido-*p*-toluic acid** (Weber), 1892, A., 1092.
- **Sulphamidotrimellitic acid,** salts of (Jacobsen and Meyer), 1883, A., 590.
- **Sulphamido-xylidic** and **-xylylic acids** (Jacobsen and Meyer), 1883, A., 589.
- **Sulphanilazocumenol,** potassium salt of (Liebermann and v. Kostanecki), 1884, A., 1147.
- **Sulphanilic acid.** See Aniline-*p*-sulphonic acid.

Sulphohalite (HIDDEN and MACKINTOSH), 1889, A., 217.
Sulpho-*n***-hexoic acid** (LUDWIG), 1889, A., 121.
Sulpho-*p***-hydroxybenzoic acid** (HEDRICK), 1888, A., 280.
Sulphohydroxystearic acid. See *α*-Stearinsulphuric acid.
Sulphonal (*diethylsulphonedimethylmethane; isopropylidenediethylsulphone*), influence of, on proteid metabolism (HAHN), 1891, A., 1523.
  physiological action of (GORDON), 1890, A., 542; (SMITH), 1892, A., 1507.
  See also Diethylsulphonedimethylmethane.
Sulphonamide, imido- (DIVERS and HAGA), 1892, T., 952.
Sulpho-*α***- and -***β***-naphthylethylxanthic acids,** potassium salts of (LEUCKART), 1890, A., 606.
Sulpho-*α***- and -***β***-naphthylic** *di***sulphides,** potassium derivatives of (LEUCKART), 1890, A., 606.
Sulphonates, constitution of the double compounds of, with alkyl sulphates (GEUTHER), 1883, A., 973.
  alkaline, action of, on salts of dihalogenated fatty acids (OTTO and ENGELHARDT), 1886, A., 883.
  aromatic, direct conversion of, into the corresponding amido-compounds (JACKSON and WING), 1887, A., 727.
Sulphonation with potassium hydrogen sulphate (BISCHOFF, SIENECKI and BRODSKY), 1890, A., 1149.
Sulphonecarboxylic acids, analogy of ketonic acids to, and their reactions (RÖSSING), 1890, A., 781.
Sulphonecyanamides (HEBENSTREIT), 1890, A., 501.
Sulphonediacetic acid (*dimethylsulphonedicarboxylic acid*) and its derivatives (LOVÉN), 1885, A., 241.
  action of nitrous acid on (LOVÉN), 1886, A., 222.
α-**Sulphone-di***iso***butyric** and **-dipropionic acids** (LOVÉN), 1885, A., 241.
Sulphonedi*iso***valeric acid** (LOVÉN), 1886, A., 333.
Sulphonefluorescein (REMSEN and HAYES), 1888, A., 153; (REMSEN and LINN; FAHLBERG and BARGE), 1889, A., 710.
Sulphoneketones (R. OTTO), 1886, A., 801; (R. and W. OTTO), 1888, A., 282.
Sulphonephthaleins (REMSEN), 1885, A., 539; (REMSEN and LINN), 1889, A., 710.
Sulphones, formation of (OTTO), 1888, A., 482.
  formation of, from alkylsulphonated acids of the series $C_nH_{2n}O_2$ (OTTO), 1885, A., 536.
  formation of, on sulphonating naphthalene derivatives (HELLER), 1889, P., 121.
  preparation of (OTTO and RÖSSING), 1890, A., 780.
  synthesis of aromatic (OTTO), 1885, A., 535.
  hydrolysis of (STUFFER), 1890, A., 987; 1891, A., 180; (OTTO), 1891, A., 1229.
  stability of, towards alkalis (AUTENRIETH), 1891, A., 1068.
  relation between the physiological action and chemical constitution of (BAUMANN and KAST), 1889, A., 1232; (LAVES), 1892, A., 153.

Sulphonic acid, amido- (Krafft and Bourgeois), 1892, A., 700.
chloro- (*sulphuryl hydroxychloride*) (Divers and Shimosé), 1884, T., 195.
new mode of formation of (Billitz and Heumann), 1883, A., 710.
conversion of pyrosulphuric chloride into (Ogier), 1883, A., 642.
thermal constants of (Ogier), 1883, A., 642.
vapour-density and action of heat on (Heumann and Köchlin), 1883, A., 781.
action of potassium nitrate on (Williams), 1886, T., 225.
conversion of, into sulphur chloride (Prinz), 1884, A., 1255.
fluoro- (Thorpe and Kirman), 1892, T., 921; P., 160.
imido- (Divers and Haga), 1892, T., 943.
Sulphonic acid-group, displacement of the amido-group by the (Landsberg), 1890, A., 1137.
displacement of, by chlorine (Kelbe), 1883, A., 806.
catalytic reduction of (Loew), 1891, A., 237.
Sulphonic acids (Monari), 1885, A., 970; (Spiegel), 1885, A., 987; (Limpricht), 1885, A., 1232.
hydrolysis of (Armstrong and Miller), 1884, T., 148; (Miller), 1886, P., 234; (Kelbe), 1886, A., 355.
decomposition of (Friedel and Crafts), 1885, A., 268.
decomposition of, in presence of phosphoric acid (Friedel and Crafts), 1889, A., 1200.
aromatic, method for the isolation of (Gattermann), 1891, A., 1226.
aromatic, direct conversion of, into amido-compounds (Jackson and Wing), 1886, A., 623.
alkyl salts of (Krafft and Roos), 1892, A., 1219.
anhydrides of (Armstrong), 1892, P., 41.
ethereal salts of, preparation of (Armstrong and Rossiter), 1891, P., 184.
Sulphonic acids, amido- (Pellizzari and Matteucci), 1888, A., 1302; (Krafft and Bourgeois), 1892, A., 700.
action of aldehydes on (Cahn and Lange), 1887, A., 962.
aromatic, acetyl-derivatives of (Nietzki and Benckiser), 1884, A., 1024.
Sulphonic acids, imido- (Krafft and Bourgeois), 1892, A., 700.
nitroso-, preparation of (Limpricht), 1892, A., 475.
Sulphonic chlorides, action of alcohols on (Armstrong and Rossiter), 1891, P., 184.
behaviour of, towards thiophenols and thio-alcohols in presence of alkalis (Otto), 1891, A., 720.
Sulphonic derivatives, action of heat on a mixture of sulphuric acid and (Istrati), 1890, A., 51.
Sulphonic iodides, aromatic, and action of zinc ethyl on (Otto and Tröger), 1891, A., 718, 719.
Sulpho-oleic acid (Benedikt and Ulzer), 1887, A., 914.
Sulphophenylcarbamic acid (Nölting), 1889, A., 144.
4-**Sulphophthalamide** (Rée), 1886, T., 521.
Sulphophthalamides, 3- and 4- (Remsen and Comstock), 1884, A., 320.
3-**Sulphophthalic acid** and its salts (Remsen and Comstock), 1884, A., 320; (Stokes), 1885, A., 540; (Rée), 1886, T., 512; (Moulton), 1891, A., 1064.
4-**Sulphophthalic acid** (Remsen and Comstock), 1884, A., 320; (Graebe), 1885, A., 902; (Rée), 1886, T., 510; P., 211.
from phthalic acid (Rée), 1885, A., 1062.
salts of (Remsen and Comstock), 1884, A., 320.
2:4-*di***Sulpho***iso***phthalic acid** (Wischin), 1891, A., 73.
4-**Sulphophthalic anhydride** and *mono-* and *di-***chlorides** (Rée), 1886, T., 515, 520.
4-**Sulphophthalimide,** ammonium salt of (Rée), 1886, T., 519.
β-**Sulphopropionic acid** (Andreasch), 1886, A., 226; (Rosenthal), 1886, A., 866.
δ-**Sulphopyromucamide** (Hill and Palmer), 1889, A., 37.
Sulphopyromucic acid, *di*chloro- (Hill and Jackson), 1890, A., 601.
β-**Sulphopyromucic acid** (Hill and Palmer), 1885, A., 1204; 1889, A., 386.
δ-bromo- (Hill and Palmer), 1889, A., 386.
δ-**Sulphopyromucic acid** and its derivatives (Hill and Palmer), 1885, A., 1204; 1889, A., 37.
Sulphosalicylic acids, *mono-* and *di-* (Pisanello), 1889, A., 1062.

Sulphotoluic acid, nitro- (LIMPRICHT), 1885, A., 1234.

3-**Sulpho**-*p*-**toluic acid** and its derivatives (RANDALL), 1891, A., 1228.

3-**Sulpho**-*p*-**toluic anhydride** (RANDALL), 1891, A., 1229.

Sulphotoluide (*di-p-tolylsulphone*), decomposition of (OTTO), 1886, A., 1031.

Sulpho-*o*- and -*p*-**tolylazo**-*m*- and -*p*-**cresols** (*sulphotolueneazocresols*) and their salts (NÖLTING and KOHN), 1884, A., 901.

Sulphotolylic disulphide (OTTO and TRÖGER), 1891, A., 924.

Sulphotrimellitic acid, salts of (JACOBSEN and MEYER), 1883, A., 590.

Sulphotriphenylacetic acid (ELBS and TÖLLE), 1886, A., 352.

Sulpho*iso***valeric acid** (DE VARDA), 1889, A., 35.

Sulphoxyleneazo-*β*-**naphtholdisulphonic acid**, spectrum of (HARTLEY), 1887, T., 188.

Sulphur, remarkable bed of (PREUSSNER), 1889, A., 215.
  - from Japan (DIVERS and SHIMIDZU), 1884, A., 391.
  - from New South Wales (MACIVOR), 1888, A., 560.
  - from the island of Saba (LUNGE), 1886, A., 430.
  - in the Stassfurt salt deposits (PFEIFFER), 1890, A., 336.
  - from the Yellowstone National Park (WEED and PIRSSON), 1892, A., 283.
  - from Zielenzig (ARZRUNI), 1885, A., 27.
  - in coal (BAILEY), 1890, A., 414.
  - from the fumaroles of Montecito in the Island of Ischia (OGLIALORO-TODARO), 1884, A., 1098.
  - in marine muds and nodules, and its bearing on their mode of formation (BUCHANAN), 1891, A., 994.
  - in masses of metal (WARREN), 1889, A., 13.
  - in plants, soils and moulds (BERTHELOT and ANDRÉ), 1888, A., 384.
  - in vegetable soils (BERTHELOT and ANDRÉ), 1892, A., 656.
  - selenium and tellurium, isomorphism of (MUTHMANN), 1891, A., 1417.
  - allotropic modifications of (GERNEZ), 1884, A., 389, 553, 889; 1885, A., 952, 1037, 1109; (MAQUENNE), 1884, A., 1254; 1885, A., 1037; (REICHER; RUYS), 1885, A., 346; (SABATIER), 1885, A., 952, 1037; (VAN'T HOFF), 1885, A., 1037; (DEBUS), 1888, T., 282; P., 18; (ENGEL), 1891, A., 976; (FRIEDEL), 1891, A., 977; (PETERSEN), 1892, A., 405.

Sulphur rhombic, from hydrogen sulphide (AHRENS), 1890, A., 1371.
  - crystals in square tables, genesis of (BRAME), 1885, A., 1182; 1886, A., 16.
  - crystallised, planes in (DANA), 1887, A., 343.
  - native, conditions for the formation of (ILOSVAY), 1885, A., 729.
  - Magnus's "black" (KNAPP), 1887, A., 110; 1888, A., 1163; 1891, A., 877.
  - insoluble (SCHMITZ-DUMONT), 1892, A., 1389.
  - insoluble, formation of, from sulphur vapour (GAL), 1892, A., 1150.
  - recovery of, by Mond's process (SCHAEPPI), 1883, A., 129.
  - recovery of, by Schaffner and Helbig's process (CHANCE), 1884, A., 228.
  - recovery of, from alkali waste (GROUVEN), 1885, A., 614; (ANON.) 1885, A., 1017.
  - recovery of, from hydrogen sulphide (CLAUS), 1885, A., 304.
  - recovery of, from hydrogen sulphide by means of nitrohydrochloric acid in presence of air (LUNGE), 1885, A., 454.
  - available for sulphuric acid manufacture, assay of iron pyrites for (WELCH), 1887, A., 180.
  - atomic refraction of (NASINI), 1883, A., 264; 1884, A., 149.
  - refraction-equivalent of (GLADSTONE), 1884, T., 258.
  - dispersion equivalents of (SCHRAUF), 1886, A., 406; (GLADSTONE), 1888, A., 389.
  - phosphorescence of (JACOBSEN), 1883, A., 710.
  - electrical conductivity of (DUTER), 1888, A., 640.
  - molecular weight of (BILTZ), 1888, A., 1027; 1889, A., 340.
  - molecular weight of, in solution (PATERNÒ and NASINI), 1888, A., 1027; (BECKMANN), 1890, A., 447; (HERTZ), 1891, A., 260.
  - vapour density of (KRAUSE and MEYER), 1890, A., 1365; (RIECKE), 1891, A., 381.
  - vapour density of, at a white heat (BILTZ and MEYER), 1889, A., 674.
  - valency of (KLINGER and MASSEN), 1888, A., 357; 1889, A., 1135; (NASINI and SCALA), 1889, A., 115; 1890, A., 1234.

Sulphur, expansion coefficient of (Schrauf), 1886, A., 408.
volatility of (Berthelot), 1885, A., 953.
igniting point of (Hill), 1890, A., 849.
combustion of, in oxygen (Baker), 1889, A., 465; (Noyes), 1892, A., 679.
combustion of, in oxygen at high pressure (Hempel), 1890, A., 1050.
heat of combustion of substances containing (Berthelot and Matignon), 1890, A., 1361.
affinity of the heavy metals for (Schürmann), 1889, A., 468.
a property of (Lepierre), 1891, A., 1417.
sulphur oxides, carbon, and carbon oxides, reactions between (Berthelot), 1883, A., 551.
action of, on the alkaline earths and on the alkalis (Senderens), 1892, A., 770.
action of, on ammonia and metallic bases in presence of water (Senderens), 1887, A., 327.
vapour, action of, on copper (Warren), 1888, A., 555.
action of, on metallic solutions (Vortmann and Padberg), 1890, A., 9; (Senderens), 1892, A., 770.
action of, on oxides (Filhol and Senderens), 1883, A., 710; 1884, A., 959.
action of sulphurous acid on (Debus), 1888, T., 347.
action of sulphurous acid on flowers of (Colefax), 1891, P., 180; 1892, T., 199.
action of, on water at 100° (Cross and Higgin), 1883, A., 900; (Senderens), 1892, A., 770.
influence of, on Eggertz' carbon colour test (Hogg), 1889, A., 76.
influence of, on the working of steel (Wasum), 1883, A., 404.
spontaneous oxidation of (Pollacci), 1885, A., 347.
oxidation of, in the air (Basaroff), 1883, A., 551.
oxidation of, in carbon compounds (Berthelot, André and Matignon), 1890, A., 1462.
solubility of, in alcohol (Bloxam), 1886, A., 593.
experiments to combine sulphur with (Prinz), 1884, A., 1255.
behaviour of, in the organism (Salkowski), 1889, A., 432; (Presch), 1890, A., 812.

Sulphur, "neutral" and metabolism (Rudenko), 1891, A., 1523.
attraction of animal tissues for (de Rey-Pailhade), 1889, A., 633.
state of combination of, in proteids (Krüger), 1889, A., 528.
function of, in plants (Berthelot and André), 1891, A., 606.
fate of, in germination (Tammann), 1885, A., 1004.

Sulphur-compounds, certain, action of potassium *per*manganate on (Hönig and Zatzek), 1884, A., 151.
with phosphorus (Mai), 1892, A., 14.
volatile organic, analysis of (Meyer and Stadler), 1884, A., 1215.

Sulphur salts derived from phosphorus trisulphide (Lemoine), 1884, A., 555.
amides of (Mente), 1889, A., 210.
bromides and chlorides (Spring and Lecrenier), 1886, A., 977.
Thionyl bromide (Michaelis), 1891, A., 716.

Sulphur chlorides, thermochemical investigation on the (Thomsen), 1883, A., 543.
chloride, constitution of (Prinz), 1884, A., 1255.
action of, on oils (Warren), 1888, A., 538, 633, 1348.
action of silver cyanide on (Schneider), 1885, A., 1193.
action of, on sulphurous acid (Debus), 1888, T., 345.
*di*chloride, molecular weight and refractive energy of (Costa), 1891, A., 149.
estimation, volumetric, of (Le Roy), 1891, A., 617.
*tetra*chloride, compound of auric chloride with (Lindet), 1886, A., 310.
Thionyl chloride (Schorlemmer), 1885, P., 52.
action of, on organic compounds (Heumann and Köchlin), 1883, A., 1051.
Sulphuryl chloride, function of the chlorine in (Armstrong), 1891, P., 60.
heat of formation of (Thomsen), 1884, A., 250.
action of heat on (Heumann and Köchlin), 1883, A., 781.
action of potassium nitrate on (Williams), 1886, T., 226.
Hydrogen sulphide and *per*sulphide. See Hydrogen.

Sulphide solutions, physical constitution of (PICTON), 1891, P., 176; 1892, T., 137.

Sulphides, metallic (GAUTIER and HALLOPEAU), 1889, A., 677.
  crystalline, from the Mechernich lead works (BRAND), 1890, A., 338.
  formation of natural mineral (PLAUCHUD), 1883, A., 610; (CHUARD), 1891, A., 1434.
  formation of, by pressure (SPRING), 1883, A., 904; 1884, A., 959.
  artificial production of (DOELTER), 1886, A., 207.
  aromatic, preparation of (ZIEGLER), 1890, A., 1292.
  double, of the alkali metals and the heavy metals, synthesis of (BRUNNER), 1890, A., 215.
  mineral, synthesis of (WEINSCHENK), 1890, A., 709.
  metallic, obtained in the wet way, composition of (ANTONY and LUCCHESI), 1890, A., 1216.
  metallic, colloidal state of (WINSSINGER), 1888, A., 911.
  metallic, dissociation of (HUNT), 1888, A., 1254.
  alkaline, mineralising action of (HAUTEFEUILLE and PERREY), 1888, A., 562.
  metallic, action of alkylic iodides on (KLINGER and MAASSEN), 1889, A., 1136.
  metallic, action of copper chlorides on (RASCHIG), 1884, A., 962.
  metallic, action of ferric chloride on (CAMMERER), 1892, A., 18, 278.
  decomposition of, by air containing bromine (JANNASCH), 1889, A., 1243.
  oxidation of, by the electrical current (SMITH), 1890, A., 1342.
  use of sulphuric acid to oxidise, for the estimation of their metals (DIVERS and SHIMIDZU), 1885, A., 836.
  mineral, natural, solutions of (BECKER), 1887, A., 555.
  metallic, solubility of, in thio-acids (STORCH), 1883, A., 1169.
  and sulphoxides, organic, reaction of, with potassium sulphide (OTTO and RÖSSING), 1887, A., 226.
  conversion of, into sulphates (SOMMER), 1884, A., 1092.
  nitroso- (PAVEL), 1883, A., 297.

Polysulphides, constitution of (BÖTTGER; GEUTHER), 1884, A., 1260.

Sulphur iodides (SPRING and LECRENIER), 1886, A., 978.

Sulphur *di***oxide** (*sulphurous anhydride*) in the air of Lille (LADUREAU), 1884, A., 710.
  in the air of towns (WITZ), 1885, A., 953.
  origin of, in the gases of volcanoes (RICCIARDI), 1887, A., 643.
  preparation of, with use of a Kipp's apparatus (NEUMANN), 1887, A., 769.
  constitution of (DIVERS), 1885, T., 216.
  latent heat of vaporisation of (MATHIAS), 1888, A., 773.
  and carbonic anhydride, specific weight and vapour pressure of mixtures of (BLÜMCKE), 1888, A., 775; (PICTET), 1888, A., 1015.
  and carbonic anhydride, isotherms of a mixture of (BLÜMCKE), 1889, A., 750.
  density of, at a white heat (LANGER and MEYER), 1885, A., 950.
  percentage of, in aqueous solutions of various specific gravities (GILES and SHEARER), 1886, A., 199.
  carbonic anhydride, and carbon *di*sulphide reactions with (EILOART), 1886, A., 16.
  action of, on *per*iodic acid (SELMONS), 1888, A., 338.
  decomposition of, by alkali sulphites (DIVERS), 1885, T., 209, 219.
  influence of, on the solution of zinc in dilute sulphuric acid (PULLINGER), 1890, T., 821.
  decomposition of, by carbon at high temperatures (SCHEURER-KESTNER), 1892, A., 681.
  and sulphites, oxidation of solutions of (BACHMAN), 1888, A., 649.
  percentage of sulphuric acid in plants damaged by (MACH), 1888, A., 745.
  in sugar refining (BATTUT), 1885, A., 709.
  compounds of (GEUTHER), 1884, A., 1256.
  compound of, with phenylhydrazine (MICHAELIS), 1890, A., 617.
  dissociation of the hydrate of (ROOZEBOOM), 1886, A., 117.

Sulphur *tri***oxide** (*sulphuric anhydride; sulphuric oxide*) (DIVERS), 1885, T., 218; (DIVERS and SHIMIDZU), 1886, T., 584.
  preparation of (NOBEL and FEHRENBACH), 1885, A., 1018.
  lecture apparatus for the preparation of (HODGKINSON and LOWNDES), 1888, A., 647.

- **Sulphur** *tri*oxide (*sulphuric anhydride; sulphuric oxide*), preparation of, from nitrosyl sulphate (v. Gruber), 1885, A., 199.
  - isolation of (Weber), 1887, A., 212.
  - action of, on antimonious oxide (Adie), 1890, T., 541.
  - action of phosphorus on (Adie), 1891, T., 231; P., 19.
  - action of, on selenium selenochloride (Divers and Shimosé), 1884, T., 197.
  - compounds of arsenious oxide with (Weber), 1887, A., 212; (Adie), 1889, T., 157; P., 4.
  - compound of, with boric acid (D'Arcy), 1889, T., 155; P., 4.
  - combination of, with phosphoric and iodic anhydrides (Weber), 1887, A., 328.
  - compounds of with selenious anhydride (Weber), 1887, A., 212.
- **Sulphur** *hept*oxide (Traube), 1891, A., 978; 1892, A., 401; (Carnegie), 1892, A., 111.
- **Sulphur acids**:—
  - **Sulphurous acid**, constitution of (Michaelis), 1892, A., 1324.
    - rate of chemical change between iodic acid and (Landolt), 1886, A., 658.
    - action of copper on (Causse), 1886, A., 423.
    - action of nitrous acid on (Raschig), 1887, A., 549, 635.
    - action of, on selenious acid (Schulze), 1886, A., 302.
    - action of, on sodium thiosulphate (Villiers), 1889, A., 568.
    - action of, on flowers of sulphur (Colefax), 1891, P., 180; 1892, T., 199.
    - comparative oxidation of solutions of sodium sulphite and (Reese), 1885, A., 217.
    - reduction of, by hydrogen phosphide (Cavazzi), 1886, A., 978.
    - poisonous nature of (Ogáta), 1885, A., 577.
    - injury to vegetation by (Just), 1888, A., 318.
    - contained in furnace gases, absorption and utilisation of (Anon.), 1883, A., 248.
    - complex salts of (Barth), 1892, A., 564.
  - **Sulphites** (Hartog), 1887, A., 886; 1889, A., 1106; (Schwicker), 1889, A., 942.
    - alkali, thermochemical researches on (Berthelot), 1883, A., 704.
  - **Sulphites**, metallic (Röhrig), 1888, A., 649.
    - constitution of (Divers), 1885, T., 205; P., 26; (Divers and Shimidzu), 1886, T., 533; P., 139.
    - their place in a series of sulphuryl compounds (Divers), 1885, T., 217.
    - interrelations of, with sulphonates and sulphinites (Divers), 1885, T., 211.
    - instability of (Divers), 1885, T., 212.
    - action of heat on (Divers), 1885, T., 208.
    - action of, on chlorates (Prud'homme), 1885, A., 207.
    - action of iodine on a mixture of thiosulphates and (Colefax), 1892, T., 1083; P., 155.
    - and nitrites of metals other than potassium, reaction between (Divers and Haga), 1887, T., 659; P., 100.
    - action of phosphorus *penta*chloride and of sulphur *di*oxide on (Divers), 1885, T., 206, 209, 219.
    - action of phosphorus oxychloride on (Divers), 1885, T., 207; P., 26; (Divers and Shimidzu), 1886, T., 588.
    - conversion of certain other salts into, by sodium, and of sulphites into other salts by chlorine or iodine (Divers), 1885, T., 210.
  - **Pyrosulphites** (*metasulphites*) (Berthelot), 1883, A., 705; (Meysztowicz), 1888, A., 344.
  - **Sulphurous acid, detection and estimation**:—
    - delicate test for (Witz), 1885, A., 954.
    - microscopic detection of (Denigès), 1892, A., 237.
    - detection of, in presence of thiosulphates and sulphates (Villiers), 1887, A., 749.
    - detection of, in wine (Liebermann), 1883, A., 384.
    - titration of (Lunge), 1884, A., 776.
    - estimation of (Classen and Bauer), 1883, A., 934; (Reese), 1885, A., 296; (Blarez), 1886, A., 918; (Volhard), 1888, A., 192.
    - estimation of, in admixture with hydrogen sulphide (Lunge), 1891, A., 498.
    - estimation of, in beer (Herz), 1886, A., 102.

Sulphurous acid, estimation:—
estimation of, in fuming sulphuric acid (Sětlík), 1890, A., 414.
estimation of, in presence of thiosulphuric acid (Kalmann), 1887, A., 618.
estimation of, in wine (Wartha), 1883, A., 621.

Sulphuric acid in chalybeate waters (Willm), 1891, A., 1440.
in natural and plastered wines (Vitali), 1891, A., 1551.
mode of combination of, in plastered wines (Magnier de la Source), 1891, A., 768.
theory of the formation of (Lunge), 1888, P., 3.
formation of, in the animal body (Goldmann), 1885, A., 922.
formation of, in burning coal-gas (Přiwoznik), 1892, A., 1151, 1389; (Lieben), 1892, A., 1374.
formation of, in the preparation of *di*thionic acid (Spring and Bourgeois), 1886, A., 978.
quantitative production of, a lecture experiment (v. Hofmann), 1883, A., 281.
manufacture of (Bornträger; Pemberton), 1884, A., 126.
manufacture of, in America (anon.), 1884, A., 230.
manufacture of, from pyrites in America (Lunge), 1884, A., 1082.
loss of nitre in the manufacture of (Eschellmann), 1884, A., 1222.
influence of the Glover tower in the manufacture of (Scheurer-Kestner), 1885, A., 706.
utilisation of the nitrogen-compounds from the manufacture of (Wachtel), 1883, A., 130.
lead chamber deposit from Japanese (Divers and Shimosé), 1884, A., 392.
theory of the lead chamber process (Lunge), 1884, A., 698; 1888, P., 3; 1889, A., 103; (Raschig), 1889, A., 103.
chambers, working of (Pemberton), 1883, A., 887.
chambers, use of Korting's apparatus for forcing the gases through (Scheurer-Kestner), 1885, A., 1166.
chambers, the currents of the gases in (Abraham), 1883, A., 129.
chambers, action in (Naef), 1886, A., 400.
chamber exit gases, testing (Lunge), 1891, A., 497.

Sulphuric acid chambers, estimation of the total acidity in the flue gases from (Younger), 1888, A., 193.
purification of (Menzies), 1885, A., 304; (anon.), 1885, A., 1269; (Kupfferschläger), 1886, A., 302.
purification of, for Kjeldahl's process (Lunge), 1891, A., 617.
dilute, composition of (Pickering), 1892, A., 271.
specific conductivity of (Kohlrausch), 1883, A., 413.
electrical conductivity of solutions of (Crompton), 1888, T., 118; (Pickering), 1889, P., 88; 1890, T., 86, 158; (Bouty), 1889, A., 556.
electrolysis of solutions of, of different degrees of concentration (Gladstone and Tribe), 1883, T., 345; 1884, A., 654; (Richarz), 1885, A., 624; (McLeod), 1886, T., 591; P., 215; (Bouty), 1889, A., 556.
electrolysis of dilute, formation of hydrogen *per*oxide at the anode during the (Richarz), 1888, A., 12.
thermochemistry of (Massol), 1891, A., 968.
heat of neutralisation of (Pickering), 1889, T., 323; P., 79.
solutions, heat capacity of (Pickering), 1889, P., 87, 88; 1890, T., 88, 160.
heat conductivity of (Chree), 1888, A., 641.
heat of dilution of (Mendeléeff), 1886, A., 413.
heat of solution of (Pickering), 1889, P., 86; 1890, T., 94, 165.
solutions, expansion by heat of (Pickering), 1889, P., 88; 1890, T., 114, 177.
solutions, properties of (Pickering), 1891, P., 105; A., 973.
solutions of, cryoscopy of (Pickering), 1889, P., 106, 150; 1890, T., 331; 1892, A., 678.
solutions, specific gravity of (Kohlrausch), 1883, A., 413; (Lunge and Naef), 1883, A., 851; (Lunge), 1884, A., 1256; 1885, A., 216; (Mendeléeff), 1885, A., 121; 1886, A., 413; 1888, A., 343; (Pickering), 1889, P., 86; 1890, T., 69, 139; 1892, A., 271, 272; (Lunge and Isler), 1891, A., 150; (Rücker), 1892, A., 271.

- **Sulphuric acid** and water, contraction on mixing (Pickering), 1892, A., 271.
  - volume-weight of (Schertel), 1883, A., 288.
  - volatility of, at ordinary temperatures (Colefax), 1891, A., 977.
  - coefficient of diffusion of (Stefan), 1889, A., 1047.
  - affinity of certain divalent metals for (Fink), 1887, A., 885.
  - quantity of moisture remaining in gases after drying by (Morley), 1886, A., 278.
  - action of, on antimonious oxide (Adie), 1890, T., 541.
  - action of, on metals (Veley), 1888, A., 104; (Ditte), 1891, A., 260.
  - action of, on zinc (Muir and Adie), 1887, P., 106; 1888, T., 47; (Pullinger), 1890, T., 815; P., 136.
  - action of, on zinc containing lead (Spring and van Aubel), 1887, A., 1076.
  - influence of, on the action of invertase on cane-sugar (O'Sullivan and Tompson), 1890, T., 855.
  - as an iodine carrier (Neumann), 1887, A., 573.
  - absorption of, by wool, silk and cotton (Mills and Takamine), 1883, T., 144.
  - total, in urine, relation between, and that existing as ethereal sulphates in rest and work (Sher), 1889, A., 430.
  - as a manure (Märcker), 1883, A., 681; (Farský), 1884, A., 775; 1885, A., 83; 1886, A., 954; (Fresenius; Stocks), 1884, A., 926.
  - amides and imides of (Traube), 1892, A., 1389.
  - hydrates of (Pickering), 1889, P., 88, 106, 128, 151; A., 941; 1890, T., 128, 339.
  - compounds of vanadic anhydride with (Münzing), 1890, A., 336.
- **Sulphates** from California (Melville and Lindgren), 1892, A., 1407.
  - formation of, in germination (Schulze), 1885, A., 1153.
  - constitution and dimorphism of (Geuther), 1883, A., 973.
  - magnetic rotation of (Perkin), 1890, P., 143.
  - efflorescence of metallic (Baubigny and Péchard), 1892, A., 1271.
- **Sulphates** and chlorides, relation between the heats of formation of, in aqueous solution (Fay), 1888, A., 401.
  - determination of atomic weights by means of normal (Bailey), 1887, T., 676; P., 100.
  - solubility of (Etard), 1888, A., 645
  - solubility of, effect of sulphuric acid on the (Engel), 1887, A., 546.
  - solubility of, decrease in the (Etard), 1888, A., 548.
  - reduction of, by algæ (Etard and Olivier), 1883, A., 229; (Etard), 1883, A., 680.
  - alkaline, reduction of, by hydrogen and by carbon (Berthelot), 1890, A., 1053.
  - reduction of, by "sulfuraires" (Plauchud), 1883, A., 610.
  - reaction between ferric oxide and certain, at high temperatures (Scheurer-Kestner), 1885, A., 125.
  - anhydrous, crystallised (Klobb), 1892, A., 941.
  - basic (Habermann), 1884, A., 151.
  - conjugated (Roy), 1887, P., 53.
  - double, hydrous, natural (Blaas), 1884, A., 1103.
  - double, modifications of: specific heat determinations (Pickering), 1885, P., 101, 112; 1886, T., 1, 12.
  - multiple (Aston and Pickering), 1885, P., 129; 1886, T., 123.
  - octo- (Weber), 1885, A., 121.
  - nitro- (Divers and Haga), 1885, T., 203; P., 25.
- **Sulphuric acid, detection and estimation:—**
  - detection of (Pickering), 1883, A., 240.
  - detection of nitrogen compounds in seleniferous (Lunge), 1887, A., 998.
  - detection of nitrous compounds in (Wilson), 1890, A., 922.
  - detection of nitric oxide in (Lunge), 1885, A., 954; 1886, A., 391; (Bayley), 1886, A., 833.
  - detection of, in aluminium sulphate (Miller), 1883, A., 1168; (Egger), 1889, A., 648.
  - detection of, in wines (Magnier de la Source), 1891, A., 768.
  - titration of (Soltsien), 1891, A., 115.

- **Sulphuric acid, detection and estimation:**—
  - and iodates, precipitation of mixtures of, by barium salts (Chrustschoff), 1887, A., 884.
  - estimation of (Marsh), 1889, A., 1032; (v. Meyer), 1890, A., 1342; (Baumann), 1892, A., 104, 538; (Lunge), 1892, A., 538; (Cazeneuve and Nicolle), 1892, A., 659.
  - estimation, volumetric, of (Knöfler), 1886, A., 180; (Wilsing), 1887, A., 181; (Quantin), 1887, A., 181; 1889, A., 1087; (Gawalowski), 1888, A., 751; 1890, A., 825; (North), 1889, P., 5; (Linossier), 1889, A., 75; (Sidersky), 1889, A., 306; (Andrews), 1890, A., 414; (Bouriez), 1892, A., 1377; (Farnsteiner), 1892, A., 1515.
  - estimation of, in presence of alkaline chlorides (Schulze), 1883, A., 240.
  - estimation of, in alum cake and sulphate of alumina (Williams), 1888, P., 84; A., 88.
  - estimation of, in presence of iron (Jannasch and Richards), 1889, A., 926; (Jannasch; Lunge), 1889, A., 1244.
  - estimation of, in presence of organic matter (Pomeroy), 1884, A., 109.
  - estimation of, in soils (Fricke), 1890, A., 833.
  - estimation of, in water (Fricke), 1887, A., 862.
  - estimation of, in rain water (Warington), 1889, T., 545.
  - estimation, volumetric, of, in urine (Freund), 1892, A., 1377.
  - estimation of ethereal hydrogen sulphates and, in urine (Salkowski), 1886, A., 739.
- **Pyrosulphuric acid**, specific conductivity of (Kohlrausch), 1883, A., 413.
  - action of, on certain metals (Divers and Shimidzu), 1885, T., 636.
- **Pyrosulphates** (Schulze), 1885, A., 216.
- **Pyrosulphuric chloride** (Konowaloff), 1883, A., 553, 782, 900; (Heumann and Köchlin), 1883, A., 1051.
  - mode of formation of (Heumann and Köchlin), 1883, A., 710.
  - heat of formation of (Konowaloff), 1884, A., 250.
- **Pyrosulphuric chloride,** vapour density of (Ogier), 1883, A., 423, 646; (Heumann and Köchlin), 1883, A., 710.
  - conversion of, into sulphuric *mono*chloride (Ogier), 1883, A., 642.
- **Hyposulphurous acid**, influence of, on the solution of zinc in dilute sulphuric acid (Pullinger), 1890, T., 822.
- **Persulphuric acid** and its salts (Berthelot), 1892, A., 931.
  - electrical behaviour of platinum in (Richarz), 1889, A., 1041.
  - galvanic polarisation in the formation of (Richarz), 1889, A., 1041.
  - behaviour of, towards nitrogen (Traube), 1889, A., 941.
  - formation of hydrogen *per*oxide from (Traube), 1889, A., 940.
  - *di*thio- (Villiers), 1888, A., 650.
- **Persulphates** (Marshall), 1891, T., 771; P., 124; (Berthelot), 1892, A., 12.
- **Thiosulphuric acid,** time of existence of, in aqueous solution (Landolt), 1884, A., 554; (Winkelmann), 1885, A., 722.
  - action of potassium *per*manganate on (Hönig and Zatzek), 1886, A., 504.
  - decomposition of (Colefax), 1892, T., 176.
- **Thiosulphates** (Schwicker), 1889, A., 942; (Fock and Klüss), 1890, A., 210, 330, 564, 1057; 1891, A., 879; 1892, A., 12; (Purgotti), 1892, A., 1418.
  - formation of (Donath and Müllner), 1888, A., 649.
  - action of acids on (Berthelot), 1889, A., 824; (Vaubel), 1889, A., 943; (Vortmann), 1889, A., 1107.
  - and sulphites, action of iodine on mixtures of (Colefax), 1892, T., 1083; P., 155.
  - action of, on metallic salts (Vortmann), 1889, A., 1107.
  - decomposition of, by acids (Foussereau), 1887, A., 883.
  - solutions, preservation of (Salzer), 1892, A., 1514.
  - alkali (Berthelot), 1883, A., 707.
  - alkaline, and acetic acid (Mathieu-Plessy), 1885, A., 1038.
  - double (Jochum), 1886, A., 17; (Cohen), 1886, P., 251; 1887, T., 38.

Thiosulphuric acid, detection and estimation:—
  detection of, in a mixture of alkaline salts (DE KONINCK), 1887, A., 297; (FLÜCKIGER), 1887, A., 689.
  detection of, in sodium hydrogen sulphocarbonate (MUSSET), 1891, A., 498.
  detection of, in urine (PRESCH), 1890, A., 812.
  detection of, in water (NEUHÖFFER), 1886, A., 99.
  estimation of (BRÜGELMANN), 1884, A., 492.
Thionic acids, thermochemistry of (BERTHELOT), 1889, A., 667.
  action of alkalis on (BERTHELOT), 1889, A., 823.
Dithionic acid, basicity of (TREY), 1885, A., 870.
  formation of, from sodium sulphite (HOLST and OTTO), 1891, A., 978.
  formation of sulphuric acid in the preparation of (SPRING and BOURGEOIS), 1886, A., 978.
Dithionates (KLÜSS), 1888, A., 784, 1156.
Trithionates, formation of, by the action of iodine on mixtures of sulphites and thiosulphates (SPRING), 1892, P., 91.
  action of alkalis on (BERTHELOT), 1889, A., 823.
  action of hydrogen sulphide on (DEBUS), 1888, T., 329.
Tetrathionates, preparation of, from Wackenroder's solution (CURTIUS and HENKEL), 1888, A., 552.
  alkaline, preparation of (v. KLOBUKOFF), 1885, A., 1110.
  action of alkalis on (BERTHELOT), 1889, A., 823.
  action of hydrogen sulphide and of sulphurous acid on (DEBUS), 1888, T., 328, 333.
Pentathionic acid (SMITH), 1883, T., 355.
  method for preparing (SALZER), 1886, A., 850.
  influence of time on the formation of (DEBUS), 1888, T., 333.
Pentathionates, preparation of (SHAW), 1883, T., 351.
  characteristic reactions of (DEBUS), 1888, T., 297.
  action of alkalis on (BERTHELOT), 1889, A., 823.
  action of hydrogen sulphide and of sulphurous acid on (DEBUS), 1888, T., 328, 331.
Polythionates (SPRING), 1892, P., 91.
  formulæ of (DEBUS), 1888, T., 351.
  action of sulphurous acid on (DEBUS), 1888, T., 331; P., 18.
  general reactions of (DEBUS), 1888, T., 298.
Thionic acids. See also Wackenroder's solution.
Sulphur, detection and estimation:—
  detection of, in alkaline sulphides (PRUNIER), 1890, A., 291.
  detection of, not combined with hydrogen in illuminating gas (ILOSVAY), 1891, A., 862.
  detection of, in organic compounds (MARSH), 1889, A., 796.
  estimation of (CLASSEN and BAUER), 1883, A., 934; (TREADWELL), 1891, A., 1137; 1892, A., 1375; (CRAIG), 1892, A., 382.
  estimation of, influence of copper on the (BRUGMAN), 1887, A., 296.
  estimation, simultaneous, of carbon and (PRUNIER), 1890, A., 290.
  estimation, volumetric, of (v. KLOBUKOFF), 1885, A., 1159; (FRIEDHEIM), 1886, A., 739; 1887, A., 396, 749; (WEIL), 1886, A., 918; 1887, A., 618, 998; (C. and J. J. BERINGER), 1889, A., 437; (VITALI), 1892, A., 1515.
  estimation of, by Sauer's method and some modifications of it (MIXTER), 1883, A., 239.
  estimation of, in coal (DROWN), 1883, A., 383; (ATKINSON), 1887, A., 296; (BAILEY), 1890, A., 414; (NEILSON), 1891, A., 1137.
  estimation of, in coal-gas (KNUBLAUCH), 1883, A., 382; (FAIRLEY), 1887, A., 297.
  estimation of, in coke (ATKINSON), 1887, A., 296; (BLUM), 1888, A., 1333.
  estimation of, in copper (PHILLIPS), 1891, A., 362; (LOBRY DE BRUYN), 1892, A., 753.
  estimation of, in galena (JANNASCH and ASCHOFF), 1892, A., 658.
  estimation of, in iron and steel (CRAIG), 1883, A., 121, 512, 883; (ROCHOLL), 1883, A., 512, 883; (PETER), 1885, A., 1161; (WIBORGH), 1886, A., 743; (MÖLLER), 1887, A., 296; (MORGAN), 1887, A., 1140; 1888, A., 1334; (PLATZ), 1887, A., 1141; (ARNOLD and HARDY), 1888, A., 1333; (v. REIS), 1889, A., 648; (BLUM), 1890, A., 921; 1892, A., 1376; (COHEN

Sulphur, estimation:—
ARCHBUTT), 1890, A., 1463; (REINHARDT), 1890, A., 1464; (v. REIS and WIGGERT), 1891, A., 1549; (WILSON), 1892, A., 382.
estimation of, in oils (ALLEN), 1888, A., 627.
estimation of, in organic compounds (KEISER), 1884, A., 500; (KLASON), 1886, A., 918; (MESSINGER), 1889, A., 81; (BURTON), 1890, A., 289; (ANGELI), 1892, A., 382.
estimation of, in proteids (HAMMARSTEN), 1885, A., 914, 931; (KOCHS), 1887, A., 396.
estimation of, in pyrites (BODEWIG), 1884, A., 492; (LUNGE), 1884, A., 492; 1886, A., 280; 1888, A., 85; 1890, A., 413; 1891, A., 496; (CLARK), 1886, A., 279; (WELCH), 1887, A., 180; (WESTMORELAND), 1888, A., 85.
estimation of, in burnt pyrites (WATSON), 1889, A., 306; (LUNGE), 1890, A., 193.
estimation of, in soluble slags (CAMPBELL), 1887, A., 526.
estimation of, in vegetable soil (BERTHELOT and ANDRÉ), 1892, A., 656.
estimation of, in inorganic sulphides (LUNGE), 1889, A., 1244; (JANNASCH), 1889, A., 1244; 1890, A., 1187; (BLUM), 1891, A., 107; (JANNASCH and WASOWICZ), 1892, A., 657.
Sulphuranes (DEMUTH and MEYER), 1887, A., 906; (BRAUN), 1888, A., 243.
Sulphuretted hydrogen. See Hydrogen sulphide.
Sulphuric acid. See under Sulphur.
anhydride or oxide. See Sulphur *tri*oxide.
Sulphur-island, a, in New Zealand (MACIVOR), 1888, A., 427.
Sulphurous acid. See under Sulphur.
anhydride. See Sulphur *di*oxide.
disinfecting powders, analysis of (MUTER), 1891, A., 124.
waters. See Water.
Sulphurylamide, imido- (MENTE), 1889, A., 211.
Sulphuvinuric acid (HANTZSCH and TRAUMANN), 1888, A., 573.
Sulphydrates. See Hydrosulphides.
Sulphydroethylphthalimide (*mercaptoethylphthalimide*) (GABRIEL), 1889, A., 870.
preparation of (GABRIEL), 1891, A., 815.
Sulphydroethylphthalimide (*mercaptoethylphthalimide*), action of various reagents on (GABRIEL), 1892, A., 130.
Sulphydromethenylamidothionaphthol and its methyl ether (JACOBSON and FRANKENBACHER), 1891, A., 1049.
$\mu\beta$-**Sulphydromethylthiazoline** ($\mu\beta$-*mercaptomethylthiazoline*) (HIRSCH), 1890, A., 860.

  glucoside, synthesis of (Guyard), 1884, A., 1304.
Tartarotartaric acid (Mulder), 1892, A., 965.
Tartramidobenzoic acids, tartranbenzamic acid, tartranilbenzamic acid, and **tartrandibenzamic acid** (Schiff), 1886, A., 621.
Tartranilide, preparation and acetyl derivatives of (Polikier), 1892, A., 54.
Tartrazine dyes (Ziegler and Locher), 1887, A., 578.
Tartrazinesulphonic acid, nitro-, sodium salt of (Lerch), 1889, A., 881.
Tartromalic acid (Ordonneau), 1892, A., 589.
Tartronamide (Freund), 1884, A., 1124; (Pinner), 1886, A., 48.
Tartronic acid (*hydroxymalonic acid*) (Pinner), 1886, A., 48.
  from glycerol, attempt to obtain, by electrolytic oxidation (Bizzarri and Campani), 1884, A., 297.
  preparation of (Pinner), 1885, A., 759.
  thermochemistry of (Massol), 1892, A., 675.
  heat of neutralisation of (Gal and Werner), 1887, A., 96.
  derivatives of (Freund), 1884, A., 1123.
  alkali salts of (Massol), 1892, A., 675.
Tartryl-benzamic, -dibenzamamidic and **-dibenzamic acids** (Schiff), 1886, A., 622.
Taste, a plant which destroys the sense of, for sweets and bitters (Berthold), 1889, A., 182.
Taurammelide (Rathke), 1888, A., 583.
Taurammeline, inner anhydride of (Rathke), 1888, A., 583.
Taurine (*amidoethanesulphonic acid*), heats of combustion and formation of (Berthelot), 1890, A., 1361.
  derivatives of (James), 1885, T., 367; P., 46; 1886, T., 486; P., 212.
Taurines, mono-, di- and tri-substituted, general method for the preparation of (James), 1885, T., 367.
Taurocholic acid, behaviour of, with albumin and peptones (Maly and Emich), 1883, A., 673.
Taurodiammeline (Rathke), 1888, A., 583.
Tautomeric compounds (Nef), 1889, A., 509; 1890, A., 983.
  experiments to determine the constitution of (Goldschmidt and Meissler), 1890, A., 499.
Taxine, the alkaloid of the yew tree, and its ethiodide (Hilger and Brande), 1890, A., 650.
Tea, preparation of (Kozai), 1892, A., 1371.
  Chinese (Dvorkovitch), 1891, A., 1302.
  Japanese (Takayama), 1885, A., 582.
  Paraguay (*maté*) (Sellin), 1884, A., 354; (Peckolt), 1884, A., 479.
  alkaloid from (Paul and Cownley), 1889, A., 416.
  analysis of (Kellner), 1887, A., 73; (Domergue and Nicolas), 1892, A., 926.
  estimation of the quantity of ash in (Nikitinski), 1885, A., 845.
  estimation of caffeine in (Paul and Cownley), 1888, A., 539; 1891, A., 358; (Spencer), 1891, A., 134, 964; (Vité), 1891, A., 372; (Dvorkovitch), 1891, A., 1302.
  estimation of tannin in (White), 1889, A., 1092; (Maltschewsky), 1891, A., 132; (Dvorkovitch), 1891, A., 1302.
  Indian and Ceylon, estimation of tannin in (Hooper), 1890, A., 820.
Tea-oil from *Camellia oleifera* (Davies), 1885, A., 1022.
Teak, mineral substances in (Hooper), 1892, A., 230.
  destructive distillation of (Romanis), 1887, T., 868; P., 114.

Tectone (Romanis), 1887, T., 871.
Tectoquinone and its derivatives (Romanis), 1888, P., 116.
Teeth, influence of various salts on the composition of (Weiske), 1892, A., 647.
Tellurium in copper (Egleston), 1883, A., 531.
  from Faczebaya (v. Foullon), 1885, A., 1116; (Loczka), 1892, A., 1054.
  atomic weight of (Brauner), 1889, T., 382; P., 94.
  valency of (Michaelis), 1887, A., 770.
  compound nature of (Brauner), 1889, T., 407, 411.
  spectrum of (Hartley), 1883, T., 399.
  specific heat of (Fabre), 1888, A., 332; 1889, A., 203.
  heat relations of the allotropic modification of (Berthelot and Fabre), 1887, A., 761.
  reactions of (Demarçay), 1884, A., 663.
  action of nitric acid on (Klein and Morel), 1885, A., 16.
  action of, on solutions of silver and copper nitrates (Senderens), 1887, A., 332.
  evidence of a new element in (Grünwald), 1890, A., 434.
  sulphur and selenium, isomorphism of (Muthmann), 1891, A., 1417.
  compounds, reaction of (Divers and Shimosé), 1883, T., 329.
Tellurium *tetra*bromide, preparation of (Brauner), 1889, T., 396.
  chlorides, thermochemical investigation on (Thomsen), 1883, A., 543.
    electrolytic conductivity of (Hampe), 1888, A., 889.
  *di*chloride (Michaelis), 1887, A., 1078.
  *tetra*chloride, vapour density of (Michaelis), 1887, A., 770.
  Tellurous hydrate (Klein and Morel), 1885, A., 16.
Tellurium hydride. See Hydrogen telluride.
  Tellurides, crystallised, heat of formation of (Fabre), 1887, A., 1010.
Tellurium iodides, electrolytic conductivity of (Hampe), 1888, A., 889.
  nitrate, basic (Klein), 1884, A., 1256; (Klein and Morel), 1885, A., 16, 17, 870.
  *mono*xide (Divers and Shimosé), 1883, T., 319.
Tellurium *di*oxide (*tellurous anhydride*) (Klein and Morel), 1885, A., 16, 870.
    dimorphism of (Klein), 1886, A., 767.
    compounds of (Klein), 1884, A., 1256; (Klein and Morel), 1885, A., 870.
  sulphoxide (Divers and Shimosé), 1883, T., 323; (Divers and Shimidzu), 1886, T., 583.
  Telluryl citrates and tartrates (Klein), 1886, A., 336.
Tellurium, detection, estimation and **separation**:—
  microchemical test for (v. Haushofer), 1887, A., 301.
  detection and estimation of (Donath), 1891, A., 242.
  estimation, volumetric, of (Brauner), 1890, P., 168; 1891, T., 58, 238; P., 31.
  separation of (Donath), 1891, A., 242.
  separation, quantitative, of, from selenium (Divers and Shimosé), 1885, T., 439; P., 53.
Tellurium minerals from Honduras (Dana and Wells), 1891, A., 153.
Tellurium silver bismuth from Jalisco, Mexico (de Landero), 1887, A., 1084.
Tellurous anhydride. See Tellurium *di*oxide.
Temper, influence of, on the electrical resistance of glass (Foussereau), 1883, A., 701.
Temperature. See under Thermochemistry.
Tengkawang fat or vegetable tallow (Bakker), 1885, A., 710.
Tephrites (Doelter), 1883, A., 721.
Tephroite (Sjögren), 1884, A., 972.
  artificial production of (Gorgeu), 1884, A., 164.
Teraconic acid, synthesis of (Schleicher), 1892, A., 427.
  constitution of (Frost), 1885, A., 393.
Terbia, equivalent of (Lecoq de Boisbaudran), 1886, A., 424, 507; 1891, A., 17.
Terbia earths, spectrum of the (Lecoq de Boisbaudran), 1886, A., 293; (Bettendorff), 1892, A., 1400.
β-**Terebangelene** (Naudin), 1883, A., 810.
Terebene. See Pinene under Terpenes.
Terebenthene and its derivatives. See under Terpenes.
Terebenthic acid (Tanret), 1888, A., 720.

Terebic acid and its derivatives (Roser), 1884, A., 459; (Frost), 1885, A., 393.
  constitution of (Frost), 1885, A., 393.
  crystalline form of (Leiveh), 1886, A., 543.
  heat of combustion of (Ossipoff), 1889, A., 460.
  action of alcoholic ammonia and of aniline on (Corselli), 1891, A., 1384.
Terebilic acid, crystalline form of (Leiveh), 1886, A., 543.
  action of heat on (Frost), 1885, A., 394.
  derivatives of (Roser), 1884, A., 459.
  chloro-, and some of its salts (Roser), 1884, A., 460.
Terecamphene. See Camphene under Terpenes.
Terephthalaldehyde (Löw), 1886, A., 461.
  preparation of (Hönig), 1889, A., 505.
  action of ammonia on (Oppenheimer), 1886, A., 547.
  action of potassium cyanide on (Oppenheimer), 1886, A., 876.
  condensation of, with hydrocarbons (Oppenheimer), 1886, A., 946.
  nitro-, action of potassium cyanide on (Homolka and Löw), 1886, A., 701.
Terephthalaldehydic acid, and its derivatives (Löw), 1885, A., 799.
Terephthalaldoxime, and its ethyl and acetyl derivatives (Westenberger), 1884, A., 581.
Terephthalamic acid (Sandmeyer), 1885, A., 981.
Terephthalamide, 2:5-*di*chloro- (Levy and Curchod), 1889, A., 1179.
  thio- (Luckenbach), 1884, A., 1158.
Terephthalamidine, and its salts (Luckenbach), 1884, A., 1158.
Terephthalic acid (*p-phthalic acid*), from *iso*butylbenzoic acid (Pahl), 1884, A., 1010.
  preparation of (v. Baeyer), 1888, A., 1072; (Hell and Rockenbach), 1889, A., 601; (v. Baeyer and Herb), 1890, A., 1130.
  thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096; (Stohmann and Kleber), 1891, A., 376.
  reduction products of (v. Baeyer), 1888, A., 1069; 1889, A., 1176; (v. Baeyer and Herb), 1890, A., 1130.
Terephthalic acid (*p-phthalic acid*), derivatives of (Ahrens), 1886, A., 801.
  hydrogenised derivatives of, heats of combustion and formation of (Stohmann and Kleber), 1891, A., 376.
Terephthalic acid, bromo- (Fileti), 1887, A., 52.
  2:5-*di*bromo-, and its salts (Schultz), 1885, A., 1054.
  2:3:5- and 3:6:2-*di*bromonitro- (Fileti and Crosa), 1891, A., 1056.
  chloro- (Fileti and Crosa), 1889, A., 496.
  2:5-*di*chloro- (Levy and Andreocci), 1888, A., 841, 1091.
  chlorobromo- and chlorobromonitro- (Willgerodt and Wolfien), 1889, A., 966.
Terephthalic chloride, 2:5-*di*chloro- (Levy and Curchod), 1889, A., 1179.
Terephthalic sulphinide (Noyes and Walker), 1887, A., 728.
Terephthalonitrile, derivatives of (Luckenbach), 1884, A., 1157.
Terephthalophenone (Nölting and Kohn), 1885, A., 389; 1886, A., 349.
  dioxime (Münchmeyer), 1886, A., 877.
Terephthalyl ethyl ketone (Münchmeyer), 1886, A., 877.
Terfâs (*kámes*), relation between truffles and (Chatin), 1892, A., 654.
Terfezia Bouderi, *T. claveryi* and *T. hafazi*, analysis of (Chatin), 1892, A., 654.
Terminalia Chebula, chebulinic acid from (Fridolin), 1885, A., 396.
TERPENES and THEIR DERIVATIVES (Wallach), 1885, A., 550; 1886, A., 70; 1887, A., 595; 1888, A., 60, 1098; 1890, A., 1314; 1891, A., 217, 1078, 1240; (Brühl), 1888, A., 377, 494; 1892, A., 200, 347, 624, 1100; (Armstrong), 1891, T., 311; (Marsh and Gardner), 1891, T., 648, 725; (Dunwody), 1891, A., 217; (Brühl, Biltz, Cantzler and Reuter), 1892, A., 623; (Brühl and Müller), 1892, A., 772.
  and ethereal oils (Wallach), 1887, A., 965; 1888, A., 1204; 1889, A., 1072; 1891, A., 217; (Wallach and Gildemeister), 1888, A., 1204.
  "olefinic" (Semmler), 1891, A., 655.
  in the oil from compressed gas (Etard and Lambert), 1891, A., 1085.

Terpenes and their derivatives :—

- from oil of myrtle (Jahns), 1889, A., 616; (Bartolotti), 1891, A., 1348.
- from oxy*iso*amylamine, synthesis of (Radziszewski and Schramm), 1884, A., 1190.
- from *Pinus Abies* (Kuriloff), 1890, A., 789; 1892, A., 625.
- from *Pinus Cembra* (Flawitzky), 1890, A., 789.
- from Russian turpentine, degree of saturation of (Stschükareff), 1892, A., 1350.
- constitution of (Kanonnikoff), 1886, A., 336; (Tilden), 1888, T., 879; P., 89.
- formulæ of (Wallach), 1887, A., 968.
- isomerism in (Wallach), 1889, A., 1069.
- physical properties of (Brühl), 1888, A., 377.
- molecular refraction as a means of determining the constitution of (Wallach), 1888, A., 845.
- specific rotatory and refractive powers of, relation between (Kanonnikoff), 1889, A., 453.
- refraction and dispersion equivalents of (Gladstone), 1886, T., 612.
- decomposition of, by heat (Tilden), 1884, T., 410.
- presence of ethylene linkages in (Markownikoff), 1891, A., 464; (Wagner), 1891, A., 1084.
- additive products of (Maissen), 1883, A., 1140.
- and their compounds with hydro-acids (Wallach), 1887, A., 965.
- derivatives of, rotatory power of (Wallach; Wallach and Conrady), 1889, A., 1071.
  - physical properties of (Brühl), 1888, A., 377.
- **Australene** (*d-pinene*) (Barbier and Hilt), 1889, A., 616; (Marsh and Gardner), 1891, T., 727.
- *iso***Australene** (Barbier and Hilt), 1889, A., 616.
- **Camphene** (*borneocamphene, terecamphene*) (Wallach), 1886, A., 70; 1891, A., 1082; 1892, A., 868, 1481; (Brühl), 1888, A., 377; 1892, A., 625, 1240; (Brühl, Biltz, Cantzler and Reuter), 1892, A., 624.
  - lævogyrate, action of glacial acetic acid on (Lafont), 1887, A., 969.
  - active (Bouchardat and Lafont), 1887, A., 596.

Terpenes and their derivatives :—

- **Camphene** (*borneocamphene, terecamphene*), preparation of (Marsh and Gardner), 1891. T., 648.
  - constitution of (Marsh and Stockdale), 1890, T., 964; (Collie), 1892, A., 865; (Wallach), 1892, A., 868.
  - molecular refraction of (Wallach), 1889, A., 1069.
  - action of heat on (Tilden), 1884, T., 417.
  - action of phosphoric chloride on (Marsh and Gardner), 1891, T., 652.
  - oxidation of (Marsh and Gardner), 1891, T., 649.
- **Camphene-series**, thermochemistry of the (Berthelot and Matignon), 1891, A., 1313.
- "**Camphenes**, olefinic" (Semmler), 1891, A., 540.
- **Caoutchene.** See Dipentene.
- **Carvene.** See *d*-Limonene.
- **Cedrene**, molecular refraction and dispersion of (Gladstone), 1886, T., 618; 1891, T., 295.
- **Cinene.** See Dipentene.
- **Citrene.** See *d*-Limonene.
- **Colophene**, action of heat on (Tilden), 1884, T., 417.
  - dihydride (Vesterberg), 1886, A., 1039.
- **Dihydrocamphene** derivatives (Tanret), 1887, A., 676.
- **Dipentene** (*caoutchene, cinene, i-limonene*) (Tilden), 1884, T., 413; (Hell and Stürcke), 1884, A., 1363; (Wallach and Brass), 1885, A., 172; (Bouchardat and Lafont), 1886, A., 890; (Brühl), 1888, A., 377; (Wallach), 1889, A., 1072; 1891, A., 1083.
  - refraction and dispersion equivalents of (Gladstone), 1886, T., 618.
  - *tetra*bromide (Wallach), 1886, A., 71.
  - dihydrobromide (Wallach and Brass), 1885, A., 172; (Wallach), 1891, A., 1242.
  - dihydrochloride (Hell and Ritter), 1884, A., 1363; (Oliveri), 1891, A., 1496; (Wallach and Hesse), 1892, A., 1350.
  - dihydriodide (Wallach and Brass), 1885, A., 172.
  - nitrosate (Wallach), 1888, A., 1098.

TERPENES and THEIR DERIVATIVES:—
- **Dipentene** (*caoutchene, cinene, i-limonene*), nitrosochloride (WALLACH), 1888, A., 1099; 1889, A., 1070.
- **Dipentenenitrolaniline** (WALLACH), 1889, A., 1071; 1892, A., 1348.
  - nitroso- (WALLACH), 1892, A., 1348.
- **Dipentenenitrolbenzylamine** (WALLACH), 1889, A., 1070; (WALLACH and CONRADY), 1889, A., 1072.
  - hydrochloride (WALLACH), 1892, A., 1349.
- **Dipentenenitrolpiperidine** (WALLACH), 1888, A., 1099; 1889, A., 1070; (WALLACH and CONRADY), 1889, A., 1072.
- **Diterpene**, a, from urine (LE NOBEL), 1885, A., 668.
- **Fenchene** (WALLACH), 1891, A., 1082, 1088.
- **Hesperidene.** See *d*-Limonene.
- **Laurene** (BRÜHL), 1888, A., 377.
- **Licarene** (MORIN), 1888, A., 1308.
- *d*-**Limonene** (*carvene, citrene, hesperidene*) (GOLDSCHMIDT), 1884, A., 1138; (BRÜHL), 1888, A., 377; (WALLACH), 1888, A., 1204; 1891, A., 1083.
  - obtained from camphor oil (YŌSHIDA), 1885, T., 787.
  - constitution of (REYCHLER), 1892, A., 1350.
  - refraction and dispersion equivalents of (GLADSTONE), 1886, T., 615.
  - thermochemistry of (BERTHELOT and MATIGNON), 1891, A., 1315.
  - action of heat on (TILDEN), 1884, T., 417.
  - action of acetic acid on (LAFONT), 1888, A., 718.
  - derivatives, rotatory power of (WALLACH and CONRADY), 1889, A., 1072.
  - *tetra*bromide (WALLACH), 1885, A., 550; 1891, A., 1241; (OLIVERI), 1891, A., 1496.
  - hydrochloride (WALLACH), 1888, A., 1098.
  - nitrosobromide (WALLACH), 1888, A., 1098.
  - nitrosochlorides (WALLACH), 1888, A., 1098; 1889, A., 1069; 1892, A., 1349; (WALLACH and CONRADY), 1889, A., 1072.
- **Limonenenitrolaniline** (WALLACH), 1889, A., 1071; 1892, A., 1348.
  - nitroso- (WALLACH), 1892, A., 1348.

TERPENES and THEIR DERIVATIVES:—
- **Limonenenitrolbenzylamine** (WALLACH), 1889, A., 1070; (WALLACH and CONRADY), 1889, A., 1072.
  - hydrochloride (WALLACH), 1892, A., 1349.
- **Limonenenitrolpiperidine** (WALLACH), 1889, A., 1070; (WALLACH and CONRADY), 1889, A., 1072.
- **Limonenenitrol-*p*-toluidine** hydrochloride (WALLACH), 1888, A., 1099.
- **Limonene-series**, isomerism in the (WALLACH), 1892, A., 1348.
- *l*-**Limonene** and its derivatives, rotatory power of (WALLACH and CONRADY), 1889, A., 1072.
- **Massoyene** (WOY), 1890, A., 638; 1891, A., 464; (WALLACH), 1890, A., 1316; 1891, A., 935.
- **Menthene** (BRÜHL), 1888, A., 377; (BERKENHEIM), 1892, A., 866; (SIEKER and KREMERS), 1892, A., 1479.
  - preparation of (BRÜHL, BILTZ, CANTZLER and REUTER), 1892, A., 623.
  - transformation of terpilene into (BOUCHARDAT and LAFONT), 1889, A., 276.
  - constitution of (BRÜHL, BILTZ, CANTZLER and REUTER), 1892, A., 624; (BRÜHL), 1892, A., 625.
  - nitrosochloride (SIEKER and KREMERS), 1892, A., 1479.
- **Phellandrene** (PESCI), 1884, A., 331; 1886, A., 1038; (WALLACH), 1887, A., 967; 1891, A., 1084.
  - physical isomerides of (WALLACH and GILDEMEISTER), 1888, A., 1205.
- **Phellandrenediamine** (PESCI), 1886, A., 1038.
- **Pinene** (BRÜHL), 1888, A., 377; (WALLACH), 1890, A., 1315; 1891, A., 1081.
  - from oil of *Asarum europaeum* (PETERSEN), 1888, A., 680.
  - constitution of (MARSH and STOCKDALE), 1890, T., 964; (WAGNER), 1891, A., 1242; (COLLIE), 1892, A., 865; (WALLACH), 1892, A., 997.
  - action of chromium oxychloride on (HENDERSON and SMITH), 1888, P., 116; 1889, T., 45.
  - oxidation products of, aldehydic nature of (SCHIFF), 1883, A., 1141.

Terpenes and their derivatives:—
Pinene, *di*bromide (Wallach), 1891, A., 1241.
nitroso-chloride and -bromide (Wallach), 1888, A., 1098.
nitroso- (*nitrosoterpene*) (Goldschmidt and Zürrer), 1885, A., 1210.
See also Australene, Terebenthene.
Pinenenitrol-allylamine, -amylamine and **-propylamine** (Wallach and Frühstück), 1892, A., 998.
Pinenenitrolbenzylamine (Wallach), 1889, A., 1071.
Pinenenitrolpiperidine (Wallach), 1888, A., 1098.
Pinene-phthalamic acid and **-phthalimide** (Pesci), 1891, A., 1086.
Sesquiterpene (Brühl), 1888, A., 377.
and its derivatives, rotatory power of (Wallach and Conrady), 1889, A., 1072.
hydrate (Beilstein and Wiegand), 1883, A., 346.
Sesquiterpenes (Wallach), 1887, A., 596.
Shikimene (Eijkman), 1886, A., 95.
Sylvestrene (Wallach), 1887, A., 967; (Brühl), 1888, A., 377.
and its derivatives, rotatory power of (Wallach and Conrady), 1889, A., 1072.
nitrosochloride (Wallach), 1888, A., 1099.
Sylvestrenenitrolbenzylamine (Wallach), 1889, A., 1071.
Terebenthene (*l-pinene*) (Brühl, Biltz, Cantzler and Reuter), 1892, A., 624; (Brühl), 1890, A., 625.
from camphor oil and its derivatives (Yōshida), 1885, T., 782.
from frankincense (Wallach), 1889, A., 1072.
thermochemistry of (Berthelot and Matignon), 1891, A., 1315.
action of acetic acid and heat on (Bouchardat and Lafont), 1886, A., 475; 1889, A., 895.
action of aluminium chloride and of bromine on (Varet), 1891, A., 1084.
French, action of formic acid on (Lafont), 1888, A., 495.
action of picric acid on (Lextreit), 1886, A., 71.
action of sulphuric acid on (Bouchardat and Lafont), 1888, A., 294.

Terpenes and their derivatives:—
Terebenthene (*l-pinene*), oxidation of, in sunlight (Armstrong), 1891, T., 311; (Armstrong and Pope), 1891, T., 315.
monohydric alcohols from (Bouchardat and Lafont), 1886, A., 475.
conversion of, into an inactive terpilene (Bouchardat and Lafont), 1886, A., 364.
derivatives of (Pesci), 1889, A., 158.
hydrochlorides, liquid (Barbier), 1883, A., 809.
hydrochlorides (Marsh and Gardner), 1891, T., 728.
Terebenthene, amido- (Pesci and Bettelli), 1887, A., 272.
action of phthalic anhydride on (Pesci), 1891, A., 1086.
nitrogen derivatives of (Tanret), 1887, A., 595, 675.
nitro- (Pesci and Bettelli), 1887, A., 272; (Pesci), 1889, A., 157.
detection of resin oil in (Zune), 1892, A., 923.
d-**Terebenthene** (Pesci), 1889, A., 157; (Armstrong), 1891, T., 313.
l-**Terebenthene** (Armstrong), 1891, T., 313.
Terecamphene. See Camphene.
*iso***Terpene** from the resin of *Pinus Abies* (Kuriloff), 1892, A., 625.
constitution of (Kanonnikoff), 1886, A., 336.
*d-iso***Terpene** (Flawitzky), 1887, A., 969.
Terpilene from French essence of terebenthene (Bouchardat and Lafont), 1889, A., 897.
heat of combustion of (Luginin), 1889, A., 328.
action of heat on (Tilden), 1884, T., 417.
transformation of, into menthene (Bouchardat and Lafont), 1889, A., 276.
dihydrochloride, molecular refraction and dispersion of in solution (Gladstone), 1891, T., 591.
Terpinene (Weber), 1887, A., 596; (Wallach), 1887, A., 967; 1891, A., 1084.
benzoyl*iso*nitrosite (Wallach), 1888, A., 1099.
nitrosite (Wallach), 1887, A., 967; 1888, A., 60.
Terpinenenitrol-amine, -*iso*amylamine, -diethylamine, -dimethylamine, -ethylamine, -methylamine and **-piperidine** (Wallach), 1880, A., 60.

Terpenes and their derivatives :—
Terpinolene (Wallach), 1886, A., 71; 1887, A., 966.
β-Terebangelene (Naudin), 1883, A., 810.
Tetrahydropinene (Wallach and Berkenheim), 1892, A., 998.
Winterene (Arata and Canzoneri), 1890, A., 405.

Terpene oxidised compounds :—
Absinthol (Brühl), 1888, A., 494.
Borneol. See Borneol.
Camphene glycol (Wagner), 1890, A., 1313.
Camphor. See Camphor.
Carveol (Leuckart), 1887, A., 376.
Carvol (*carvole*) (Beyer), 1884, A., 331; (Brühl), 1888, A., 495.
constitution of (Claus and Fahrion), 1889, A., 880.
derivatives of (Goldschmidt), 1884, A., 1138; (Goldschmidt and Kisser), 1887, A., 475, 923; (Wallach), 1892, A., 499.
oxime of. See Carvoxime.
Carvolphenylhydrazine (Goldschmidt), 1884, A., 1138.
Carvyl phenylamidoformate (Leuckart), 1887, A., 376.
Carvylamine (Goldschmidt), 1887, A., 249; (Leuckart and Bach), 1887, A., 377.
Cineol (*cajeputol; eucalyptol*) and its derivatives (Wallach), 1885, A., 171; 1891, A., 1083; (Wallach and Brass), 1885, A., 171; (Jahns), 1885, A., 394; (Brühl), 1888, A., 494; (Bouchardat and Voiry), 1888, A., 719; (Voiry), 1888, A., 962.
constitution of (Wallach), 1890, A., 1315.
Dihydrocarveol (Wallach), 1892, A., 499.
Fenchone (Wallach and Hartmann), 1891, A., 218; (Wallach), 1891, A., 1082, 1086.
Fenchoneoximes (Wallach and Hartmann), 1891, A., 218; (Wallach), 1891, A., 1087; 1892, A., 1237.
Fenchonitrile and its derivatives (Wallach), 1892, A., 1236.
Geraniol, oxidation of (Semmler), 1891, A., 30.
Linalool (*licareol*) (Semmler), 1891, A., 540; (Semmler and Tiemann), 1892, A., 868; (Barbier), 1892, A., 1236; (Schimmel), 1892, A., 1347.

Terpene oxidised compounds :—
Menthol (Brühl), 1888, A., 494; (Berkenheim), 1892, A., 866.
constitution of (Beckmann), 1889, A., 723; (Brühl, Biltz, Cantzler and Reuter), 1892, A., 624.
molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 591.
specific rotatory and refractive powers of, relation between Kanonnikoff), 1889, A., 453.
action of carbon *di*sulphide on (Bamberger and Lodter), 1890, A., 517.
conversion of, into cymene (Brühl), 1892, A., 200.
oxidation of, by potassium *per*manganate (Arth), 1884, A., 755.
derivatives of (Arth), 1884, A., 167; 1886, A., 892; (Berkenheim), 1892, A., 866.
metallic derivatives of (Brühl and Biltz), 1891, A., 656.
Menthone and its derivatives (Berkenheim), 1892, A., 867.
d- and *l*- (Beckmann), 1889, A., 721.
Myristicol (Brühl), 1888, A., 494.
Pulegone and its oxime (Beckmann; Pleissner), 1891, A., 936.
Puleone and its oxime (Barbier), 1892, A., 627.
Sobrerol (*pinol hydrate*) (Armstrong), 1890, P., 100; 1891, T., 313; (Armstrong and Pope), 1891, T., 315; (Wallach), 1891, A., 218.
Sobrerone (*pinol*) and its derivatives (Armstrong), 1890, P., 100; 1891, P., 314; (Wallach and Otto), 1890, A., 169.
and its derivatives, oxidation of (Wallach), 1891, A., 218.
*tri*bromide (Wallach), 1891, A., 218.
glycol (*pinol glycol*) and its derivatives (Wallach), 1891, A., 217; (Wallach and Früstück), 1892, A., 998.
diacetate (Wallach), 1891, A., 217.
ethyl ether (Wallach and Otto), 1890, A., 170.
nitrosochloride (Wallach and Otto), 1890, A., 170.
Sobreronenitrol-amine, -aniline, -benzylamine, -β-naphthylamine and -piperidine (Wallach and Otto), 1890, A., 170.

Terpene oxidised compounds:—

Terpin (Brühl), 1888, A., 494; (Wallach), 1891, A., 1084.

heat of combustion of (Luginin), 1889, A., 328.

formate (Lafont), 1888, A., 495.

hydrate (Wallach), 1886, A., 70; (Vulpius), 1889, A., 1202.

from eucalyptus oil (Merck), 1892, A., 1235.

molecular refraction and dispersion of, in solution (Gladstone), 1891, T., 591.

heat of combustion of (Luginin), 1889, A., 328.

action of hydriodic acid on (Berkenheim), 1892, A., 867.

reduction of (Stschükareff), 1892, A., 1351.

Terpineol (*terpinol*, *i-terpilenol*, *terpol*) (Tanret), 1885, A., 990; (Wallach), 1886, A., 70; (Weber), 1887, A., 596; (Bouchardat and Voiry), 1887, A., 677; (Voiry), 1888, A., 962.

synthesis of an inactive (Bouchardat and Lafont), 1886, A., 890.

ethyl ether (Bouchardat and Voiry), 1887, A., 677; 1888, A., 719, 961.

Terpineols, action of acids and anhydrides on (Lafont), 1888, A., 845.

Terpenes. See also Oils, vegetable.

Terra cotta lumber, preparation of (anon.), 1883, A., 896.

Tetanine (Brieger), 1888, A., 1317.

Tetano-cannabine (Hay), 1883, A., 1156.

Tetanus produced by a ptomaine (Brieger), 1887, A., 284.

Tetrabenzoyl-2:4:6-*tri*amidophenol (Hinsberg and v. Udránszky), 1890, A., 371.

Tetrabenzoyl*iso*dulcitol (Rayman), 1887, A., 907.

Tetrabenzoyl-erythritol and **-levulose** (Skraup), 1889, A., 1152.

Tetrabenzoylmethane, preparation of (Perkin), 1885, T., 253.

Tetrabenzoylquinone (Maquenne), 1887, A., 908.

Tetrabenzylacetonedicarboxylic acid (Dünschmann and v. Pechmann), 1891, A., 674.

Tetrabenzyl-carbamide and **-oxamide** (Hammerich), 1892, A., 1083.

Tetrabenzyl-*m*- and **-*p*-phenylenediamines** (Meldola and Coste), 1889, T., 600, 602.

Tetrabenzylphosphonium compounds (Ledermann), 1888, A., 475.

iodide (Letts and Blake), 1890, A., 767.

Tetrabenzylsilicon, crystalline form of (Polis), 1886, A., 619.

Tetrabenzyltrimethylenetrisulphone (Camps), 1892, A., 592.

Tetra*iso*butylic oxalate (Anschütz), 1890, A., 236.

Tetra*iso*butylmethylenediamine (Ehrenberg), 1887, A., 1027.

Tetracetyl*di*amidoapione (Ciamician and Silber), 1890, A., 1295.

Tetracetylamidodihydroxyphenylquinol and **-quinone** (Bamberger), 1884, A., 309.

Tetracetyl-α-*di*amidophenanthraquinol (Kleemann and Wense), 1885, A., 1240.

Tetracetyl*di*amidothymol and its acetate (Mazzara), 1891, A., 188.

Tetracetyl-*di*- and **-*tri*-bromobrazileins** (Schall and Dralle), 1890, A., 997.

Tetracetylenedicarboxylic acid (v. Baeyer), 1885, A., 1199.

Tetracetylethyldiresorcinol (Herzig and Zeisel), 1891, A., 75.

Tetracetyleuxanthic acid (Herzig), 1892, A., 1354.

Tetracetylhydrindigotin (Liebermann), 1892, A., 480.

Tetracetylhydroxyanthranol (Liebermann), 1888, A., 717.

Tetracetylmucic acid (Maquenne), 1888, A., 676.

Tetracetylpenterythritol (Tollens and Wigand), 1892, A., 128.

Tetracetylphenolglucoside (Michael), 1884, A., 439.

Tetracetylquinic acid (Erwig and Koenigs), 1889, A., 991.

Tetracetylquinol, 2-chlor-3:6-*di*amido- (Kehrmann and Tiesler), 1890, A., 243.

Tetracetylrosaniline (Renouf), 1883, A., 981.

Tetracetyl*iso*saccharic acid (Tiemann and Haarmann), 1886, A., 690.

Tetracetylsativic acid (Hazura), 1887, A., 799.

Tetracresotide (Bargioni and Schiff), 1888, A., 838.

Tetradecahydroanthracene (Lucas), 1888, A., 1201; 1890, A., 637.

Tetradecaldoxime and **tetradecylamine** (Krafft), 1890, A., 1234.

Tetradecane (*diheptyl*) (Sorabji), 1885, T., 40; (Krafft), 1886, A., 998.

- **Tetradecenoic acid** (*hexylpentylacrylic acid;* $C_{14}H_{26}O_2$) (Perkin), 1883, T., 48, 62, 66.
- **Tetradecenoic aldehyde** ($C_{14}H_{26}O$) (Perkin), 1883, T., 49.
- **Tetradecenylic alcohol** (*heptylpentylethylic alcohol;* $C_{14},H_{28}O$) (Perkin), 1883, T., 54.
- **Tetradecinene** (*methylundecylacetylene*) (Krafft and Reuter), 1892, A., 1164.
- **Tetradecoic acid** (*heptylpentylacetic acid;* $C_{14}H_{28}O_2$) (Perkin), 1883, T., 75, 79.
- **Tetradecylacetylene** (Krafft and Reuter), 1892, A., 1163.
- **Tetradecylene,** preparation of (Krafft), 1884, A., 571.

Tetrahydronaphthylthiocarbamide, *di*-amido- (Bamberger and Bammann), 1889, A., 783.

ac-**Tetrahydro-β-naphthylxanthic acid**, sodium salt of (Bamberger and Lodter), 1890, A., 508.

Tetrahydro-*p*-oxazine (Knorr), 1889, A., 1218.

Tetrahydropapaverine and its derivatives (Goldschmiedt), 1887, A., 163.

Tetrahydrophthalic acids, Δ^1-, Δ^2-, Δ^3-, and Δ^{4}-cistrans (v. Baeyer), 1890, A., 1279; 1892, A., 1216.

Tetrahydrophthalic anhydrides, Δ^1-, Δ^2-, and $\Delta^{4\text{-cistrans}}$ (v. Baeyer), 1890, A., 1280.
Tetrahydropicoline, Δ^2- (Lipp), 1887, A., 277; 1892, A., 1243.
Tetrahydropicolinic acid, chloro- (Ost), 1883, A., 794.
Tetrahydropinene (Wallach and Berkenheim), 1892, A., 998.
Tetrahydropyrazine (Garzino), 1892, A., 633.
Tetrahydropyridine. See Piperideine.
Tetrahydropyridylacrylic acid. See Anhydroecgonine.
Tetrahydropyrroline. See Pyrrolidine.
Tetrahydroquinaldine. See 2′-Methyltetrahydroquinoline.
Tetrahydro-*p*-quinanisoil. See 3-Methoxytetrahydroquinoline.
Tetrahydroquinazoline, thio- (Busch), 1892, A., 1496.
Tetrahydroquininic acid (Srpek), 1890, A., 177.
Tetrahydroquinoline (Hoffmann and Koenigs), 1883, A., 1143.
  from crude quinoline (Oechsner de Coninck), 1883, A., 739.
  spectrum of (Hartley), 1885, T., 731.
  action of bromine on (Hoffmann and Koenigs), 1883, A., 1145.
  oxidation of (Hoffmann and Koenigs), 1883, A., 1144; (Lellmann and Reusch), 1889, A., 905; (Tafel), 1892, A., 1104.
  conversion of, into isatin (Schotten), 1891, A., 722.
  colouring matters from (Lellmann and Boye), 1890, A., 1005.
  derivatives (Hoffmann and Koenigs), 1883, A., 1143.
  derivatives, oxidation of (Schotten and Schlömann), 1892, A., 355.
  benzyl derivatives of (Lellmann and Pekrun), 1891, A., 88.
  homologues of (Bamberger and Wulz), 1891, A., 1253.
  hydrochloride, spectrum of (Hartley), 1885, T., 735.
  methochloride (Ostermayer), 1885, A., 672.
Tetrahydroquinoline, *p*-amido- (Ziegler), 1888, A., 609.
  *di*nitro- (Simon-Thomas), 1892, A., 726.
  p-mono- and *di*-nitroso- (Ziegler), 1888, A., 610.
Tetrahydroquinoline-2-carboxylic acid (Fischer and Körner), 1884, A., 1197; (Lellmann and Alt), 1887, A., 503.
Tetrahydroquinolinedimethylanilinethiosulphonic indamine (Lellmann and Boye), 1890, A., 1006.
Tetrahydroquinoline-4-sulphonic acid (Lellmann and Lange), 1888, A., 296.
Tetrahydroquinolylcarbamide, and its *di*nitro-derivative (Simon-Thomas), 1892, A., 725.
Tetrahydroretene (Bamberger and Lodter), 1888, A., 292.
Tetrahydroterephthalic acid, Δ^1- (v. Baeyer), 1887, A., 370.
  constitution of (v. Baeyer), 1888, A., 1070.
  heats of combustion and formation of (Stohmann and Kleber), 1891, A., 376.
  oxidation of (v. Baeyer and Herb), 1890, A., 1134.
  hydrobromide (v. Baeyer), 1888, A., 1074.
Tetrahydroterephthalic acid hydriodide, $\Delta^{2\text{-cistrans}}$ (v. Baeyer and Herb), 1890, A., 1134.
Tetrahydroterephthalic acids (v. Baeyer), 1889, A., 1176, 1178.
Tetrahydro-α-thiophencarboxylic acid and its salts (Ernst), 1887, A., 471.
  thermochemistry of (Stohmann and Kleber), 1891, A., 376.
Tetrahydrothiophen-2:5-dicarboxylic acid (Ernst), 1887, A., 237.
Tetrahydroxy*iso*amylidenephosphonium iodide (de Girard), 1884, A., 1119.
Tetrahydroxyanthraquinoline (Graebe and Philips), 1891, A., 1240.
Tetrahydroxyanthraquinone, boiling point of (Schweitzer), 1891, A., 1240.
  (*rufiopine*) (Nölting), 1883, A., 65.
1:2:1′:4′-Tetrahydroxyanthraquinone (*quinalizarin; alizarin-bordeaux*) and its derivatives (Liebermann and Wense), 1887, A., 593; (Schmidt; Gattermann), 1891, A., 935.
  formation of, from alizarin (Graebe), 1891, A., 463.
1:3:2′:4′-Tetrahydroxyanthraquinone (*anthrachrysone*) (Noah), 1886, A., 556.
Tetrahydroxyanthraquinones (*α- and β-oxyanthragallols*) (Noah), 1887 A., 56.
Tetrahydroxyaurindicarboxylic acid (Caro), 1892, A., 1469.
1:2:3:4-Tetrahydroxybenzene. See Apionol.

1:2:3:5-Tetrahydroxybenzene diethyl ether. See Diethoxydihydroxybenzene.
1:2:4:5-Tetrahydroxybenzene (Loewy), 1886, A., 1028; (Nietzki and Schmidt), 1888, A., 1182; (Böniger), 1889, A., 878.
  amido-, hydrochloride (Nietzki and Schmidt), 1889, A., 969.
  *di*amido-, and its derivatives (Nietzki and Benckiser), 1885, A., 780.
  nitramido- (Nietzki), 1884, A., 58.
Tetrahydroxybenzophenone and its derivatives (Graebe and Eichengrün), 1892, A., 1225.
Tetrahydroxybutanetricarboxylic acid (Düll), 1891, A., 547.
Tetrahydroxydiphenyl. See Diquinol and Diresorcinol.
Tetrahydroxydiphenylmethane (Barth and Schreder), 1883, A., 59.
  (*methylenediresorcinol*) (Caro), 1892, A., 856.
Tetrahydroxydiphthalyl (Goldschmiedt and Egger), 1891, A., 1372.
Tetrahydroxyditolyl (Brunner), 1889, A., 997; (Deninger), 1890, A., 39.
Tetrahydroxyethylidenephosphonium compounds (Messinger and Engels), 1888, A., 442.
  iodide (de Girard), 1884, A., 1119.
Tetrahydroxyoctolactone (Bulitsch), 1888, A., 450.
Tetrahydroxypropylidenephosphonium compounds (Messinger and Engels), 1888, A., 442.
Tetrahydroxyquinone, formula of (Nietzki and Kehrmann), 1888, A., 263.
  action of *o*-phenylenediamine on (Kehrmann), 1890, A., 1265.
  salts of (Nietzki and Benckiser), 1885, A., 780.
Tetrahydroxyquinoneanilide (Nietzki and Schmidt), 1888, A., 944.
Tetrahydroxystearic acid. See Sativic acid.
Tetrahydroxyterephthalic acid (Loewy), 1886, A., 1028.
Tetrahydroxytoluene, *p*-nitro- (Kehrmann and Brasch), 1889, A., 970.
Tetrahydroxyvaleric acid (*arabonic acid*) (Bauer), 1885, A., 500; 1886, A., 869; (Kiliani), 1887, A., 230.
  phenylhydrazide of (Fischer), 1890, A., 1398.
  (*ribonic acid*) (Fischer and Piloty), 1892, A., 438.
Tetraketohexamethylene, *tri*bromo- (Landolt), 1892, A., 836.
  *tetra*bromo- (Nef), 1890, A., 1272.
  *tri*chloro-, hydrate (Landolt), 1892, A., 835.
  *tetra*chloro- (Nef), 1890, A., 1271; (Landolt), 1892, A., 836.
  *di*chloro*di*bromo- (Nef), 1890, A., 1271.
Tetraketopiperazines, attempts to prepare (Bischoff and Nastvogel), 1890, A., 1164.
Tetralkylammonium iodides, formation of (H. and A. Malbot), 1892, A., 133.
  action of potassium on (Thompson and Cundall), 1888, T., 761; P., 79.
Tetramethoxy*di*amidodiphenyl and its derivatives (Baessler), 1884, A., 1330; 1887, A., 364.
Tetramethoxybenzene (Will), 1888, A., 458.
Tetramethoxybenzhydroltricarboxylic acid (*tetramethoxydicarboxydiphenylglycollic acid*) (Goldschmiedt and Egger), 1891, A., 1372.
Tetramethoxydihydrodiphthalyl (Goldschmiedt and Egger), 1891, A., 1373.
Tetramethoxy-diphthalyl and **-diphthalyldicarboxylic acid** (Goldschmiedt and Egger), 1891, A., 1371.
Tetramethoxyditolyl (Brunner), 1889, A., 997.
Tetramethoxyindigodicarboxylic acid (Liebermann), 1886, A., 468.
Tetramethoxyquinhydrone, *tetra*chloro- (Kehrmann), 1891, A., 905.
Tetramethylaldine. See Tetramethylpyrazine.
Tetramethylallylalkine. See Hydroxytetramethylpropylenediamine.
Tetramethyl*iso*allylene (Vaubel), 1891, A., 997.
Tetramethyl*di*amidoarsenobenzene (Michaelis and Rabinerson), 1892, A., 1321.
Tetramethyl*di*amidoazobenzene (*dimethylamidobenzeneazodimethylaniline*) (Nölting and Kohn), 1885, A., 386; (Barbier and Vignon), 1888, A., 54.
Tetramethyl*di*amidobenzhydrol (*tetramethyldiamidodiphenylcarbinol*), condensation of, with xylidine, mesidine, ψ-cumidine, *iso*duridine and prehnidine (Nölting), 1892, A., 188.
  derivatives of (Nathanson and Müller), 1889, A., 1189.

- **Tetramethyl*di*amidobenzophenone** (Ziegler), 1887, A., 674.
  - action of nitrous acid on (Bischoff), 1888, A., 1197; 1889, A., 511.
  - derivatives and reactions of (Nathanson and Müller), 1889, A., 1188.
  - nitramine derived from (van Romburgh), 1888, A., 1196.
  - nitroso-, salts of (Bischoff), 1889, A., 511.
- **Tetramethyl*tri*amidobenzophenone** (Nathanson and Müller), 1889, A., 1189.
- **Tetramethyl*di*amidochlorethoxyquinone** (Kehrmann), 1891, A., 904.
- **Tetramethyl*di*amido*di*chloronitrotriphenylmethane** (Kock), 1887, A., 837.
- **Tetramethyl*di*amidodinaphthylphenylmethane** (*phenyltetramethyldiamidodinaphthylmethane*) (Friedländer and Welmans), 1889, A., 151.
- **Tetramethyl*di*amidodiphenyl** (*tetramethylbenzidine*) (Michler and Pattinson), 1884, A., 747; (Giraud), 1890, A., 138; (Lauth), 1891, A., 457.
  - derivatives (Michler and Pattinson), 1884, A., 747.
  - *m-di*amido- (Lauth), 1892, A., 1222.
  - (*tetramethyldiphenyline*) (Reuland), 1890, A., 167.
- **Tetramethyl*di*amidodiphenylamine,** oxidation of (Bernthsen), 1884, A., 597.

Thermochemistry:—
- **Heat** and volume changes attending mixture (Guthrie), 1885, A., 339.
  - absorption of, by water-vapour (Röntgen), 1885, A., 5.
  - displacement of chlorine by bromine, and reactions accompanied by the absorption of (Potilizin), 1884, A., 955.
  - developed by action of acids and alkalis upon silk (Vignon), 1890, A., 553.
  - developed by action of acids and alkalis upon wool and cotton (Vignon), 1890, A., 939.
  - developed by the action of oxygen on the blood (Berthelot), 1890, A., 274.
  - production of, in animals (Rosenthal), 1890, A., 182.
  - developed when powders are moistened (Meissner), 1887, A., 9.
  - evolved in the absorption of gases by solids and liquids (Chappuis), 1883, A., 702.
  - evolved on diluting solutions of calcium chloride (Pickering), 1888, P., 35.
  - evolved in the electrolysis of copper sulphate (Jahn), 1883, A., 1043.
  - constancy in the, produced by the reaction of certain salts on each other (Pickering), 1888, A., 333.
- **Calorimetric** study of the effect of tempering and hammering on cast steel (Osmond), 1885, A., 856.
- **Diathermous power,** molecular weight, density and refractive index of a substance, relation between (Aymonnet), 1892, A., 1.
- **Diathermancy** of æsculin (Wesendonck), 1885, A., 213.
- **Isothermals**, theoretical and empirical, of mixtures, connection between (Blümcke), 1891, A., 375; 1892, A., 259.
- **Isothermal curves** for carbonic anhydride (Amagat), 1892, A., 3.
- **Isothermic lines** of bismuth placed in a magnetic field, rotation of (Righi), 1888, A., 102.
- **Isotherms** of a mixture of sulphurous and carbonic anhydrides (Blümcke), 1889, A., 750.
- **Radiation,** comparative, of fused platinum and fused silver (Violle), 1887, A., 1010.
  - from silver at the solidifying point (Violle), 1883, A., 771.

Thermochemistry:—
- **Temperature**, radiation, and energy, relation between (Abney and Festing), 1884, A., 249.
  - relation between solubility and (van Deventer and van de Stadt), 1892, A., 559.
  - relation between pressure and, of saturated vapours (Jarolimek), 1883, A., 417, 951.
  - volume and pressure, relation of, in the case of liquids (Barus), 1890, A., 321.
  - volume and pressure, relations of, in the case of saturated vapours (Unwin), 1886, A., 764.
  - physical and chemical phenomena at very low (Pictet), 1892, A., 1138.
  - influence of, on spectroscopic observations and measurements (Krüss), 1885, A., 209.
  - effect of, on refraction and dispersion (Gladstone), 1891, T., 290.
  - influence of, on the refractive power of certain organic compounds (Perkin), 1892, T., 287; P., 115.
  - relation of, to the conductive capacity of gases (Winkelmann), 1887, A., 5.
  - influence of, on the electromotive force and resistance of batteries (Preece), 1883, A., 840; 1884, A., 243.
  - influence of, on the magnetism of salts of metals of the iron group (Plessner), 1890, A., 678.
  - influence of, on the direction of chemical reactions (Potilizin), 1889, A., 335.
  - influence of, on the rate of certain reactions (Menschutkin), 1884, A., 1295.
  - influence of, on the rate of action of certain acids on marble (Spring), 1887, A., 882.
  - influence of, on the decomposition of oxalic acid by ferric chloride (Lemoine), 1887, A., 324.
  - influence of, on heat of chemical combination (Pickering), 1886, T., 260; P., 161.
  - thermodynamical expression of the influence of, on the rate of chemical change (Urech), 1888, A., 338.
  - of saturated vapours of various liquids under the same pressure (Colot), 1892, A., 1143.

THERMOCHEMISTRY :—
Temperature of the body, influence of meat extract on (RUBNER), 1885, A., 409.
in nerves (ROLLESTON), 1890, A., 536.
influence of, on the exhalation of carbonic anhydride (GRANDIS), 1890, A., 1334.
relation of expansion of substances in gaseous, vaporous, and liquid state to absolute (SCHALL), 1885, A., 1179.
Critical constants (PAWLEWSKI), 1884, A., 252.
in chemical decompositions (VAN'T HOFF), 1885, A., 1181.
relation between boiling points and (BARTOLI), 1885, A., 859.
molecular constitution of compounds at their critical temperature and pressure (GUYE), 1890, A., 443.
determination of molecular weight at the critical point (GUYE), 1891, A., 1411.
determination of critical pressures and temperatures (CAILLETET and COLARDEAU), 1891, A., 779.
of bodies, relation between their thermal expansion as liquids and critical temperatures (THORPE and RÜCKER), 1884, T., 135; 1887, A., 429.
of gases (ANSDELL), 1883, A., 277; (JAMIN), 1883, A., 898.
of vapours (VINCENT and CHAPPUIS), 1885, A., 861, 1104; 1886, A., 963.
of liquids (DEWAR), 1885, A., 331; (HEILBORN), 1891, A., 380, 969.
of mixed liquids (SCHMIDT), 1892, A., 262.
pressure curves of fluids at their critical points (v. WROBLEWSKI), 1886, A., 964.
of liquids, Mendeléeff's formula for the expansion of liquids, and Thorpe and Rücker's formula for determining, from their coefficient of expansion (BARTOLI and STRACCIATI), 1885, A., 859.
so-called, of solids (v. RICHTER), 1886, A., 656.
of alkyl salts (PAWLEWSKI), 1883, A., 276.
of ethyl ether (RAMSAY and YOUNG), 1887, A., 320.
of ethylic alcohol (RAMSAY and YOUNG), 1885, A., 1178.

THERMOCHEMISTRY :—
Temperatures, high, determination of (ANON.), 1883, A., 274.
high, optical measurement of (LE CHATELIER; BECQUEREL), 1892, A., 761.
low, production of (CAILLETET), 1884, A., 383, 656, 1248; (OLSZEWSKI), 1885, A., 1101.
low, use of boiling oxygen, nitrogen, carbonic oxide and atmospheric air for producing (v. WROBLEWSKI), 1885, A., 715; (OLSZEWSKI), 1885, A., 1101.
Thermometers, air (CAILLETET), 1888, A., 772.
for lecture purposes (YOUNG), 1888, A., 410.
or hydrogen, for low temperatures (COLEMAN), 1886, A., 116.
Thermometer, gas (BEILBY), 1886, A., 116.
Thermometer, hydrogen, limit to the use of (v. WROBLEWSKI), 1885, A., 861.
Thermometer, mercurial, relation between the ordinary, and the weight thermometer (BARBIER), 1885, A., 111.
determination of fixed points on (HEYCOCK and NEVILLE), 1890, T., 656.
graduation of (CRAFTS), 1883, A., 842.
comparison of, with the hydrogen thermometer (CRAFTS), 1883, A., 144.
use of, with particular reference to the determination of melting and boiling points (CRAFTS), 1884, A., 656.
influence of the composition of glass on the depression phenomena of (WEBER), 1888, A., 641.
of Jena glass, rise of the zero point of (ALLIHN), 1889, A., 1041; 1891, A., 8.
short range, estimation of the value of a degree of (CALDERON), 1889, A., 203.
Thermometric readings, correction of (RIMBACH), 1890, A., 205.
Thermometers, platinum (HEYCOCK and NEVILLE) 1890, T., 657.
standardising (CALLENDAR and GRIFFITHS), 1891, A., 1146.
determination of boiling and freezing points by means of (GRIFFITHS), 1891, A., 251.

Thermochemistry:—

- **Pyrometer** (Carnelley), 1884, T., 237; (Keiser), 1887, A., 1073; (Mensching and Meyer), 1888, A., 331.
  - Boulier's (Lauth), 1884, A., 543.
  - platinum-water (Hoadley), 1883, A., 769.
  - Siemens', modification of (Spohr), 1886, A., 112.
- **Pyrometric** use of the principle of viscosity (Barus), 1888, A., 1014.
- **Thermo-regulator** (Richmond), 1884, A., 656; (Meyer), 1884, A., 883; (Ramsay and Young), 1885, T., 640; (v. Baumhauer), 1885, A., 471; (Fock), 1885, A., 950; (anon.), 1885, A., 1157; (Kreusler), 1886, A., 301; (Kahlbaum), 1887, A., 206; (Rügheimer), 1887, A., 698.
- **Thermal expansion**, method of determining, for equal quantities of heat (Dragoumis), 1891, A., 142.
  - of bodies as liquids, relation between critical temperatures and (Thorpe and Rücker), 1884, T., 135; 1887, A., 429.
  - of liquids (Konowaloff), 1888, A., 1019; (Grimaldi), 1888, A., 1143.
  - of liquid bismuth (Vicentini), 1891, A., 518; (Cattaneo), 1892, A., 259.
  - of phosphorous oxide (P_4O_6) (Thorpe and Tutton), 1890, T., 560.
  - of sulphuric acid solutions (Pickering), 1990, T., 114, 177.
  - of saline solutions (Nicol), 1887, A., 760; (Drecker), 1888, A., 1010; (Tschernai), 1889, A., 204, 330, 1101; 1890, A., 318; (Bremer), 1889, A., 329.
  - of water (Pickering), 1891, A., 8; (Scheel), 1892, A., 7; (Marek), 1892, A., 106; (Puschl), 1892, A., 1382.
  - of acetic acid (Ramsay and Young), 1886, T., 790; P., 225.
  - of ethyl ether (Ramsay and Young), 1887, A., 320.
- **Heat conductivity** of liquids (Chree), 1888, A., 641.
  - of bismuth (Righi), 1887, A., 1009; 1888, A., 102; (v. Ettingshausen), 1888, A., 400.
  - of boric acid (Bock), 1887, A., 758.
  - of mercury vapour (Berget), 1888, A., 1237; (Schleiermacher), 1889, A., 559.

Thermochemistry:—

- **Heat conductivity** of selenium, action of light on (Bellati and Lussana), 1888, A., 98.
  - of tourmaline (Stenger), 1885, A., 5.
  - of mixtures of ethylic alcohol and water (Henneberg), 1889, A., 459.
  - of soils (Wagner), 1884, A., 923.
- **Heats, specific,** law of variation of (Mallard and Le Chatelier), 1883, A., 845.
  - at high temperatures (Pionchon), 1887, A., 201; (Sutherland), 1889, A., 4.
  - temperatures of combustion, dissociation and pressure of explosive gaseous mixtures, some relations between (Berthelot), 1883, A., 771.
  - relation between specific gravity and, of isomerides (Colson), 1886, A., 961.
  - determination of atomic weight from (Janeček), 1887, A., 419.
  - method of determining (Thoulet and Lagarde), 1885, A., 6.
  - apparatus for the determination of, by cooling (Violle), 1883, A., 6.
  - molecular, of gases (Le Chatelier), 1888, A., 213, 772.
  - of gases at high temperatures (Vieille), 1883, A., 771, 898; (Berthelot), 1884, A., 804; (Berthelot and Vieille), 1885, A., 7.
  - of gases at constant volume (Joly), 1889, A., 459.
  - of gaseous acetic acid (Berthelot and Ogier), 1883, A., 6; (Threlfall), 1887, A., 429.
  - of carbonic anhydride at high temperature (Berthelot and Vieille), 1885, A., 7.
  - of gaseous compounds of chlorine, bromine, and iodine with one another and with hydrogen (Strecker), 1883, A., 417.
  - of nitrogen *tet*roxide (Threlfall), 1887, A., 429.
  - of steam at high temperature (Berthelot and Vieille), 1885, A., 7.
  - experimental determination of the ratio of, in superheated steam (Cohen), 1890, A., 205.
  - of liquids (Langlois), 1887, A., 419.
  - of liquids, calculation of (Hinrichs), 1892, A., 2.
  - of liquids at temperatures above the boiling point (Grimaldi), 1892, A., 761.

Thermochemistry :—
Heats, specific, of water (Neesen), 1883, A., 541.
  of superfused water (Cardani and Tomasini), 1888, A., 102.
  of sea water of different densities (Thoulet and Chevallier), 1889, A., 666.
  of small quantities of substances (Thoulet and Lagarde), 1883, A., 6.
  of solutions of hydrobromic acid and of the solid hydrate $HBr.2H_2O$ (Roozeboom), 1887, A., 628.
  of saline solutions (Arons), 1885, A., 1101; (Gerlach), 1888, A., 894; (Mathias), 1889, A., 4.
  of supersaturated saline solutions (Bindel), 1890, A., 1042.
  of aqueous and alcoholic solutions of metallic chlorides, influence of concentration on (Blümcke), 1885, A., 8.
  of calcium and potassium chloride solutions (Drecker), 1888, A., 1010.
  of concentrated soda solutions (Blümcke), 1885, A., 1101.
  of sulphuric acid solutions (Pickering), 1889, P., 86; 1890, T., 88, 160.
  of liquid carbon compounds (Schiff), 1887, A., 6; 1888, A., 14, 771.
  of acids of the acetic series (Luedeking), 1886, A., 439.
  of solutions of ethylic alcohol (Blümcke), 1885, A., 1031; (Timoféeff), 1891, A., 1406.
  molecular, of solid compounds (Kopp), 1888, A., 893.
  molecular, of solids, determination of, from their solution in water and other liquids (Wiedemann), 1883, A., 704.
  of alloys of lead and tin (Spring), 1886, A., 961.
  of aluminium (Naccari), 1888, A., 1236; (Richards), 1892, A., 673; (Pionchon), 1892, A., 1281.
  of antimony and its compounds (v. Pebal and Jahn), 1886, A., 655; (Naccari), 1888, A., 1236.
  of beryllium (Humpidge), 1885, A., 1184; 1886, A., 506.
  of bismuth (Classen), 1890, A., 707.
  atomic, of chromium (Jäger and Krüss), 1889, A., 1121.
  of the diamond (Carbonelli), 1892, A., 761.

Thermochemistry :—
Heats, specific, of iodine chlorides (Stortenbeker), 1892, A., 1387.
  of mellite (Bartoli and Stracciati), 1884, A., 1244.
  of mercury (Heilborn), 1891, A., 632.
  of mercury, variation of, with temperature (Milthaler), 1889, A., 750.
  of metals (Naccari), 1888, A., 1236.
  molecular, of niobium *pent*oxide and niobic hydride (Krüss and Nilson), 1887, A., 706.
  of three modifications of anhydrous potassium copper sulphate (Pickering), 1885, T., 102; 1886, T., 14.
  of silver iodide, and its alloys with cuprous and lead iodides (Bellati and Romanese), 1883, A., 274.
  of sulphuric *mono*chloride (Ogier), 1883, A., 642.
  of tellurium (Fabre), 1888, A., 332; 1889, A., 203.
  of thorium (Nilson), 1888, A., 553, 649.
  of uranium (Blümcke), 1885, A., 8, 625.
  of solid carbon compounds (Hess), 1889, A., 92.
  of solid carbon compounds and their chemical composition, relation between (Kopp), 1886, A., 587.
  of lauric and myristic acids (Stohmann and Wilsing), 1885, A., 1177.
Latent heat, relation of E.M.F. to (Gore), 1892, A., 257.
Latent heat of fusion (Ehrhardt), 1885, A., 625.
  relation between solubility and (Carnelley and Thomson), 1888, T., 782; P., 80; (Walker), 1890, A., 686.
  determination of, from the reduction of the freezing point (Eijkman), 1889, A., 666.
  of iodine chlorides (Stortenbeker), 1892, A., 1387.
  of nitric *per*oxide (Ramsay), 1890, T., 593.
  of aluminium (Pionchon), 1892, A., 1281.
  of lauric and myristic acids (Stohmann and Wilsing), 1885, A., 1177.
Heat of solidification of hypophosphoric acid (Joly), 1886, A., 408.

Thermochemistry:—*Heat of formation=f.; of transformation=t.; of decomposition=d.; of dissociation=dis.; of combination=cb.; of combustion =c.; of neutralisation=n.; of substitution=sb.; of hydration=h.*

- **Latent heat of vaporisation** (Gerlach), 1889, A., 813.
  - relation of specific inductive capacity to (Obach), 1892, A., 258.
  - determination of, by means of the steam calorimeter (Wirtz), 1890, A., 1040.
  - of liquefied gases, measurement of (Chappuis), 1887, A., 627; 1888, A., 733; (Mathias), 1888, A., 773.
  - of liquids (Schall), 1884, A., 551; 1885, A., 113.
  - of hydrofluoric acid (Guntz), 1884, A., 544.
  - of sulphuric *mono*chloride (Ogier), 1883, A., 642.
  - of homologous carbon compounds (Schiff), 1887, A., 9.
  - of acetic acid (Ramsay and Young), 1886, T., 790; P., 225.
  - of ethyl ether (Ramsay and Young), 1887, A., 320.
  - of ethylene oxide (Berthelot), 1883, A., 275.
  - of ethylic alcohol (Ramsay and Young), 1885, A., 1178.
  - of a solution (Jäger), 1892, A., 1382.
- **Heat of formation** (Berthelot), 1885, A., 868; (Colley), 1890, A., 681.
  - (*thermodynamic equivalents*) (de Landero and Prieto), 1887, A., 99.
  - and the law of thermal substitution constants (Tommasi), 1883, A., 143; 1884, A., 883; 1885, A., 8; (Berthelot), 1884, A., 702.
- **Heat of transformation** in double decomposition (van't Hoff and Reicher), 1889, A., 930.
- **Heat of chemical combination,** influence of temperature on (Pickering), 1886, T., 260; P., 161.
- **Heat of combustion** (Gerlach), 1889, A., 814.
- **Heat of neutralisation** (Pickering), 1887, T., 593; P., 77; 1888, P., 52; (Arrhenius), 1891, A., 1406.
- **Thermochemical data** for acetaldehyde and its polymerides (*c.*) (Brühl), 1891, A., 633.
  - for acetaldehyde into paracetaldehyde (*t.*) (Franchimont), 1883, A., 454.
  - for metacetaldehyde (*c.*) (Luginin), 1889, A., 668.
- **Thermochemical data** for acetic acid (*c.*) (Jahn), 1890, A., 99; (*c.* and *f.*) (Berthelot and Matignon), 1892, A., 1139.
  - for acetic acid, mercury salt of (*f.*) (Berthelot), 1884, A., 706.
  - for acetocarbamide (*c.* and *f.*) (Matignon), 1891, A., 1448.
  - for acids of the aromatic series (*n.*) (Berthelot), 1886, A., 8; (*c.* and *f.*) (Stohmann, Kleber and Langbein), 1889, A., 1096.
  - for acids of the aromatic series, influence of the nitrosyl amidogen groups on the (*n.*) (Alexéeff and Werner), 1890, A., 439.
  - for acids of the fatty series (*c.*) (Stohmann), 1885, A., 857; 1886, A., 296; (Stohmann and Rodatz), 1885, A., 1177; 1886, A., 296; (Luginin), 1886, A., 757; (Stohmann and Langbein), 1891, A., 11.
  - for acids of the oxalic series (*c.* and *f.*) (Stohmann, Kleber and Langbein), 1889, A., 1097; (Ossipoff), 1890, A., 680.
  - for acids of the oxalic and lactic series (*c.*) (Luginin), 1889, A., 5.
  - for homologous and isomeric acids (*n.*) (Gal and Werner), 1887, A., 95.
  - for solid dibasic acids, relations of, to those of the gaseous hydrocarbons (*c.*) (Stohmann), 1891, A., 252.
  - for dibasic organic acids (*n.*) (Massol), 1891, A., 968; 1892, A., 395; (*c.* and *f.*) (Stohmann and Kleber), 1892, A., 1041.
  - for albuminoids (*c.*) (Stohmann), 1885, A., 857.
  - for alcohols of the fatty series (*c.*) (Stohmann), 1886, A., 295.
  - for the polybasic alcohols (*c.* and *f.*) (Stohmann and Langbein), 1892, A., 763.
  - for the alkaline earths (*h.*) (Thomsen), 1884, A., 250.
  - for alkalis (*h.*) (Thomsen), 1884, A., 250; (*n.*) (Muller), 1889, A., 811.
  - for alkyl oxides (*f.*) (de Forcrand), 1884, A., 142, 546; 1885, A., 1102; 1887, A., 204, 318, 319.

Thermochemistry:—*Heat of formation=f.; of transformation=t.; of decomposition=d.; of dissociation=dis.; of combination=cb.; of combustion=c.; of neutralisation=n.; of substitution=sb.; of hydration=h.*

Thermochemical data for alkylene oxides (*c.*) (Brühl), 1891, A., 633.
- for allantoin, alloxan and alloxantin (*c.* and *f.*) (Matignon), 1891, A., 1448.
- for the compounds of aluminium bromide with hydrocarbons (*f.*) (Gustavson), 1885, A., 472.
- for aluminium fluoride (*n.*) (Petersen), 1890, A., 680.
- for aluminium oxide and hydroxide (*f.*) (Baille and Féry), 1890, A., 110.
- for amides (*c.* and *f.*) (Berthelot and Fogh), 1890, A., 1359.
- for aromatic amines (*n.*) (Vignon), 1888, A., 1013.
- for fatty amines (*c.*) (Muller), 1886, A., 409; (*n.*) (Muller), 1889, A., 811.
- for some salts of the fatty amines in dilute solutions (*f.*) (Muller), 1885, A., 716.
- for ammonia with silicon *tetra*fluoride (*cb.*) (Truchot), 1885, A., 626.
- for ammonium sulphite and *di*sulphite (*f.*) (de Forcrand), 1885, A., 471.
- for aniline (*f.*) (Petit) 1888, A., 773.
- for aniline salts (*f.* and *n.*) (Berthelot), 1890, A., 1361.
- for aniline *di*chromate (*f.*) (Girard and L'Hôte), 1889, A., 562.
- for antimony halogen compounds and oxides (*f.*) (Thomsen), 1883, A., 544; (Guntz), 1884, A., 707, 884, 1246; 1885, A., 1101.
- for antimony hydride (*f.*) (Berthelot and Petit), 1889, A., 666.
- for allotropic forms of arsenic (*cb.*) (Berthelot and Engel), 1890, A., 679.
- for arsenic halogen compounds (*f.*) (Thomsen), 1883, A., 544; (Guntz), 1885, A., 1101.
- for asparagin (*c.*) (Stohmann), 1885, A., 857.
- for aspartic acid (*c.* and *f.*) (Berthelot and André), 1890, A., 936; (Berthelot), 1891, A., 967.
- for atropic acid (*c.*) (Ossipoff), 1889, A., 460.

Thermochemical data for azoimide (*n.* and *f.*) (Berthelot and Matignon), 1892, A., 261; (*f.*) (Bach), 1892, A., 933.
- for bases where dissociation cannot take place (*n.*) (van Deventer and Reicher), 1890, A., 553.
- for organic bases in relation to Berthollet's laws (*n.*) (Berthelot), 1890, A., 1363; (Colson), 1890, A., 1367, 1368; 1891, A., 377.
- for benzene (*c.* and *f.*) (Stohmann, Rodatz and Herzberg), 1886, A., 409; (Thomsen), 1886, A., 842; (Stohmann, Kleber and Langbein), 1889, A., 1042; (*c.*) (Stohmann), 1886, A., 842; (Brühl), 1891, A., 633.
- for benzene and its molecular refraction compared with those of dipropargyl (*c.*) (Brühl), 1892, A., 1436.
- for benzene to the acetic series (*t.*) (Berthelot and Recoura), 1887, A., 1011.
- for the solid isomeride of benzene (*c.*) (Luginin), 1888, A., 893.
- for benzoic acid (*c.*) (Stohmann), 1885, A., 857; (Berthelot and Recoura; Berthelot and Luginin), 1887, A., 762; (*c.* and *f.*) (Stohmann, Kleber and Langbein), 1889, A., 1096.
- for benzoyl compounds (*c.*) (Stohmann, Rodatz and Herzberg), 1887, A., 878; 1888, A., 333.

- **Tiemannite** (Penfield), 1886, A., 314.
- **Tiglamide**, chloro- (Otto and Holst), 1890, A., 958.
- **Tiglic acid** (*methylcrotonic acid; pentenoic acid*) (Melikoff), 1887, A., 29.
  - constitution of (Beilstein and Wiegand), 1885, A., 42; (Kondakoff), 1889, A., 374; 1892, A., 1304; (Pückert), 1889, A., 587.
  - derivatives of (Melikoff), 1887, A., 29; (Melikoff and Petrenko-Kritschenko), 1890, A., 862.
  - *di*bromide (Pückert), 1889, A., 587.
- **Tiglic acid**, chloro- (Otto and Beckurts), 1885, A., 755; (Isbert), 1886, A., 1010; (Otto and Holst), 1890, A., 958.
  - action of potash on (Friedrich), 1883, A., 969.
- **Tiglic aldehyde** (*αβ-dimethylacrolein*) (Lieben and Zeisel), 1886, A., 783.
  - action of sulphurous anhydride on (Haymann), 1889, A., 487.
- **Tiglyl alcohol** (Lieben and Zeisel), 1886, A., 784; (Haymann), 1889, A., 487.
- **Tiles**, Oriental enamel on (Boeck), 1889, A., 1112.
- **Tilias**, oil from the seeds of (Mueller), 1892, A., 92.
- **Timbers**, solution for the preservation of (Wright), 1884, A., 1233.
- "**Timbo**," poisonous constituents of (Pfaff), 1891, A., 938.
- **Timboin** and **timbole** (Pfaff), 1891, A., 938.
- **Tin**, atomic weight of (van der Plaats), 1885, A., 348; (Bongartz and Classen), 1889, A., 19.
  - molecular weight of (Ramsay), 1889, T., 531, 533.
  - (metal), crystallised, allotropic modifications of (v. Foullon), 1886, A., 124.
    - precipitated (Vignon), 1889, A., 107.
    - production of, from old tin plate by electrolysis (anon.), 1885, A., 941.
    - influence of various metals on the freezing point of (Heycock and Neville), 1890, T., 376.
    - lowering of the freezing point of, by the addition of other metals (Heycock and Neville), 1889, T., 667.
    - lowering of the freezing points of bismuth, cadmium and lead by (Heycock and Neville), 1892, T., 896, 901, 908.
- **Tin** (metal), action of chlorine on (Cowper), 1883, T., 154.
  - action of nitric acid on (Montemartini), 1892, A., 1402.
  - action of nitrosyl chloride on (Sudborough), 1891, T., 661.
  - action of certain vegetable acids on (Hall), 1883, A., 1038.
  - action of, on the animal organism (White), 1886, A., 1058.
  - oxidation of (Vignon), 1889, A., 351.
- **Tin alloys**, eutectic (Heycock and Neville), 1890, T., 386.
  - with bismuth, thermal and electrical behaviour of some, in a magnetic field (v. Ettingshausen and Nernst), 1888, A., 546.
  - with bismuth and zinc (Wright and Thompson), 1891, A., 1158.
  - with cadmium (Laurie), 1889, T., 679.
  - triple, with cadmium and gold, freezing point of (Heycock and Neville), 1891, T., 936.
  - with copper (Ball), 1887, P., 136; 1888, T., 167.
    - constitution of (Laurie), 1887, P 117; 1888, T., 104.
  - with copper and lead (Trench), 1890, A., 335.
  - with iridium (Debray), 1887, A., 779.
  - with lead (Laurie), 1889, T., 677.
    - composition of (Kleinstück), 1889, A., 1051.
    - melting points of (Weld), 1891, A., 644.
    - specific heat of (Spring), 1886, A., 961.
    - specific gravity of (Kleinstück), 1889, A., 1051.
    - estimation of lead in (Schwartz), 1888, A., 992; (Winkler), 1889, A., 309.
  - with lead and zinc (Wright and Thompson), 1890, A., 336; 1891, A., 267.
  - crystalline, with platinum metals (Debray), 1887, A., 779.
  - with sodium (Bailey), 1892, A., 572.
  - with zinc (Laurie), 1889, T., 679.
- **Tin**, compounds of, with platinum (Schützenberger), 1884, A., 823.
  - salts (Benas), 1885, A., 728.
    - action of sodium thiosulphate on (Vortmann), 1889, A., 1109.
  - halogen salts, double (Richardson), 1892, A., 785.
- **Tin** *di*bromide (*stannous bromide*) (Rayman and Preis), 1884, A., 1265.

Tin *di*bromide (*stannous bromide*), preparation and properties of (Benas), 1885, A., 728.
  *tetra*bromide and its hydrate (Raýman and Preis), 1883, A., 424; 1884, A., 1265.
    double salts (*stannibromides*) (Leteur), 1892, A., 121.
  oxybromide (Preis and Raýman), 1883, A., 425.
  *di*chloride (*stannous chloride*), solutions, molecular refraction and dispersion of (Gladstone), 1891, T., 596.
    boiling point and molecular formula of (Biltz and Meyer), 1888, A., 345.
    influence of hydrochloric acid on the solubility of (Engel), 1888, A., 918.
    action of sulphur on (Vortmann and Padberg), 1890, A., 9.
    behaviour of, towards nitric oxide, and towards nitric acid (Divers and Haga), 1885, T., 623.
    estimation, volumetric, of (Jolles), 1889, A., 189.
    solutions, estimation of free hydrochloric acid in (Minor), 1891, A., 241.
  *tetra*chloride (*stannic chloride*), electrical and chemical properties of (Coldridge), 1890, A., 1065.
    vapour pressures and molecular volumes of (Young), 1891, T., 911.
    freezing point of (Besson), 1890, A., 331.
    action of water on (Vignon), 1889, A., 1121.
    compounds of, with hydrogen chloride (Engel), 1886, A., 984.
  potassium chloride (Morel), 1891, A., 1160; (Richardson), 1892, A., 785.
  *mono*xide (*stannous oxide*) and some of its compounds (Ditte), 1883, A., 294.
  *di*oxide (*stannic anhydride; stannic oxide*) (Spring), 1889, A., 1051.
    preparation of, from sodium stannate (Austen), 1883, A., 425.
    variations in the acid function of (Vignon), 1889, A., 833.
    action of magnesium on (Winkler), 1891, A., 802.
    influence of, on potassium chlorate (Fowler and Grant), 1890, T., 276.
    compounds of, with sulphuric acid and selenic acid (Ditte), 1887, A., 336.
Tin *di*oxide (*stannic anhydride; stannic oxide*), colour reactions of (Lévy), 1887, A., 304.
    separation of, from tungstic acid (Donath and Müllner), 1888, A., 531.
    See also Cassiterite.
  *tri*oxide (*perstannic anhydride*) (Spring), 1889, A., 1051.
  Stannic acid, colloidal (van Bemmelen), 1888, A., 1160.
    heat of neutralisation of (Vignon), 1889, A., 833.
    dehydration of, by heat (Carnelley and Walker), 1888, T., 68, 83.
    combination of phosphoric acid with (Hautefeuille and Margottet), 1886, A., 670.
    lakes formed by (Vignon), 1891, A., 807.
    α-ortho- (Neumann), 1892, A., 412.
  Stannates, crystallised (Ditte), 1883, A., 716.
  Stannites, alkali, inaction of, with nitrites and nitrates (Divers and Haga), 1885, T., 363.
  Stannic acid, bromo- (Preis and Raýman), 1883, A., 425; (Seubert and Schürmann), 1887, A., 554.
    chloro- (Engel), 1886, A., 984; (Seubert), 1887, A., 554.
    thio- (Storch), 1889, A., 1053.
    thio-, salts of (Ditte), 1883, A., 156.
  Metastannic acid, heat of neutralisation of (Vignon), 1889, A., 833.
    behaviour of, to bismuth and iron oxides (Lepéz and Storch), 1889, A., 1052.
    colloidal (van Bemmelen), 1888, A., 1160.
Tin phosphates, double (Ouvrard), 1890, A., 1379.
  Stanno-phosphomolybdates and **-phosphotungstates** (Gibbs), 1886, A., 511.
Tin *mono*selenide, action of hydrochloric acid on (Ditte), 1884, A., 19.
  sulphide (*stannous sulphide*), action of ammonium sulphide on (Baubigny), 1883, A., 22.
    action of hydrochloric acid on (Ditte), 1884, A., 18.
  *di*sulphide (*stannic sulphide*) (Storch), 1889, A., 1053.
    compounds of, with tin *di*selenide (Ditte), 1883, A., 156.
    detection of, in presence of antimonious sulphide (Griffith), 1887, A., 183.

Tin *mono*telluride (*stannous telluride*), action of hydrochloric acid on (DITTE), 1884, A., 19.
  Stannous *di***thionate** (KLÜSS), 1888, A., 1156.
Tin organic compounds, two (FISCHER), 1885, A., 377.
  tetrethide (LETTS and COLLIE), 1886, P., 166.
    molecular refraction and dispersion of (GLADSTONE), 1891, T., 296.
  tetraphenyl (POLIS), 1890, A., 166.
Tin, detection, estimation and **separation**:—
  reaction of, with nitric and sulphuric acids (BASSETT), 1886, A., 599.
  microchemical reactions of (STRENG), 1889, A., 78.
  delicate test for (RIDEAL), 1885, A., 1013.
  test for, with brucine (DRYER), 1884, A., 498.
  detection of, in corpses (SEYDA), 1891, A., 121.
  detection of, in minerals (JOHNSTONE), 1890, A., 830.
  detection of antimony, arsenic and (PIESZCZEK), 1892, A., 918.
  precipitation of, from acid solutions by metallic iron (SCHULTZE), 1890, A., 853.
  estimation of (CRISMER), 1884, A., 1078; (CLASSEN), 1885, A., 191; (BENAS), 1885, A., 839; (LESSER), 1888, A., 754; (LOVITON), 1888, A., 992; (BRAND), 1890, A., 294; (HILGER and HAAS), 1890, A., 666; (LUCKOW), 1892, A., 1129.
  estimation of, in alloys (WACHSMUTH), 1887, A., 304; (WARREN), 1888, A., 632; (FRENCH), 1892, A., 1030.
  estimation of, in corpses (SEYDA), 1891, A., 121.
  estimation of, in "hardhead" (FRESENIUS and HINTZ), 1886, A., 180.
  estimation of, in siliceous slags (WARREN), 1888, A., 632.
  estimation of, in sugar (PHIPSON), 1889, A., 1036.
  estimation of lead in (YVON), 1889, A., 549; (PERRON), 1890, A., 665.
  separation of, from antimony (CARNOT), 1886, A., 1077; (WARREN), 1888, A., 632; 1891, A., 366; (LOVITON), 1888, A., 992; (CLASSEN and SCHELLE), 1889, A., 77.
  separation of, from antimony and arsenic (BERGLUND), 1884, A., 777; 1885, A., 839; (CLASSEN and LUDWIG), 1885, A., 932; (CARNOT),

Tin, separation:—
    1886, A., 1078; (LESSER), 1888, A., 754; (CLARK), 1892, T., 424; P., 68.
  separation of antimony, arsenic and, from gold and platinum (DE KONINCK and LECRENIER), 1888, A., 1344.
  separation of, from bismuth, cadmium and lead (JANNASCH and ETZ), 1892, A., 754.
  separation of, from titanium (HILGER and HAAS), 1890, A., 666; (HAAS), 1890, A., 1029.
Tin capels, Cornish (COLLINS), 1886, A., 988.
Tin mineral in process of formation (MEUNIER), 1890, A., 1082.
Tin ores from Asia (FISCHER), 1883, A., 435.
  deposits of Mt. Bischoff (V. GRODDECK), 1888, A., 434.
  analysis of (BURGHARDT), 1890, A., 1027; (WELLS), 1892, A., 540.
  dry assay of (HOFFMANN), 1891, A., 246, 502.
Tinplate, estimation of lead in (CARLES), 1884, A., 1078.
Tin scrap, to work up (ANON.), 1886, A., 109.
Tin stone. See Cassiterite.
Tinder ore from the Harz (LUEDECKE), 1883, A., 1061.
Tintometer (LOVIBOND), 1890, A., 1461.
Tintura for wines (JAY), 1885, A., 309.
Tirmania africana, analysis of (CHATIN), 1892, A., 654.
Tissue, living, active oxygen in (WURSTER), 1888, A., 863.
  pulmonary, action of, in the expiration of carbonic anhydride (GARNIER), 1886, A., 1052.
  retiform (YOUNG), 1892, A., 1113.
  vegetable. See Vegetable tissue under Agricultural Chemistry.
Tissues, determination of the rate of consumption of oxygen in, by means of the spectroscope (DENNIG), 1884, A., 1391.
  deposits of iron and glycogen in (DELÉPINE), 1891, A., 1274.
  toxic action of various (HÉRICOURT and RICHET), 1892, A., 228.
  estimation of the wool, silk, and cotton in (RÉMONT), 1885, A., 96.
Tissue-fibrinogens (WRIGHT), 1891, A., 1524; 1892, A., 646.
Tissue-waste in the fowl during starvation (KUCKEIN), 1883, A., 603.
Titanic iron. See Ilmenite.

- **Titanic iron sand** from Brazil, analysis of (Mackintosh), 1885, A., 878.
- **Titanic oxide.** See Titanium *di*oxide.
- **Titaniferous garnet** from North Carolina (Genth), 1891, A., 155.
- **Titanite.** See Sphene.
- **Titanium** (v. der Pfordten), 1887, A., 14; (Koenig and v. der Pfordten), 1889, A., 1122.
  - atomic weight of (Thorpe), 1884, A., 395; 1885, T., 108; P., 1.
  - physical constants of (Nilson and Pettersson), 1887, A., 778.
  - alloy of, with silicon and aluminium (Lévy), 1888, A., 423.
  - compounds (Koenig and v. der Pfordten), 1889, A., 947.
- **Titanium** *tetra*bromide, pure, preparation of (Thorpe), 1885, T., 126.
  - carbide in pig iron (Shimer), 1887, A., 703.
  - chloride (Wagner), 1888, A., 557.
  - *di*- and *tri*-chlorides (v. der Pfordten), 1887, A., 338.
  - *tri*chloride, reduction of (Koenig and v. der Pfordten), 1889, A., 1123.
  - *tetra*chloride (v. der Pfordten), 1887, A., 337.
    - pure, preparation of (Thorpe), 1885, T., 119.
    - molecular refraction and dispersion of (Gladstone), 1891, T., 299.
    - action of, on metals (Lévy), 1890, A., 1066.
  - fluorides, double (Piccini), 1884, A., 264; 1886, A., 670; 1891, A., 271; (Petersen), 1889, A., 107.
  - oxyfluorides of (Piccini), 1884, A., 264.
  - oxide, hydrated, from Diamantina (Gorceix), 1885, A., 640.
  - *sesqui*oxide (Koenig and v. der Pfordten), 1889, A., 1122.
    - action of nitric oxide on (Sabatier and Senderens), 1892, A., 1152.
  - *di*oxide (*titanic anhydride; titanic oxide*) in soils (McCaleb), 1888, A., 745.
    - hydrated (v. der Pfordten), 1887, A., 337.
    - crystallisation of (Hautefeuille and Perrey), 1890, A., 1071.
    - fourth form of (Hidden), 1889, A., 354.
    - distribution of, on the earth (Dunnington), 1892, A., 791.
    - action of carbon *tetra*chloride on (Demarçay), 1887, A., 329.
    - action of magnesium and hydrogen on (Winkler), 1890, A., 1375.
- **Titanium** *di*oxide (*titanic anhydride; titanic oxide*), action of magnesium on (Winkler), 1891, A., 802.
    - colour reactions of (Lévy), 1887, A., 304.
    - separation of, from alumina and ferric oxide (Cohen), 1884, A., 640.
  - *tri*oxide (Weller), 1883, A., 295; (Jackson), 1883, A., 828; (Classen), 1888, A., 424, 789; (Piccini), 1888, A., 789; (Lévy), 1889, A., 572.
  - **Titanic acids** (Piccini), 1883, A., 1056.
    - gelatinous modification of (v. der Pfordten), 1884, A., 1093.
  - **Titanic acid** (Wagner), 1888, A., 557.
    - dehydration of, by heat (Carnelley and Walker), 1888, T., 66, 81.
    - influence of, on the fusibility of refractory earths (Seger), 1884, A., 784.
    - action of sodium on (Koenig and v. der Pfordten), 1889, A., 1122.
    - oxidation of (Piccini), 1883, A., 1055.
    - as a mordant (Barnes), 1886, A., 292.
    - combination of phosphoric acid with (Hautefeuille and Margottet), 1886, A., 670.
    - *mono*-, *di*- and *tri*-chlorides (Koenig and v. der Pfordten), 1888, A., 788.
    - hydrochloride (Koenig and v. der Pfordten), 1889, A., 947.
    - phenyl-derivative of (Schumann), 1888, A., 679.
    - reaction of (Fresenius), 1886, A., 181.
    - estimation of (Lévy), 1887, A., 1064.
    - estimation of, in presence of iron (Wiegand), 1883, A., 381.
  - **Titanates**, artificial production of certain (Bourgeois), 1884, A., 564.
  - **Pertitanic acid**, fluorine derivatives of (Piccini), 1888, A., 1255.
- **Titanium** phosphates, double (Ouvrard), 1890, A., 1379.
  - sulphides (v. der Pfordten), 1884, A., 1093; 1887, A., 15; (Thorpe), 1885, T., 491; P., 69.
- **Titanium organic compounds** :—
  - cyanonitride (Reinhardt), 1888, A., 1047; (Luedeking), 1888, A., 1263.

Titanium organic compounds:—
Titanium ethyl, attempts to prepare (PATERNÒ and PERATONER), 1889, A., 591.
Titanium, detection, estimation and **separation**:—
detection of (WELLER), 1883, A., 381; (JACKSON), 1883, A., 828; (NOYES), 1891, A., 1295.
estimation of (WELLER), 1883, A., 381; (LÉVY), 1888, A., 196; (HILGER and HAAS), 1890, A., 666; (NOYES), 1891, A., 1295.
estimation of, in iron and its ores (LEDEBUR), 1885, A., 1160.
estimation of, in iron ores (JENNINGS), 1889, A., 189.
estimation of, in rock analysis (CHATARD), 1891, A., 768.
estimation of, in natural silicates (HOLLAND), 1889, A., 443.
estimation of, in titanium aluminium (HUNT, CLAPP, and HANDY), 1892, A., 1131.
separation of, from aluminium (GOOCH), 1885, A., 1265; 1886, A., 492.
separation of, from iron (GOOCH), 1885, A., 1265; 1886, A., 492; (CLASSEN), 1888, A., 532.
separation of, from niobium and zirconium (DEMARÇAY), 1885, A., 639.
separation of, from tin (HILGER and HAAS), 1890, A., 666; (HAAS), 1890, A., 1029.
Titanium minerals, distribution of (THÜRACH), 1886, A., 126.
decomposition of (JONES), 1892, A., 664.
Tobacco, influence of the ash constituents on the combustibility of (MAYER), 1890, A., 1458.
slow combustion of (SCHLŒSING), 1888, A., 979; 1889, A., 639.
ratio of starch to sugar in (MÜLLER), 1886, A., 904.
wax from (KISSLING), 1884, A., 173.
climatic conditions for the development of nicotine in (MAYER), 1891, A., 858.
estimation of nicotine in (BIEL), 1888, A., 876; (KISSLING), 1890, A., 430.
composition of "smalls" of (BROWN), 1889, A., 543.
Japanese (TAKAYAMA), 1885, A., 582; (FESCA and IMAI), 1889, A., 69.
Virginian, composition of the midribs of leaves of (MEMMINGER), 1884, A., 99.

(*Toluene compounds Me* = 1.)
Tobacco. See also Agricultural Chemistry.
Tobacco ash, composition of (ROMANIS), 1883, A., 372; (ANON.), 1885, A., 927; (JORDAN; JENKINS), 1886, A., 177; (VAN BEMMELEN), 1890, A., 1338.
Tobacco smoke, toxic action of, on bacteria (TASSINARI), 1888, A., 1327.
wax-like body from (KISSLING), 1884, A., 173.
Tolallyl sulphide (BAUMANN and KLETT), 1892, A., 185.
Tolane. See Diphenylacetylene.
Tolazinedicarboxylic acid, *di*amido- (KEHRMANN), 1889, A., 1154.
p-**Tolenylamidine** derivatives (GLOCK), 1888, A., 1290.
hydrochloride (CRAYEN), 1891, A., 560.
nitrite (LOSSEN), 1892, A., 53.
Tolenylamidinebenzenyl-*o*-carboxylic acid (BISTRZYCKI), 1890, A., 969.
Tolenylamidinedimethoxybenzenylcarboxylic acid (BISTRZYCKI), 1891, A., 746.
p-**Tolenylamidine-*p*-tolenylazosulphimecarbohydrosulphide** (CRAYEN), 1891, A., 560.
p-**Tolenylamidosulphime-*p*-tolenylsulphime*di*thiocarbamate** (CRAYEN), 1891, A., 560.
o-**Tolenylamidoxime** and its derivatives (SCHUBART), 1890, A., 49.
p-**Tolenylamidoxime** and its derivatives (SCHUBART), 1886, A., 797; 1890, A., 47.
action of carbon *di*sulphide on (CRAYEN), 1891, A., 559.
potassium compound of, action of carbon *di*sulphide on (SCHUBART), 1890, A., 49.
3-nitro- (WEISE), 1890, A., 47.
p-**Tolenylamidoxime-ethylidene** (SCHUBART), 1890, A., 48.

Toluenenaphthalenes, *di*- and *tri*-nitro- (Hepp), 1883, A., 318.

Toluenesulphamine (Paysan), 1884, A., 454; (Heffter), 1884, A., 455.

Toluenesulphinic acids (Perl), 1885, A., 391.

Toluenesulphonamic acid (Traube), 1890, A., 1137.

Toluene-*o*-sulphonamide, 4-chloro- (Heffter), 1884, A., 73.

Toluene-*m*-sulphonamide (Noyes and Walker), 1886, A., 788.

Toluene-*p*-sulphonamide, oxidation of, with potassium ferricyanide (Noyes), 1886, A., 142.

Toluenesulphonic acid, 3-chloro-, and its amide and chloride (Wynne), 1892, T., 1075.
 2:5-*di*chloro-, and its metallic salts and amide and chloride (Wynne), 1892, T., 1051; P., 139.
 3:4-*di*chloro-, and its amide and chloride (Wynne), 1892, T., 1061; P., 139.
  hydrolysis of (Wynne), 1892, T., 1068; P., 139.
 3:4:5-*tri*chloro-, and its metallic salts and chloride (Wynne), 1892, T., 1069; P., 139.
 o-iodo- and its salts (Mabery and Palmer), 1885, A., 538.

Toluene-*m*-sulphonic acid and its derivatives (Vallin), 1887, A., 263.

Toluene-*p*-sulphonic acid and its derivatives (Vallin), 1887, A., 263.
 action of bromine on (Miller), 1886, P., 235.
 amine salts of (Norton and Otten), 1888, A., 698.
 barium salt of (Kelbe), 1883, A., 807.
 potassium salt of, bromination of (Miller), 1892, T., 1027; P., 155.
 2-bromo- (Miller), 1892, T., 1027; P., 155.
 2:3:5-*tri*bromo- (Claus and Immel), 1891, A., 1490.

Toluene-2-sulphonic acid, 4-bromo-, and its salts (de Roode), 1891, A., 1227.

(*Toluene compounds Me*=1.)

Toluene-2-sulphonic acid, 4-chloro-, and its salts (DE ROODE), 1891, A., 1227; (WYNNE), 1892, T., 1078; P., 140.

4-iodo- (*o-(β)-acid*) and its salts (DE ROODE), 1891, A., 1227.

4-fluoro- and its amide (DE ROODE), 1891, A., 1226.

4-nitro- (HAUSSER), 1891, A., 73.

Toluene-3-sulphonic acid, 4-chloro-, and its amide (WYNNE), 1892, T., 1078; P., 140.

Toluene-4-sulphonic acid, 2-bromo- (MILLER), 1892, T., 1023; P., 155.

2-chloro-, and its amide (PAYSAN), 1884, A., 73.

Toluene-5-sulphonic acid, 2-bromo-, and its amide (MILLER), 1892, T., 1030; P., 155.

2-bromo-, and its chloride, bromide and amide (WYNNE), 1892, T., 1041; P., 155.

2:3-*di*bromo-, and its salts, and chloride, bromide and amide (WYNNE), 1892, T., 1038; P., 155.

2-chloro-, and its salts and chloride and amide (WYNNE), 1892, T., 1040, 1072; P., 139, 140.

2-nitro- (LIMPRICHT), 1885, A., 1234; (FOTH), 1886, A., 153.

Toluene-ω-sulphonic acid (*benzylsulphonic acid*), derivatives of (MOHR), 1884, A., 69.

4-bromo- (JACKSON and HARTSHORN), 1884, A., 665.

Toluenesulphonic acids, isomeric, formation of (GORDON), 1888, P., 78.

Toluene-*p*-sulphonic chloride, condensation of amido-acids with (HEDIN), 1891, A., 203.

p-**Toluenesulphonic iodide** (OTTO and TRÖGER), 1891, A., 718.

Toluenesulphothiosulphonic anhydride (OTTO and TRÖGER), 1891, A., 924.

Toluenethiosulphonic acid, reactions of (OTTO and RÖSSING), 1892, A., 478.

Toluene-ω-thiosulphonic acid (*benzylthiosulphonic acid*), sodium salt of (PURGOTTI), 1890, A., 1419.

Toluenethiosulphonic acids and their salts, action of ethylic chlorocarbonate on (OTTO and RÖSSING), 1891, A., 926.

Toluenethiosulphonic thioanhydride (OTTO and TRÖGER), 1891, A., 924.

Toluic acid, nitrosulpho- (LIMPRICHT), 1885, A., 1234.

α-Toluic acid. See Phenylacetic acid.

o-**Toluic acid** (*methylbenzoic acid*) (RACINE), 1887, A., 945.

(*Toluene compounds Me*=1.)

o-**Toluic acid** (*methylbenzoic acid*), derivatives of (JACOBSEN and WIERSS), 1883, A., 1121; (RACINE), 1887, A., 945.

5-amido-, phosphate of (HÖNIG), 1886, A., 242.

4-bromo- (JACOBSEN), 1885, A., 143; (CLAUS and PIESZCZEK), 1887, A., 240; (CLAUS and KUNATH), 1889, A., 987.

5-bromo- (NOURRISSON), 1887, A., 668; (CLAUS and KUNATH), 1889, A., 987.

nitration and bromination of (CLAUS and BECK), 1892, A., 1207.

4:5- and 3:5-*di*bromo-, and 5:3-, 5:4- and 5:6-bromonitro- (CLAUS and BECK), 1892, A., 1207.

4-, 5- and 6-nitro- (JACOBSEN), 1884, A., 745.

m-**Toluic acid** (SPICA), 1883, A., 459; (MÜLLER), 1887, A., 724.

2-amido-, and its derivatives (*p-methylanthranilic acid*) (PANAOTOVIĆ), 1886, A., 361.

ω-amido- (REINGLASS), 1891, A., 1345.

4-chloro- (CLAUS), 1892, A., 1201.

ω-chloro- (REINGLASS), 1891, A., 1344.

4:6-*di*chloro- (CLAUS and BURSTERT), 1890, A., 1106.

nitro-, from nitro-*m-iso*cymene (KELBE and WARTH), 1884, A., 46.

5-nitro- (TÖHL), 1885, A., 522.

p-**Toluic acid,** 3-amido- (*m-homoanthranilic acid*) (NIEMENTOWSKI), 1888, A., 837; 1889, A., 1065; (NIEMENTOWSKI and ROZAŃSKI), 1888, A., 1088; (NOYES), 1889, A., 394; (FILETI and CROSA), 1889, A., 495.

2:3-, 2:6- and 3:6-*di*amido- (CLAUS and JOACHIM), 1892, A., 176.

2- and 3-bromo- (CLAUS and KUNATH), 1889, A., 987.

3-bromo- (FILETI and CROSA), 1889, A., 496.

2:5-*di*bromo-, and its salts (SCHULTZ), 1885, A., 1054.

2:3-, 2:5- and 3:5-*di*bromo- (CLAUS and HERBABNY), 1892, A., 175.

2:6-*di*bromo- (CLAUS and SEIBERT), 1892, A., 176.

3:6-*di*bromo- (FILETI and CROSA), 1889, A., 496; (CLAUS and BEYSEN), 1892, A., 177.

3:6-bromamido- (FILETI and CROSA), 1889, A., 495.

3:2-, 3:5- and 3:6-bromonitro- (CLAUS and HERBABNY), 1892, A., 174.

3:6-bromonitro- (FILETI and CROSA), 1887, A., 37; 1889, A., 495.

p-**Toluidine**, production of, from *p*-cresol (Buch), 1885, A., 147.
 spectrum of (Hartley), 1885, T., 741.
 action of benzylic chloride on (Rabaut), 1892, A., 313.
 action of bromine on, in presence of sulphuric acid (Hafner), 1890, A., 137.
 diazotised, action of, on methyl-*p*-bromaniline (Meldola and Streatfeild), 1889, T., 433.
 diazotised, action of, on methyl-*p*-chloraniline (Meldola and Streatfeild), 1889, T., 436.
 action of sulphur on (Green), 1889, T., 228.
 nitration of (Nölting and Collin), 1884, A., 1012.
 oxidation of (Klinger and Pitschke), 1885, A., 151.
 from *p*-nitrobenzaldehyde, condensation products of (Bischler), 1888, A., 287.
 citric acid derivatives of (Gill), 1887, A., 40.
 azophenine of (Nölting and Witt), 1884, A., 743.
 chloracetate (Bischoff), 1888, A., 726.
 *allo*cinnamate (Liebermann), 1891, A., 833.
 hydrate (Lewy), 1887, A., 134.
 hydrobromide and hydriodide (Staedel), 1883, A., 578.
 oxalate (Bornemann), 1890, A., 137.
 picrate (Smolka), 1886, A., 454.
 sulphate as a test for nitric acid (Longi), 1884, A., 365.
 hydrogen sulphate (Wellington and Tollens), 1886, A., 347.
 commercial, assay of (Raabe), 1892, A., 925.
 eatimation of (Schoen), 1890, A., 839.

p-**Toluidine**, 3:5-*di*bromo- (Claus and Herbabny), 1892, A., 175.
 3:5:6-*tri*bromo- (Claus and Immel), 1891, A., 1491.
 3:5-bromonitro- (Hand), 1886, A., 1018.
 3:6-bromonitro- (Claus and Herbabny), 1892, A., 174.
 chloro-, conversion of, into chlorotoluene (Wynne), 1892, T., 1058; P., 139.
 2-chloro- (Witt), 1892, A., 445.
 3-chloro- (Erdmann), 1891, A., 1466.
 2:5-chloronitro- (Claus and Böcher), 1892, A., 173.

(*Toluene compounds Me*=1.)

p-**Toluidine**, 3:5- and 3:6-chloronitro- (CLAUS and DAVIDSEN), 1892, A., 172.
  cyano-, and its salts (BLADIN), 1884, A., 1141.
  2-nitro- (BERNTHSEN), 1883, A., 579; (NÖLTING and COLLIN), 1884, A., 1012; (ULLMANN), 1884, A., 1316; (LEVINSTEIN), 1885, A., 1127.
  3-nitro- (NÖLTING and COLLIN), 1884, A., 1012.
    action of ethylenic bromide on (GATTERMANN and HAGER), 1884, A., 1142.
    action of reducing agents on (LIMPRICHT), 1885, A., 974; GRAEFF), 1885, A., 1127.
    derivatives of (GATTERMANN), 1885, A., 975.
    oxalic acid derivatives of (HINSBERG), 1883, A., 323.
  *β-di*nitro- (HEPP), 1883, A., 317.
  3:5-*di*nitro-, constitution of (STAEDEL), 1883, A., 865.
  thio-, and its derivatives (TRUHLAR), 1887, A., 472.
  thionyl- (MICHAELIS and HERZ), 1891, A., 310.
Toluidines (LEWY), 1886, A., 872.
  heat of formation of (PETIT), 1888, A., 1239.
  action of benzylic chloride on (RABAUT), 1892, A., 313.
  action of *di*brom-*α*-naphthol on (MELDOLA), 1884, T., 156.
  action of cyanogen on (BLADIN), 1884, A., 1141.
  isomeric, action of *p*-diazobenzenesulphonic acid on (GRIESS), 1883, A., 182.
  action of nascent nitrous acid on (DENINGER), 1890, A., 38.
  action of sulphur on (GATTERMANN), 1889, A., 602.
  chlorination of, and bromination of, in presence of an excess of a mineral acid (HAFNER), 1890, A., 37.
  physiological action of (GIBBS and HARE), 1890, A., 1018.
  compounds of, with cupric chloride (POMEY), 1887, A., 472.
  compounds of metallic sulphites with (DENIGÈS), 1891, A., 1031.
  compounds of, with zinc chloride (LACHOWICZ and BANDROWSKI), 1888, A., 1281.
  quantitative analysis of (MINIATI, BOOTH and COHEN), 1888, A., 202.

Trimethyldihydroxyethylammonium salts (Bode), 1892, A., 807.
Trimethyldipiperidyl (Liebrecht), 1887, A., 162.
Trimethylene (Tornöe), 1888, A., 665.
  preparation of (Lellmann and Würthner), 1885, A., 978; (Gustavson), 1888, A., 240.
  constitution of (Brühl), 1892, A., 1163.
  relation between the spectrometrical constant and chemical constitution of (Brühl), 1891, A., 631.
  liquefaction of (Moltschanowski), 1889, A., 1126.
  action of chlorine on (Gustavson), 1891, A., 159.
  bases (Niederist), 1883, A., 450.
  derivatives (Perkin), 1884, A., 1154; 1885, T., 801.
  bromhydrin (Frühling), 1883, A., 42.
  diphenyl ether (Lohmann), 1891, A., 1468.
  glycol. See 1:3-Propylene glycol.
  mercaptan (Hagelberg), 1890, A., 949.
  methyl ketone (Perkin), 1885, T., 835.

Trimethylene, *mono-* and *di*-chloro-, action of bromine on (Gustavson), 1891, A., 888.

  chloro-, and some allied compounds, reaction capacity of (Gustavson), 1891, A., 888.

  *di*chloro- and its *di*bromide (Gustavson), 1891, A., 159, 888.

Trimethylenebenzylamidine (v. Hofmann), 1888, A., 1051.

Trimethylenecarbamide (Fischer and Koch), 1886, A., 527.

Trimethylene-ψ-carbamide (Gabriel and Lauer), 1890, A., 473; (Lauer), 1890, A., 1090.

Trimethylenecarboxylic acid, and its derivatives (Perkin), 1884, A., 832; 1885, T., 815.

Trimethylenediamine (Fischer and Koch), 1884, A., 1289; 1886, A., 527.

  condensation products from (Strache), 1888, A., 1174.

  derivatives (Fischer and Koch), 1884, A., 1289; 1886, A., 527; (Strache), 1888, A., 1172; (Gabriel), 1889, A., 486; (Goldenring), 1890, A., 976.

  thiocyanate (Lellmann and Würthner), 1885, A., 978.

Trimethylenedicarbamide (Fischer and Koch), 1886, A., 528.

Trimethylenedicarbanilic chloride and **anilide** (Hanssen), 1887, A., 578.

α-Trimethylene-1:1-dicarboxylic acid (*ethylenemalonic acid; vinaconic acid; vinylmalonic acid*) (Fittig and Roeder), 1883, A., 730; 1884, A., 295; (Perkin), 1884, A., 832, 992; 1885, T., 810; A., 1049; 1886, A., 688; 1887, T., 849; (Roeder; Fittig), 1885, A., 653; (Buchner), 1890, A., 736.

  constitution of (Roeder; Fittig), 1885, A., 653.

  action of bromine on (Fittig and Marburg), 1886, A., 224.

  action of hydrobromic acid on (Perkin), 1885, T., 814.

  salts of (Perkin), 1885, T., 810.

  ethyl salt of (Perkin), 1884, A., 832; 1885, T., 807.

β-Trimethylene-1:2-dicarboxylic acid (*alloitaconic acid*) (Conrad and Guthzeit), 1884, A., 992; (Buchner), 1890, A., 736.

  anhydride of (Conrad and Guthzeit), 1884, A., 992.

Trimethylenedicarboxylic acids, melting points of (Stohmann and Kleber), 1892, A., 1040.

Trimethylenediethylalkine (*hydroxypropyldiethylamine*) (Berend), 1884, A., 1115.

Trimethylenediethyldisulphone (Stuffer), 1891, A., 181.

Trimethylenedinitramine (Franchimont and Klobbie), 1889, A., 492.

Trimethylenediphenylcarbamide (Hanssen), 1887, A., 577.

Trimethylenediphenyldiamine and its derivatives (Hanssen), 1887, A., 577.

Trimethylene-diphthalamic acid and **diphthalimide** (Gabriel and Weiner), 1888, A., 1292.

Trimethylenedisulphonesulphide (Camps), 1892, A., 592.

  di- and *hexa*-bromo- (Camps), 1892, A., 593.

Trimethylenedisulphonic acid. See 1:3-Propanedisulphonic acid.

Trimethyleneditolyldisulphone (Otto), 1891, A., 1229.

Trimethylenediurethane (Fischer and Koch), 1886, A., 527.

Trimethylene-ethenyldiamine (v. Hofmann), 1888, A., 1050.

Trimethyleneimine (Gabriel and Weiner), 1888, A., 1293; (Ladenburg and Sieber), 1890, A., 1394.

Trimethyleneoxamide (Strache), 1888, A., 1174.

Trimethylenephenyl-carbamide and **-thiocarbamide** (Goldenring), 1890, A., 977.

Trimethylenephenyldiamine (Balbiano), 1889, A., 1215; 1890, A., 1244; (Goldenring), 1890, A., 977.

  trimethylenephenylthiocarbamate (Balbiano), 1890, A., 1244.

Trimethylenepolycarboxylic acids, thermochemistry of (Stohmann and Kleber), 1892, A., 1041.

Trimethylene-ring, existence of (Perkin), 1884, A., 992.

Trimethylene-ψ-selenocarbamide hydrobromide (Baringer), 1890, A., 880.

Trimethylene-1:1:2:2-tetracarboxylic acid (Guthzeit and Dressel), 1890, A., 879.

  thermochemistry of (Stohmann and Kleber), 1892, A., 1041.

Trimethylene-1:1:2:3-tetracarboxylic acid and its salts (Perkin), 1884, A., 1300; 1885, T., 823.

Trimethylene-1:2:1:3-tetracarboxylic acid. See Propargylenetetracarboxylic acid.

Trimethylene-α-tetramethylenedipyrroline (Paal and Schneider), 1887, A., 273.

Trimethylenethiocarbamide (LELLMANN and WÜRTHNER), 1885, A., 978.
Trimethylene-ψ-thiocarbamide (GABRIEL and LAUER), 1890, A., 473; (LAUER), 1890, A., 1090.
Trimethylene-*o*- and -*p*-tolyldiamines (BALBIANO), 1889, A., 1216.
Trimethylene-1:1:2-tricarboxylic acid (CONRAD and GUTHZEIT), 1884, A., 992; (PERKIN), 1884, A., 1300.
  constitution of (MICHAEL), 1887, A., 468.
Trimethylene-1:2:3-tricarboxylic acid and its salts (PERKIN), 1885, T., 823, 826.
s-**Trimethylene-1:2:3-tricarboxylic acid** (*ψ-aconitic acid*) (SCHACHERL), 1885, A., 1125; (BUCHNER), 1888, A., 1274; (BUCHNER and WITTER), 1890, A., 1397.
s-**Trimethylene-1:2:3-tricarboxylic anhydride** (BUCHNER), 1888, A., 1274.
Trimethylenetrinitrosamine (MAYER), 1889, A., 33.
Trimethylenetrisulphone (BAUMANN and CAMPS), 1890, A., 478; (CAMPS), 1892, A., 591.
  *hexa*bromo-, and *hexa*chloro- (CAMPS), 1892, A., 592.
Trimethylenic bromide (1:3-*dibromopropane*), action of ammonia on (NIEDERIST), 1883, A., 450.
    action of, on ethylic sodacetoacetate (PERKIN), 1886, A., 689.
    action of, on ethylic sodethylacetoacetate (KIPPING and PERKIN), 1890, T., 30.
    action of, on the sodium compounds of ethylic acetoacetate, benzoylacetate, *p*-nitrobenzoylacetate and acetonedicarboxylate (PERKIN), 1887, T., 702; P., 55; A., 32.
    conversion of, into propylene bromide (GUSTAVSON), 1888, A., 240.
  chlorobromide, action of aromatic amines and amides on (PINKUS), 1892, A., 1491.
  cyanide (*glutaronitrile*), magnetic rotatory power of (PERKIN), 1889, T., 702.
    molecular refraction and dispersion of (GLADSTONE), 1891, T., 295.
    heats of combustion and formation of (BERTHELOT and PETIT), 1889, A., 812.
    boiling points of (KRAFFT and NOERDLINGER), 1889, A., 690.
    imido-ethers from (PINNER), 1891, A., 61.
Trimethylenic iodide (PERKIN), 1885, A., 495; 1887, T., 12; (HENRY), 1885, A., 736.
    preparation of (KEPPLER and MEYER), 1892, A., 1062.
    molecular refraction and dispersion of (GLADSTONE), 1891, T., 295.
    reaction of, with aniline (BISCHOFF and NASTVOGEL), 1890, A., 1164.
  phenylimidophenylthiocarbamate (FOERSTER), 1888, A., 946.
  selenide and selenocyanate (HAGELBERG), 1890, A., 950.
  sulphide (HAGELBERG), 1890, A., 949.
  *tetra*sulphide (BAUMANN), 1890, A., 1093.
  thiocyanate (HAGELBERG), 1890, A., 949.
Trimethylethylammonium salts, *di*- and *tri*-bromo- (BODE), 1892, A., 806.
  salts, β-iodo- (SCHMIDT), 1892, A., 808.
  chloride, action of heat on (COLLIE and SCHRYVER), 1890, T., 768.
  *hept*iodide (GEUTHER), 1887, A., 910.
Trimethylethylbenzenesulphonic acids (TÖHL and V. KARCHOWSKI), 1892, A., 990.
Trimethylethylene. See β-*iso*Amylene.

Trimethylpyrrolidine (Weil), 1886, A., 529.
1:2:5-**Trimethylpyrrolidine** (Tafel and Neugebauer), 1890, A., 1001.
1:1:2-**Trimethylpyrrolidyl salts** (Merling), 1891, A., 1506.

Trimethylpyrrolidyl iodide (Ciamician and Magnaghi), 1885, A., 1243.

Trimethylpyrroline [b. p. 150°—165°] (Ciamician and Anderlini), 1889, A., 728.

1:2:5-**Trimethylpyrroline** [b. p. 173°] (Knorr), 1887, A., 275.

1:2:5-**Trimethylpyrroline-3:4-dicarboxylic acid** (Knorr), 1885, A., 555.

Trimethylpyruvic acid (Glücksmann), 1890, A., 237.

1:3:4-**Trimethylquinoline** and its salts (Berend), 1885, A., 558.

1:3:2′-**Trimethylquinoline** and its derivatives (Panajotow), 1887, A., 381.

2:3:2′-**Trimethylquinoline** (Berend; Merz), 1884, A., 1053.

2′:3′:4′-**Trimethylquinoline** (Combes), 1888, A., 505.

3:2′:3′-**Trimethylquinoline** (v. Miller), 1890, A., 1326; 1891, A., 1095.

3:2′:4′-**Trimethylquinoline** and its derivatives (Pfitzinger), 1885, A., 1246; 1888, A., 1207; (Combes), 1888, A., 505.
  derivatives of (Pfitzinger), 1885, A., 1246.

Trimethylquinolinealdehyde (Einhorn), 1886, A., 264.

1:3:2′-**Trimethylquinolinesulphonic acid** (Panajotow), 1887, A., 381.

Trimethylquinoxaline (*dimethyltoluquinoxaline*) (v. Pechmann), 1888, A., 812.

Trimethylsuccinic acid (Bischoff and Mintz), 1890, A., 743; (Bischoff), 1890, A., 1099; 1891, A., 828; (Auwers and Köbner), 1891, A., 1016.
  relative properties of dimethylglutaric acid and (Zelinsky and Besredka), 1891, A., 669.

Trimethylsuccinic acids, stereoisomeric (Zelinsky and Besredka), 1891, A., 669.

Trimethylsulphine, preparation of (Carrara), 1892, A., 1422.
  haloid-derivatives of (Dobbin and Masson), 1885, T., 56.
  salts, action of the halogens on (Dobbin and Masson), 1885, T., 56.
  cyanide (Patein), 1890, A., 881.
  iodide (Klinger and Maassen), 1889, A., 1135; (Davies), 1892, A., 300.

Trimethyltaurine, preparation of (James), 1885, T., 372.
  decomposition of, by alkali (James), 1886, T., 486.

1:3:2′-**Trimethyltetrahydroquinoline** (Panajotow), 1887, A., 381.

Trimethylthiazole (Hantzsch), 1890 A., 1238; (Rubleff), 1891, A., 223.

Trimethylthiohydantoin (Marckwald, Neumark and Stelzner), 1892, A., 151.

νβ-**Trimethyl-μ-thiomethoxyglyoxalone** (Marckwald, Neumark and Stelzner), 1892, A., 153.

2:3:4-**Trimethylthiophen** (Zelinsky), 1887, A., 921.

2:3:4-**Trimethylthiophen-5-carboxylic acid** (Gattermann), 1888, A., 575.

Trimethyl-tricoumaric acid and **-tricoumarin** (Hantzsch and Zürcher), 1887, A., 830.

Trimethyltrimethyleneammonium bromide (Partheil), 1890, A., 357.

Tri-2′-methyltritetrahydroquinolylmethane (v. Miller), 1891, A., 1103.

Trimethyluracil (Behrend), 1886, A., 339; 1890, A., 31; (Hagen), 1888, A., 582; (Hoffmann), 1890, A., 31.
  amido-, and chloro- (Hagen), 1888, A., 582.

Trimethyluric acid (Fischer), 1884, A., 1309.

Trimethylvinylammonium salts (Bode), 1892, A., 806.
  salts, bromo- (Bode), 1892, A., 807.
  hydroxide, physiological action of (Brieger), 1884, A., 1202; (Cervello), 1885, A., 925; 1888, A., 309.

Trimethylxylidine iodide (Menton), 1891, A., 1205.

Trimyristin (Reimer and Will), 1885, A., 1197.
  heats of combustion and formation of (Stohmann and Langbein), 1891, A., 11.

Trinaphthylcarbinol, synthesis of (Elbs), 1883, A., 1000.

Tri-α-naphthylguanidine (Evers), 1888, A., 601.

Trinaphthylic phosphates, α- and β- (Heim), 1883, A., 1108.

Tri-α-naphthylmelamine (Fries), 1886, T., 315.

Tri-β-naphthyl*para*rosaniline (Meldola), 1883, A., 807.

Trioctylamine (*tricaprylamine*) (Merz and Gasiorowski), 1884, A., 984.

Triolein, distillation of, under pressure (Engler), 1889, A., 586.
  action of strong sulphuric acid on (Geitel), 1888, A., 578.

Trional (Baumann and Kast), 1889, A., 1233.

Triopianide, and the action of bromine and of nitric acid on (Wegscheider), 1883, A., 997.

Trioxymethylene. See Paraformaldehyde under Formaldehyde.
Triphenetylarsine (*triethoxyphenylarsine*) (Michaelis and Weitz), 1887, A., 367.
Triphenodioxazine, formation of (Seidel), 1890, A., 490.
Triphenol-aluminium chloride (Claus and Mercklin), 1886, A., 143.
Triphenylacetamidine (Luckenbach), 1884, A., 1135.
Triphenylacetic acid, and its sulpho-derivative (Elbs and Tölle), 1886, A., 352.
Triphenylallylpyrrolone, crystallography of (Tutton), 1890, T., 748.
Triphenylamidobenzene (Mohr), 1890, A., 614.
Triphenyl*tri*amidobenzene (Minunni), 1888, A., 1081.
  nitroso- (Minunni), 1891, A., 190.
Triphenylamidomethane and its derivatives (Elbs), 1884, A., 1031; (v. Hemilian and Silberstein), 1884, A., 1032.
  action of halogens on (v. Hemilian and Silberstein), 1884, A., 1033.
Triphenylamine (Heydrich), 1885, A., 1213.
  derivatives of (Heydrich), 1886, A., 553.
  mono- and *di*-amido- (Herz), 1890, A., 1409.
  *tri*amido- (Heydrich), 1885, A., 1213.
  mono-, and *di*-nitro- (Herz), 1890, A., 1409.
  *tri*nitro- (Heydrich), 1885, A., 1213.
Triphenylaminetrisulphonic acid (Herz), 1890, A., 1410.
Triphenylarsine and the corresponding antimony-compound, preparation of (Michaelis and Reese), 1883, A., 327.
  hydroxynitrate (Beckmann), 1886, A., 618.
  oxide (Philips), 1886, A., 618.
  *tri*amido- (Philips), 1886, A., 618.
s-**Triphenylbenzene** (Mellin), 1890, A., 1423.
  synthesis of (Delacre), 1892, A., 993.
  *tetra*amido-, and *tetra*nitro- (Mellin), 1890, A., 1423.
Triphenylbenzenedisulphonic acid (Mellin), 1890, A., 1424.
Triphenylbenzoylpropionic acid (*oxylepidenic acid*) (Japp and Klingemann), 1889, P., 139; 1890, T., 690.
  crystallography of (Tutton), 1890, T., 747.
Triphenylbismuthine, and its *di*bromide and *di*chloride (Michaelis and Polis), 1887, A., 368; (Michaelis and Marquardt), 1889, A., 1061.
Triphenylbutyrolactone (Japp and Klingemann), 1889, P., 138; 1890, T., 680.
Triphenylcarbamide, *m*- and *p*-nitro- (Lellmann and Bonhöffer), 1887, A., 936.
  thio- (Paschkowetzky), 1892, A., 164.
Triphenylcarbinol, synthesis of (Elbs), 1883, A., 1000.
  p-amido- (v. Baeyer and Löhr), 1890, A., 1141, 1142.
  *tri*amido-. See *para*Rosaniline.
  m-nitro- (Tschacher), 1888, A., 373.
  p-nitro- (v. Baeyer and Löhr), 1890, A., 1141.
Triphenylcarbinolcarboxylic acids (v. Hemilian), 1884, A., 323.
Triphenylcarbinoldicarboxylic acids (v. Hemilian), 1887, A., 267.
Triphenylcarbinyl bromide. See Triphenylmethane, bromo-.
Triphenylcarbinyldimethylcarbinol (Willgerodt and Genieser), 1888, A., 811.
Triphenylcarbinyl*mono-* and *-di*methylamine and their iodine-compounds (v. Hemilian and Silberstein), 1884, A., 1033.
Triphenylcrotolactone, oxidation, reduction and chemical reactions of (Japp and Klingemann), 1889, P., 137; 1890, T., 678.
  crystallography of (Tutton), 1890, T., 716.
2:4:5-**Triphenyl-*m*-diazine,** 6-amido- (Wache), 1889, A., 684.
Triphenyldicarbimide (Rathke and Oppenheim), 1890, A., 1125.
Triphenyldiethyl*di*thiobiuret (Billeter and Strohl), 1888, A., 365.
Triphenyldiguanide (Rathke and Oppenheim), 1890, A., 1126.
Triphenyldimethylamidophosphine (Schenk and Michaelis), 1888, A., 835.
Triphenyldimethylethyl ether (Willgerodt and Schiff), 1890, A., 959.
Triphenyl-dimethyl- and -dipropyl-*di*thiobiurets (Billeter and Strohl), 1888, A., 365.
Triphenylethane (Combes), 1884, A., 837.
Triphenylethenyltrisulphone (Laves), 1892, A., 612.
Triphenylethophenazonium hydroxide, amido- (Kehrmann and Messinger), 1892, A., 1109.

Triphenylethylamine, and its hydrochloride (Elbs), 1884, A., 1031.
Triphenylethylenesemithiocarbazide (Burchard), 1890, A., 251.
Triphenylethylpropyl*di*thiobiuret (Billeter and Strohl), 1888, A., 365.
3:3:5-Triphenyl-1-ethylpyrroline (Japp and Klingemann), 1890, T., 704.
  crystallography of (Tutton), 1890, T., 730.
  action of bromine on (Japp and Klingemann), 1890, T., 705.
  bromo-, crystallography of (Tutton), 1890, T., 736.
Triphenylfurfuran (*lepiden*) (Smith), 1890, T., 645.
  oxidation and reduction of (Japp and Klingemann), 1890, T., 675.
  *tri*bromo- (Japp and Klingemann), 1890, T., 713.
  chloro-, reduction of (Japp and Klingemann), 1890, T., 674.
Triphenylglyoxaline (*lophin*), constitution of (Japp), 1883, T., 9.
  oxidation of (Japp), 1883, T., 15.
  reduction of (Zaunschirm), 1888, A., 1078.
α-Triphenylguanidine (Hentschel), 1883, A., 1107.
  a physical peculiarity of (Giraud), 1887, A., 366.
  action of ethoxalyl chloride on (v. Stojentin), 1884, A., 1159.
  picrate (Prelinger), 1892, A., 950.
α-Triphenylguanidine, *m*-nitro- and *m*-*tri*nitro-, and its hydriodide (Losanitsch), 1883, A., 582.
  β-nitro-, *di*cyanide (Hirsch), 1888, A., 947.
Triphenylguanylthiocarbamide and **dicyanodiamide** (Rathke and Oppenheim), 1890, A., 1125.
1:2:3-Triphenyl-1:2-hydronaphthazonium hydroxide (Fischer and Busch), 1891, A., 1109.
Triphenyl-γ-hydroxybutyric acid (Japp and Klingemann), 1889, P., 138; 1890, T., 680.
αβδ-Triphenyl-γ-hydroxypropylideneacetethylamide and **-acetic acid** (Cohn), 1892, A., 484.
Triphenylic phosphate, *tri*nitro- (Rapp), 1884, A., 1338.
  phosphite (Noack), 1883, A., 735; (Anschütz and Emery), 1890, A., 34.
  thiophosphate (Anschütz and Emery), 1890, A., 35.
1-*eso*-Triphenylmelamine (Rathke), 1888, A., 591.
2-*eso*-**Triphenylmelamine** and its derivatives (v. Hofmann), 1886, A., 233.
3-*eso*-**Triphenyl*iso*melamine** (v. Hofmann), 1886, A., 233; (Rathke), 1887, A., 663.
  derivatives of (v. Hofmann), 1886, A., 233.
n-**Triphenylmelamine** (v. Hofmann), 1886, A., 41, 233; (Klason), 1886, A., 522.
ψ-Triphenylmelamine, nature of (Buddéus), 1890, A., 1254.
Triphenylmelamines, formula of (Rathke), 1887, A., 650.
Triphenylmethane, preparation of (Linebarger), 1892, A., 719.
  synthesis of (Elbs), 1883, A., 1000; (Griepentrog), 1886, A., 887.
  spectrum of (Hartley), 1887, T., 162.
  action of bromine on (Kölliker), 1885, A., 990.
  action of potassium on (Hanriot), 1889, A., 882.
  condensation of, with chloroform (Linebarger), 1892, A., 722.
  hydrogenation of (Golenkin), 1888, A., 483.
  oxidation of (Hanriot and Saint-Pierre), 1890, A., 168.
  derivatives of (Renouf), 1883, A., 981; (Ullmann), 1885, A., 1236; 1888, A., 288; (Kock), 1887, A., 836.
  violet derivatives of (Fischer and German), 1883, A., 1097; (Fischer and Körner), 1884, A., 606, 749.
  and its homologues, hydroxynitro-derivatives of (Bertoni), 1891, A., 1378.
Triphenylmethane, 1-amido- (*triphenylmethylamine*) (Elbs), 1883, A., 1000; 1884, A., 1031; (Nauen), 1884, A., 899.
  o-amido- (Fischer and Fränkel), 1888, A., 56.
  p-amido- (v. Baeyer and Löhr), 1890, A., 1141.
  *di*amido-, preparation of (Mazzara), 1885, A., 904; (Ullmann), 1885, A., 1236.
    action of phenols on (Mazzara), 1885, A., 800.
    action of potassium nitrite on (Mazzara), 1885, A., 800, 904.
  *tri*amido-. See *para*Leucaniline.
  bromo-, action of, on ethylic sodiomalonate (Henderson), 1886, P., 251; 1887, T., 224.
    reactions of (Elbs), 1883, A., 1000; 1884, A., 1030.

Triphenylmethane, bromo-, derivatives of (Allen and Kölliker), 1885, A., 655; (Kölliker), 1885, A., 990.
  o-cyano- (Drory), 1891, A., 1461.
  m-nitro- (Tschacher), 1887, A., 44; 1888, A., 373.
  p-nitro- (v. Baeyer and Löhr), 1890, A., 1141.
  thiocyano- (Elbs), 1884, A., 1030.
Triphenylmethaneanhydrocarboxylic acid (v. Hemilian), 1884, A., 323.
Triphenylmethane-*o*-carboxylic acid (Gresly), 1886, A., 1035; (Fischer and Fränkel), 1888, A., 56; (Drory), 1891, A., 1462.
Triphenylmethane-2:4-dicarboxylic acid (v. Hemilian), 1887, A., 267.
Triphenylmethane-3:4-dicarboxylic acid (v. Hemilian), 1884, A., 323.
Triphenylmethane-group, dyes of the (Nölting), 1891, A., 727; 1892, A., 187.
Triphenylmethylaniline (Elbs), 1884, A., 1031; (v. Hemilian and Silberstein), 1884, A., 1033.
  nitroso- (Elbs), 1884, A., 1031.
Triphenylmethylanilinesulphonic acid (Elbs), 1884, A., 1032.
Triphenylmethylazimethylene (Curtius and Rauterberg), 1891, A., 1360.
Triphenylmethylbenzylamine and its hydrochloride (Elbs), 1884, A., 1031.
Triphenylmethylpropyl*di*thiobiuret (Billeter and Strohl), 1888, A., 365.
Triphenylmethylpyrazine (Knorr and Laubmann), 1888, A., 725.
3:3:5-**Triphenyl-1-methylpyrrolidone** (Japp and Klingemann), 1889, P., 140; 1890, T., 701.
3:3:5-**Triphenyl-1-methylpyrrolone** (Japp and Klingemann), 1889, P., 140; 1890, T., 698.
  crystallography of (Tutton), 1890, T., 724.
  action of bromine on (Japp and Klingemann), 1890, T., 699.
  oxidation of (Japp and Klingemann), 1890, T., 701.
  bromo-, crystallography of (Tutton), 1890, T., 728.
Triphenylmethyl-*p*-toluidine, nitroso- (Wittich), 1884, A., 1032.
Triphenylmethyltoluidines (Wittich), 1884, A., 1032.
Triphenyl-*β*-naphthyl-carbamide and **-thiocarbamide** (Paschkowetzky), 1892, A., 165, 167.
Triphenyl*tri*nitrophloroglucinol (Jackson and Warren), 1891, A., 1026.
Triphenylosotriazone (Auwers and Meyer), 1889, A., 51.
Triphenylphloroglucinol (Hodgkinson), 1886, P., 189.
Triphenylphosphine and its derivatives (Michaelis and v. Soden), 1885, A., 1134.
Triphenylphosphine oxide, nitro- and amido- (Michaelis and v. Soden), 1884, A., 1180.
Triphenylphosphoryl *di*bromide (Noack), 1883, A., 736.
Triphenylphosphoryl *di*chloride (Anschütz and Emery), 1890, A., 35.
1:2:3-**Triphenylpropane** (Claus and Mercklin), 1886, A., 143.
Triphenylpropenyldisulphone sulphide (Otto and Rössing), 1891, A., 568.
Triphenylpropenyltrisulphone (Stuffer), 1890, A., 988.
β-**Triphenylpropionic acid** and its salts (Henderson), 1887, T., 226; A., 671.
Triphenylpropylpyrrolone, crystallography of (Tutton), 1890, T., 738.
1:3:5-**Triphenylpyrazole** and its derivatives (Knorr and Laubmann), 1888, A., 725.
  methiodide (Knorr and Laubmann), 1888, A., 725.
1:4:5-**Triphenylpyrazole** (Japp and Klingemann), 1889, P., 141; 1890, T., 710.
1:3:5-**Triphenylpyrazoline** and its derivatives (Knorr and Laubmann), 1888, A., 725.
2:4:6-**Triphenylpyridine** (Riehm), 1887, A., 599.
3:3:5-**Triphenylpyrrolidone** (Japp and Klingemann), 1889, P., 140; 1890, T., 683, 696.
1:2:5-**Triphenylpyrroline** (Baumann), 1887, A., 736; (Kapf and Paal), 1889, A., 149.
2:3:5-**Triphenylpyrroline** (Smith), 1890, T., 645.
1:4:5-**Triphenylpyrrolone** (Klingemann), 1892, A., 1003.
3:3:5-**Triphenylpyrrolone** and its reduction (Japp and Klingemann), 1889, P., 140; 1890, T., 694.
  and its derivatives, crystallography of (Tutton), 1890, T., 720.

 oil. See under Oils.
Turmeric, certain substances obtained from (Jackson and Menke), 1883, A., 480; 1885, A., 271.
Turmeric acid, and its salts (Jackson and Menke), 1885, A., 271.
apo-**Turmeric acid** (Jackson and Menke), 1885, A., 271.
Turmerol (Jackson and Menke), 1883, A., 482.
 oxidation of (Jackson and Menke), 1883, A., 483; 1885, A., 271.
Turmeryl chloride (Jackson and Menke), 1883, A., 482.
Turnbull's blue (*ferrous ferricyanide*), composition of (Reynolds), 1887, T., 644; P., 86.
Turnips, cooked, composition of (Williams), 1892, T., 227.
 See also Agricultural Chemistry.
Turpentine (Marsh and Gardner), 1891, T., 725; P., 123.
 constitution of (Collie), 1892, A., 864.
 specific rotatory power of (Dunwody), 1891, A., 217.

Turpentine, Russian, specific rotatory and refractive powers of (Kanonnikoff), 1889, A., 453.
increase of rotatory power of, on keeping (Marsh and Gardner), 1891, T., 726.
anomalous dispersion of (v. Wyss), 1888, A., 542.
behaviour of, in mixtures of two solvents (Rimbach), 1892, A., 1137.
specific gravity of (Dunwody), 1891, A., 217.
action of benzoic acid on (Bouchardat), 1892, A., 199.
action of hydrogen chloride on (Marsh and Gardner), 1891, T., 728.
reaction of, with manganous salts (Crismer), 1892, A., 386.
atmospheric oxidation of (Kingzett), 1888, A., 605.
oxidation of, in sunlight (Armstrong), 1890, P., 99.
production of camphor from (Marsh and Stockdale), 1890, T., 961; P., 140.
hydrochloride, conversion of, into camphene hydrochloride (Marsh and Gardner), 1891, T., 730.

Turpentine, detection and estimation:—
detection of, in essences (Crismer), 1892, A., 386.
detection of, in Venice turpentine (Hirschsohn), 1890, A., 307.
detection of petroleum in (Dunwody), 1891, A., 217.
estimation of, in paint and varnishes (Phillips), 1891, A., 1302.
estimation of petroleum in (Burton), 1890, A., 669.
French essence of, estimation of resin oil in (Aignan), 1890, A., 422.
See also Resins and Balsams.

Turpentine oil, heat conductivity of (Chree), 1888, A., 642.
American, action of heat on (Tilden), 1884, T., 411.
oxidation of, in sunlight (Armstrong), 1891, T., 311; (Armstrong and Pope), 1891, T., 315.
spontaneous oxidation of (Papasogli), 1889, A., 615.
detection of, in essence of lemons (Oliveri), 1891, A., 1497.
detection of resin oil in (Baudin), 1891, A., 870.

Turpentine oils (Armstrong), 1891, T., 311.

Turpentineglycuronic acid (Külz), 1890, A., 1287.

Turquoise. See Calaite.

Tylophorine, an alkaloid from *Tylophora asthmatica* (Hooper), 1891, A., 1266.

Type metal, analysis of (Weil), 1884, A., 1429.

Typhoid fever, reduction of oxyhæmoglobin in (Hénocque and Baudoin), 1888, A., 865.

Typhotoxine, Brieger's (de Blasi), 1890, A., 391.

Tyrolite from Utah (Hillebrand and Washington), 1888, A., 1043; (Hillebrand and Dana), 1890, A., 853.

Tyrosine (*p-hydroxyphenyl-α-amidopropionic acid*) in dahlia tubers (Leitgeb), 1889, A., 433.
formation of (Blendermann), 1883, A., 818, 876.
synthesis of (Erlenmeyer and Lipp), 1883, A., 994.
heats of combustion and formation of (Berthelot and André), 1890, A., 936.
relation of, to hippuric acid (Baas), 1887, A., 1133.
action of benzoic chloride on (Baum), 1885, A., 982.
condensation of, with benzenesulphonic chloride (Hedin), 1891, A., 203.
decomposition of (Blendermann), 1883, A., 818, 876.
administration of, in the food (Blendermann), 1883, A., 879.
detection of, in urine (Blendermann), 1883, A., 879.
ethyl ether, behaviour of, in animal metabolism (Cohn), 1890, A., 187.

Tyrosine-hydantoin (Blendermann), 1883, A., 818.

Tyrotoxicon (Vaughan), 1886, A., 373.
relation of, to diazobenzene (Vaughan), 1888, A., 497.

U.

Uigite from Skye (Heddle), 1886, A., 130.

Ulex europaeus, composition of (Troschke), 1885, A., 684.

Ulexine (*cytisine*) and its derivatives (Gerrard), 1886, A., 1048; (Gerrard and Symons), 1890, A., 180; 1891, A., 334; (Partheil), 1891, A., 231, 750; (v. Buchka and Magalhaẽs), 1891, A., 587, 750; (van de Moer), 1891, A., 946.
physiological action of (Bradford), 1888, A., 1325.
detection of (van de Moer), 1891, A., 947.

Ulexite (*borocalcite; boronatrocalcite; hayesine*) (Darton), 1883, A., 162, 1062; (Rammelsberg), 1885, A., 28; (Whitfield), 1888, A., 347.
Chilian (Witting), 1885, A., 846.
analysis of (Brun), 1884, A., 403.
Ullmannite from Lölling and from Sarrabus (Klein and Jannasch), 1888, A., 31.
from Siegen (Laspeyres), 1892, A., 124.
Ulmic acid. See Humic acid.
Ulmin, natural and artificial, morphology and chemistry of (Früh), 1884, A., 923.
Ultramarine (Guckelberger), 1883, A., 714; (Knapp), 1888, A., 1163.
artificial, discovery and early manufacture of (Heintze), 1891, A., 400.
Japanese materials for the manufacture of (Iwabuchi), 1885, A., 460.
formation of, in the wet way (Knapp), 1886, A., 306; 1887, A., 110.
preparation of, from silica (Knapp), 1885, A., 847.
action of carbonic anhydride on (Büchner), 1887, A., 774.
in a fine state of division, similarity of the behaviour of, to that of metallic sulphides in the colloidal state (Ebell), 1884, A., 147.
green (Guckelberger), 1883, A., 715; (Szilasi), 1889, A., 758.
analyses of (Guckelberger), 1883, A., 714.

chloride (*uranium oxychloride*), ammoniacal compounds of (Regelsberger), 1885, A., 638.
fluorides, *α*- and *β*- (*uranium oxyfluorides*) (Smithells), 1883, T., 128.
chromate and its double salts (Formánek), 1890, A., 852.
potassium chromate (Wiesner), 1883, A., 425.
sulphates, basic (Athanasescu), 1886, A., 982.
Uranium, detection, estimation and **separation:—**
detection of minute quantities of (Fairley), 1891, A., 360.
estimation, electrolytic, of (Classen), 1885, A., 192.
separation of, from the alkalis and alkaline earths (Alibegoff), 1886, A., 922.
separation of, from chromium (Formánek), 1888, A., 531.
separation of, from other metals (Rammelsberg), 1885, A., 649.
Uranium ochre, from Johanngeorgenstadt (Weisbach), 1883, A., 433.
Uranophane, analyses of (v. Foullon), 1885, A., 223.
Uranothallite (Schrauf), 1883, A., 956.
from Joachimsthal (Brezina), 1886, A., 24.
Uranothorite (Nilson), 1883, A., 299.
Urao. See Trona.
Urea, origin of, in the animal economy (Coppola), 1890, A., 184.
formation of, in the animal body (Salomon), 1885, A., 921.
mechanism of the production of, in the animal organism (Popoff), 1892, A., 89.
formation of, in the dog fish (v. Schroeder), 1890, A., 1451.
formation of, from sarcosine (Salkowski), 1884, A., 1394.

Urea, heats of formation and combustion of (Berthelot and Petit), 1890, A., 206.
thermal equivalent of a solution of (Rubner), 1885, A., 328.
solutions, dilute, cryoscopy of (Pickering), 1892, A., 1045.
action of *hexa*bromacetone on (Senier), 1886, T., 693, 743.
action of chromyl dichloride on (Sell), 1883, A., 178.
action of nitrous acid on (Emmerling), 1886, A., 747.
and some of its derivatives, action of phenylhydrazine on (Skinner and Ruhemann), 1888, T., 550; P., 54.
behaviour of quinol with (Anraeff), 1887, A., 514.
hydrolysis of, by micro-organisms (Warington), 1888, T., 732.
nitrification of (Munro), 1886, T., 639.
behaviour of, in soils (Kellner), 1887, A., 524.
amount of, in blood and muscle (Gréhant and Quinquaud), 1889, A., 914.
excretion of (Herringham and Davies), 1892, A., 365.
excretion of, by the human subject (Genth), 1885, A., 830; (Mareš), 1887, A., 856.
influence of the muscular work on the output of (Bleibtreu), 1891, A., 350.
excretion of, in fever (Wood and Marshall), 1891, A., 1530.
excretion of, in liver diseases (Mörner and Sjöquist), 1891, A., 758.
hourly excretion of, in urine (Etard and Richet), 1883, A., 751; (Gley and Richet), 1888, A., 179.
and inorganic salts, excretion of, with the urine under the influence of an artificially increased temperature (Koch), 1884, A., 1394.
poisonous action of (Gréhant and Quinquaud), 1884, A., 1398.
acetate (Matignon), 1891, A., 1448.
oxalate (Kirkaldy), 1892, A., 1421.
picrate (Smolka), 1886, A., 453.
thio-. See Thiourea.

Urea, detection and estimation:—
titration of (Pfeiffer), 1885, A., 450; 1888, A., 539; (Pflüger and Schenck), 1886, A., 396.
titration of, with mercuric nitrate (Braun), 1885, A., 702; (Pflüger), 1888, A., 201.
detection of (Lüdy), 1889, A., 1059.

Urea, detection and estimation:—
detection of, in an aqueous solution (Bloxam), 1883, A., 1036.
estimation of, in urine (Hugounenq), 1884, A., 122; (Greene), 1884 A., 507; (Hamburger), 1885, A., 450; (Gerrard; Luzzatto), 1885, A., 610; (Jacobj), 1886, A., 104; (Allen), 1886, A., 279; (Malerba), 1886, A., 583; (Green), 1886, A., 747; (Pflüger and Bohland), 1887, A., 90; (Méhu), 1887, A., 1001; (Campari), 1887, A., 1145; (Cazeneuve and Hugounenq), 1888, A., 328; (Camerer), 1888, A., 518; (Luther), 1889, A., 1039; (Pflüger and Bleibtreu), 1890, A., 308; (Dott), 1890, A., 931; (Miquel), 1891, A., 132; (Heaton and Vasey; Warden), 1891, A., 133; (Smith), 1891, A., 512; (Mörner and Sjöquist), 1891, A., 759, 1561.
See also Carbamide.

Urea bacillus, action of, on urea (Frankland), 1885, T., 179.

Urea ferment, soluble (Miquel), 1891, A., 100.
soluble, from the *Torula Ureæ* (Lea), 1886, A., 641.

Ureides and their derivatives (Franchimont), 1888, A., 1064; (Franchimont and Klobbie), 1889, A., 125.
condensed (Leeds), 1883, A., 664.
from normal acids (Matignon), 1891, A., 1448.

"**Ureines**" (Franchimont and Klobbie), 1889, A., 125.

Ureometer (Lunge), 1886, A., 396; (Marshall), 1887, A., 310.

Urethane. See Ethylic carbamate.

Urethanes of the paraffin series (Arth), 1886, A., 692.

1:2:4-**Urethanotolyloxamic acid** (Schiff and Vanni), 1891, A., 834; 1892, A., 599, 602, 1208.

1:2:4-**Urethanotolyloxamide** (Schiff and Vanni), 1892, A., 601.

Uribilinuria (Engel and Kiener), 1889, A., 637.

Uric acid from the green glands of *Astacus fluviatilis* (Griffiths), 1885, A., 680.
in insects and molluscs (MacMunn), 1886, A., 1056.
in urine (Roberts), 1890, A., 540.
absence of, in urine of Carnivora (Sanarelli), 1888, A., 178.
in the urine of Herbivora (Mittelbach), 1888, A., 1215.

Uric acid, place of origin of, in the animal organism (Garrod), 1887, A., 388.
- origin of, in mammals (Horbaczewski), 1890, A., 184.
- formation of, in the animal organism (Garrod), 1883, A., 876; (Horbaczewski), 1891, A., 1340.
- formation of, in the blood of mammals (Mareš), 1892, A., 1257.
- formation of, from cyanacetic acid and carbamide (Formánek), 1892, A., 149.
- formation of, from nuclein (Horbaczewski), 1892, A., 646.
- synthesis of (Horbaczewski), 1883, A., 179; 1885, A., 1050; 1887, A., 918.
- constitution of (Michael), 1884, A., 426; (Fischer), 1884, A., 1310; (Horbaczewski), 1887, A., 918; 1888, A., 256.
- heat of formation of (Matignon), 1890, A., 1040.
- action of nitrous acid on (Emmerling), 1886, A., 747.
- products of oxidation of (Matignon), 1891, A., 1448.
- decomposition of, by hippurates and benzoates (Garrod), 1883, A., 876.
- solubility of (Blarez and Denigès), 1887, A., 919.
- solubility of, at the temperature of the healthy human body (Garrod), 1883, A., 876.
- ammoniacal fermentation of (F. and L. Sestini), 1890, A., 1399.
- physiology of (Garrod), 1885, A., 414.
- influence of glycerol, sugar and fat on the secretion of, in man (Horbaczewski and Kaněra), 1886, A., 822.
- excretion of (Mareš), 1887, A., 856; (Haig), 1888, A., 1322; (Herringham and Davies), 1892, A., 365.
- excretion of, in cases of leucæmia (Bohland and Schurz), 1891, A., 483.
- influence of hot baths on the excretion of, from the human system (Formánek), 1892, A., 1503.
- influence of sodium phosphate on the excretion of (Haig), 1890, A., 397.
- influence of drinking large quantities of water on the excretion of (Schöndorff), 1891, A., 848.
- derivatives of (Fischer), 1884, A., 996, 1308; (Mylius), 1884, A., 1128.

Uric acid, salts of, artificial formation of sphaeroliths of (Ebstein and Nicolaier), 1891, A., 760.
- solubility of, at the temperature of the healthy human body (Garrod), 1883, A., 876.
- ammonium, potassium and sodium salts of, thermochemistry of (Matignon), 1890, A., 1041.
- calcium salt of (Delépine), 1887, A., 469.
- test for (Denigès), 1888, A., 1347.
- estimation of, in urine (Ludwig), 1886, A., 102; (Haycraft), 1886, A., 748; 1891, A., 1297; (Blarez and Denigès), 1887, A., 621; (Czapek), 1888, A., 1225; (Gossage), 1889, A., 450; (Camerer), 1889, A., 1040; 1890, A., 1345; (Salkowski), 1889, A., 1250; (Pott), 1890, A., 304; (Bayrac), 1890, A., 670; (Groves), 1892, A., 546; (Geelmuyden), 1892, A., 1032; (Haig), 1892, A., 1133.

ψ-Uric acid, thio- (*thiouramidobarbituric acid*) (Trzciński), 1883, A., 914.

Uric acid-group, azines of (Kühling), 1891, A., 1341; 1892, A., 70.
- synthesis of compounds of (Behrend), 1887, A., 919; (Behrend and Roosen), 1888, A., 581.

Urimidosuccinic acids, molecular weights of (Paternò and Nasini), 1890, A., 725.

Urinary fermentation (Müller), 1886, A., 276.

Urine, secretion of, when pressure is exerted on the urinary canals (Lépine and Porteret), 1888, A., 1321.
- mean composition of (Yvon and Berlioz), 1888, A., 1320.
- reaction of (Aducco), 1888, A., 621.
- is free acid contained in? (v. Brücke), 1887, A., 986.
- influence of the administration of acids and alkalis on the reaction of (Freudberg), 1891, A., 1528.
- nitrification of (Munro), 1886, T., 642.
- healthy, absence of acetone in (West), 1890, A., 399.
- volatile fatty acids in (v. Jaksch), 1886, A., 384.
- formation of volatile fatty acids in the ammoniacal fermentation of (Salkowski), 1889, A., 431.
- pathological, alkaloids in (Villiers), 1885, A., 1084; 1886, A., 88.
- alkaloids in (Thudichum), 1888, A. 1119.

- **Urine**, ammonium magnesium phosphate crystals in (Weiske), 1883, A., 609.
  - febrile, aromatic substances in (Haldane), 1889, A., 65.
  - aromatic compounds in (Baumann), 1886, A., 384.
  - excretion of balsams in (Stockman), 1891, A., 600.
  - biliary acids in, during jaundice (Baelde and Lavrand), 1889, A., 637.
  - benzamide in, after administration of benzaldehyde (Cohn), 1890, A., 188.
  - calcium salts in (Hoppe-Seyler), 1891, A., 484.
  - carbohydrates in (v. Udránszky), 1888, A., 863; (Wedenski), 1889, A., 293; (Roos), 1891, A., 1392.
  - putrefying, carbohydrates of (Treupel), 1892, A., 226.
  - sugar in albuminous (Méhu), 1887, A., 1060.
  - substances likely to be mistaken for sugar in (Ashdown), 1890, A., 279.
  - sugar in, on a diet of cane-sugar (Seegen), 1886, A., 383.
  - carbonic anhydride in (van Nüys and Lyons), 1892, A., 649.
  - influence of the secretion of gastric juice on the quantity of chlorine in (Sticker), 1888, A., 620.
  - creatinine in (Grocco), 1887, A., 513.
  - diabetic, α-crotonic acid in (Stadelmann), 1885, A., 924.
  - cystin not present in (Stadthagen), 1885, A., 830.
  - cystin in the (Goldmann and Baumann), 1888, A., 519; (Delépine), 1890, A., 1018.
  - pathological, diamines in (v. Udránszky and Baumann), 1888, A., 1297.
  - ethylic carbamate in the alcoholic extract of (Jaffé and Cohn), 1890, A., 654.
  - diabetic, glycogen in (v. Leube), 1889, A., 65, 293.
  - glycerophosphoric acid in (Eymonnet), 1884, A., 1058.
  - glycuronic acid compounds in (Flückiger), 1885, A., 924; (Hagemann), 1889, A., 535; (Ashdown), 1890, A., 279.
  - pathological, reduction products of hæmatin in (Le Nobel), 1887, A., 1127.
  - hæmatoporphyrin in (Salkowski), 1891, A., 601, 1130; (Halliburton), 1891, A., 1279; (Hammarsten), 1892, A., 649.
- **Urine**, source of hippuric acid in (Schotten), 1884, A., 1057.
  - diabetic, β-hydroxybutyric acid (active) in (Minkowski), 1885, A., 413; (Worm-Müller), 1885, A., 702; (Deichmüller, Szymanski and Tollens), 1885, A., 830; (Külz), 1887, A., 290; (Stadelmann), 1887, A., 464; (Wolpe), 1887, A., 857.
  - indigo-red (*indirubin*) in (Rosenbach), 1890, A., 1032; (Rosin), 1891, A., 850.
  - extraction of indigotin and indirubin from (Méhu), 1884, A., 1059.
  - iodine in, after the external application of iodoform (Gründler), 1885, A., 413.
  - lactic acid and lactose in (Gaube), 1890, A., 188.
  - nitrates in (Weyl), 1885, A., 413.
  - nitrogenous constituents of (Bohland), 1889, A., 536; (Schultze), 1890, A., 280; (Camerer), 1891, A., 1277.
  - excretion of nitrogen in (Gumlich), 1892, A., 1503.
  - of soldiers after a forced march, paralactic acid in (Colasanti and Moscatelli), 1888, A., 1321.
  - elimination of phosphoric acid in, in insanity and epilepsy (Lailler), 1885, A., 73.
  - phosphates in, in different diseases (Vanni and Pons), 1888, A., 621.
  - influence of intellectual activity on the elimination of phosphoric acid in (Mairet), 1884, A., 1394.
  - phosphoric acid in (Carles), 1892, A., 1115.
  - relation of phosphoric acid to nitrogen in (Politis), 1885, A., 283.
  - relations of the phosphates in (Ott), 1886, A., 167.
  - proportion of incompletely oxidised phosphorus contained in (Lépine), 1884, A., 913.
  - elimination of hypophosphites by (Eymonnet), 1884, A., 1058.
  - precipitate produced by picric acid in (Jaffé), 1886, A., 1056.
  - pigments of (Plósz), 1883, A., 814; 1884, A., 1059; (MacMunn), 1884, A., 194; 1889, A., 531; (v. Udránszky), 1887, A., 1133; 1888, A., 180.
  - pigments, unusual, colouring matter of (MacMunn), 1883, A., 1159.
  - pigment, unusual, in (Harley and Torup), 1891, A., 601.

- **Urine**, new pathological colouring matter in (v. Leube), 1888, A., 179.
  - reactions for distinguishing between chrysophanic acid and santonin colouring matters in (Hoppe-Seyler), 1887, A., 406.
  - albumin in (Posner), 1887, A., 390.
  - albumin from, coagulated by nitric acid and soluble in alcohol (Garnier), 1883, A., 247.
  - albuminous, turbidity of, on heating (Stokvis), 1885, A., 680; (Smith), 1885, A., 681; (Carles), 1886, A., 384.
  - albuminous, toxic effects of (Teissier and Roque), 1888, A., 1326.
  - hemialbumose in (Kühne), 1884, A., 854.
  - peptones in (Georges), 1887, A., 188.
  - proteid substance in (Müller), 1886, A., 87.
  - proteids in (Noël-Paton), 1890, A., 1174; (Winternitz), 1891, A., 1130.
  - mucin in (Citron), 1887, A., 390.
  - normal and pathological, pepsin in (Stadelmann), 1889, A., 430.
  - ferments in (Stadelmann), 1888, A., 308.
  - diastatic ferment in (Rosenberg), 1891, A., 760.
  - diastatic and other ferments in (Holovokschiner), 1886, A., 902.
  - diabetic, reducing substance in (Leo), 1887, A., 513.
  - reducing agents in (Johnson), 1892, A., 1504.
  - rennet in (Helwes), 1889, A., 536.
  - sulphur in (Goldmann), 1885, A., 922.
  - partially oxidised sulphur in (Lépine and Guérin), 1884, A., 347.
  - ethereal hydrogen sulphates in (Morax), 1886, A., 729; (Hoppe-Seyler), 1888, A., 179; (Rovighi), 1892, A., 226.
  - sulphates and ethereal hydrogen sulphates in, during diarrhœa (Bartoschewitsch), 1892, A., 1505.
  - relation between the total sulphuric acid of the, and that as ethereal sulphates in rest and work (Sher), 1889, A., 430.
  - hydrogen sulphide in (Müller), 1888, A., 178.
  - evolution of hydrogen sulphide in the (Salkowski), 1889, A., 432.
  - trypsin in (Leo), 1887, A., 69.
- **Urine**, excretion of urea and inorganic salts with, under the influence of an artificially increased temperature (Koch), 1884, A., 1394.
  - uric acid in (Roberts), 1890, A., 540.
  - *para*xanthine in (Salomon), 1883, A., 601; 1885, A., 403; 1886, A., 266.
  - xanthine-derivatives in (Salomon), 1887, A., 739; 1891, A., 1528.
  - xanthocreatinine in the (Colasanti), 1892, A., 364.
  - behaviour of Congo-red with (v. Brücke), 1888, A., 381.
  - behaviour of, after ingestion of naphthalene (Edlefsen), 1888, A., 1322.
  - passage of naphthol into (Desesquelle), 1891, A., 98.
  - behaviour of, with quinol (Anraeff), 1887, A., 514.
  - relative toxic effect of the organic and saline constituents of (Lépine and Aubert), 1885, A., 1085.
  - of fever patients (v. Jaksch), 1883, A., 1162.
  - in melanuria (v. Jaksch), 1889, A., 637.
  - in a case of melanotic sarcoma (Hoppe-Seyler), 1891, A., 484.
  - in a case of phosphorus poisoning (Starling and Hopkins), 1892, A., 650.
  - of cold blooded animals, lactic acid in, after the extirpation of the liver (Nebelthau), 1888, A., 1323.
  - of animals, occurrence of acetyl derivatives in, after the ingestion of aldehydes (Cohn), 1892, A., 1504.
  - of Carnivora, absence of uric acid and alkaline reaction in (Sanarelli), 1888, A., 178.
  - of Herbivora, uric acid in (Mittelbach), 1888, A., 1215.
  - of cows and sheep (Zacharewicz), 1884, A., 1204.
  - of dogs, nitrogenous constituents of (Bleibtreu), 1890, A., 279.
  - of horses, phenaceturic acid in (Salkowski), 1885, A., 413.
    - composition of (Salkowski), 1885, A., 924; (Hagemann), 1889, A., 535.
    - chemistry of (Smith), 1890, A., 914.
  - of pigs, chemical composition of (Salomon), 1885, A., 413.
  - of hydrophobic rabbits, catechol in (Moscatelli), 1892, A., 1115.
  - of the tortoise (Mills), 1887, A., 170.
- **Urine, analytical methods relating to:—**
  - analysis of (Taniguti), 1890, A., 1199.

Urine, analytical methods relating to:—
detection of acetone in (Legal), 1888, A., 1346; (Salkowski and Taniguti), 1891, A., 624.
detection of alkaloids in, by means of iodine solution (Chibret and Izarn), 1886, A., 748.
detection of bile constituents in (Jolles), 1891, A., 135.
detection of blood in (Wolff), 1888, A., 880.
detection of creatinine in (Campari), 1885, A., 702.
detection of ethylic acetoacetate in (Spiethoff), 1885, A., 703; (Legal), 1888, A., 1346.
detection of hæmatoporphyrin in (Hammarsten), 1892, A., 1136.
detection of hæmoglobin in (Rosenthal), 1886, A., 956.
detection of indican and its homologues in (Michailoff), 1888, A., 880.
detection of indigo-red in (Rosenbach), 1890, A., 1032.
detection of iodine in (Schwarz), 1888, A., 626.
detection of mercapturic acid in (Baumann), 1884, A., 1395.
detection of mercury in (Alt), 1888, A., 630.
detection of morphia in (Notta and Lugan), 1885, A., 447.
detection of oxalic acid in (Salkowski), 1886, A., 395.
detection of phenols and hydroxy-acids in (Baumann), 1883, A., 885.
detection of albumin in (Haslam), 1883, A., 885; (Johnson), 1885, A., 845; (Blum), 1887, A., 1003; (Liebermann), 1887, A., 1150; (Grocco), 1892, A., 667; (Spiegler), 1892, A., 928.
detection of albumin in bacterial (Jolles), 1891, A., 136.
Tanret's reaction for albumin, peptone and alkaloids in (Brasse), 1888, A., 204.
examination of, for albumose and peptone (Méhu), 1885, A., 451.
detection of proteids in (Martin), 1888, A., 763; (Boymond), 1890, A., 273.
detection of quinine and phenacetin in (Sestini and Campani), 1892, A., 665.
detection of sugar in (Campari), 1885, A., 702; (Buchner), 1885, A., 843; (Schwarz), 1889, A., 85; (Crismer), 1889, A., 552; (Werner), 1890, A., 427.
clinical examination of, by means of Fehling's solution (Jolly), 1886, A., 744.
phenylhydrazine as a test for sugar in (v. Jaksch), 1886, A., 744; (Hirschl), 1890, A., 835.
picric acid as a test for sugar to (Johnson), 1883, A., 1176.
alkaline bismuth solution as a test for glucose in (Nylander), 1884, A., 1433.
value of Brücke's method for the removal of interfering substances from, in testing for glucose (Green), 1886, A., 745.
detection of tannin in (Kathrein), 1891, A., 964.
detection of thiosulphuric acid in (Presch), 1890, A., 812.
detection of tyrosine in (Blendermann), 1883, A., 879.
detection of urobilin in (Grimbert), 1889, A., 324.
detection of urochloralic acid in (Wagner), 1891, A., 624.
estimation of acetone in (Huppert), 1891, A., 370.
estimation of alkalis in (Lehmann), 1885, A., 609.
estimation of ammonia in (Wurster), 1888, A., 991.
estimation of chlorides in (Gruber), 1884, A., 1424; (Zuelzer), 1885, A., 608; (Arnold), 1885, A., 835; (Brignone), 1888, A., 990; (Corvi), 1891, A., 495.
of dogs, estimation of chlorides and chlorates in (v. Mering), 1884, A., 1423.
estimation of creatinine in (Salkowski), 1886, A., 397; (Moitessier), 1892, A., 1135.
estimation of gallic acid in (Mörner), 1892, A., 924.
estimation of hippuric acid in (Völker), 1887, A., 535, 1001.
estimation of homogentisic acid in (Baumann), 1892, A., 925.
estimation of hydroxy-acids in (Baumann), 1883, A., 885.
estimation of indican and its homologues in (Michailoff), 1888, A., 880.
estimation of iodine in (Baumann), 1884, A., 1423; (Harnack), 1885, A., 296; (Gründler), 1885, A., 413; (Jolles), 1891, A., 1288.

Urine, analysis of:—
- estimation of mercury in (Brasse), 1888, A., 196.
- estimation of nitrogen in (Petri and Lehmann), 1884, A., 1440; (Camerer), 1885, A., 303; 1888, A., 518; (Pflüger and Bohland), 1885, A., 608; (Bohland), 1885, A., 609; (Garnier), 1887, A., 863; (Oechsner de Coninck), 1889, A., 649.
- of Herbivora, estimation of nitrogen in (Weiske), 1886, A., 1072.
- estimation, quantitative, of oxalic acid in (Nickel), 1887, A., 401.
- estimation of phenols in (Baumann), 1883, A., 885; (Rumpf), 1892, A., 544.
- estimation of total phosphorus in (Chappelle), 1890, A., 825.
- estimation of phosphoric acid in (Guillaume-Gentil), 1891, A., 619.
- estimation of the potassium in, as hydrogen potassium tartrate (Robin), 1890, A., 187.
- estimation of albumin in (Záhoř), 1888, A., 1227; (Schaumann), 1889, A., 88; (Christensen), 1889, A., 452; (van Nüys and Lyons), 1890, A., 1199; (Venturoli), 1891, A., 627.
- estimation, optical, of albumin in (Ellinger), 1891, A., 1403.
- estimation, volumetric, of peptones in (Roux), 1892, A., 1264.
- estimation of proteids in (Ott), 1885, A., 451.
- estimation of sugar in (Worm-Müller), 1883, A., 829; (Pollatschek), 1888, A., 995; (Hagemann), 1889, A., 535; (Guttmann), 1890, A., 836; (Luther), 1891, A., 1559.
- estimation of dextrose in (Budde), 1888, A., 198; (Will), 1888, A., 535.
- estimation of dextrose in, by means of the Soleil-Ventzke polarimeter (Worm-Müller), 1885, A., 702.
- estimation of dextrose in, by means of the percentage glucosometer (Gerrard), 1890, A., 300.
- estimation, volumetric, of sulphuric acid in (Freund), 1892, A., 1377.
- estimation of sulphuric acid and ethereal hydrogen sulphates in (Salkowski), 1886, A., 739.
- estimation of urea in (Hugounenq), 1884, A., 122; (Greene), 1884, A., 507; (Hamburger), 1885, A., 450; (Gerrard; Luzzatto), 1885, A., 610; (Jacobj), 1886, A., 104; (Allen), 1886, A., 279; (Malerba), 1886, A., 583; (Green), 1886, A., 747; (Pflüger and Bohland), 1887, A., 90; (Méhu), 1887, A., 1001; (Campari), 1887, A., 1145; (Cazeneuve and Hugounenq), 1888, A., 328; (Camerer), 1888, A., 518; (Luther), 1889, A., 1039; (Pflüger and Bleibtreu), 1890, A., 308; (Dott), 1890, A., 931; (Miquel), 1891, A., 132; (Heaton and Vasey; Warden), 1891, A., 133; (Smith), 1891, A., 512; (Mörner and Sjöquist), 1891, A., 759, 1561.
- estimation of urea and total nitrogen excreted hourly in (Etard and Richet), 1883, A., 751; (Gley and Richet), 1888, A., 179.
- estimation of uric acid in (Ludwig), 1886, A., 102; (Haycraft), 1886, A., 748; 1891, A., 1297; (Blarez and Denigès), 1887, A., 621; (Czapek), 1888, A., 1225; (Gossage), 1889, A., 450; (Camerer), 1889, A., 1040; 1890, A., 1345; (Salkowski), 1889, A., 1250; (Pott), 1890, A., 304; (Bayrac), 1890, A., 670; (Groves), 1892, A., 546; (Geelmuyden), 1892, A., 1032; (Haig), 1892, A., 1133.
- estimation of urethane in (Jacquemin), 1888, A., 878.
- estimation of urobilin in (Hoppe-Seyler), 1891, A., 1278.
- separation of globulin from albumin in (Ott), 1887, A., 406.

Urns, ancient, analyses of (Jensch), 1887, A., 218.

Urobilin (Michailoff), 1885, A., 677
- peculiar modification of (Salkowski), 1888, A., 73.
- in the bile (Winter), 1890, A., 187.
- in various diseases (Hoppe-Seyler), 1891, A., 1278.
- febrile (MacMunn), 1884, A., 197.
- detection of, in urine (Grimbert), 1889, A., 324.
- estimation of, in urine (Hoppe-Seyler), 1891, A., 1278.
- See also Hydrobilirubin.

Urobilinoidin (Le Nobel), 1887, A., 1127.

Urochloralic acid, detection of, in urine (Wagner), 1891, A., 624.

Urochrome (Thudichum), 1888, A., 1119.

Uroerythrin (MacMunn), 1884, A., 198.

- **Urohæmatin,** Harley's (MacMunn), 1884, A., 197.
- **Urohæmatoporphyrin** (Garrod), 1892, A., 744.
  - and allied pigments (MacMunn), 1888, A., 614.
- **Uroleucic acid** (Kirk), 1888, A., 1121.
  - and alcaptonuria (Kirk), 1890, A., 188.
- **Uromelanin** (Plósz), 1884, A., 1060; (Thudichum), 1888, A., 1120.
- **Uropepsin** and **uroptyalin** (Bendersky), 1891, A., 483.
- **Uro-phosphates** (Gaube), 1891, A., 98.
- **Uropittin** and **metauropittin** (Thudichum), 1888, A., 1119.
- **Urorosein** (Nencki and Sieber), 1883, A., 101.
- **Urorubin** (Plósz), 1884, A., 1059; (Thudichum), 1888, A., 1119.
- **Urotheobromine** (Thudichum), 1888, A., 1120.
- **Urotrypsin** (Bendersky), 1891, A., 483.
- *Urtica urens, U. dioica* and *U pilulifera,* constituents of (Reuter), 1890, A., 545.
- **Urushi**(*lacquer*), chemistry of (Yōshida), 1883, T., 472.
  - diastatic matter of, and its action on urushic acid (Yōshida), 1883, T., 483.
- **Urushic acid** and its compounds (Yōshida), 1883, T., 475.
  - *di*nitro- (Yōshida), 1883, T., 480.
- **β-Urushic acid** (Yōshida), 1883, T., 480.
- **Urvölgyte.** See Herrengrundite.
- **Utahite** from New Mexico (Genth and Penfield), 1891, A., 274.
- **Uterus,** peptones in fibromata of the (Fischel), 1886, A., 167.
- **Uvic acid.** See Pyrotritaric acid.
- **Uvinone** (Dietrich and Paal), 1887, A., 658.
- **Uvinuric acid,** thio- (Steude), 1891, A., 742.
- **Uvitic acid,** thermochemistry of (Stohmann, Kleber and Langbein), 1889, A., 1096.
- *iso***Uvitic acid.** See *o*-Carboxyphenylacetic acid.
- **Uvitonic acid.** See 2-Methylpyridine-4:6-dicarboxylic acid.

V.

- *Vaccinium Vitis-Idæa* (*cowberry*), bitter principle of (Claassen), 1885, A., 1254.
- **Vacuum,** transportation of solids in, by the vapours of metals (Morse and White), 1892, A., 1386.
  - apparatus for operations in a (v. Klobukoff), 1886, A., 178.
- **Vacuum-discharges,** movement of gas in (Spottiswoode and Moulton), 1883, A., 5.
- **Valency** (Armstrong), 1888, A., 550.
  - and the carbon atom (Meyer and Riecke), 1888, A., 549.
  - atomic (Pickering), 1885, P., 122.
  - change of (Traube), 1886, A., 661.
  - lecture experiment for the demonstration of (Lepsius), 1888, A., 410; 1890, A., 1050.
  - of elements of the aluminium group (Nilson and Pettersson), 1888, T., 825.
- **Valeraldehyde,** condensation of, with ethylic acetoacetate (Matthews), 1883, T., 202.
  - action of glycol on (Lochert), 1888, A., 670.
  - condensation of, with pyrotartaric acid (Fittig and Feist), 1890, A., 591.
  - condensation of, with succinic acid (Fittig and Schneegans), 1890, A., 590.
  - action of zinc methyl on (Kuwschinoff), 1888, A., 125.
  - 5-amido- (Wolffenstein), 1892, A., 1484.
  - *di*bromo- (*dibromomethylethylacetaldehyde*) (Lieben and Zeisel), 1886, A., 783.
- *iso***Valeraldehyde,** polymeride of (Perkin), 1883, T., 86.
  - *tri*thio- (Barbaglia), 1885, A., 136; 1887, A., 462.
- **Valeraldehydeaniline** (v. Miller and Plöchl), 1892, A., 1193.
- *Valeriana officinalis, var. angustifolia* (Bertram and Gildemeister), 1891, A., 239.
- **Valerian,** camphol from (Haller), 1886, A., 1040.
  - extract, effect of, on the destruction of sugar in the blood (Butte), 1891, A., 754.
- *n*-**Valeric acid,** preparation of (Duclaux), 1887, A., 1028.
  - preparation of, from ethylic malonate (Fürth), 1888, A., 1053.
  - γ-amido- (Tafel), 1886, A., 1008; 1887, A., 463; 1889, A., 961.
  - δ-amido- (Schotten), 1888, A., 1105.
    - from the putrefaction of proteids (Gabriel and Aschan), 1891, A. 948.

n-**Valeric acid,** δ-amido-, synthesis of (Gabriel), 1890, A., 1129.
  γ-*mono*- and βγ-*di*-bromo- (Fittig and Fränkel), 1890, A., 585.
  γδ-*di*bromo- (*dibromallylacetic acid*) (Ott), 1891, A., 1453.
    decomposition of (Fittig and Urban), 1892, A., 960.
  γ-cyano- (Wislicenus), 1886, A., 880.
  α-oxime of (Fürth), 1884, A., 42.
  γ-oxime of, and its salts (Müller), 1883, A., 1129; (Rischbieth), 1888, A., 44.
  γδ-*di*oxime of (Wolff), 1891, A., 417.
Valeric acid (*methylethylacetic acid*), zinc salt of (Schmidt), 1886, A., 867.
  silver and calcium salts of, solubility of (Sedlitzky), 1888, A., 250.
Valeric acid (*trimethylacetic acid*), action of bromine on (Reformatsky), 1890, A., 1096.
  solubility of salts of (Stiassny), 1892, A., 581.
*iso***Valeric acid** (*isopropylacetic acid*), vapour pressures of (Richardson), 1886, T., 767, 774, 776.
  action of nitric acid on (Bredt), 1883, A., 176.
  silver and calcium salts of, solubility of (Sedlitzky), 1888, A., 250.
  β-amido- and β-nitro- (Bredt), 1883, A., 176.
  α-bromo- (Volhard), 1888, A., 129; (Schleicher), 1892, A., 427.
  sulpho- (de Varda), 1889, A., 35.
Valeric anhydride, γ-amido- (Tafel), 1889, A., 961.
*iso***Valeric-creatinine** (Duvillier), 1883, A., 221.
*iso***Valeridenetoluidine** (v. Miller and Plöchl), 1892, A., 1194.
Valero-betaine, derivatives of (Körner and Menozzi), 1884, A., 425.
*iso***Valerodiacetonamine** (Antrick), 1885, A., 502.
Valeroin (Klinger and Schmitz), 1891, A., 891.
Valerolactone in pyroligneous acid (Grodzki), 1884, A., 1118.
  hydrolysis of (Henry), 1892, A., 1303.
  action of phenylhydrazine on (Wislicenus), 1887, A., 490.
  action of sodium ethoxide on (Fittig), 1890, A., 867.
  action of water, hydriodic acid and sodium ethylate on (Fittig and Rühlmann), 1885, A., 375.
Valerolactone, bromo- (Fittig and Urban), 1892, A., 960.
Valerolactone, *di*bromo-, and chloro- (Wolff), 1885, A., 1124.
  γ-cyano- (Block and Tollens), 1886, A., 533.
Valero-β-naphthalide (Bamberger and Müller), 1888, A., 713.
Valerophenylhydrazide (Autenrieth), 1888, A., 251.
*iso***Valero-quinhydrone** and **-quinol** (Klinger and Standke), 1891, A., 900.
γ-**Valeroximidolactone** (Rischbieth), 1888, A., 44; (Bredt and Boeddinghaus), 1889, A., 1061.
*iso***Valeryl-*d*-ecgonine** (Einhorn and Klein), 1889, A., 283; (Deckers and Einhorn), 1891, A., 476.
Valerylene, Reboul's. See Dimethylallylene.
Vanadic acid and **vanadates.** See under Vanadium.
Vanadic anhydride. See Vanadium *pent*oxide.
Vanadicovanadates (Gibbs), 1886, A., 205.
Vanadinite (Genth), 1888, A., 564.
  from Arizona (Blake), 1885, A., 489.
  crystallised, from Arizona and New Mexico (Penfield), 1887, A., 347.
  from New Mexico (Genth and vom Rath), 1886, A., 26.
  from Leadhills (Collie), 1889, T., 94.
Vanadinites, bromo- (Ditte), 1883, A., 783.
Vanadious sulphate. See under Vanadium.
Vanadium in the Leadville ores (Iles), 1883, A., 562.
  in potassium hydroxide (Smith), 1890, A., 706.
  diffusion of, in the mineral and vegetable kingdoms (Ricciardi), 1884, A., 159.
  extraction of, from iron ores (Claassen), 1886, A., 428; 1887, A., 449.
  compounds (Brierley), 1885, P., 114; 1886, T., 30; (Claassen), 1886, A., 428.
  fluorine compounds of (Piccini and Giorgis), 1889, A., 214; 1892, A., 785; (Petersen), 1889, A., 107, 1123; 1890, A., 15; 1891, A., 884.
Vanadium arsenate (Friedheim and Schmitz-Dumont), 1890, A., 1380.
  *tri*oxide, compound of, with sulphur (Brierley), 1886, T., 822; P., 230.
  *pent*oxide (*vanadic anhydride*) (Ditte), 1886, A., 18.
    preparation of (Petersen), 1890, A., 16.

Vanadium *pent*oxide (*vanadic anhydride*), action of, on alkaline fluorides (DITTE), 1888, A., 114, 558.
action of, on ammonium salts (DITTE), 1886, A., 672.
action of hydracids on (DITTE), 1886, A., 772.
action of, on haloid salts of the alkalis (DITTE), 1886, A., 855.
action of hydrogen *per*oxide on (CAMMERER), 1892, A., 944.
action of reducing agents on (DITTE), 1886, A., 307.
influence of, on potassium chlorate (FOWLER and GRANT), 1890, T., 276.
colour reactions of (LÉVY), 1887, A., 305.
combinations of, with oxy-acids (DITTE), 1886, A., 599.
sulphur-derivatives of (KRÜSS), 1884, A., 1269; (MÜNZING), 1890, A., 336.
Vanadates (CARNOT), 1887, A., 1018; (RADAU), 1889, A., 351.
from the Argentine Republic (DÖRING), 1885, A., 641.
from New Mexico (GENTH and VOM RATH), 1886, A., 26.
arsenates and phosphates, analogous (HALL), 1886, P., 259; 1887, T., 94.
alkali, preparation of (RAMMELSBERG), 1884, A., 395; (DITTE), 1887, A., 639, 705, 899.
metallic (MANASSE), 1887, A., 339; (DITTE), 1887, A., 898.
of the fatty amines, some (BAILEY), 1884, T., 690.
crystallised, production of, in the dry way (DITTE), 1883, A., 784.
fluoro- (DITTE), 1885, A., 225.
organic (HALL), 1887, T., 751.
thio- (KRÜSS and OHNMAIS), 1890, A., 1381; 1891, A., 989.
Vanadious sulphate, electrolytic preparation of (BRIERLEY), 1886, T., 822; P., 230.
Vanadyl chloride, preparation of (L'HÔTE), 1886, A., 204.
Vanadium, detection and **estimation**:—
detection of (WITZ and OSMOND), 1886, A., 923.
detection of, in minerals (L'HÔTE), 1887, A., 690.
estimation of (WITZ and OSMOND), 1886, A., 923; (DITTE), 1887, A., 691; (CARNOT), 1887, A., 896; (HOLVERSCHEIT), 1890, A., 1343.
Vanadium, estimation:—
estimation of, in the presence of aluminium, chromium and phosphorus (RIDSDALE), 1888, A., 628.
estimation of, in minerals (L'HÔTE), 1887, A., 690.
estimation of, in vanadotungstates (ROSENHEIM), 1891, A., 247.
separation of, from metals (HALBERSTADT), 1883, A., 513.
separation of, from phosphoric acid (HOLVERSCHEIT), 1890, A., 1343.
separation of, from tungstic acid (FRIEDHEIM), 1890, A., 666.
Vanadoarsenates (FRIEDHEIM and SCHMITZ-DUMONT), 1890, A., 1380.
Vanadomolybdates (GIBBS), 1884, A., 561; (FRIEDHEIM), 1891, A., 884.
Vanadotungstic acid and its salts (ROSENHEIM), 1889, A., 762.
Vanadotungstates (GIBBS), 1884, A., 562; (FRIEDHEIM), 1890, A., 1066; (ROTHENBACH), 1891, A., 18.
estimation of vanadic acid in (ROSENHEIM), 1891, A., 247.
Vanadovanadico-molybdates and **-tungstates** (GIBBS), 1884, A., 714.
Vanillenylamidoxime (MARCUS), 1892, A., 318.
Vanillin in asafœtida (SCHMIDT), 1886, A., 906.
in asparagus (V. LIPPMANN), 1886, A., 387.
in the seeds of *Lupinus albus* (CAMPANI and GRIMALDI), 1888, A., 983.
from *Rosa canina* (SCHNEEGANS), 1890, A., 1270.
preparation of (HAARMANN and REIMER), 1884, A., 1343.
preparation of, from *m*-chloro-*p*-nitrobenzaldehyde (LANDSBERG), 1887, A., 483.
preparation of, from the gum of the olive tree (SCHEIDEL), 1886, A., 238.
synthesis of (ULRICH), 1886, A., 60.
condensation product of dimethylaniline and (FISCHER and SCHMIDT), 1884, A., 1316.
phenylhydrazine-derivatives of (TIEMANN and KEES), 1885, A., 1072.
compounds of, with pyrogallol and with phloroglucinol (ETTI), 1883, A., 61.
*iso***Vanillin** (WEGSCHEIDER), 1883, A., 190.
Vanillinaldoxime (LACH), 1883, A., 1104; (TIEMANN and KEES), 1885, A., 1073.

- **Vanillinoxyacetic acid** (Elkan), 1887, A., 259.

Water of crystallisation (Salzer), 1884, A., 584, 806; 1892, A., 581; (Pickering), 1886, T., 280, 411; P., 163; (Nicol), 1886, T., 690; P., 220; A., 972; (Perkin), 1886, T., 788; (Schneider), 1890, A., 1209.
  dissociation and constitution of salts containing (Müller-Erzbach), 1884, A., 952; 1886, A., 10; 1887, A., 207; 1890, A., 206.
  measure of the chemical attraction of, derived from the vapour pressures (Müller-Erzbach), 1887, A., 436.
  influence of, on the electrical conductivity of salt solutions (Trötsch), 1891, A., 141.
  of dissolved cobalt salts (Kallir), 1888, A., 23.
  of alums (Juttke), 1888, A., 112.
  of morphine (Hesse), 1889, A., 417.
  amount of, in certain salts (Schulze), 1887, A., 766.
  estimation of, in organic compounds (Ostermayer), 1886, A., 96.
Natural Water :—
Rain Water, composition of (Lévy), 1889, A., 299.
  ammonia in (Houzeau), 1883, A., 753; 1884, A., 104; (Marcano and Müntz; Lévy), 1892, A., 381; (Müntz), 1892, A., 909.
  at Cirencester, amount of chlorine in (Kinch), 1886, P., 258; 1887, T., 92.
Natural Water :—
Rain Water at Rothamsted, chlorine, sulphuric anhydride and ammonia in (Warington), 1887, T., 501.
  of tropical districts, nitrates in the (Müntz and Marcano), 1889, A., 923.
  at Rothamsted, amount of nitric acid in (Warington), 1889, T., 537; P., 102.
  nitrogen compounds in (Berthelot and André), 1886, A., 737.
  salt in (Belluci), 1889, A., 299.
  analysis of (Warington), 1889, T., 543; P., 102.
  See also Agricultural Chemistry.
River Water, turbid, clarification of (Lueger), 1885, A., 198.
  destruction and formation of nitrates in (Munro), 1886, T., 632, 656, 664; P., 218.
  diffusion of, into sea-water (Thoulet), 1891, A., 970.
  of the Danube above Vienna in the year 1878, chemical composition of (Wolfbauer), 1884, A., 122.
  of La Plata rivers (Schoelter), 1887, A., 786.
  of the Nile, fertilising properties of (Müntz), 1888, A., 1261; 1889, A., 646.
  of some black equatorial rivers (Müntz and Marcano), 1889, A., 226.
Lake Water of Aiguebelette, Paladru, Nantua and Sylans (Duparc and Delebecque), 1892, A., 1061.
  of some American alkali lakes (Chatard), 1889, A., 29.
  of a saline lake near the Stolüpin mineral springs (Bulitsch), 1887, A., 648.
Spring and **Mineral Water**, destruction and formation of nitrates in (Munro), 1886, T., 632, 658, 664; P., 218.
  decrease of dissolved oxygen in, and a simple method for taking samples in deep borings (Lepsius), 1885, A., 1266.
  of Acquarossa (Bertoni), 1885, A., 494.
  of the Admirals-gartenbad, Berlin (Fresenius), 1889, A., 27.
  from springs in Aegina and Andros (Dambergis), 1887, A., 23.
  from Aruba (de Loos), 1884, A., 978.
  of Bagnères de Luchon, Haute Garonne (Willm), 1886, A., 997.
  of Barèges, arsenic in (Schlagdenhauffen), 1883, A., 302.

Natural Water:—

Spring and **Mineral Water** of Borhegyer, composition of (Balló), 1884, A., 978.

from Artesian wells near Brussels (Klement), 1888, A., 239.

at Brucourt, analysis of (Cloëz), 1884, A., 895.

deposit from a spring at Carmaux (Meunier), 1885, A., 644.

deposit from a spring at Chabetout (Thabuis), 1886, A., 215.

from collieries, composition of (Arche and Hassack), 1884, A., 782; (Bedson), 1888, A., 354.

from the Roundwood Colliery (Cleeves and Platts), 1890, A., 220.

of Contrexeville and Schinznach, Switzerland, lithium, strontium and boric acid in (Dieulafait), 1883, A., 301.

of Cransac (Carnot), 1890, A., 1385.

from the spring "Römerbrunnen," at Echzell, Wetterau (Pistor), 1885, A., 362.

from the springs of Edepsos (Dambergis), 1892, A., 418.

of Eilsen (Fresenius), 1892, A., 796.

from hot springs in Ferguson Island (Liversidge), 1891, A., 280.

from hot springs at Finca Huracato, Salta, Argentine Republic (Canzoneri), 1892, A., 574.

from Flitwick (Johnstone), 1887, A., 1087.

from the springs at Freyersbach, composition of (Birnbaum), 1884, A., 1274.

from hot springs of Hammam el Lif, Tunis (Barillé), 1886, A., 322.

from hot springs of Hammam Salahine (Girard), 1886, A., 996.

from hot springs of Leuk (Lunge and Schmidt), 1886, A., 996.

from the brine spring at Lautenthal (Lattermann), 1891, A., 652.

from Java (Meunier), 1887, A., 224.

of Malaisie (Meunier), 1890, A., 1081.

from springs in the peninsula of Menthana (Dembergis), 1888, A., 238.

of Monte de Malo (Spica), 1892, A., 1287.

at Montroud, Loire (Terreil), 1883, A., 1071.

accompanying petroleum and those ejected by mud volcanoes (Potilizin), 1883, A., 171.

Natural Water:—

Spring and **Mineral Water**, sulphuretted, of Olette, Pyrénées orientales (Willm), 1887, A., 710.

of the Orchard Alum Spring (Thresh), 1883, A., 171.

of the Ottili Spring, Suhl, Thuringia (Reichardt), 1889, A., 1054.

from the spring at Oued Ref (de Lesseps), 1887, A., 455.

from a hot spring in the Island of Pantellaria (Brignone), 1884, A., 1105.

of Penon de los Banos, Mexico (L'Hôte), 1891, A., 279.

subterranean, near Port-Vendres (Essner), 1892, A., 285.

chalybeate, of Raffanelo (Maugini), 1888, A., 1261.

from a spring at Rindö, near Stockholm (Cronquist), 1883, A., 449.

from Roncegno (Gläser and Kalmann), 1888, A., 796; 1889, A., 28.

of St. Nectaire, Puy-de-Dôme (Boutet), 1886, A., 858.

of Salies-dn-Salat (Sabatier), 1885, A., 231.

from a spring at Salzbrunn, analysis of (Poleck), 1883, A., 563.

at Selafani (Paternò), 1892, A., 25.

from Servia (Losanitch), 1887, A., 648.

from Shotley Bridge Spa (Peile), 1888, A., 569.

of the brine spring at Stoke Prior, Worcestershire (Griffiths), 1884, A., 165.

from the Tönnissteiner Spring (Lepsius), 1888, A., 435.

from an Artesian well in the Tunisian Chotts (de Lesseps), 1887, A., 455.

from Uriage, Isère, composition of (Peligot), 1886, A., 37.

of Warmbrunn, Silesia (Poleck), 1886, A., 997.

from springs at Wiesbaden (R. Fresenius), 1887, A., 352; 1888, A., 928; (H. Fresenius), 1887, A., 647.

of Woodhall Spa (Wright and (Burton), 1884, T., 168; (Wanklyn), 1887, A., 221.

of the Yellowstone National Park (Leffmann), 1884, A., 30; (Hague), 1888, A., 122; (Gooch and Whitfield), 1889, A., 682.

from the Red Spring at Zacaune, Tarn, France (Soubeiran and Massol), 1885, A., 232.

Natural Water :—
Spring and **Mineral Water** from the wells of Zemzem (van Romburgh), 1887, A., 455.
  preservation of (Parmentier), 1892, A., 1162.
  aluminium in (Parmentier), 1892, A., 1287.
  arsenic in (Lefort), 1885, A., 232.
  containing calcium sulphate, origin of arsenic and lithium in (Schlagdenhauffen), 1883, A., 302.
  chalybeate, alteration of (Riban), 1892, A., 1288; (Parmentier), 1892, A., 1289.
    containing free sulphuric acid (Willm), 1891, A., 1440.
  manganiferous spring (Mason), 1890, A., 854.
  phosphatic (Bourgoin and Chastaing), 1888, A., 354.
  sulphurous (Vitali), 1891, A., 116.
  estimation of arsenic and boric acids in (Fresenius), 1886, A., 649.
  estimation of carbonic anhydride in (Borchers), 1888, A., 533; (Bretet), 1891, A., 862.
  estimation of lithium in (Carnot), 1888, A., 1342; (Waller), 1891, A., 1292.
Sea Water from the Arctic Ocean (Thoulet), 1892, A., 1287.
  composing the Clyde sea area, chemical composition of (Dickie), 1888, A., 569; 1889, A., 359.
  of the Firth of Forth, salinity of (Mill), 1886, A., 322.
  of the North Sea on the coasts of Holland (Roozeboom), 1892, A., 419.
  chemistry of (Hamberg), 1886, A., 322, 679.
  solid and gaseous constituents of (Tornöe and Schmelck), 1884, A., 31.
  physical properties of (Pettersson), 1884, A., 889.
  specific heat of, of different densities (Thoulet and Chevallier), 1889, A., 666.
  action of, on cast iron (Draper), 1888, A., 421.
  diffusion of fresh water into (Thoulet), 1891, A., 970.
  solubility of calcium carbonate in (Irvine and Young), 1889, A., 344; (Anderson), 1890, A., 450.
  solubility of minerals in (Thoulet), 1889, A., 682.
  solubility of some substances in (Thoulet), 1890, A., 719.

Natural Water :—
Sea Water, manganese in, and in certain marine deposits (Dieulafait), 1883, A., 725.
  influence of the salts of, on fresh water animals (Bert; de Varigny), 1884, A., 620; (Plateau), 1884, A., 621.
  estimation of bromine in (Berglund), 1886, A., 134; (Gutzkow), 1889, A., 74.
Potable or **Drinking Water** supplies (Reichardt), 1885, A., 612.
  of Moscow, composition of (Grigorieff), 1883, A., 622.
  of Rangoon (Romanis), 1883, A., 128.
  at Royat, Puy-de-Dôme (Boutet), 1886, A., 859.
  of Oderzo (Spica and Halagian), 1888, A., 35.
  natural purification of (Emich), 1885, A., 846.
  self-purification of peaty (Hartley), 1884, A., 781.
  purification of, by alum (Austen and Wilber), 1885, A., 936.
  purification of, by irrigation (König and Böhmer), 1886, A., 287.
  purification of, by soda and lime (Binder), 1888, A., 758.
  influence of filters on (Snijders), 1888, A., 866.
  action of, on lead pipes (Allen), 1883, A., 128; (Reichardt), 1888, A., 344, 554; (Carnelley and Frew), 1888, A., 555.
  action of, on zinc, and effects of drinking water contaminated with zinc (Stevenson), 1884, A., 878.
  zinc in (Heaton), 1884, A., 697; (Venable), 1885, A., 453.
  copper precipitate formed in (Grimbert and Barré), 1890, A., 851.
  ammonia, nitrous and nitric acids in (Greinert), 1885, A., 297; (Enklaar), 1889, A., 1234.
  alleged formation of nitric and nitrous acid in the evaporation of (Baumann), 1889, A., 183.
  nitrates in (Bréal), 1888, A., 384.
  a reducing agent in (Ramsay), 1886, P., 225.
  micro-organisms in (Leone), 1886, A., 286.
    removal of, from (Frankland), 1886, A., 573.
Water analysis :—
  examination of (Tichborne), 1883, A., 382; (anon.), 1883, A., 883; 1887, A., 1141; 1890, A., 196;

Water analysis :—
(Bachmeyer), 1884, A., 1431; (Smith), 1885, A., 86; (Gunning), 1885, A., 841; (Binder), 1888, A., 197; (Vignon), 1890, A., 667.
colour standard for (Hagen), 1892, A., 1527.
ammonia process for (Marsh), 1883, A., 514; (Darton), 1884, A., 696.
for technical purposes (Allen), 1890, A., 298.
by rapid method prior to its softening for technical purposes (Vignon), 1889, A., 1035.
for contamination by gas works (Dickmann), 1891, A., 117.
loss on ignition in (Drown), 1889, A., 551.
influence of temperature on Griess' reaction for nitrites in (Bosio), 1892, A., 657.
for sanitary purposes, with remarks on disinfection (Hitchcock), 1883, A., 514.
for organisms (Maggi), 1884, A., 369; (Carpenter and Nicholson), 1885, A., 442; (Warden), 1885, A., 1266; (Folkard), 1887, A., 619.
detection of organic matter by Heisch's method (Lott), 1888, A., 533.
microscopic, for organic impurities (Brautlecht), 1884, A., 221.
permanganate test for organic matter in (Stapleton), 1883, A., 516; (McCay), 1883, A., 829; (Petit), 1885, A., 841; (Dupré), 1886, A., 581.
detection of traces of copper in (Thoms), 1891, A., 620.
detection of organic matter in, application of diazo-compounds to the (Griess), 1888, A., 993.
detection of nitrates in (Binder), 1888, A., 197.
detection of thiosulphates in (Neuhöffer), 1886, A., 99.
estimation of the hardness of (v. Cochenhausen), 1888, A., 874; (Waller), 1890, A., 86; (Neugebauer), 1891, A., 116; (Lepierre), 1891, A., 1554.
estimation of the hardness of, preparation of a volumetric solution for (Tichborne), 1883, A., 516.
estimation of the hardness of, by Clark's soap test (Nelson), 1890, A., 198; (Teed), 1890, A., 421.
estimation of the hardness of, by standard soap solution (Garnier), 1884, A., 1072; (Ellis), 1886, A., 1076.

Water analysis :—
estimation of alkalis in (Muck), 1890, A., 299.
estimation of ammonia in (Tichborne), 1883, A., 382; (Gore), 1885, A., 194.
estimation of carbon in the organic constituents of (Herzfeld), 1887, A., 184; (Burghardt), 1887, A., 619.
estimation of dissolved carbonic anhydride in (Vignon), 1888, A., 325.
containing magnesium, estimation of carbonic anhydride in (Trillich), 1890, A., 197.
estimation of chlorine in (Hazen), 1890, A., 86.
estimation of formic acid in (Klein), 1887, A., 100.
estimation, volumetric, of gases dissolved in (Pettersson), 1889, A., 1034.
estimation of iron in (Bell), 1890, A., 419.
estimation of nitric acid in (Mayrhofer), 1885, A., 691; (Harvey), 1887, A., 184; (Spiegel), 1887, A., 691; 1889, A., 438; (Hooker), 1889, A., 312; (Ormandy and Cohen), 1890, T., 811; P., 139; (Rideal), 1890, A., 831; (Johnson), 1890, A., 832; (Harrow), 1891, T., 320; P., 67; (Rosenfeld), 1891, A., 496; (Hazen and Clark), 1892, A., 243.
estimation of nitrous acid in (Zambelli), 1887, A., 533; (Ormandy and Cohen), 1890, T., 811; P., 139; (Rosenfeld), 1891, A., 496.
estimation of nitrogen in, by the Kjeldahl process (Leffmann and Beam), 1889, A., 786; (Drown and Martin), 1889, A., 1035.
estimation of organic nitrogen in (Burghardt), 1887, A., 619.
estimation of organic matter in (Mallet), 1883, A., 1171; (Leeds), 1884, A., 369, 499; (Petit), 1885, A., 841; (Köbrich), 1887, A., 533; (Klein), 1887, A., 1000; (Young), 1892, A., 921.
estimation, direct, of oxygen and nitrogen in (Lalieu), 1889, A., 551.
estimation of dissolved oxygen in (Dupré), 1886, A., 579; (Roscoe and Lunt), 1889, T., 552; P., 124; (Winkler), 1889, A., 79; (Thresh), 1890, T., 185; P., 1; (Linossier), 1891, A., 616; (Adams), 1892, T., 310; P., 1; (Kisch), 1892, A., 98.

Water analysis :—
  estimation of free oxygen in (WILLIAMS and RAMSAY), 1886, T., 751; P., 223; (BLAREZ), 1888, A., 874; (LALIEU), 1888, A., 1344; (MÜLLER), 1890, A., 412.
  estimation of phosphoric acid in (PHIPSON), 1888, A., 533.
  estimation of dissolved substances in (HAZEN), 1892, A., 920.
  estimation of sulphuric acid in (FRICKE), 1887, A., 862.
  estimation of suspended matter in (MARCHAND), 1884, A., 117.
Water. See also Agricultural Chemistry, Ice and Steam.
Water-baths, draught arrangement for (WINKLER), 1889, A., 437.
Water-gas. See Gas.
Waterproof materials, preparation of (ANON.), 1884, A., 379.
Waterproof paint for stones, etc. (ANON.), 1883, A., 760.
Wavellite of Ouro Preto, Brazil (GORCEIX), 1885, A., 31.
Wax, specific gravity and other properties of (ALLEN), 1887, A., 186.
  complete chlorination of (HARTMANN), 1891, A., 812.
  bees' (ZATZEK), 1883, A., 39.
    bleaching of (A. and P. BUISINE), 1891, A., 625.
    acids contained in (NAFZGER), 1884, A., 1297.
    non-acid constituents of (SCHWALB), 1885, A., 962; 1887, A., 124.
    analysis of (v. HÜBL), 1884, A., 506; (HEHNER), 1884, A., 779; (A. and P. BUISINE), 1891, A., 131; 1892, A., 251; (MANGOLD), 1892, A., 1034.
    assay of, for vegetable wax (RÖTTGER), 1892, A., 551.
    detection of ceresin, ozokerite and paraffin in (HAGER), 1890, A., 421.
    detection of paraffin in (HAGER), 1891, A., 122.
    detection of resin in (RÖTTGER), 1892, A., 923.
  carnaüba, chemical composition of (STÜRCKE), 1884, A., 1280.
  from cochineal (LIEBERMANN), 1885, A., 1045; 1886, A., 441; (RAIMANN), 1886, A., 441.
  Japanese, specific gravity of (KLEINSTÜCK), 1892, A., 428.
  mineral (DOLLFUS and MEUNIER), 1888, A., 115.
    See also Ozokerite.
Wax, vegetable, assay of beeswax for (RÖTTGER), 1892, A., 551.
  white, composition of (A. and P. BUISINE), 1891, A., 625.
    analysis of (BUCHNER), 1892, A., 665.
  analysis of (BUCHNER), 1889, A., 322; (RÖTTGER), 1890, A., 429.
  See also Oils, fatty and fixed.
Weatherproof wall paintings, process for preparing (ANON.), 1883, A., 942.
Wehrlite (SIPÖCZ), 1886, A., 312.
Weighing, rapid, modified balance for (COLLOT), 1892, A., 270.
Weight of a body, method of correcting, for the buoyancy of the atmosphere when the volume is unknown (COOKE), 1884, A., 13.
  of drops and their relation to the constants of capillarity and the capillary meniscus angle (TRAUBE), 1887, A., 210.
Weight, molecular, relation of, to capillary phenomena and constitution (TRAUBE), 1885, A., 116.
  diathermanous power, refractive index and density of a substance, relation between (AYMONNET), 1892, A., 1.
  of certain atoms or groups, dependence of substitution phenomena on (KEHRMANN), 1890, A., 484.
  principle of determining (NERNST), 1890, A., 1368.
  determination of, at the critical point (GUYE), 1891, A., 1411.
  determination of, from the rise of boiling point (BECKMANN), 1889, A., 933; 1891, A., 389, 1317; (WILEY), 1890, A., 104; (SAKURAI), 1892, T., 989; P., 151.
  determination of, by Raoult's method (RAOULT), 1886, A., 197; (PATERNÒ and NASINI), 1886, A., 970; 1890, A., 725; (MEYER), 1888, A., 407; (AUWERS), 1888, A., 408; (HOLLEMAN), 1888, A., 552; (AUWERS and MEYER), 1888, A., 646; (HENTSCHEL), 1888, A., 1143; (BECKMANN), 1889, A., 11; (MELDOLA and STREATFEILD), 1889, A., 1105; 1890, T., 804; (EIJKMAN), 1890, A., 324; (NERNST), 1891, A., 389.
  use of Raoult's method for determining, to distinguish between isomerism and polymerism (ANSCHÜTZ), 1889, A., 754.
  direct comparison of the physical constants involved in the determination of, by Raoult's method (ADIE), 1891, P., 26.

Weight, molecular, determination of, from osmotic pressure (LADENBURG), 1889, A., 820.
  determination of, from the reduction of vapour pressure (BECKMANN), 1890, A., 323.
  of liquids as evinced by their boiling points (VERNON), 1892, A., 107.
  specific gravity of a liquid a function of its (RICHARDSON), 1891, A., 780.
  and rate of evaporation of liquids, relation between (SCHALL), 1884, A., 551, 950; 1885, A., 112; (SCHALL and KOSSAKOWSKY), 1891, A., 1317.
  of liquids and solids (PICKERING), 1886, A., 198.
  of solid substances (VAN'T HOFF), 1890, A., 1044.
  of substances, determination of, from the boiling points of their solutions (WILEY), 1890, A., 104.
  of substances in solution, especially colloids (ARMSTRONG), 1889, P., 109.
  of hydrogen peroxide (TAMMANN), 1890, A., 106.
  of iodine and bromine in solution (LOEB), 1888, T., 805; P., 87; (PATERNÒ and NASINI), 1888, A., 1027; (BECKMANN), 1890, A., 447; (HERTZ), 1891, A., 260.
  of nitrous anhydride (RAMSAY), 1890, T., 595; P., 7.
  of nitric *per*oxide and nitrogen *tri*oxide (RAMSAY), 1888, T., 621; P., 59.
  of phosphorous oxide (THORPE and TUTTON), 1890, T., 551.
  of phosphorus in solution (PATERNÒ and NASINI), 1888, A., 1027; (BECKMANN), 1890, A., 447; (HERTZ), 1891, A., 260.
  of sulphur (PATERNÒ and NASINI), 1888, A., 1027; (BILTZ), 1888, A., 1027; 1889, A., 340; (BECKMANN), 1890, A., 447; (HERTZ), 1891, A., 260.
  of sulphur *di*chloride (COSTA), 1891, A., 149.
  of metals (RAMSAY), 1889, T., 521; P., 39; (V. TÜRIN), 1890, A., 1046; (MEYER), 1891, A., 984.
  of metals in solution (HEYCOCK and NEVILLE), 1890, T., 376, 656; P., 38, 158.
  of aluminium compounds (ROUX and LOUÏSE), 1889, A., 757.
  of volatile chlorides, method of estimating (BILTZ), 1888, A., 1241.

Weight, molecular, of basic ferric sulphate (PICKERING), 1883, T., 182.
  of metaphosphates (JAWEIN), 1889, A., 674.
  of water (THOMSEN), 1885, A., 870.
  of organic compounds, determinations of, by Raoult's method (PATERNÒ and NASINI), 1886, A., 970; 1890, A., 725.
  of polymeric compounds, determination of, by Raoult's method (MELDOLA and STREATFEILD), 1889, A., 1105.
  of acids of the oleic series (SCHULZ), 1889, A., 1140; (ŠULC), 1890, A., 737.
  of citraconic, itaconic and mesaconic acids (PATERNÒ and NASINI), 1888, A., 1059.
  of fumaric and maleic acids (PATERNÒ and NASINI), 1888, A., 1059.
  of gallic and tannic acids (SABANÉEFF), 1891, A., 145.
  of glycocine and its anhydride (CURTIUS and SCHULZ), 1891, A., 38.
  of methylic diacetylracemate (ANSCHÜTZ), 1888, A., 1273.
  of pentic acid (MOSCHELES and CORNELIUS), 1889, A., 489.
  and atomicity of fatty alcohols, method for the determination of (HELL), 1884, A., 1433.
  of paraldol (MAGNANINI), 1890, A., 862.
  of formaldehyde (TOLLENS and MAYER), 1888, A., 809.
  of paraformaldehyde (TOLLENS and MAYER), 1889, A., 369.
  of free alkaloids (CHRISTENSEN), 1892, A., 666.
  of the amines (DEWAR and SCOTT), 1884, A., 257.
  of amphiphenacylnitrile (*isoindole*) (TREADWELL and MEYER), 1883, A., 665.
  of caoutchouc (GLADSTONE and HIBBERT), 1889, A., 1207.
  of amylodextrin (BROWN and MORRIS), 1889, T., 455; P., 95, 96.
  of arabinose (BROWN and MORRIS), 1888, T., 619; (TOLLENS, MAYER and WHEELER), 1889, A., 367.
  of dextrose (BROWN and MORRIS), 1888, T., 614; (TOLLENS, MAYER and WHEELER), 1889, A., 367.
  of formose (V. KLOBUKOFF), 1890, A., 465.
  of maltose (BROWN and MORRIS), 1888, T., 617; (EKSTRAND and MAUZELIUS), 1890, A., 227.

Weight, molecular, of methose (v. Klobukoff), 1890, A., 466.

of raffinose (Brown and Morris), 1888, T., 619; (de Vries), 1888, A., 667; (Tollens and Mayer), 1888, A., 809.

of xylose (Tollens, Mayer and Wheeler), 1889, A., 367.

of inulin-like substances (Ekstrand and Mauzelius), 1890, A., 227.

of ζ-invertan (O'Sullivan and Tompson), 1890, T., 911.

of solid *α-di*chloropropionitrile (Otto), 1890, A., 726.

of some colloids (Armstrong), 1889, P., 109; (Gladstone and Hibbert), 1889, A., 1207; (Paternò and Nasini), 1890, A., 725; (Sabanéeff), 1890, A., 1215; 1891, A., 145.

of desaurins (Meyer), 1890, A., 1144.

of diazo-compounds (Goldschmidt), 1891, A., 193.

of 3:6-diphenylpyrazine (Treadwell and Meyer), 1883, A., 665.

of hexamethyleneamine (Tollens and Mayer), 1888, A., 809.

of *iso*indole (*amphiphenacylnitrile*) (Treadwell and Meyer), 1883, A., 665.

of nitrosoindole (Zatti and Ferratini), 1892, A., 67.

of oximes (Beckmann), 1888, A., 409, 646; (Auwers and Meyer), 1888, A., 646.

of pyrroline-derivatives (Magnanini), 1890, A., 906.

of the imidoanhydrides of pyrrolinecarboxylic and indolecarboxylic acids (Magnanini), 1890, A., 67.

of quercetin (Herzig), 1888, A., 1309.

of peptones (Ciamician and Zanetti), 1892, A., 1501.

of cholic acid, cholesterin and hydrobilirubin (Abel), 1890, A., 914.

of hæmatoporphyrin and bilirubin (Nencki and Rotschy), 1890, A., 76.

Weight, specific, of mixtures of sulphurous and carbonic anhydrides (Blümcke), 1888, A., 775; (Pictet), 1888, A., 1015.

Weldon mud. See Manganese.

Well waters. See Water.

Wernerite. See Scapolite.

Whale, bottle-nosed, milk of (Frankland and Hambly), 1890, A., 812.

Wheat. See Agricultural Chemistry.

White garnet. See Leucite.

White lead. See Lead carbonate, basic.

White metal, polychrome varnish for (Puscher), 1883, A., 896.

White precipitate. See Mercuric ammonium chloride.

Willemite from Greenland (Lorenzen), 1886, A., 519.

from New Jersey (Clarke), 1892, A., 1411.

artificial production of (Gorgeu), 1887, A., 345.

See also Zinc silicate.

Wiluite (Prendel), 1890, A., 220.

Wine, chemistry of (anon.), 1884, A., 131; (Kayser), 1884, A., 1445.

abnormal fermentation under unfavourable circumstances and its influence on the composition of (Barth), 1885, A., 942.

inferior, improvement of, by addition of the marc of superior grapes (Nessler), 1884, A., 938.

statistics of Germany (anon.), 1890, A., 285.

effects of an electric current on (Mengarini), 1888, A., 188.

bouquet of (Jacquemin), 1890, A., 1180.

influence of yeast on the (Rommier), 1890, A., 281.

colouring matters of (Monnet), 1890, A., 311.

red colouring matter of (Terreil), 1885, A., 1142.

sulpho-conjugate colouring matter in (Carles), 1886, A., 105.

coloured by aromatic sulphonic derivatives, examination of (Thomas), 1883, A., 625.

substance employed to colour (Jay), 1885, A., 309.

extraction of the colouring matter of (Hugounenq), 1891, A., 1563.

method of distinguishing natural colours from added coal-tar colours (Blarez and Denigès), 1886, A., 1084.

solubility of the colouring-matter of, in the various constituents of grape-juice (Gantter), 1883, A., 1141.

and bilberry colouring matters, difference between (Vogel), 1888, A. 1137.

free from artificial colouring matter, presence of arsenic in (Barthélemy), 1884, A., 526.

decolorisation of (Bornträger), 1892, A., 543.

clouding of (Nessler), 1884, A., 233.

distillation of (Kiticsan), 1883, A., 934.

Wine, fining of (Nessler), 1884, A., 233.
freezing of (Moritz), 1883, A., 135.
souring of (Carles), 1884, A., 646.
preservation of (Houdart), 1884, A., 130.
preservation of, by salicylic acid (Denucé), 1883, A., 535.
boric acid in (Baumert), 1889, A., 295; (Gassend), 1892, A., 93.
ethylene glycol in (Henninger), 1883, A., 631.
reduction of extractive matter by clearing of (Portele), 1884, A., 938.
relation between the glycerol and alcohol in (Borgmann), 1883, A., 518.
influence exerted by salicylic acid on the proportions of glycerol and alcohol formed in (Weigert), 1889, A., 433.
iron in (Sambuc), 1888, A., 384.
and other vegetable and animal products, presence of manganese in (Maumené), 1884, A., 879.
salicylic acid in (Barral), 1884, A., 778.
does every, contain tartar? (Petrowitsch), 1886, A., 652.
free tartaric acid in (Claus), 1883, A., 935.
fig (Carles), 1891, A., 1135.
plastering of (Pichard), 1883, A., 755; (Carles), 1888, A., 759.
plastered (Nencki), 1884, A., 233; (Magnier de la Source), 1884, A., 646.
plastered and natural, sulphuric acid in (Vitali), 1891, A., 1551.
and mixed with sulphuric acid, distinction between (Roos and Thomas), 1891, A., 123.
mode of combination of sulphuric acid in (Magnier de la Source), 1891, A., 768.
condition of the sulphuric acid in (Roos and Thomas), 1891, A., 123.
potassium tartrate in, and estimation of tartaric acid (Pichard), 1884, A., 372.
behaviour of strontium tartrate with (Spica), 1892, A., 93.
deplastering of (Blarez), 1883, A., 252.
red, manufacture in Germany (Nessler), 1884, A., 130.
sparkling, inversion of cane sugar in (Moritz), 1886, A., 608.
from sugar (Carles), 1884, A., 1086.
Wine from raspberries and strawberries (Rommier), 1887, A., 292.
raisin and grape, method of distinguishing between (Cazeneuve and Ducher), 1890, A., 1031.
raisin, and its richness in nitrogen (Cazeneuve and Ducher), 1890, A., 1031.
Tyrolese, extract in (Mach and Portele), 1883, A., 245; (Henecke), 1884, A., 130.
1883 vintage, extractive matter in (Henecke), 1884, A., 130.
lime and ash in (Mach), 1888, A., 1332.
influence of, on peptic digestion (Hugounenq), 1892, A., 87.
Wine analysis:—
analysis (Fresenius and Borgmann), 1883, A., 518; (anon.), 1884, A., 131, 501; 1885, A., 443; (Moritz), 1884, A., 645; (Nessler and Barth), 1884, A., 1432; (Ulbricht), 1885, A., 692; (Spica), 1888, A., 95; (Bosshard), 1891, A., 359.
testing the ashes from (Chiappe), 1884, A., 642.
red, acidimetry with (Tony-Garcin), 1888, A., 93.
analysis of, by means of electrolysis (Krohn), 1885, A., 298.
analyses, mode of stating the results of (König), 1889, A., 799.
from Anjou, analyses of (Bouchard), 1884, A., 646.
from California, analysis of (de Fremery), 1885, A., 842.
red Italian, analysis of (Kayser), 1883, A., 892.
Lorraine, examination of (anon.), 1884, A., 131.
of Médéah, analyses of (Balland), 1884, A., 1086.
from Palestine, etc., analyses of (Stutzer), 1884, A., 646.
detection of alkanna red in (Herz), 1890, A., 311.
detection of alum in (de' Colli), 1892, A., 1523.
detection of aluminium in (L'Hôte), 1887, A., 690.
detection of archil, cochineal and magenta in (Palmieri and Casoria), 1889, A., 655.
detection of Bordeaux red in (Thomas), 1884, A., 370.
detection of the colouring matter of Campeachy wood in (Boni), 1884, A., 502.

Wine analysis:—
detection of cane-sugar in (MEDICUS), 1885, A., 693.
detection of cane-sugar, glucose and dextrin in (TONY-GARCIN), 1887, A., 692.
detection of the colouring matter of (WEIGERT), 1889, A., 655.
detection of artificial colouring matters in (PASTROVICH), 1884, A., 502; (JAY), 1885, A., 298; (GIRARD and PABST), 1885, A., 1098; (STROHMER), 1886, A., 183; (CAZENEUVE), 1886, A., 397; (HERZ), 1887, A., 91; (SAMELSON), 1887, A., 187; (HOLTERMAN DO REGO), 1887, A., 405; (CURTMAN), 1887, A., 1147; (SOSTEGNI), 1889, A., 1091; (PAPASOGLI), 1891, A., 1563.
detection of copper in (GIGLI), 1888, A., 873.
detection of "dry extract" in (JAY), 1885, A., 602.
detection of lactic and butyric acids in (MACH and PORTELE), 1890, A., 1344.
detection of nitric acid in (BORGMANN), 1888, A., 753; (ZECCHINI), 1891, A., 961; (VITALI), 1891, A., 1551.
detection of rosaniline hydrochloride in, by means of stearin (WOLFF), 1883, A., 384.
detection of salicylic acid in (RÖSE), 1886, A., 924; (MEDICUS), 1890, A., 1475.
detection of sulphuric acid in (POLLACCI), 1884, A., 215; (FERRARI), 1885, A., 692; (MAGNIER DE LA SOURCE), 1891, A., 768.
detection of sulphurous acid in (LIEBERMANN), 1883, A., 384; (ANON.), 1884, A., 1440.
detection of added water in (EGGER), 1885, A., 842.
estimation of acetic acid in, by distillation with steam (LANDMANN), 1884, A., 641.
estimation of astringent acids in (JEAN), 1892, A., 246.
estimation of fixed organic acids in (SCHMITT and HIEPE), 1883, A., 384.
estimation of alum in (CARLES), 1884, A., 1077.
estimation of aluminium in (L'HÔTE), 1887, A., 690.
estimation of butyric acid in (MACH and PORTELE), 1890, A., 1344.
estimation of colouring matter in (JEAN), 1892, A., 246.

Wine analysis:—
estimation of the extractive matter of (AMAGAT), 1884, A., 1432; (WEIGELT), 1885, A., 602; (EGGER), 1889, A., 1091.
estimation of glycerol in (BENSEMANN), 1886, A., 1080; (SAMELSON), 1887, A., 86; (BARTH), 1887, A., 184; (SKALWEIT), 1887, A., 306; (WEIGERT), 1889, A., 446; (v. TÖRRING), 1890, A., 426; (OLIVERI and SPICA), 1891, A., 369; (JEAN), 1892, A., 246; (LECCO), 1892, A., 1263; (BAUMERT), 1892, A., 1529.
estimation of lactic acid in (MACH and PORTELE), 1890, A., 1344.
estimation of magenta in (NESSLER and BARTH), 1884, A., 1432.
estimation of malic acid in (GANS), 1890, A., 427; (NIEDERHÄUSER), 1891, A., 128; (SCHNEIDER), 1891, A., 371.
estimation of nitrogen in (KULISCH), 1886, A., 652.
estimation of non-volatile residue in, by evaporation in a vacuum (PETER), 1885, A., 692.
estimation of phosphoric acid in sweet (FRESENIUS), 1889, A., 547.
estimation of salicylic acid in, by rapid method (RÉMONT), 1883, A., 245.
estimation of mineral salts in (SCHNEIDER), 1891, A., 371.
estimation of sodium chloride in (GONDOIN), 1891, A., 1398.
estimation of solid matter in (BOUILHON), 1887, A., 87.
estimation of dissolved solids in (LÁSZLÓ), 1891, A., 123.
estimation of sugar in (ANON.), 1884, A., 502; (GIRARD), 1885, A., 1163; (BORNTRÄGER), 1890, A., 426; (VOGEL), 1891, A., 1557; (FRESENIUS), 1892, A., 922.
estimation of sulphurous acid in (WARTHA), 1883, A., 621.
estimation of tannin in (NESSLER and BARTH), 1884, A., 1432; (ROOS, CUSSON and GIRAUD), 1890, A., 431; (VIGNA), 1891, A., 1399; (VOGEL), 1891, A., 1557.
estimation of tartaric acid in (PICHARD), 1883, A., 755; 1884, A., 372; (CLAUS), 1883, A., 935; (ANON.), 1884, A., 501; (KAYSER), 1884, A., 504; (HAAS), 1888, A., 1347; (GANS), 1890, A., 427; (SCHNEIDER), 1891, A., 371; (VIGNA), 1891, A., 1399; (ACKERMANN), 1892, A., 1531.

Wine lees, analysis of (KLEIN), 1886, A., 182; (PHILIPS), 1891, A., 372.
valuation of (BOESSNECK), 1890, A., 303.
estimation of cream of tartar in (BALLI), 1892, A., 1033.
estimation of tartaric acid in (OLIVERI), 1885, A., 843; (BORNTRÄGER), 1886, A., 1082; 1888, A., 536.
Wine must, fermentation of (BARTH), 1885, A., 942.
influence of temperature on the fermentation of (MÜLLER), 1884, A., 647.
absence of nitric acid in (POLLAK), 1889, A., 541.
estimation of dry substance in (ULBRICHT), 1884, A., 1432.
Wine yeast, cultivated (ROMMIER), 1884, A., 1399; 1885, A., 205.
preparation of (ROMMIER), 1890, A., 1179.
Winklerite from Almeria, South Spain (WEISBACH), 1883, A., 433.
Winter bark, true (ARATA and CANZONERI), 1890, A., 405.
Winter flax, cultivation of (LEYDHECKER), 1884, A., 921.
Winterene (ARATA and CANZONERI), 1890, A., 405.
Wintergreen oil (PETTIGREW), 1885, A., 528; (TRIMBLE and SCHROETER), 1890, A., 256.
See also Methylic salicylate.
Withania coagulans, "rennet" ferment from the seeds of (LEA), 1884, A., 535.
Witherite, artificial production of (BOURGEOIS), 1883, A., 31.
See also Barium carbonate.
Wöhlerite (BRÖGGER), 1890, A., 1079.
Wolframite (*wolfram*) from Felsöbánya (SIPÖCZ), 1886, A., 312.
analysis of (SCHNEIDER), 1885, A., 1187; (ŠETLÍK), 1890, A., 420; (BURGHARDT), 1890, A., 1027.
Wolfsbergite from the Harz (LASPEYRES), 1892, A., 124.
Wollastonite from Perheniemi, Finland (WIDMAN), 1892, A., 1407.
from Rézbánya (LOCZKA), 1885, A., 734.
from Sardinia (FUNARO and BUSATTI), 1884, A., 270; (BUSATTI), 1887, A., 709.
artificial production of (BOURGEOIS), 1883, A., 560; 1884, A., 564; (GORGEU), 1884, A., 1262; 1890, A., 18; (HUSSAK), 1890, A., 220.
See also Calcium silicate.
Wood, elementary composition of certain kinds of, with a calorimetric investigation of their combustibility (GOTTLIEB), 1884, A., 477.
constituents of (URBAIN), 1884, A., 860.
chemical changes in decayed (WAGNER), 1884, A., 477.
dry distillation of (SENFF), 1885, A., 619.
products of the distillation of (MABERY), 1884, A., 788; (VLADESCO), 1890, A., 956.
ketones obtained in the dry distillation of (VLADESCO), 1892, A., 424.
decaying, blue colouring matter of (RIDEAL), 1886, A., 810.
colour mordants for (ANON.), 1884, A., 379.
Wood ashes, composition of (WAGNER), 1885, A., 834.
Wood cellulose (*lignose*), manufacture of (ANON.), 1884, A., 1451.
constitution of (CROSS and BEVAN), 1883, T., 20.
See also Lignocellulose.
Wood fibre, the pentosans of (SCHULZE and TOLLENS), 1892, A., 1420.
test for (REICHL), 1884, A., 118.
estimation of, in paper (WURSTER), 1887, A., 620; (GODEFFROY and COULON), 1890, A., 670.
Wood gum. See Xylan.
Wood naphtha (*wood spirit*) (FAWSITT), 1886, A., 289.
estimation of acetone in (HINTZ), 1888, A., 759.
estimation of methylic alcohol in (HABERMANN), 1889, A., 84.
See also Methylic alcohol.
Wood oil from Cochin China (SOUBEIRAN), 1885, A., 394.
from *Elaeococca cordata* (DAVIES), 1885, A., 1022.
Wood papers, different, percentage of water in (LEPSIUS), 1886, A., 112.
Wood stains, preparation of, in the solid form (ANDÉS), 1885, A., 711.
Wood sugar. See Xylose under Carbohydrates.
Wood sulphite liquor (WELD, LINDSEY, SCHNELLE and TOLLENS), 1891, A., 43; (LINDSEY and TOLLENS), 1892, A., 802.
Woody tissues, chemical composition of (SCHUPPE), 1884, A., 285.
Wool, thermochemistry of (VIGNON), 1890, A., 939.
heat of combustion of (BERTHELOT and ANDRÉ), 1890, A., 938.

Wool, bleaching of, with hydrogen *per*oxide (Löbner), 1886, A., 292.
  chemical process which takes place in dyeing, with basic coal-tar dyes (Knecht), 1888, A., 832.
  treatment of the washings from (Delattre), 1883, A., 940.
  utilisation of the washings from (anon.), 1884, A., 783.
  absorption of different acids by, from different mixtures of acids (Mills and Takamine), 1883, T., 149.
  absorption of weak reagents by (Mills and Takamine), 1883, T., 142.
  estimation of, in tissues (Rémont), 1885, A., 96.
  See also Agricultural Chemistry.
Wool dust, examination of (Nessler), 1884, A., 637.
Wool grease, constituents of (Buisine), 1885, A., 509.
Wool keratin, chemical formula of (Whiteley), 1886, P., 142; (Mills), 1886, P., 147.
Wool oils, analysis of (Horwitz), 1890, A., 305.
Woollen tissue, detection of vegetable fibre in (Fubino), 1892, A., 667.
Work, maximum, principle of (Berthelot), 1885, A., 868.
  maximum, Berthelot's law of, and spontaneous endothermic reactions (Colley), 1890, A., 681.
  change of substance in the horse during (Zuntz, Lehmann and Hagemann), 1889, A., 911.
  respiration in the horse during (Zuntz and Lehmann), 1890, A., 1170.
  muscular, and proteid metabolism (Argutinsky), 1891, A., 350; (Krummacher), 1891, A., 479; (Noël-Paton), 1891, A., 596; (Munk), 1891, A., 847.
    influence of, on the exhalation of carbonic anhydride (Grandis), 1890, A., 1334.
    effect of, on the glycogen of the muscles (Manché), 1889, A., 428.
Worms, entozoic, respiration of (Bunge), 1890, A., 274.
Wormseed oil (Hell and Stürcke), 1884, A., 1363.
  action of the halogen acids on (Hell and Ritter), 1884, A., 1363; 1885, A., 172.
Wort, nitrogenous constituents of (Ullik), 1883, A., 821; (Bungener and Fries), 1884, A., 1446.
  analysis of (Jones), 1888, A., 199; (Elion), 1891, A., 368.
Wort, estimation of dextrose, dextrin and maltose in (Elion), 1892, A., 248.
Wort centrifugal machine, Zimmer's, use of, in brewing (anon.), 1885, A., 1169.
Wrightine. See Conessine, under alkaloids.
Writing, estimation of the age of (Irvine), 1888, A., 764.
Wulfenite (Koch), 1883, A., 435; (v. Zepharovich), 1885, A., 641.
  from Beaujolais (Lacroix), 1885, A., 226.
Wurtzite, synthesis of (Lorenz), 1891, A., 990.

X.

X of Soret or holmium (Lecoq de Boisbaudran), 1886, A., 667.
Xanthine (Fischer), 1883, A., 357; (Kossel), 1883, A., 924.
  occurrence of (Baginsky), 1885, A., 286.
  in the horse's liver (Drechsel), 1892, A., 516.
  amount of, in various organs and in yeast (Schindler), 1889, A., 791.
  in urine (Salomon), 1891, A., 1528.
  synthesis of (Gautier), 1885, A., 275.
  formation of, in yeast (Salkowski), 1889, A., 1028.
  action of hydrochloric acid and of barium hydroxide on (Schmidt), 1883, A., 871.
  reaction of (Drechsel), 1892, A., 1534.
  bases, formation of, in the animal organism (Horbaczewski), 1891, A., 1340.
  derivatives (Fischer), 1883, A., 357.
  in urine (Salomon), 1887, A., 739.
  bromo- (Fischer and Reese), 1884, A., 467.
  Paraxanthine (Salomon), 1883, A., 601; 1885, A., 403; 1886, A., 266; 1891, A., 1120, 1528.
    physiological action of (Salomon), 1889, A., 293.
  Pseudoxanthine (Gautier), 1886, A., 634.
  Heteroxanthine (Salomon), 1886, A., 266; 1887, A., 740; 1891, A., 1528.
Xanthoarsenite, a mineral from Örebro (Igelström), 1886, A., 25.
Xanthochelidonic acid (*chelihydronic acid*) and its salts (Lerch), 1885, A., 45; (Haitinger and Lieben), 1885, A., 47.
Xanthocreatinine (Gautier), 1886, A., 634.

o-Xylene, Me:Me = 1:2; *m*-xylene, Me:Me = 1:3; *p*-xylene, Me:Me = 1:4.

Xanthocreatinine, formation of, in the organism (Monari), 1887, A., 613; 1888, A., 174.
  in the urine (Colasanti), 1892, A., 364.

Xanthogallol (Webster), 1884, T., 208.
  derivatives of (Theurer), 1888, A., 1084.

Xanthone (*carbonyldiphenyl oxide; diphenylene ketone oxide*) (Goldschmiedt), 1883, A., 664; (Richter), 1884, A., 324.
  preparation of (Perkin), 1883, T., 35.
  constitution of (Spiegler), 1884, A., 1182; (Graebe), 1888, A., 477.
  derivatives of (Perkin), 1883, T., 187; (Richter), 1884, A., 324.
  β-*di*amido-, and its hydrochloride and *m-di*bromo- (Perkin), 1883, T., 191, 194.
  *tri*bromo- (Arbenz), 1890, A., 893.
  β-*di*nitro-, action of reducing agents on (Perkin), 1883, T., 190.
  thio- (Graebe and Schultess), 1891, A., 1058.
    preparation of (Ziegler), 1890, A., 1292.

Xanthones of the naphthalene and quinoline series (v. Kostanecki), 1892, A., 1098.

Xanthonedisulphonic acid and its barium salt (Perkin), 1883, T., 193.

Xanthophyllidrin (Macchiati), 1886, A., 1041; 1889, A., 900.

Xanthopurpurin (*m-dihydroxyanthraquinone*), synthesis of (Noah), 1886, A., 475.

Xanthoquinic acid. See 2-Hydroxyquinoline-4′(?)-carboxylic acid.

Xanthorhodium salts. See under Rhodium.

Xanthostrychnol (Loebisch and Schoop), 1886, A., 268, 814.

Xanthoxalanil and **xanthoxalotoluidil** (Wislicenus and Sattler), 1891, A., 902.

Xanthoxylon (*Zanthoxylum*) *senegalense*, bark of, constituents of the (Giacosa and Monari), 1888, A., 167; (Giacosa and Soavé), 1890, A., 918.

Xenotime (*yttrium phosphate*) (Hidden), 1889, A., 355.
  from Colorado (Hidden), 1885, A., 878.
  from Minas Geraes, Brazil (Gorceix), 1886, A., 676.
  from North Carolina (Hidden), 1883, A., 435; (Hidden and Des Cloizeaux), 1887, A., 118.

Xenotime (*yttrium phosphate*) from Norway (Brögger), 1884, A., 1101; 1890, A., 1078; (Blomstrand), 1890, A., 111.
  as an accessory constituent of rocks (Derby), 1891, A., 993.
  analyses of (Blomstrand), 1889, A., 217.

Xenylenepyrazine. See 2:3-Diphenylpyrazine.

Xeronic acid (*diethylmaleic acid*) (Roser), 1883, A., 98.
  synthesis of, from α-*di*bromobutyric acid (Fromme and Otto), 1887, A., 917.

p-**Xylaldiphenylmaleide** (Cohn), 1892, A., 482.

m-**Xylal-phthalide** and **-phthalimidine** and their nitro-derivatives, and *iso*-**xylal-phthalide** and **-phthalimidine** (Heilmann), 1890, A., 625; 1891, A., 200.

p-**Xylal-phthalide** and **-phthalimidine** and their nitro-derivatives, and *iso-p*-**xylal-phthalide** and **-phthalimidine** (Ruhemann), 1892, A., 473.

Xylalphthalnitronitrite (Heilmann), 1890, A., 625.

Xylan (*wood-gum*) (Hoffmeister), 1886, A., 955; (Wheeler and Tollens), 1889, A., 847; (Allen and Tollens), 1891, A., 659.
  from straw, etc. (Allen and Tollens), 1890, A., 472.

Xylene tetrahydride from resin essences (Renard), 1884, A., 844.
  glycols. See Dihydroxyxylenes.
  amido-. See Xylidine.
  *di*amido-. See Xylylenediamine.

o-**Xylene** (*dimethylbenzene*), spectrum of (Hartley), 1885, T., 702.
  action of bromine on, in presence of aluminium (Blümlein), 1885, A., 163.
  oxidation of (Claus and Pieszczek), 1887, A., 240.
  derivatives of (v. Baeyer and Pape), 1884, A., 898; (Leser), 1884, A., 1313; (Claus and Groneweg), 1891, A., 921.

o-**Xylene**, 4-bromo- (Jacobsen), 1885, A., 142.
  ω-*di*bromo- (*xylylenic bromide*) (v. Baeyer and Perkin), 1884, A., 752; (Colson), 1884, A., 1000.
    action of ammonia on (Scholtz), 1891, A., 1353.
  4:5- and 3(?):4-*di*bromo- (Jacobsen), 1885, A., 142; (Koch), 1890, A., 1247.

o-Xylene, Me:Me = 1:2; *m*-xylene, Me:Me = 1:3; *p*-xylene, Me:Me = 1:4.

- *o*-**Xylene**, *tetra*bromo- (Jacobsen), 1885, A., 142.
  - 4:5:3-*di*bromonitro- and 4:5:3:6-*di*bromo*di*nitro- (Töhl), 1886, A., 57.
  - 3-chloro- (Krüger), 1885, A., 1053.
  - 4-chloro- (Claus and Kautz), 1885, A., 972; (Krüger), 1885, A., 1053; (Claus and Groneweg), 1891, A., 921.
  - ω-*di*chloro- (Colson), 1884, A., 1000.

  preparation of (WERNER), 1891, T., 405.

Y.

Yα of Marignac (CROOKES), 1886, A., 506; (LECOQ DE BOISBAUDRAN), 1886, A., 667.

Yarns, bleaching (THOMPSON and RICKMANN), 1884, A., 1234.

Yeast, pure (AMTHOR), 1888, A., 184.
    manufacture of (ELION), 1891, A., 1532.
    apparatus for the manufacture of (FERNBACH), 1891, A., 352.
  preparation of (HEINZELMANN), 1884, A., 789.
  purification of (EFFRONT), 1892, A., 905.
  velocity of the hydrolytic action of (O'SULLIVAN), 1892, T., 928; P., 147.
  hydrolytic functions of (O'SULLIVAN), 1892, T., 593, 926.
  influence of light on the growth of (KEY), 1886, A., 387.
  influence of alcohol on the development of (HAYDUCK), 1883, A., 104.
  action of air on (COCHIN), 1883, A., 746; 1884, A., 939.
  influence of alcohol, and sulphuric and salicylic acids on (ANON.), 1884, A., 476.
  action of hydrogen fluoride and of fluorides on (EFFRONT), 1891, A., 1532.
  influence of, on the bouquet of wines (ROMMIER), 1890, A., 281.
  action of, on the animal and human organism (NEUMAYER), 1891, A., 237.
  chemical reactions of (FRANKLAND), 1885, T., 166.
  degeneration of (JACOBSEN), 1885, A., 102; (BUNGENER), 1885, A., 417.
  influence of the age of, on alcoholic fermentation (REGNARD), 1888, A., 184.
  self-fermentation of (LEHMANN), 1885, A., 1151.
  liquefaction of (O'SULLIVAN and TOMPSON), 1890, T., 869.
  alcoholic extract of (DE REY-PAILHADE), 1890, A., 905.

Yeast, nuclein in (STUTZER), 1883, A., 1166; (LIEBERMANN), 1888, A., 510.
  metaphosphoric acid in the nuclein of (LIEBERMANN), 1891, A., 477.
  formation of sugar and other substances in (SALKOWSKI), 1889, A., 1027.
  method of examining (MEISSL), 1884, A., 931; (MEYER), 1885, A., 452.
  abnormal, secretion of nitrogenous substances by (GAYON and DUBOURG), 1886, A., 733.
  anaërobic, disengagement of carbonic anhydride by (GRÉHANT and QUINQUAUD), 1889, A., 539.
  beer- (MARTINAND), 1889, A., 181.
    fermentative strength of, in distillery mash (KRUIS), 1884, A., 939.
    glycogen in (ERRERA), 1885, A., 1151.
    formation of glycogen in (LAURENT), 1888, A., 981.
    degeneration of (BUNGENER), 1885, A., 417.
  elliptical, effect of copper salts on (ROMMIER), 1890, A., 814.
    products of fermentation of sugar by (CLAUDON and MORIN), 1887, A., 714, 746.
  pressed, preparation of (WEHMER), 1883, A., 692; (ANON.), 1884, A., 132.
    utilisation of malt combings in the manufacture of (HAYDUCK), 1884, A., 790.
  wine, preparation of (ROMMIER), 1890, A., 1179.
    cultivated (ROMMIER), 1884, A., 1399; 1885, A., 205.

Yeast liquor, composition of (O'SULLIVAN and TOMPSON), 1890, T., 878.

Yeast sowing, the favourable temperature for (STENGLEIN), 1884, A., 789.

Yeast-albuminoid (O'SULLIVAN and TOMPSON), 1890, T., 886, 893.

Yeast-cells, effects of varying environment on (BROWN), 1892, T., 369.
  effect of the presence of certain organic substances on the respiratory combustion of (SCHÜTZENBERGER), 1884, A., 857.
  respiration of, at different temperatures (GRÉHANT and QUINQUAUD), 1888, A., 623.

Yeast-poisons (SCHULTZ), 1889, A., 181.

Yellows, coal-tar, toxic effect of (CAZENEUVE and LÉPINE), 1886, A., 273.

Zinc organic compounds:—

Zinc organo-metallic compounds, action of, on aldehydes (WAGNER), 1885, A., 370.
- *iso*butyl, boiling point of (v. GARZAROLLI-THURNLACKH and POPPER), 1884, A., 1117.
- cyanide, formation of, from zinc dust (AUFSCHLÄGER), 1892, A., 1164.
  - action of cupric salts on (VARET), 1890, A., 464.
  - action of, on metallic chlorides (VARET), 1888, A., 799.
- ammoniocyanides (VARET), 1888, A., 123.
- mercuric cyanide (DUNSTAN), 1890, A., 855; 1892, T., 666; P., 51.
- ethoxide. See Ethoxide, zinc.
- ethyl, molecular refraction and dispersion of (GLADSTONE), 1891, T., 296.
  - heat of formation of (GUNTZ), 1888, A., 15.
  - and zinc methyl, apparatus for distilling (KAULFUSS), 1888, A., 255.
  - action of, on amides (GAL), 1883, A., 913.
  - action of, on amines and phosphines (GAL), 1884, A., 985.
  - action of liquid carbonic anhydride on (SCHMITT), 1891, A., 288.
  - action of oxygen on (DEMUTH and MEYER), 1890, A., 481.
  - and iodoethyl, action of, on dipropyl ketone (MENSCHIKOFF), 1888, A., 248.
- mercuric thiocyanate (BEHRENS), 1892, A., 10.

Zinc, detection, estimation and separation:—
- microchemical test for (v. HAUSHOFER), 1887, A., 300.
- detection of, in presence of iron (DEROS), 1884, A., 367.
- estimation of (CARNOT), 1886, A., 580, 650; (LÖSEKANN and MEYER), 1886, A., 836; (BRAGARD), 1887, A., 689; (RIBAN), 1888, A., 1343; (LUCKOW), 1892, A., 1129.
- estimation, electrolytic, of (MILLOT), 1883, A., 122; (CLASSEN), 1885, A., 192; (MOORE), 1886, A., 921; (SMITH and KNERR), 1886, A., 923; (SHAND), 1887, A., 1000; (BRAND), 1890, A., 294.
- estimation, electrolytic, of, as amalgam (VORTMANN), 1891, A., 1553.
- estimation, volumetric, of (VOIGT), 1890, A., 196; (BLUM), 1890, A., 1191; 1892, A., 534; (DONATH and HATTENSAUR), 1891, A., 112.

Zinc, estimation and separation:—
- estimation of, as pyrophosphate (BRAGARD), 1887, A., 398.
- estimation of, as sulphide (MACARTHUR), 1883, A., 828.
- estimation of, by the ferrocyanide process (MOLDENHAUER), 1892, A., 915.
- estimation of, in blende containing manganese (STAHL), 1890, A., 827.
- estimation of, in calamine (MINOR), 1890, A., 418; 1891, A., 863.
- estimation of, in presence of iron (DEROS), 1884, A., 367.
- estimation of, in presence of iron and manganese (RIBAN), 1890, A., 1193.
- estimation of, in iron ores (PLATZ), 1890, A., 1192.
- estimation of, in the presence of manganese (NEUMANN), 1889, A., 549.
- estimation of, in manganiferous flue deposits (JENSCH), 1890, A., 294.
- estimation of, in pickled railway sleepers (GRITTNER), 1891, A., 620.
- estimation of, in zinc dust (MINOR), 1891, A., 863.
- estimation of, in zinc fume (MARQUARDT), 1886, A., 490.
- estimation of, in zinc ores (CODA), 1890, A., 1191.
- separation of (RIBAN), 1888, A., 1343.
- separation of, in ores (OSBORNE), 1885, A., 595.
- separation of, from aluminium, cobalt, iron, manganese and nickel (MOORE), 1888, A., 631.
- separation of cadmium, copper, nickel, etc. and (CARNOT), 1886, A., 580, 650.
- separation, electrolytic, of cadmium from (ELIASBERG), 1886, A., 281; (SMITH and FRANKEL), 1889, A., 1033.
- separation of, from cobalt (BAUBIGNY), 1889, A., 653.
- separation of, from cobalt, iron and nickel (v. BERG), 1887, A., 182.
- separation of, from iron (CARNOT), 1886, A., 650.
- separation of, from lead and silver, in galena and blende (AUBIN), 1892, A., 1378.
- separation of, from manganese (JANNASCH and MACGREGORY), 1891, A., 963; (DONATH), 1892, A., 384; (JANNASCH and NIEDERHOFHEIM), 1892, A., 537.
- separation of, from manganese and nickel (BAYLEY), 1888, A., 388.

Zinc, separation:—
separation, electrolytic, of, from mercury and silver (SMITH and FRANKEL), 1890, A., 664.
separation of, from the metals of the same group (HAMPE), 1885, A., 932.
separation of, from nickel (MOORE), 1885, A., 193; (OSBORNE), 1885, A., 595; (BAUBIGNY), 1889, A., 652; (ALT and SCHULZE), 1890, A., 418.
Zincaluminite, a mineral species (BERTRAND and DAMOUR), 1883, A., 443.
Zinc blende from Cornwall, Lebanon Co., Pa. (GENTH), 1884, A., 266.
black, of Freiberg (STELZNER and SCHERBEL), 1887, A., 451.
from Hungary (SIPÖCZ), 1886, A., 313.
modifications of (V. SANDBERGER), 1889, A., 836.
and tetrahedrite, parallel growth of (BECKE), 1886, A., 207.
etching of (BECKE), 1886, A., 207.
roasting of, and neutralisation of the evolved gases with calcium sulphide solution (KOSMANN), 1883, A., 399.
See also Blende and Zinc sulphide.
Zinc bloom. See Hydrozincite.
Zinc-carbon couples in electrolysis (TOMMASI), 1883, A., 4.
Zinc-copper couple, action of nitric oxide on (GLADSTONE and TRIBE), 1883, T., 346.
action of, on organic bodies (GLADSTONE and TRIBE), 1885, T., 448; P., 60.
estimation of chlorates by means of the (BOTHAMLEY and THOMPSON), 1887, P., 141; 1888, T., 164.
Zinc dust, preparation of hydrogen and of carbonic oxide by means of (SCHWARZ), 1886, A., 660.
action of, on ferric chloride (CARNEGIE), 1888, T., 468.
action of, on zinc hydroxide (WILLIAMS), 1886, A., 204.
properties of cadmium in (ANON.), 1885, A., 461.
valuation of (MORSE), 1885, A., 1012; (WEIL), 1887, A., 301; (KLEMP), 1890, A., 1190.
Zinc eisen (WARREN), 1887, A., 550.
Zinc fume, estimation of zinc in (MARQUARDT), 1886, A., 490.
Zinc gasometers, storage of oxygen in (LOEWE), 1883, A., 619.
containing oxygen, explosion of (PFAUNDLER), 1883, A., 524.
use of lime-water in (LOEWE), 1885, A., 835.
Zinciferous clays from South West Missouri (SEAMON), 1890, A., 573.
Zincite, crystallised, from Stirling Hill, New Jersey (DANA), 1887, A., 343.
artificial production of (GORGEU), 1887, A., 345.
See also Zinc oxide.
Zinckenite (GONNARD), 1885, A., 221.
from Arkansas (CHESTER), 1887, A., 782.
Zinc-magnesium group, peroxides of (HAASS), 1885, A., 20.
Zinc-manganese-serpentine from Franklin, New Jersey (KÖNIG), 1887, A., 646; 1888, A., 565.
Zinc mineral from a blast furnace (CUNDALL), 1889, P., 67.
Zinc minerals, origin of, in the older limestones of the secondary series (DIEULAFAIT), 1885, A., 644.
Zinc powder, valuation of (BARNES), 1887, A., 80.
titration of (KUPFFERSCHLÄGER), 1887, A., 865; (WEIL), 1887, A., 1000.
Zircon from Australia (SCHMIDT), 1891, A., 1169.
from Burgess, Canada (HIDDEN), 1885, A., 878.
from Colorado (CROSS and HILLEBRAND), 1883, A., 1065.
from a Colorado rock (LACROIX), 1889, A., 1054.
from the itacolumite of Edge Hill, Pa. (GENTH), 1884, A., 270.
from the quarries of Nil St. Vincent (RENARD), 1883, A., 561.
from North Carolina (GENTH), 1891, A., 155.
in stratified rocks (V. SANDBERGER), 1886, A., 24.
artificial production of (HAUTEFEUILLE and PERREY), 1889, A., 355.
composition of (LINNEMANN), 1885, A., 1042.
twin crystals of (FOOTE), 1885, A., 222.
absorption phenomena of (LINNEMANN), 1885, A., 1173.
disintegration of (ŠTOLBA), 1884, A., 821.
Zircon minerals, distribution of (THÜRACH), 1886, A., 126.
Zirconia. See Zirconium *di*oxide.
Zirconic acid and zirconates. See under Zirconium.
Zirconic anhydride. See Zirconium *di*oxide.
Zirconium (HINSBERG), 1887, A., 896.
atomic weight of (BAILEY), 1890, A., 705.

Zirconium, crystallised compounds of (WEIBULL), 1887, A., 778.
Zirconium chloride, preparation of, from zircons (VENABLE), 1892, A., 412.
  hydride (WINKLER), 1891, A., 802.
  hydroxide, dehydration of, by heat (CARNELLEY and WALKER), 1888, T., 68, 82.
  *di*oxide (*zirconia; zirconic anhydride*), extraction of (LINNEMANN), 1885, A., 1042.
    crystallisation of (HAUTEFEUILLE and PERREY), 1890, A., 1071.
    action of magnesium on (WINKLER), 1890, A., 1375; 1891, A., 802.
    light (LINNEMANN), 1886, A., 417.
  *pent*oxide (BAILEY), 1886, T., 149, 483.
  Zirconic acid, combination of phosphoric acid with (HAUTEFEUILLE and MARGOTTET), 1886, A., 670.
  Zirconates of the alkalis and alkaline earths (OUVRARD), 1891, A., 1431.
Zirconium potassium phosphate (TROOST and OUVRARD), 1886, A., 853.
  sodium phosphates (TROOST and OUVRARD), 1887, A., 1017.
Zirconium, method for the estimation and separation of (BAILEY), 1886, T., 149, 481; P., 138, 205.
  separation of, from aluminium (DAVIS), 1889, A., 550.
Zirconyl compounds (WEIBULL), 1887, A., 778.
Zobtenite (ROTH), 1888, A., 661.
Zoisite (BELL), 1886, A., 319.
  from Orenburg (MELNIKOFF), 1892, A., 690.
Zorgite, analysis of (HEUSLER and KLINGER), 1886, A., 22.
Zuiderzee, composition of the sea mud in the new alluvia of the (VAN BEMMELEN), 1890, A., 822.
Zunyite, from Colorado (HILLEBRAND), 1885, A., 878.
Zygadite (KRENNER), 1886, A., 518.
Zymase of jequirity (BÉCHAMP and DUJARDIN), 1885, A., 1085.
  of human milk (BÉCHAMP), 1883, A., 926.
Zymases, observations concerning organisms which produce (BÉCHAMP), 1885, A., 580.
Zymogluconic acid. See Gluconic acid.
Zymolysis (LEA), 1890, A., 538.

AGRICULTURAL CHEMISTRY.

ANIMALS, DAIRY PRODUCTS, AND FEEDING EXPERIMENTS.

Animals, certain, digestive tract of, search for a cellulose-dissolving enzyme in (Brown), 1892, T., 352; P., 30.
  secretion of calcium carbonate by (Irvine and Woodhead), 1889, A., 429; 1890, A., 653.
  stony concretions in (Schuberg), 1884, A., 348.
  hydrocyanic acid from (Weber), 1884, A., 348.
  nitrates in (Gossels), 1887, A., 389.
  idiosyncrasy of certain, with regard to phenol (Zwaardemaker), 1891, A., 762.
  influence of the consumption of water on the alimentation of (Henneberg), 1889, A., 287.
  results of the suppression of perspiration of (Ellenberger), 1883, A., 817.
  respiratory exchanges in (Chapman and Brubaker), 1891, A., 592.
  exhalation of nitrogen during the respiration of (Reiset), 1883, A., 675.
  urine of, occurrence of acetyl derivatives in, after the ingestion of aldehydes (Cohn), 1892, A., 1504.
  starving, amount of iron in (v. Zaleski), 1888, A., 977.
  starving and normal, the relation of water and solid constituents in the organs and tissues of (Lukjanow), 1889, A., 632.
  diseases of (Roloff), 1884, A., 95, 914; (Pasteur), 1884, A., 623.
  destruction and utilisation of bodies of, which have died from contagious diseases (Girard), 1884, A., 106.

Animals—
  Bees, larval, food of (v. Planta), 1888, A., 733; 1889, A., 1022.
  Calves, fattening of (v. Langsdorff), 1883, A., 815.
    feeding of (Fjord), 1888, A., 1319.
    feeding of, with skim-milk (Paul), 1883, A., 675; (Barth; Henningsen), 1884, A., 852.
  Cattle, use of, for labour (v. Babo), 1884, A., 1396.
    stall-fed, experiments with (Vossler), 1884, A., 472.
    feeding of (Fjord), 1889, A., 1076.
    value of fodders for (Walther), 1883, A., 820; (v. Knieriem), 1890, A., 395.
    influence of food on the composition of butter (Ladd), 1889, A., 1023.
    exhausted beetroot-pulp as food for (Andouard and Dézaunay), 1884, A., 347; 1885, A., 73.
    beetroot sections as food for (Schrodt and Hanssen), 1885, A., 833; (Stutzer and Werner), 1886, A., 953.
    beet seed as food for (Simon-Legrand), 1884, A., 631; (Pellet), 1885, A., 425.
    arsenic in the bone phosphate used as food for (Fresenius), 1889, A., 548.
    cotton-cake as food for (De la Tréhonnais), 1884, A., 1411.
    influence of cotton-cake on the secretion of milk in (anon.), 1884, A., 623; (Siewert), 1884, A., 669.

Animals—
Cattle, diffusion residues as food for (Märcker), 1884, A., 921.
earth-nut- and palm-nut-cake as food for (Schrodt), 1888, A., 174.
poisoning of, by earth-nut-cake (Anacker), 1883, A., 818.
earth-nut-meal compared with rye-meal as food for (Meyer), 1885, A., 1252.
earth-nut- and rice-meal as food for (Wolde), 1883, A., 820.
dry fodder as food for (anon.), 1883, A., 816.
first grass and aftermath as food for (Rüfin), 1885, A., 586.
horse-chestnuts as food for (Kaehler), 1884, A., 1411.
basic phosphate of lime as an addition to food for (Cohn), 1884, A., 194.
lupines as food for (Seeling), 1884, A., 1211.
maize silage as food for (anon.), 1884, A., 355; (Rose), 1885, A., 1149.
influence of oat- and wheat-bran on the secretion of milk in (Schrodt and Hanssen), 1884, A., 854.
silage as food for, in Holland (Theil), 1887, A., 1062.
silage as compared with hay as food for (Broekema and Mayer), 1886, A., 737.
sugar as an addition to food for (Märcker), 1885, A., 1149; (Holdefleiss), 1886, A., 727; (Pfeiffer and Lehmann), 1887, A., 511.
sunflower-seed-cake as food for (Schrodt and v. Peter), 1884, A., 483.
white mustard as food for (Brümmer), 1884, A., 864.
amounts of nitrogen ingested and recovered in manure (Müntz and Girard), 1887, A., 175.
urine of (Zacharewicz), 1884, A., 1204; (Mittelbach), 1888, A., 1215.
Cattle disease, bacillus of (Metzdorf), 1884, A., 1398.
and Pasteur's protective inoculation (Koch), 1884, A., 96; (Müller), 1884, A., 473.
occasioned by town sewage (anon.), 1884, A., 95.
various (Eggeling; Pasteur), 1885, A., 73.

Animals—
Dogs, formation of fat from carbohydrates in (Munk), 1887, A., 288.
glycogen in the liver of new-born (Demant), 1887, A., 167.
hæmoglobin of (Jaquet), 1888, A., 731; 1890, A., 273.
nutrition of (Guimaraes), 1884, A., 344.
digestion of starch by (Ellenberger and Hofmeister), 1892, A., 516.
urine of, nitrogenous constituents of (Bleibtreu), 1890, A., 279.
Fowl, tissue waste in the, during starvation (Kuckein), 1883, A., 603.
Chicken cholera, infection of eggs by (Barthélemy), 1884, A., 1398.
value of disinfectants in (Colin), 1885, A., 180.
Goats, amount of volatile acids in the excrement of (Wilsing), 1886, A., 87.
Horse, circulation of mineral matter in the (v. Wolff), 1888, A., 735.
absorption in the stomach of the (Goldschmidt), 1887, A., 743.
sugar contents of the stomach of the (Ellenberger and Hofmeister), 1889, A., 176.
gastric digestion in the (Goldschmidt), 1886, A., 952; 1887, A., 610.
digestion and digestive secretions in the (Ellenberger and Hofmeister), 1883, A., 487; 1884, A., 92, 472; 1885, A., 178, 679, 1148; 1887, A., 744.
digestion of cellulose by the (Hofmeister), 1885, A., 916.
foddering of the (v. Wolff), 1888, A., 735.
useful effect of food supplied to the (Lezé), 1890, A., 807.
digestibility of substances used as food for the (Müntz and Girard), 1885, A., 282.
dried beer grains as food for the (Sattig), 1886, A., 1066.
cocoanut-meal as food for the (anon.), 1884, A., 852.
earth-nut-meal as food for the (Freytag and v. der Becke), 1884, A., 100.
flesh-meal as food for the (Findeisen), 1883, A., 102.
digestibility of clover- and meadow-hay by the (v. Wolff), 1885, A., 410, 411.

Animals—
- **Horse**, digestibility of lucerne by the (v. Wolff), 1885, A., 410.
  - working power of the, when fed with lupines and oats and digestibility of purified lupine seeds (Kellner), 1883, A., 102.
  - maize as food for the (Gerssdorf), 1884, A., 355.
  - digestibility of potatoes with hay and oats, and of carrots with hay and oats by the (v. Wolff), 1885, A., 72.
  - alimentary value of oats as food for the (Müntz and Girard), 1885, A., 281.
  - sweat of the (Smith), 1891, A., 349.
  - cutaneous excretion of albumin by the (Leclerc), 1888, A., 1320.
  - change of substance in the, at rest and at work (Zuntz, Lehmann and Hagemann), 1889, A., 911.
  - respiration in the, during rest and work (Smith), 1890, A., 392; (Zuntz and Lehmann), 1890, A., 1170.
  - fat of the (Lenz), 1889, A., 1076; (Amthor and Zink), 1892, A., 1533.
  - cystin and xanthine in the liver of the (Drechsel), 1892, A., 516.
  - urine of the (Mittelbach), 1888, A., 1216; (Smith), 1890, A., 914.
    - composition of (Salkowski), 1885, A., 413, 924.
- **Pigeons**, feeding experiments on (Assmus), 1884, A., 473.
- **Pigs**, gastric juices and histology of the gastric mucous membrane of (Ellenberger and Hofmeister), 1886, A., 271.
  - digestion in (Ellenberger and Hofmeister), 1887, A., 512, 684; 1890, A., 183.
  - exchange of material in (Meissl), 1886, A., 381.
  - fed on corn cockle, metabolism in (Kornauth and Arche), 1892, A., 1018.
  - feeding of (Fjord), 1888, A., 1319.
  - influence of fodder on the production of fat and lean in (Henry), 1888, A., 1319.
  - bile, acids of (Jolin), 1887, A., 742; 1888, A., 1213; 1889, A., 422; (Bergeat), 1889, A., 1231.
  - urine of (Mittelbach), 1888, A., 1216.

Animals—
- **Pigs**, urine of, chemical composition of (Salomon), 1885, A., 413.
- **Rabbits**, aged, composition of the bones of (Graffenberger), 1891, A., 1275.
  - hydrophobic, catechol in the urine of (Moscatelli), 1892, A., 1115.
- **Sheep**, fattening of (Pfeiffer and Lehmann), 1888, A., 973.
  - influence of wool on the material exchange in (Kern, Wattenberg and Pfeiffer), 1891, A., 1392.
  - of different breeds, effect of food on (Weiske), 1883, A., 226.
  - Scotch hill, composition of the food of (Kinch), 1885, A., 291.
  - digestibility of clover- and meadow-hay by (v. Wolff), 1885, A., 410, 411.
  - digestibility of lucerne by (v. Wolff), 1885, A., 410.
  - comparative value of peas, barley and malt as food for (Voelcker), 1884, A., 206.
  - dry and steeped maize as food for (Müller), 1885, A., 1149.
  - effect of increasing the proteids in food rations of (Kern and Wattenberg), 1891, A., 753.
  - sugar as food for (Henneberg), 1885, A., 1252; (Werner), 1886, A., 569; (Pfeiffer and Lehmann), 1887, A., 511.
  - amounts of nitrogen ingested and recovered in manure (Müntz and Girard), 1887, A., 175.
  - effect of copper on (Ellenberger and Hofmeister), 1884, A., 474.
  - physiological effect of lead on (Ellenberger and Hofmeister), 1885, A., 74.
  - lupine sickness in (Harmuth), 1883, A., 228.
  - urine of (Zacharewicz), 1884, A., 1204; (Mittelbach), 1888, A., 1216.
- **Silkworm**, Japanese (*Bombyx Mori*), development and feeding of (Kellner), 1884, A., 667, 1202; 1887, A., 68.
  - chemical changes attending the development of the embryo in the eggs of (Tichomiroff), 1885, A., 1000, 1150.

Dairy Products—
- **Butter** and **Butter-fat** (Schrodt and Henzold), 1891, A., 757.
  - chemistry of (Bell), 1883, A., 1160.

Dairy Products—
Butter and **Butter-fat**, nature of (Blyth and Robertson), 1889, P., 5.
  composition of (Schmitt), 1885, A., 309; (Vieth), 1891, A., 507, 508; (Johnstone), 1891, A., 849.
  composition of, from various districts (Duclaux), 1887, A., 996.
  melting point and composition of, as affected by nutrition (Mayer), 1889, A., 173.
  influence of food on the composition of (Ladd), 1889, A., 1023.
    See also Cattle feeding.
  acids of (Koefoed), 1892, A., 1113.
  amount of fatty acids in (Reichardt), 1884, A., 1219.
  acids, volatile fatty, of (Spallanzani), 1890, A., 186.
  amount of volatile fatty acids in rancid (Corbetta), 1891, A., 130.
  action of alcohol on (Cochran), 1888, A., 634.
Butter, artificial and natural, comparative value of, as articles of food (Mayer), 1884, A., 92, 622; (Uldall), 1884, A., 622.
  buffaloes' (Strohmer), 1888, A., 976.
  ewes' and goats', composition of (Schmitt), 1885, A., 309.
  goats', insoluble fatty acid in (Jehn), 1884, A., 535.
  melted (Eugling), 1885, A., 1171.
  "oily" (Storch), 1891, A., 603.
Butter making (Fleischmann and Sachtleben), 1883, A., 253; (Fjord; Otto), 1884, A., 135; (Schmoeger), 1884, A., 236; (Fleischmann; Blunck-Schilkowitz), 1884, A., 534; (Köhnke), 1884, A., 1448; (Schrodt), 1885, A., 105.
  influence of the concentration of the cream on (Sebelien), 1889, A., 300.
  from fresh and stale cream (Brünig), 1885, A., 620.
Butter colourings, examination of (Cornwall), 1887, A., 621.
  artificial (Schmitt), 1884, A., 236.
  carrot colour in (Moore), 1887, A., 310.
  detection of artificial colouring matters in (Martin), 1887, A., 1149.

Dairy Products—
Butter, preservation of (Hagemann), 1883, A., 254; (Fleischmann), 1884, A., 534; (Schrodt), 1885, A., 612.
Butter analysis (v. Bastalaer), 1883, A., 246; 1884, A., 120; (Munier), 1883, A., 247, 750; (Schmitt), 1883, A., 521; 1885, A., 197; (Beckurts), 1884, A., 779; (Leffmann), 1885, A., 196; (Hanssen; McCay), 1885, A., 197; (Moore), 1885, A., 300; (Fox and Wanklyn), 1885, A., 446; (Schmoeger), 1885, A., 603; (Zauni), 1885, A., 695; (Horsley), 1885, A., 696; (Wagner), 1886, A., 103; (Andouard), 1886, A., 283; (Mayer), 1886, A., 395; (Allen), 1886, A., 583; 1887, A., 1145; (Duclaux), 1886, A., 685; (Skalweit), 1887, A., 308; (Hager; Woll; Cornwall and Wallace), 1887, A., 309; (anon.), 1888, A., 93; (Warren), 1888, A., 199, 538; (Wollny), 1888, A., 200; (Bockairy), 1888, A., 1135; (Morse and Burton), 1888, A., 1347; (Mansfeld), 1889, A., 85; (Pagnoul and Grenet), 1889, A., 192; (Besana), 1889, A., 448, 658; (Nilson), 1889, A., 801; (Richmond), 1890, A., 93; (Johnstone), 1890, A., 93; 1891, A., 868; (Salvatori), 1890, A., 305; (Bondzyński and Rufi), 1890, A., 838; (Viollette), 1891, A., 130, 869; (Brullé), 1891, A., 506; (Firtsch), 1891, A., 868; (Lezé), 1891, A., 1300; (König and Hart), 1891, A., 1301; (Ellinger), 1891, A., 1401; (Erdélyi), 1892, A., 1532.
  detection of coco (*cacao*)-nut fat in (Muter), 1892, A., 391.
  detection of margarine in (Planchon), 1889, A., 318; (Lezé), 1891, A., 1300; (Rodewald), 1892, A., 1034.
  and margarine, discrimination of (Viollette), 1891, A., 130.
  See also Margarine in Main Index.
  detection of salicylic acid in (anon.), 1884, A., 372.
  estimation of free acids in (Besana), 1892, A., 924.
  estimation of fatty acids in (Reichardt), 1884, A., 1219; (Wollny), 1889, A., 1037;

Dairy Products—
- **Butter analysis**—
    - (Richmond), 1890, A., 93; (Johnstone), 1890, A., 93; 1891, A., 868; (Koefoed), 1892, A., 1113.
    - estimation of volatile fatty acids in (Schmitt), 1884, A., 1434.
    - estimation of dry residue and fat in (Gantter), 1888, A., 537.
    - estimation of salicylic acid in (Rémont), 1883, A., 522.
    - estimation of water in (Henzold), 1891, A., 1300.
- **Cheese**, chemistry of (Bell), 1883, A., 1160.
    - from skim-milk and foreign fat (Willard), 1884, A., 536; (Hansen), 1884, A., 942.
    - composition of (Vieth), 1883, A., 256.
    - inorganic constituents of (Eugling and Mähr), 1886, A., 290.
    - digestibility of varieties of (v. Klenze), 1885, A., 1252.
    - loss of weight during the ripening of (Martiny; Fleischmann), 1884, A., 1448.
    - American, composition of (Willard), 1884, A., 536.
    - blue (Schmoeger), 1884, A., 942.
    - Emmenthaler, composition and ripening of (Weidmann), 1883, A., 692; (Röse and Schulze), 1885, A., 207.
    - oleomargarine, composition of (Vieth), 1883, A., 256.
    - poisonous, ptomaine from (Vaughan), 1886, A., 373.
    - Russian, composition of (Kalantaroff), 1884, A., 700.
    - sheeps' milk, chemistry of (Sartori), 1891, A., 951.
    - estimation of fat in (Lezé and Allard), 1892, A., 392.
- **Cream**, souring of (Köhnke), 1884, A., 1448; (Storch), 1891, A., 603.
    - separation of (Gäbel), 1883, A., 253; (Fleischmann and Sachtleben), 1883, A., 253; 1884, A., 135; (Schmoeger), 1884, A., 236; 1886, A., 290; (Fjord), 1884, A., 1447; (Fleischmann and Berendes), 1885, A., 944; (Siewert), 1885, A., 1022.
    - detection and estimation of boric acid in (Cassal), 1891, A., 619.
    - estimation of fat in (v. T.), 1885, A., 844; (Schmid), 1888, A., 1347; (Lezé and Allard), 1892, A., 392.

Dairy Products—
- **Milk**, chemistry of (Bell), 1883, A., 1160.
    - physiology of the formation of (Thierfelder), 1884, A., 914.
    - secretion of, influence of movement on (Munk), 1884, A., 1205.
        - alteration in, under the influence of drugs (Stumpf), 1883, A., 818.
        - influence of atropine on (Hammerbacher), 1884, A., 1396.
        - influence of pilocarpine on (Hammerbacher), 1884, A., 1396; (Cornevin), 1892, A., 365.
        - influence of exhausted beetroot pulp on (Andouard and Dézaunay), 1884, A., 347; 1885, A., 73.
        - influence of oat- and wheat-bran on (Schrodt and Hanssen), 1884, A., 854.
        - influence of cotton-cake on (anon.), 1884, A., 623; (Siewert), 1884, A., 669.
        - influence of distillers' waste on (Schmoeger and Neubert), 1884, A., 194.
        - influence of malt sprouts and the amides contained in them on (Schrodt and Hanssen), 1885, A., 929.
        - See also Cattle feeding.
    - a physical property of (Recknagel), 1884, A., 941.
    - specific gravity of (Vieth), 1888, A., 634; 1889, A., 915.
    - composition of (Jenkins), 1884, A., 533; (Fleischmann), 1885, A., 849; (Vieth), 1886, A., 168; 1888, A., 620.
        - of abnormal quality (Lloyd), 1890, T., 201; P., 3.
        - during early and late periods of lactation (Kühn), 1891, A., 97.
        - produced on English dairy farms (Vieth), 1889, A., 914.
        - in Holland (Gäbel), 1884, A., 1396.
        - at Kiel experimental dairy farm (Schrodt), 1884, A., 1396.
        - changes in the (Faber), 1888, A., 862.
    - changes in (Vieth), 1883, A., 757.
    - changes in, during milking (Schmidt-Mülheim), 1884, A., 93.
    - influence of the frequency of milking on (Erlenmeyer), 1883, A., 227; (Schmoeger), 1885, A., 1000.

Dairy Products—

- **Milk**, changes in, by freezing (Kaiser and Schmieder), 1887, A., 745.
  - composition of the ash of (Schrodt and Hanssen), 1884, A., 1397.
  - casein in (Duclaux), 1884, A., 762; (Eugling), 1885, A., 1083.
  - digestibility of casein from heated (Hoffmann), 1883, A., 487, 815.
  - the salts of, and their relation to the behaviour of casein (Söldner), 1889, A., 634.
  - citric acid in (Soxhlet), 1889, A., 178; (Henkel), 1891, A., 1276.
    - origin of (Scheibe), 1891, A., 1276.
  - variations of the fat of (Nilson), 1888, A., 861.
  - of hill-bred cows, amount of fat and dry matter in (Siedel), 1891, A., 1275.
  - from cows of different breeds, percentage of fat in (anon.), 1884, A., 94.
  - of shorthorns, composition of (Vieth), 1886, A., 168.
  - amount of nitrogen in (Nilson), 1890, A., 652.
  - variations in the proportion of phosphoric acid in (Andouard), 1887, A., 856.
  - proteids of (v. Struve), 1883, A., 1174; (Biedert), 1885, A., 922; 1887, A., 388; (Sebelien), 1885, A., 1000; 1889, A., 450; 1891, A., 951; (Dogiel), 1885, A., 1149; (Halliburton), 1891, A., 339.
    - peptonised (Horton-Smith), 1891, A., 953.
  - poisonous ptomaine in (Firth), 1887, A., 389.
  - buffaloes' (Strohmer), 1888, A., 976.
  - goats', composition of (Vieth), 1886, A., 168.
  - of Herbivora, estimation of nitrogen in the (Weiske), 1886, A., 1072.
  - mares', composition of (Vieth), 1885, A., 849.
  - sheep's (Sartori), 1891, A., 951.
  - action of calcium salts on (Ringer), 1891, A., 340.
  - effect of bad odours on (Schrodt), 1883, A., 254.
  - digestion of, and the substances which increase its digestibility (Uffelmann), 1884, A., 192.
    - time required for the (Jessen), 1884, A., 470.

Dairy Products—

- **Milk**, boiled, digestibility of (Raudnitz), 1889, A., 1225; 1890, A., 650.
  - is alcohol eliminated by the? (Klingemann), 1892, A., 365.
  - coagulation, influence of salts on (Ringer and Sainsbury), 1890, A., 1176.
    - cause of the, during thunder storms (v. Liebig), 1892, A., 1370.
  - thickening of (Recknagel), 1884, A., 941.
  - refrigerator, Oberbockstruck's (Wüst and Kirchner), 1885, A., 1022.
  - condensed, preparation of (anon.), 1883, A., 759.
  - preservation of (Barff), 1883, A., 253; (Busse; Dietzell; Fleischmann), 1883, A., 254; (Fleischmann and Morgen), 1883, A., 757; (anon.), 1883, A., 758; (Schrodt), 1885, A., 612; (Hueppe and Eugling), 1885, A., 1170.
    - changes occurring in the (Loew), 1883, A., 634.
    - by high temperatures (100°) for children's food (Baginsky), 1885, A., 679.
    - Thiel's pasteurising apparatus for the (Fleischmann), 1885, A., 105.
  - sterilisation of (Storch), 1891, A., 603.
    - improvements in Soxhlet's apparatus for the (Soxhlet), 1892, A., 518.
  - alcoholic fermentation of (Martinand), 1889, A., 916.
  - chemical action of microbes on (Warington), 1888, T., 734.
  - changes which it undergoes through the agency of microbes (Hueppe), 1885, A., 416.
  - action of rennet on (Eugling), 1885, A., 1083.
  - action of Blumenthal's prepared rennet on (Schmoeger), 1884, A., 535.
  - action of rennet from the seeds of *Withania coagulans* on (Lea), 1884, A., 535.
  - ferment for making "kephir" (Kern), 1883, A., 229.
  - lactic ferment in (Hueppe), 1885, A., 1170.
  - putrefaction of (Winternitz), 1892, A., 1116.

Dairy Products—

Milk, bitter (Liebscher), 1885, A., 105.

blue (Reiset), 1883, A., 742.

organisms of (Hueppe), 1885, A., 417.

isolation of the bacterium which produces (Hueppe and Eugling), 1885, A., 1171.

blue, and ropy (Schmoeger), 1884, A., 942.

changes in, by udder tuberculosis (Storch), 1890, A., 652.

Butter-milk, utilisation of, in bread making (Müller), 1883, A., 1037.

Skim milk, nutritive value of (König), 1883, A., 102.

utilisation of (Folkers), 1884, A., 534.

feeding calves with (Paul), 1883, A., 675; (Barth; Henningsen), 1884, A., 852.

Milk adulteration and **analysis**—

Milk, adulteration of (Sambuc), 1885, A., 299; (Perron), 1890, A., 428.

presence of nitrites and nitrates in, an evidence of adulteration (Schrodt), 1887, A., 87.

adulteration of, with goats' milk (Gerber), 1886, A., 924.

analysis of (Pfeiffer), 1883, A., 521; (Vogel), 1884, A., 1219; (Dechan and Maben), 1885, A., 446; (Adams; Johnstone), 1886, A., 583; (Allen and Chattaway), 1887, A., 186; (Short), 1887, A., 751; (Palm), 1887, A., 1003; (anon.), 1888, A., 94; (Bourcart), 1889, A., 1090; (Davenport), 1890, A., 670; (Watts), 1890, A., 929; (Ballario and Revelli), 1890, A., 1472; (Shutt), 1891, A., 1299; (Hill), 1892, A., 390.

detection of benzoic acid in (Meissl), 1883, A., 385.

detection of boric acid in (Meissl), 1883, A., 385; (Kretzschmar), 1887, A., 864; (Cassal), 1891, A., 619.

detection of sodium carbonate in (Bachmeyer), 1883, A., 385.

detection of sodium hydrogen carbonate in (Padé), 1889, A., 1244.

estimation of boric acid in (Cassal), 1891, A., 619.

estimation of casein in (Frenzel and Weyl), 1885, A., 936; (Roux), 1891, A., 1404.

estimation of casein and lactalbumin in condensed (Faber), 1890, A., 92.

Dairy Products—

Milk adulteration and **analysis**—

Milk, estimation of citric acid in (Scheibe), 1891, A., 1276.

estimation of dry residue in (Gantter), 1888, A., 537.

estimation of fat in (Emmerich), 1883, A., 246; (Liebermann), 1884, A., 372; 1885, A., 695; (Geissler), 1885, A., 1014; (Caldwell and Parr), 1886, A., 283; (Cronander), 1887, A., 308; (Morse and Piggot), 1887, A., 752; (Faber), 1887, A., 1144; (Gantter; Morse and Burton), 1888, A., 537; (Schreib), 1888, A., 1135; (Schmid), 1888, A., 1347; (Short), 1889, A., 1037; (Patrick), 1889, A., 1250; (Richmond), 1890, A., 91; (Parsons), 1890, A., 92; (Stokes), 1890, A., 304; 1892, A., 391; (Lezé), 1890, A., 837; (Langkopf), 1890, A., 1346; (Sjöström), 1891, A., 508; (Babcock), 1891, A., 509; (Gorodetzky), 1891, A., 625; (Molinari), 1891, A., 1299; (Kühn), 1891, A., 1402; (Shutt), 1891, A., 1559; (Gottlieb), 1892, A., 549; (Nilson), 1892, A., 550; (Pinette), 1892, A., 1134; (Leffmann and Beam), 1892, A., 1532.

estimation of fat in the products from (Lezé and Allard), 18 2, A., 391.

estimation of fat in skim (Fleischmann), 1884, A., 1435.

estimation of fat in sour (Kühn), 1890, A., 304.

estimation of glucose, lactose and sucrose in condensed (Bignamini), 1885, A., 443.

estimation of lactose in (Stephens), 1886, A., 582; (Kühn), 1891, A., 127.

estimation of lactose in, by optical methods (Wiley), 1885, A., 601; (Schmoeger), 1885, A., 693; (Vieth), 1889, A., 315.

estimation of the proteids in (Parr), 1886, A., 272.

estimation of salicylic acid in (Rémont), 1883, A., 522.

estimation of sodium hydrogen carbonate in (Padé), 1889, A., 1244.

Milk-serum, analyses of (Söldner), 1889, A., 635.

- **Honey** composition and adulteration of (Sieben), 1885, A., 693.
  - unfermentable dextrorotatory constituent of (v. Raumer), 1890, A., 356.
  - harvest, correct time for (Zwilling), 1885, A., 590.
  - eucalyptus (Maquenne), 1890, A., 122.
  - pine tree (Wiley), 1891, A., 412.
  - analysis of (Hehner; Bishop), 1885, A., 444.
  - estimation of water in (Wiley and Broadbent), 1886, A., 282.
- Feeding Experiments—
  - **Aftermath** and first grass (Rüfin), 1885, A., 586.
  - **Albuminoids.** See Proteids.
  - **Asparagine**, importance of, for feeding (Weiske), 1888, A., 80; (König), 1891, A., 1525.
  - **Barley, peas** and **malt**, comparative feeding value of (Voelcker), 1884, A., 206.
  - **Beans**, digestibility of (Lehmann and Vogel), 1891, A., 595.
  - **Beet diffusion residues**, frozen and unfrozen, composition of (Stutzer), 1892, A., 1512.
    - preservation of (anon.), 1883, A., 695.
    - dried washed, preservation of (Hellriegel), 1885, A., 685.
    - preservation of, in silos (Liebscher), 1886, A., 275.
    - drying of (Reinhardt), 1884, A., 1411; (Märcker), 1885, A., 79.
    - feeding value of (Morgen), 1883, A., 680; (Märcker), 1884, A., 921; 1887, A., 521.
    - exhausted, as food for cows (Andouard and Dézaunay), 1884, A., 347; 1885, A., 73.
    - feeding cows with (Schrodt and Hanssen), 1885, A., 833; (Stutzer and Werner), 1886, A., 953.
    - fresh and dried, digestibility of (Pfeiffer and Lehmann), 1886, A., 1054.
    - decomposition of (Märcker), 1883, A., 1025.
  - **Beet-seed** as fodder for cattle (Simon-Legrand), 1884, A., 631; (Pellet), 1885, A., 425.
  - **Bran**, food value of (Rubner), 1884, A., 622.
  - **Brushwood**, food value of (Stutzer), 1892, A., 1511.

- Feeding Experiments—
  - **Carrots**, digestibility of, with hay and oats by the horse (v. Wolff), 1885, A., 72.
  - **Cattle-cake**, estimation of oil in (Pickering), 1885, A., 844.
  - **Cattle-foods**, composition of (Dietrich), 1886, A., 1067.
    - mildew, etc., in (Emmerling), 1884, A., 1411.
    - addition of sugar to (Märcker), 1885, A., 1149; (Holdefleiss), 1886, A., 727; (Pfeiffer and Lehmann), 1887, A., 511.
    - basic phosphate of lime as an addition to (Cohn), 1884, A., 194.
  - **Cellulose**, does it economise the decomposition of proteid in the nutrition of Herbivora? (v. Knieriem), 1885, A., 916; 1888, A., 515; (Weiske, Schulze and Flechsig), 1886, A., 728; (Weiske), 1888, A., 618.
    - digestion of, by Herbivora (Brown), 1892, T., 352; P., 30.
    - digestion of, by the horse (Hofmeister), 1885, A., 916.
  - **Cider-marc**, use of, as fodder (Lechartier), 1885, A., 834.
  - **Cocoanut-meal** as food for the horse (anon.), 1884, A., 852.
  - **Corn-silage**, composition of (Richardson), 1885, T., 82.
  - **Cotton-cake** (Renouard), 1883, A., 111.
    - undecorticated (Dietrich), 1884, A., 100.
    - influence of feeding with, on milk secretion (anon.), 1884, A., 623; (Siewert), 1884, A., 669.
    - as fodder for cows (De la Tréhonnais), 1884, A., 1411.
    - and cotton-meal, feeding values of (Weiske), 1886, A., 272.
  - **Cotton-plant**, feeding value of (McBryde), 1892, A., 1510.
  - **Cotton-seed-foods**, choline and betaine in (Maxwell), 1892, A., 380.
  - **Dari-seeds**, composition of (Voelcker), 1884, A., 630.
  - **Earth-nut cake**, fungus spores in (Holdefleiss), 1884, A., 356.
    - poisoning of cattle by (Anacker), 1883, A., 818.
    - feeding cows with (Schrodt), 1888, A., 174.
  - **Earth-nut-meal**, feeding value of (Emmerling), 1892, A., 92.
    - as food for cows (Wolde), 1883, A., 820.

Feeding Experiments—

- **Earth-nut-meal** compared with rye-meal as food for cows (Meyer), 1885, A., 1252.
  - feeding horses with (Freytag and v. der Becke), 1884, A., 100.
- **Earth-nut-meal** and -cake, adulteration of (Hiltner), 1892, A., 1535.
- **Flesh-meal**, feeding horses with (Findeisen), 1883, A., 102.
- **Fodders**, green, chemical alterations in, during their conversion into silage (Kellner), 1884, T., 612; (Richardson), 1885, T., 80.
  - valuation of (Emmerling), 1884, A., 100.
  - relative values of (v. Knieriem), 1890, A., 395.
  - production of so-called sweet (Mach), 1890, A., 82.
  - composition of (Petermann), 1883, A., 111; (Voelcker), 1884, A., 630; (Märcker), 1886, A., 645.
  - composition and relative digestibility of (Ladd), 1886, A., 646.
  - composition of the fats of (Stellwaag), 1890, A., 657.
  - amount of fat and albuminoids in (Wagner), 1884, A., 631.
  - different, proportion of nitrogen in the form of amides, albumin and nuclein in (Klinkenberg), 1883, A., 748.
  - acid, loss of nitrogen in (Woll), 1890, A., 1339.
  - influence of, on the production of fat and lean in pigs (Henry), 1888, A., 1319.
  - artificial digestion of (Niebling), 1890, A., 1451.
  - influence of heat on the digestibility of (Stutzer), 1891, A., 752.
  - action of hydrochloric acid and pepsin on the digestible albumin of (Stutzer), 1890, A., 651.
  - influence of sodium chloride on the digestion of albumin in (Siewert), 1888, A., 859.
  - feeding of cattle with dry (anon.), 1883, A., 816.
  - for cows, value of (Walther), 1883, A., 820; (v. Knieriem), 1890, A., 395.
  - acid and compressed, analysis of (König), 1890, A., 1477.
  - containing drying oils, apparatus for drying (Foerster), 1890, A., 670.

Feeding Experiments—

- **Fodders**, estimation of fat in (Bühring), 1888, A., 633; (Patterson), 1890, A., 930.
  - estimation of free fatty acids in (Loges and Claessen), 1891, A., 770.
  - estimation of starch in (Leclerc), 1890, A., 1197.
  - estimation of sugars and starch in (Ladd), 1888, A., 748.
- **Grains**, dried beer, as horse fodder (Sattig), 1886, A., 1066.
- **Grass**, first, and aftermath (Rüfin), 1885, A., 586.
- **Grasses**, composition and digestibility of the proteids of (Emmerling and Loges), 1890, A., 657.
- **Hay**, comparison of, with silage as fodder (Broekema and Mayer), 1886, A., 737.
  - and silage from a poor quality of grass (Sutton), 1883, A., 1026.
  - grown on marsh lands, nutritive value of (Petersen), 1885, A., 929.
  - digestibility of (Lehmann and Vogel), 1891, A., 595.
  - clover-, digestibility of, by the horse and sheep (v. Wolff), 1885, A., 410.
  - clover- and meadow-, digestibility of, by the horse and sheep (v. Wolff), 1885, A., 411.
  - meadow-, artificial digestion of (Kern), 1883, A., 1025; (v. Wolff), 1885, A., 410.
    - treated with hot and cold water, digestibility of (Kühn), 1883, A, 816.
- **Hop foliage**, feeding value of (Wein), 1886, A., 577.
- **Horse-chestnuts** as cattle food (Kaehler), 1884, A., 1411.
- **Leguminosæ**, straw of, digestibility of (Weiske), 1884, A., 482.
- **Linseed**, feeding value of (Langlebert), 1884, A., 852.
- **Linseed cake**, adulteration of (Klien), 1885, A., 425.
  - estimation of fat in (Klopsch), 1888, A., 1349; (Wrampelmeyer), 1889, A., 1251.
  - estimation of oil and water in (Baessler), 1889, A., 321.
- **Lucerne**, digestibility of, by the horse and sheep (v. Wolff), 1885, A. 410.
- **Lupine seeds**, purified, digestibility of, and the working power of the horse when fed with lupines and oats (Kellner), 1883, A., 102.

Feeding Experiments—
- **Lupines**, feeding cattle on (Seeling), 1884, A., 1211.
- **Maize fodder**, experiments with, at Grignon, 1883 (Dehérain), 1884, A., 1070.
  - composition of (Richardson), 1885, T., 85; (Sestini and Dicocco), 1885, A., 1087.
  - hygienic action of (Chatin), 1883, A., 488.
  - dry and steeped, for sheep (Müller), 1885, A., 1149.
  - for horses (Gerssdorf), 1884, A., 355.
- **Maize silage** (Schulze), 1887, A., 521; (Jenkins), 1889, A., 743; (Armsby and Caldwell), 1891, A., 359.
  - for cows (anon.), 1884, A., 355; (Rose), 1885, A., 1149.
  - composition of (Richardson), 1885, T., 85.
- **Malt, barley** and **peas**, comparative feeding value of (Voelcker), 1884, A., 206.
- **Malt sprouts**, influence of, and the amides contained in them on the yield of milk (Schrodt and Hanssen), 1885, A., 929.
- **Mangels**, feeding value of various (Mayer), 1885, A., 1259.
- **Oat-bran**, influence of, on the secretion of milk (Schrodt and Hanssen), 1884, A., 854.
- **Oats**, feeding value of (Sanson), 1884, A., 914; (Müntz and Girard), 1885, A., 281; (Märcker), 1889, A., 184.
- **Oil-cakes**, examination of (Dircks), 1883, A., 245; (anon.), 1883, A., 751.
- **Palm-nut-cake** and palm-nut-meal (Holdefleiss), 1884, A., 631.
  - feeding cows with (Schrodt), 1888, A., 174.
- **Palm-nut-meal**, estimation of fat in (v. Wilm), 1885, A., 290, 1164.
- **Palm-oil residue** as fodder (Märcker), 1884, A., 355.
- **Peas, barley** and **malt**, comparative feeding value of (Voelcker), 1884, A., 206.
- **Pentose carbohydrates**, digestibility of (Stone), 1892, A., 645, 653.
- **Phosphate**, bone, used for cattle feeding, arsenic in (Fresenius), 1889, A., 548.
- **Poppy-cake**, estimation of fat in (Baessler), 1890, A., 306.
- **Potato spirit liquor**, composition of (Kühn), 1891, A., 105.

Feeding Experiments—
- **Potatoes**, digestibility of, with hay and oats by the horse (v. Wolff), 1885, A., 72.
- **Press-cake**, new process for preparing, from maize, etc. (Burow), 1883, A., 695.
- **Proteids** of fodders (Wagner), 1884, A., 631; (Stutzer), 1891, A., 858.
  - in peach kernels and sesame-cake (Ritthausen), 1883, A., 360.
  - relation of, to digestive ferments (Stutzer), 1887, A., 1129.
  - relative digestibility of (Ladd), 1889, A., 734.
  - effect of certain organic acids on the digestion of (Stutzer), 1891, A., 751.
  - influence of oil or fat on the digestibility of (Stutzer), 1891, A., 752.
  - action of "saccharin" on the digestion of (Stutzer), 1890, A., 1450.
  - artificial digestion of (Stutzer), 1890, A., 275.
  - of grasses, digestibility and composition of the (Emmerling and Loges), 1890, A., 657.
  - nutritive value of (Gabriel), 1890, A., 394.
  - animal and vegetable, relative nutritive value of (Rutgers), 1888, A., 515.
  - in food rations of grown animals, effect of an increase in (Kern and Wattenberg), 1891, A., 753.
  - formation of nitrogenous organic bases by the decomposition of, in the vegetable organism (Schulze), 1891, A., 856.
  - changes of, in silage (Schulze), 1888, A., 1329.
- **Rape-cake**, adulteration of (Klien), 1885, A., 425.
- **Rice-meal**, digestibility of (Lehmann and Vogel), 1891, A., 595.
  - as food for cows (Wolde), 1883, A., 820.
- **Rice-straw**, digestibility of (Kellner), 1890, A., 546.
- **Rye**, green, digestibility of (Frear), 1889, A., 735.
- **Rye-meal** compared with earth-nut-meal as food for cows (Meyer), 1885, A., 1252.
- **Serradella** at various ages, composition and digestibility of (Weiske), 1884, A., 206.

FEEDING EXPERIMENTS—

- **Silage** and **ensilage** (Toms), 1884, A., 864.
  - preparation of (Kellner and Sawano), 1890, A., 546.
  - composition of (Smetham), 1884, A., 770; (Aitken), 1885, A., 1257.
  - experiments with, in Holland (Theil), 1887, A., 1062.
  - experiments with, at Woburn (Voelcker), 1890, A., 286.
  - experiments with various fodders (Kirchner), 1885, A., 422.
  - processes (Cserháti), 1888, A., 522.
  - in the open air (Barth), 1888, A., 523.
  - nitrogenous matters in (Kinch), 1884, T., 122.
  - feeding experiments with (Lawes), 1885, A., 1088, 1255.
  - comparison of, with hay as fodder (Broekema and Mayer), 1886, A., 737.
  - and hay from a poor quality of grass (Sutton), 1883, A., 1026.
  - changes which take place in the conversion of grass into (Lloyd), 1884, A., 772.
  - changes in fodder during (Kellner and Sawano), 1885, A., 1087.
  - chemical alterations in green fodder during its conversion into (Kellner), 1884, T., 612; (Richardson), 1885, T., 80.
  - changes occurring during (Kellner, Kozai and Mori), 1891, A., 1287.
  - changes of nitrogenous matter during (Schulze), 1888, A., 1329.
  - decomposition of organic ammoniacal compounds during (Woll), 1889, A., 1030.
  - preservation of sliced beets in (Liebscher), 1886, A., 275.
  - of beet-leaves, loss of weight in the (Märcker), 1885, A., 423.
  - and acidification of green fodder (König), 1885, A., 183.

FEEDING EXPERIMENTS—

- **Silage** and **ensilage** of frozen potatoes (Fittbogen and Foerster), 1885, A., 184.
  - analyses of (Kinch), 1884, T., 124; (Weiske), 1884, A., 1409; (Aitken), 1885, A., 1257.
- **Sodium chloride**, influence of, on the digestion of albumin in fodders (Siewert), 1888, A., 859.
- **Spurrey silage** (Munro) 1886, A., 173.
- **Starch refuse** as fodder (Saare), 1885, A., 1155.
- **Sugar** as an addition to cattle food (Märcker), 1885, A., 1149; (Holdefleiss), 1886, A., 727; (Pfeiffer and Lehmann), 1887, A., 511.
  - feeding sheep with (Henneberg), 1885, A., 1252; (Werner), 1886, A., 569.
- **Sunflower-seed-cake** as fodder for cows (Schrodt and v. Peter), 1884, A., 483.
- **Swedes**, digestibility of (Lehmann and Vogel), 1891, A., 595.
- *Symphytum asperrimum*, comparative feeding value of (Weiske), 1883, A., 613; (Märcker), 1886, A., 646.
- **Vetches**, feeding value of some (Döhn; Nobbe), 1883, A., 612.
- **Wheat-bran**, influence of, on the secretion of milk (Schrodt and Hanssen), 1884, A., 854.
  - treated with hot and cold water, digestibility of (Kühn), 1883, A., 816.
- **Wheat-chaff**, digestibility of, with different methods of preparation (Kühn), 1884, A., 772.
- **Wheat-grain**, alimentary value of the different parts of (Girard), 1885, A., 678.
- **Wheat-meal**, nutritive value of (Blyth), 1890, A., 396.
- **White mustard** as fodder (Brümmer), 1884, A., 864.
- **Woody fibre** as fodder (Märcker), 1884, A., 864.

PLANTS.

PLANT COMPOSITION AND METABOLISM—

- **Plants**, chemistry of (Balló), 1884, A., 765.
  - histochemistry of (Rosoll), 1884, A., 847.
  - chemical processes in (Emmerling), 1884, A., 670.

PLANT COMPOSITION AND METABOLISM—

- **Plants**, development and absorption of heat by (Bonnier), 1886, A., 483.
  - heat and carbonic anhydride given out by (Rodewald), 1888, A., 979.

Plant composition and metabolism—
Plants, evolution of carbonic anhydride by, in absence of oxygen (Wilson), 1883, A., 105.
  interchange of material in amylaceous (Müller), 1883, A., 497.
  blood pigment as a gauge of gaseous exchange in (Engelmann), 1889, A., 182.
  variations of the internal atmosphere of (Peyrou), 1889, A., 641.
  essential elements of (Munro), 1886, A., 389.
  constituents and properties of some aquatic (Niederstadt), 1884, A., 108.
  influence of acids on the evolution of gases by (Mangin), 1890, A., 190.
  formation of organic acids in (Palladin), 1888, A., 1126.
  acetic acid in (Borgmann), 1883, A., 611.
  citric acid in (Claassen), 1891, A., 129.
  formic acid in (Borgmann), 1883, A., 611.
  oxalic acid in (Berthelot and André), 1885, A., 1164; 1886, A., 734; (Wakker), 1888, A., 1126; (Kohl; Wehmer), 1890, A., 191; (Acqua), 1890, A., 1182; (Monteverde), 1891, A., 857.
  aluminium in (Yōshida), 1887, T., 748; (Ricciardi), 1890, A., 818.
  allantoin, asparagine, hypoxanthine and guanine in (Schulze and Bosshard), 1885, A., 1007.
  influence of carbohydrates on the accumulation of asparagine in (Monteverde), 1892, A., 91.
  boron in (Crampton), 1889, A., 794; (Bechi), 1890, A., 656; (Hotter), 1890, A., 1338.
  carbonates in (Berthelot and André), 1885, A., 1086.
  cholesterol in (Schulze), 1890, A., 1457.
  closed carbon chains, formation of, in (Semmler), 1891, A., 655.
  diastase, function of, in (Wortmann), 1891, A., 856.
  action of diastase on starch grains within (Krabbe), 1891, A., 605; 1892, A., 92.
  glycogen in (Errera), 1884, A., 354.
  guanidine in (Schulze), 1892, A., 908.
  gum in, which yields xylose (Hébert), 1892, A., 1371.
  solid hydrocarbons in (Abbot and Trimble), 1888, A., 1329; (Gutzeit), 1889, A., 68.

Plant composition and metabolism—
Plants, hydrochloric acid, formation of, in (Detmer), 1885, A., 683.
  elements of lactose in (Müntz), 1886, A., 575, 643.
  lecithin in (Heckel and Schlagdenhauffen), 1886, A., 1064; (Schulze and Steiger), 1889, A., 645.
  manganese in (Maumené), 1885, A., A., 421; (Campani), 1885, A., 832.
  methylic alcohol from (Maquenne), 1886, A., 274.
  nitrogen necessary for (Thaer), 1885, A., 75.
  nitrogen, sources of the, of (Dietzell), 1885, A., 418; (Lawes and Gilbert), 1888, A., 745; 1892, A., 367; (Hellriegel and Wilfarth), 1889, A., 640; (Schmitter), 1890, A., 1023.
  rain as a source of nitrogen for (Tuxen), 1892, A., 233.
  nitrogen, absorption of, by (Boutelleau), 1884, A., 1401; (Atwater), 1885, A., 1005; 1887, A., 515; (Hellriegel and Wilfarth), 1888, A., 742; (Gautier and Drouin), 1888, A., 746, 871, 1127; (Chevreul; Wilfarth), 1888, A., 979; (Berthelot), 1888, A., 1330; (Bréal), 1888, A., 1330; 1890, A., 79, 660; 1892, A., 1508; (Lawes and Gilbert), 1890, A., 814; 1892, A., 367; (Petermann), 1890, A., 816; (Atwater and Woods), 1891, A., 353, 491; (Schlœsing and Laurent), 1891, A., 353; 1892, A., 378, 523, 1021; (Prazmowski), 1891, A., 607; (Frank), 1891, A., 764; 1892, A., 370, 1507; (Frank and Otto), 1891, A., 855; (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533; (Beyerinck), 1891, A., 1539; 1892, A., 1019; (Immendorff), 1892, A., 374.
  gain of nitrogen by (Dehérain), 1883, A., 373, 749; (Lawes), 1889, A., 922.
  loss of nitrogen by, during germination and growth (Atwater and Rockwood), 1887, A., 292.
  maintenance and increase of the amount of nitrogen in (König), 1888, A., 523.
  a nitrogenous constituent of (Schulze and Bosshard), 1886, A., 157.
  nitrogenous compounds in (Schulze), 1886, A., 955.

Plant composition and metabolism—

Plants, absorption of nitrogenous foodstuffs by (Atwater), 1884, A., 1401; (Molisch), 1887, A., 989.
  - nitrates, formation of, in (Berthelot and André), 1885, A., 581; (Gossels), 1887, A., 389; (Berthelot), 1890, A., 543.
  - are nitrates formed in the organism of? (Kreusler), 1887, A., 686; (Schulze), 1887, A., 859.
  - nitrates, elaboration of, in (Loew), 1890, A., 1182.
  - nitric acid, origin and fate of, in (Frank), 1888, A., 979.
  - nitrites in (Molisch), 1887, A., 989; (Modderman), 1889, A., 295.
  - evolution of ammonia and volatile nitrogen compounds from (Berthelot), 1889, A., 1238.
  - oxidation in (Reinke), 1888, A., 741.
  - rôle of oxygen in (Palladin), 1888, A., 1125.
  - exhalation of oxygen by fleshy-leaved, in absence of carbonic anhydride (Mayer), 1887, A., 988.
  - emission of oxygen by, in coloured light (Pringsheim), 1886, A., 642.
  - easily oxidisable constituents of (Reinke), 1883, A., 880.
  - pectic compounds in (Mangin), 1890, A., 80.
  - phloroglucinol, formation of, in (Waage), 1891, A., 605.
  - phloroglucinol, function of, in (Waage), 1892, A., 1120.
  - phosphorus in (Berthelot and André), 1888, A., 384, 743.
  - potassium in (Berthelot and André), 1888, A., 190.
  - proteids, formation of, in (Emmerling), 1885, A., 289; 1887, A., 615; (Müller), 1887, A., 70; (Chrapowitzki), 1888, A., 868.
  - proteid substance in the latex of (Green), 1886, A., 828.
  - proteids, decomposition of, in, kept in the dark (Schulze and Kisser), 1889, A., 642.
  - proteids, products of the decomposition of, in (Palladin), 1889, A., 642.
  - protophyllin in etiolated (Timiriazeff), 1889, A., 1236.
  - sodium chloride in (Lesage), 1892, A., 651.
  - starch in. See Carbohydrates in Main Index.
  - sucrose, formation of, in etiolated (Schulze), 1890, A., 282.

Plants—

Plants, sulphur in (Berthelot and André), 1888, A., 384; 1891, A., 606.
  - substance containing sulphur in cruciferous (Smith), 1888, A., 869.
  - tannin in (Waage), 1891, A., 770.
  - tannin, function of, in (Kutscher), 1884, A., 628; (Büsgen), 1890, A., 819; 1891, A., 104.
  - distribution of water in heliotropically inclined parts of (Thade), 1884, A., 352.
  - of different species, experiments in grafting between (Strasburger), 1886, A., 645.
  - **Ash** of bracken (*Pteris aquilina*), of broom (*Genista pilosa*) and of *Erica vulgaris*, composition of (Petermann), 1884, A., 207.
    - of the Equisetaceæ (Dieulafait), 1885, A., 583.
    - of flowering plants, aluminium in (Yōshida), 1887, T., 748.
    - of leaves grown in the earth and under water culture (Councler), 1884, A., 98.
    - of strawberries (Munro), 1885, A., 183.
    - of sugar beet, rare constituents of (v. Lippmann), 1889, A, 295.
    - distribution of, in trees (Weber), 1888, A., 742.
    - of seeds of forest trees (Hornberger), 1884, A., 353; 1885, A., 1255.
    - of wheat-grain and wheat-straw grown at Rothamsted under different seasons and manures, composition of (Lawes and Gilbert), 1884, T., 305.
    - estimation of chlorine in (Jolles), 1889, A., 73.
    - wood-, composition of (Wagner), 1885, A., 834.
  - **Cells**, chemico-microscopical researches on (Griffiths), 1883, T., 195.
    - chemical composition of the membrane of (Schulze), 1889, A., 916; 1890, A., 1456; 1891, A., 238, 1178; 1892, A., 907; (Schulze, Steiger and Maxwell), 1890, A., 283.
    - deprived of starch, behaviour of formose in contact with (Wehmer), 1888, A., 739.
    - action of various gases, especially nitrous oxide, on (Detmer), 1883, A., 105.

Plants—

- **Cells**, production of oxygen by (Pringsheim), 1888, A., 741.
  - elimination of oxygen from (Engelmann), 1883, A., 105.
  - dependence of the assimilation of, on their respiration of oxygen (Pringsheim), 1888, A., 185.
  - oxidation in (Pfeffer), 1889, A., 1028.
  - autoxidation in (Reinke), 1883, A., 819.
  - oxidation in dead (Johannsen), 1888, A., 741.
  - iron sulphate in (Griffiths), 1883, T., 195.
  - behaviour of, with alkaline silver solution (Loew and Bokorny), 1890, A., 401.
  - liberation of silver by (Bokorny), 1888, A., 980.
  - reduction of silver nitrate by (Pfeffer), 1889, A., 1028.
  - absorption of aniline colours by (Pfeffer), 1887, A., 747.
  - part played by vegetable acids in causing the turgescence of (de Vries), 1884, A., 1064.
  - epidermis of, structure and functions of the (Westermaier), 1884, A., 1066.
  - sap of. See Sap.
- **Chlorophyll** (Mayer), 1884, A., 1366; (Schimper), 1884, A., 1367; (Guignet), 1885, A., 551; (Schunck), 1885, A., 1241; 1887, A., 972; 1889, A., 279; (Jodin), 1886, A., 476; (Tschirch), 1887, A., 1116; (Wollheim), 1888, A., 723.
  - in the living cell and assimilation of carbon (Reinke), 1885, A., 182.
  - from the deep sea (Hartley), 1886, A., 367.
  - in sponges, etc. (MacMunn), 1887, A., 613.
  - conditions of the development, and of the activity of (Gilbert), 1886, A., 92.
  - influence of phosphoric acid on the formation of (Loew), 1892, A., 1261, 1372.
  - pure, preparation of (Tschirch), 1884, T., 57.
  - constitution of (Schunck), 1884, A., 666.
  - a compound of iron with a glucoside (Griffiths), 1884, A., 848.
  - absorption spectrum of (Stenger), 1887, A., 693.

Plants—

- **Chlorophyll**, spectra of blue and yellow (Hartley), 1890, P., 161; 1891, T., 106.
  - chemical and physiological action of light on (Timiriazeff), 1883, A., 697; 1885, A., 714.
  - activity of, under the ultra-violet rays (Bonnier and Mangin), 1886, A., 387.
  - solution, destruction of, by light (Reinke), 1885, A., 991.
  - crystals of (Monteverde), 1892, A., 1355.
  - functions of (Nagamatsz), 1887, A., 516.
  - decomposition of carbonic anhydride by (Regnard), 1886, A., 254; (Timiriazeff), 1886, A., 626; (Jodin), 1886, A., 648; (Pringsheim), 1887, A., 685.
  - relation between the assimilation and transpiration produced by (Jumelle), 1890, A., 190.
  - colouring matters of (Borodin), 1884, A., 910; (Sachsse), 1885, A., 670; (Hansen), 1890, A., 171; (Immendorff), 1890, A., 641; (Monteverde), 1892, A., 1355.
  - function of the colouring matter of (Hansen), 1888, A., 867.
  - estimation of (Hansen), 1886, A., 1083.
  - estimation of, in leaves and in extracts (Tschirch), 1890, A., 672.
  - separation of blue and yellow (Hartley), 1891, T., 109.
  - extracts, analysis of (Etard), 1892, A., 1136.
  - compounds (Guignet), 1885, A., 551.
  - granules, formation of starch in (Belluci), 1887, A., 1136.
- **Chlorophyll-group**, synonymy of certain bodies of the (Tschirch), 1884, T., 60.
- **Chlorophyllan** (Tschirch), 1884, T., 58; (Wollheim), 1888, A., 723.
  - nature of (Etard), 1892, A., 1136.
- **Leaves**, composition of (Urbain), 1884, A., 862.
  - activity of assimilation by (v. Sachs), 1885, A., 289.
  - respiration of, in the dark (Bonnier and Mangin), 1884, A., 857; (Dehérain and Maquenne), 1886, A., 170, 273.
  - absorption of carbonic anhydride by (Dehérain and Maquenne), 1886, A., 1062; 1887, A., 172.

Plants—
- **Leaves**, evolution of carbonic anhydride and absorption of oxygen by, in the dark (Dehérain and Maquenne), 1885, A., 927.
  - effect of light on etiolated (Palladin), 1892, A., 521.
  - acquisition of green colour and growth of etiolated (Palladin), 1892, A., 520.
  - colour of, in relation to the assimilation of carbon (Engelmann), 1888, A., 381.
  - colouring matter of (Sachsse; Arnaud), 1885, A., 670.
  - amylase, presence of, in (Brasse), 1885, A., 182.
  - ash of, grown in the earth and under water culture (Councler), 1884, A., 98.
  - formation and migration of carbohydrates in (Schimper), 1886, A., 826; (Saposchnikoff), 1891, A., 763.
  - carrotene in (Arnaud), 1887, A., 859; 1890, A., 285.
  - compounds accompanying chlorophyll in (Etard), 1892, A., 746.
  - gases, variations in the composition of, in (Peyrou), 1886, A., 273.
  - gas in floating and submerged (Gréhant and Peyrou), 1885, A., 1153.
  - calcium oxalate, formation of, in (Schimper), 1888, A., 981.
  - oxalates, absence of, in young (Wehmer), 1892, A., 651.
  - oxygen, variations in the amount of, in (Peyrou), 1889, A., 641.
  - silicic acid, alleged decomposition of, by (Denaro), 1887, A., 70.
  - metastasis in (v. Sachs), 1885, A., 831.
  - starch, solution of, in (Brasse), 1886, A., 827.
  - influence of internal causes on the presence of starch in (Mer), 1891, A., 604.
  - supplied with sugars, mannitol and glycerol, formation of starch in (Meyer), 1886, A., 902.
  - amount of proteids in green and etiolated (Palladin), 1892, A., 520.
  - tannin, rôle of, in (Kraus), 1889, A., 917.
  - reserve materials, especially tannin, in evergreen (Schulze), 1889, A., 540.

Plants—
- **Leaves**, withering of (Wiesner), 1884, A., 918.
  - detection of starch in green (v. Sachs), 1885, A., 831.
  - estimation of chlorophyll in (Tschirch), 1890, A., 672.
- **Protoplasm**, living vegetable (Bokorny), 1890, A., 283.
  - living, chemical character of (Loew), 1883, A., 819.
  - morphological and chemical composition of (Schwartz), 1888, A., 983.
- **Roots**, composition of (Urbain), 1884, A., 861.
  - acid juice excreted by (Molisch), 1889, A., 68.
  - secretions of, properties of (Molisch), 1890, A., 656.
  - result of the removal of leaves of (Geibel), 1883, A., 613.
  - influence of the amount of soil on the development of (Hellriegel), 1884, A., 626.
  - deviation of, from normal growth (*aërotropism*) (Molisch), 1885, A., 1153.
- **Sap**, cell (Schwartz), 1888, A., 983.
    - acidity of (Kraus), 1884, A., 1209; (Lange), 1888, A., 744.
  - in plants, theory of the circulation of (Godlewski), 1885, A., 927.
  - albumin in (Loew and Bokorny), 1888, A., 983.
  - easily oxidisable substances in (Kraus), 1884, A., 918.
  - from a silver birch tree (Attfield), 1883, A., 1164.
  - of the birch and hornbeam (Hornberger), 1888, A., 313.
  - estimation of the combined acids in (de Vries), 1885, A., 1014.
- **Seeds**, solubility of the constituents of (Maxwell), 1889, A., 1028.
  - germinative power of, after exclusion of air and drying at high temperatures (Wilhelm), 1886, A., 171.
  - ripening of (Müntz), 1887, A., 173.
  - for permanent pasture (Wilson), 1889, A., 1084.
  - of various sizes, plants from (Hellriegel), 1884, A., 352.
  - action of hydrocyanic acid on (Schär), 1886, A., 575.
  - valuation of (Mayer), 1884, A., 200.
  - carbohydrates in (Maxwell), 1889, A., 644; 1890, A., 544, 917; (Schulze), 1889, A., 916.

Plants—
Seeds, lecithin in (Schulze and Steiger), 1889, A., 645; (Maxwell), 1891, A., 511.
ratio of nitrogen to phosphoric acid in (Heiden), 1884, A., 1404.
nitrogenous bases in (Schulze), 1891, A., 490.
proteids, micro-chemical detection of, in (Szymanski), 1886, A., 1088.
leguminous, composition of (Waage), 1887, A., 991; (Schulze, Steiger and Maxwell), 1891, A., 1541.
citric acid in (Ritthausen), 1884, A., 1304.
Fibres, composition of (Webster), 1883, T., 25.
See also Main Index.
Tissue, constituents of (Urbain), 1884, A., 858.
albumin in (Krasser), 1887, A., 407.
nature of the gases contained in (Böhm), 1884, A., 670.
behaviour of, towards gases (Böhm), 1884, A., 1250.
saccharification in (Bondonneau and Foret), 1888, A., 41.
physiological signification of tannin in (Westermaier), 1888, A., 187.
testing for nitric acid in (Arnaud and Padé), 1884, A., 1074.
Respiration (Godlewski), 1883, A., 498; (Möller), 1885, A., 832; (Kreusler), 1888, A., 186, 742; (Mangin), 1890, A., 190.
chemical phenomena of (Phipson), 1884, A., 1403; 1885, A., 420.
intramolecular (Pfeffer), 1886, A., 170; (Jentys), 1887, A., 686.
molecular (Diakonoff), 1887, A., 988.
under abnormal conditions (Johannsen), 1886, A., 575.
method of observing (Kreusler), 1886, A., 574.
evolution of carbonic anhydride and absorption of oxygen by, in the dark (Dehérain and Maquenne), 1885, A., 927.
in the dark (Bonnier and Mangin), 1884, A., 857; (Dehérain and Maquenne), 1886, A., 170, 273.
influence of light on (Bonnier and Mangin), 1884, A., 1066.
effects of light on the respiration of oxygen by (Reinke), 1884, A., 916.

Plants—
Respiration of oxygen by, dependence of the assimilation of green cells on the (Pringsheim), 1888, A., 185.
under lessened oxygen tension and when injured (Stich), 1892, A., 1259.
transformation of force and of material in (Rodewald), 1889, A., 540.
of aquatic and submerged aëro-aquatic (Barthélemy), 1883, A., 747.
continuation of, in dead vegetable cells (Johannsen), 1888, A., 741.
of the cells of yeast (Schützenberger), 1884, A., 857.
of the cells of yeast, at different temperatures (Gréhant and Quinquaud), 1888, A., 623.
Transpiration in, in the tropics (Marcano), 1884, A., 1403.
Transpiration of, relation between the assimilation and, produced by chlorophyll (Jumelle), 1890, A., 190.
Plant-growth under special conditions (Griffiths), 1883, A., 496.
influence of light and heat on (Hellriegel), 1884, A., 855, 1206.
influence of rays of the spectrum on (A. B. Griffiths), 1884, T., 74; (A. B. and F. E. Griffiths), 1888, A., 623.
influence of the electric light on (Dehérain), 1883, A., 105.
influence of radiant heat on (Wortmann), 1884, A., 626.
thermic constants in (Staub), 1884, A., 1067.
nitrogen necessary for (Thaer), 1885, A., 75.
nitrogen, loss of, during (Atwater and Rockwood), 1887, A., 292.
alkaloids, action of, on (Marcacci), 1887, A., 859.
effect of altitude on (Angot), 1884, A., 627.
effects of atmospheric deposits on (Wollny), 1888, A., 316.
influence of climate and soil on (Wollny), 1884, A., 624.
ether, action of, on (Brenstein), 1888, A., 624.
ferrous oxide in basic slag, influence of the, on (Munro), 1887, A., 178.
ferrous oxide in soil, action of the, on (Kellner), 1886, A., 486.

Plants—

- **Plant-growth**, hydroxylamine salts, action of, on (Meyer and Schulze), 1884, A., 1210.
  - lime, influence of, as a soil constituent on (Hilgard), 1888, A., 318.
  - moisture, influence of, in soils on (Hellriegel), 1885, A., 421.
  - effect of mowing and feeding-off on (Wollny), 1884, A., 625.
  - migration of nitrates in (Capus), 1886, A., 484.
  - compressed oxygen, influence of, on (Jentys), 1888, A., 1125.
  - oxygen, effect of variations in the quantity of, on (Wieler), 1884, A., 625.
  - action of rain, dew and watering on (Wiesner), 1884, A., 766.
  - soil, influence of the composition of the, on (Ville), 1890, A., 81; (Raulin), 1892, A., 1121.
  - influence of constant temperature in the soil on (Hellriegel), 1884, A., 916.
  - soil, influence of the sterilisation of, on (Tschirch), 1888, A., 985.
  - effect of depth of sowing on (Wollny), 1884, A., 1404.
  - influence of, on the undergrowth (Wollny), 1885, A., 77.
  - water, influence of, on (Hellriegel), 1884, A., 1401.
  - effects of running water on (Jonsson), 1885, A., 419.
  - action of water containing sodium chloride on (Stood), 1889, A., 795.
  - action of water containing sodium chloride and zinc sulphate on (Krauch), 1883, A., 1027; (Storp), 1884, A., 856.
  - action of zinc salts in the soil on (Nobbe), 1884, A., 1407; (Baumann), 1884, A., 1408.
  - supply of food constituents at different periods of (Liebscher), 1888, A., 382.
- **Plant-nutrition**, ammonia in (Müntz), 1890, A., 287.
  - absorption of ammonium salts by plants (Pagnoul), 1891, A., 1545; (Griffiths), 1892, A., 229.
  - function of ammonium salts in (Müntz), 1890, A., 79.
  - assimilation of asparagine by plants (Baessler), 1886, A., 1061.
  - assimilation and colour (Engelmann), 1883, A., 819.
  - activity of assimilation by leaves (v. Sachs), 1885, A., 289.
  - first product of (Mori), 1883, A., 365.

Plants—

- **Plant-nutrition**, influence of chemical agents on the assimilative capacity of plants (Weyl), 1883, A., 611.
  - calcium and magnesium oxides in plants (v. Raumer), 1884, A., 917.
  - assimilation of carbon by plants (Griffiths), 1884, A., 202.
  - colour of leaves in relation to the assimilation of carbon (Engelmann), 1888, A., 381.
  - assimilation of carbon from certain compounds by plants (Acton), 1890, A., 818, 1021.
  - relation between the intensity of radiation and the decomposition of carbonic anhydride by plants (Timiriazeff), 1889, A., 1234.
  - chlorine, importance of, in (Farský), 1883, A., 497; (Aschoff), 1890, A., 1182.
  - plants deprived of chlorophyll, decomposition of carbonic anhydride by (Hueppe), 1888, A., 1125.
  - plants free from chlorophyll acting like chlorophyll-containing plants (Hueppe), 1888, A., 623.
  - plants containing chlorophyll, direct assimilation of vegetable remains by (Koch), 1888, A., 739.
  - chlorophyll, functions of (Nagamatsz), 1887, A., 516.
  - chlorophyll in the living cell and assimilation of carbon (Reinke), 1885, A., 182.
  - chlorophyll, action of, on carbonic anhydride when removed from vegetable cells (Regnard), 1886, A., 254.
  - chlorophyll and the reduction of carbonic anhydride by plants (Timiriazeff), 1886, A., 626.
  - formaldehyde, rôle of, in (Loew), 1889, A., 640; (Bokorny), 1892, A., 1259.
  - substitution of manganese for iron in (Spampani), 1891, A., 1394.
  - metallic oxides, absorption of, by plants (Phillips), 1883, A., 231.
  - assimilation of mineral salts by plants (Schimper), 1891, A., 604.
  - nitrates as food for ferments and other plants (Laurent), 1891, A., 1135.
  - are nitrates essential to? (Pitsch), 1888, A., 84.
  - behaviour of nitric acid in (Serno), 1890, A., 1021.
  - nitrogen necessary for (Thaer), 1885, A., 75.
  - sulphur, function of, in (Berthelot and André), 1891, A., 606.

Plants—

Plant-nutrition, absorption of the non-alimentary substances in (Knop), 1886, A., 171.
  concentrated nutritive fluid for (Knop), 1884, A., 1205.
  absorption and digestion of fat oils in (Schmidt), 1892, A., 1118.
  phosphoric acid in (Berthelot and André), 1888, A., 743.
  phosphoric acid, assimilation of, by plants (Dehérain), 1892, A., 233.
  phosphoric acid of basic slag, assimilation of the, by plants (Petermann), 1889, A., 647.
  potassium, rôle of, in (Lupke), 1890, A., 917.
  salts, absorption of, in (Berthelot and André), 1888, A., 739.
  sodium in (Atterberg), 1892, A., 1508.

Plant diseases and their prevention (Danger), 1883, A., 110; (Niessing), 1883, A., 612.
  chlorosis in (v. Sachs), 1887, A., 76.

Plants, damage done to, by acid vapours (v. Schroeder), 1885, A., 76; (Just and Heine), 1889, A., 795.
    by kiln smoke (Prevost), 1888, A., 744.
    by sulphurous anhydride (Just), 1888, A., 318; (Mach), 1888, A., 745.
    by arsenic, lead and zinc (Nobbe), 1884, A., 1407.
    by copper compounds (Formento), 1891, A., 491.
    by lithium salts (Gaunersdorfer), 1887, A., 991.
    by poisoning (Krauch), 1883, A., 612.
    by potassium chloride (Munro), 1886, A., 389.
  protection of, against frost (Goppert), 1884, A., 1067.
  function of resins in injury to (de Vries), 1883, A., 365.
  Embryos of ungerminated rye, composition of (Nachbaur), 1883, A., 107.
    of wheat, composition of, and presence of sugar and allantoin in (Richardson and Crampton), 1886, A., 734.
  Enzymes—
    amylase, presence of, in leaves (Brasse), 1885, A., 182.
    diastase, genesis of two varieties of, in resting and germinating seeds (Brown and Morris), 1890, T., 505.

Plants—
  Enzymes—
    diastatic ferments, formation of, in the cells of plants (Detmer), 1884, A., 917, 1063, 1402.
    diastatic ferment of ungerminated wheat (Lintner), 1890, A., 650.
    in flour (Balland), 1884, A., 236, 532.
    existence of a cellulose-dissolving (*cytohydrolyst*), in the germinating seed of grasses (Brown and Morris), 1890, T., 497; P., 52.
    hydrolytic, of germinated grain, origin of (Brown and Morris), 1890, T., 511; P., 52.
    fat-decomposing ferments in plants (Sigmund), 1890, A., 1455; 1892, A., 1261.
    proteolytic and other ferments in oats (Ellenberger and Hofmeister), 1888, A., 867.
    ferments in the latex of (Hansen), 1886, A., 1059.
  Plant-germination in soil rich in organic matter, but free from microbes (Duclaux), 1885, A., 428.
    after exclusion of air and drying at high temperatures (Wilhelm), 1886, A., 171.
    light, influence of, on (Cieslar), 1885, A., 419.
    intermittent heat, influence of, on (v. Liebenberg), 1885, A., 419.
    relation between chemical metamorphosis and transformation of forces during (Rodewald), 1884, A., 1207.
    genesis of two varieties of diastase in resting and germinating seeds in (Brown and Morris), 1890, T., 505.
    changes in the embryo and endosperm during (Brown and Morris), 1890, T., 466.
    choline in (Schulze), 1887, A., 747.
    nitrogen, loss of, during (Atwater and Rockwood), 1887, A., 292.
    proteids, changes in, during (Green), 1887, A., 987.
    transformation of alkaloids during (Heckel), 1890, A., 543.
    formation of amides during, in the dark (Schulze and Flechsig), 1886, A., 90.
    sulphates, formation of, in (Schulze), 1885, A., 1153.
    fate of sulphur in (Tammann), 1885, A., 1004.

PLANTS—

- **Plant-germination**, conversion of starch during (MARCACCI), 1891, A., 357.
  - mode of solution of reserve cellulose during (REISS), 1891, A., 356.
  - action of boric acid on (MOREL), 1892, A., 651.
  - influence of camphor on (BURGERSTEIN), 1888, A., 742.
  - influence of carbonic oxide on (LINOSSIER), 1889, A., 645, 739.
  - effect of depth of sowing on (WOLLNY), 1884, A., 1404.
  - effect of drying on (VAN TIEGHEM and BONNIER), 1884, A., 629.
  - behaviour of fatty substances and lecithins during (MAXWELL), 1891, A., 489.
  - part played by lime in (V. LIEBENBERG), 1883, A., 490.
  - influence of magnesium and calcium chlorides on (HINDORF), 1888, A., 1126.
  - influence of oxygen on the disengagement of carbonic anhydride during (JOHANNSEN), 1886, A., 274.
  - influence of ozone on (VOGEL), 1887, A., 516.
  - action of saline solutions on (JARIUS), 1886, A., 90.
  - effect of steeping and drying on (WILL), 1883, A., 490.
  - influence of vegetable poisons on (CORNEVIN), 1892, A., 228.
  - germinator, a new (KÖNIG), 1885, A., 419.
- **Forests** as a protection against hailstorms (GLASER), 1884, A., 632.
  - comparative meteorological observations in (FANKHAUSEN), 1883, A., 614.
  - oxygen in the air of (EBERMAYER), 1886, A., 1066.
- **Vegetation**, physiological function of soluble starch in (DUFOUR), 1886, A., 903.
  - action of long days on (SCHÜBELER), 1885, A., 419.
  - influence of weather on (HILLEBRAND), 1884, A., 856.

PLANTS—

- *Agrostemma Githago.* See Corn-cockle.
- **Almonds**, sweet, germination of (JORISSEN), 1885, A., 181.
  - distribution of amygdalin and emulsin in (JOHANNSEN), 1888, A., 869.

PLANTS—

- *Alnus glutinosa*, calcium oxalate in the leaves of (WEHMER), 1890, A., 191.
- **Anemones**, volatile constituents of (BECKURTS), 1886, A., 365.
- **Apple tree leaves**, composition of (SHUTT), 1892, A., 1372.
- **Apples**, composition of some cider (LEZÉ), 1884, A., 203.
- **Apple-must**, examination of, and of the cider obtained therefrom (KAYSER), 1884, A., 98.
- **Artichokes**, inulin in (PISTONE and DE REGIBUS), 1884, A., 284.
  - Jerusalem, composition and cultivation of (LECHARTIER), 1892, A., 1024.
    - germination of (GREEN), 1890, A., 656.
- **Asparagus**, coniferin and vanillin in (V. LIPPMANN), 1886, A., 387.
- **Barley**, continuous cultivation of, at Woburn (VOELCKER), 1884, A., 482.
  - crop of 1883, experimental (AITKEN), 1885, A., 1259.
  - growth of, from varieties of seed (MÄRCKER), 1886, A., 274.
  - manuring of (KLAWITTER; WÄTERLING), 1884, A., 1419; (V. LIEBENBERG), 1888, A., 189; (HANAMANN), 1889, A., 743.
  - manuring of, with nitrogen and phosphates (MÄRCKER), 1884, A., 925.
  - manuring of, with sodium nitrate (MÄRCKER), 1885, A., 1169.
  - composition of (ANON.), 1884, A., 233; (KLIEN), 1887, A., 73.
  - influence of manures on the composition of (KRANDAUER), 1888, A., 870.
  - American, composition of (ANON.), 1884, A., 1405; (RICHARDSON), 1887, A., 616.
  - mealy and steely, composition of (JOHANNSEN), 1888, A., 748.
  - Saxon, composition of (MÄRCKER), 1884, A., 630.
  - grown at Württemberg in 1887, composition of (BEHREND), 1888, A., 1331.
  - distribution and condition of iron in (PETIT), 1892, A., 1509.
  - nitrogenous constituents of (LINTNER), 1884, A., 790; (BUNGENER and FRIES), 1884, A., 1446.
  - non-nitrogenous extract-substance from (LINTNER), 1891, A., 957.

Plants—

Barley, raffinose in (O'Sullivan), 1885, P., 119; 1886, T., 70.
sugars of (O'Sullivan), 1886, T., 58.
starch in (O'Sullivan), 1884, T., 4; (v. Milkowski), 1890, A., 928.
influence of calcium sulphide on (Fittbogen), 1885, A., 1154.
change in, during germination (Fankhauser), 1886, A., 1061; 1888, A., 867.
change in the nitrogenous substances of, during germination (Hilger and van der Becke), 1891, A., 489.
influence of temperature on germinating (Day), 1891, T., 664; P., 123.
culture of excised embryos of, on nutrient solutions and on water (Brown and Morris), 1890, T., 482.

Barley-grain, structure of (Brown and Morris); 1890, T., 461.
of different countries, comparison of (Marx), 1885, A., 422.

Bassia latifolia (*Mahwa flowers*) (Church), 1886, A., 389; (Heckel and Schlagdenhauffen), 1889, A., 434.
seeds of, and the fat contained therein (Valenta), 1884, A., 919.

Bean crop of 1884, experimental (Aitken), 1885, A., 1258.

Beans, iron sulphate as a manure for (Griffiths), 1887, T., 219.
composition of varieties of, grown under like conditions (Flechsig), 1886, A., 95.
assimilation of nitrogen by (Beyerinck), 1891, A., 1539.
fat from (Jacobson), 1889, A., 295.

Beetroot (sugar-), cultivation of (Rimpau; Ladureau), 1883, A., 114; (v. Koeth), 1883, A., 1026; (Crahé), 1884, A., 208; (Nowoczek), 1884, A., 921; (Märcker), 1884, A., 1211; (Dehérain), 1885, A., 184, 423; (Liebscher), 1885, A., 424; (Corenwinder), 1885, A., 685.
cultivation of, at Grignon (Dehérain), 1884, A., 204, 1070; 1885, A., 423; 1888, A., 383; 1889, A., 542; 1890, A., 820; 1891, A., 493.
varieties of (Märcker)), 1884, A., 865.

Plants—

Beetroot, shaded and unshaded (Lach), 1885, A., 1155.
influence of soil, size of seed, period of sowing, etc., on the quality and yield of (Marek), 1884, A., 103.
manuring of (Beseler), 1883, A., 238; (Tschuschke), 1883, A., 823; (Holdefleiss), 1884, A., 103, 773; (Nantier), 1884, A., 635; (Dehérain), 1884, A., 773; (Nowoczek), 1884, A., 921; (Petermann), 1884, A., 1420; (Pagnoul), 1887, A., 748; (Kohlrausch and Strohmer), 1890, A., 1022.
with ammonium sulphate (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
with basic slag (v. Proskowitz), 1888, A., 319.
with peat compost and sodium nitrate (Kuntze), 1885, A., 429.
with phosphates (Ladureau), 1885, A., 1157; (Märcker), 1891, A., 612.
with potassium chloride on heavy soil (Petermann), 1888, A., 1128.
with sodium nitrate (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
with superphosphate (Nantier), 1886, A., 832; 1887, A., 295.
valuation of, by its density (v. Wachtel), 1884, A., 118.
relations between the density, the richness in sucrose and the purity of the juice of (Pagnoul), 1886, A., 915.
estimation of the richness of (Marek), 1886, A., 283.
development of (Girard), 1886, A., 1063.
the rôle of sucrose and its development during the growth of (Durin), 1890, A., 1020.
formation of sucrose in (Girard), 1884, A., 476; 1885, A., 75.
accumulation of sucrose in the root of the (Brasse), 1886, A., 1063.
formation of organic acids, nitrogenous compounds and potassium nitrate in (Leplay), 1888, A., 868.

PLANTS—
Beetroot, absorption of potash and lime from the soil by, during the first year of vegetation (LEPLAY), 1886, A., 830.
  vegetation of, in the second year (LEPLAY), 1885, A., 293.
  composition of (PAGNOUL; MAREK), 1884, A., 356; (HELLRIEGEL), 1884, A., 485.
  white Silesian, composition of (LEPLAY), 1883, A., 235, 368.
  rare constituents of the ash of (V. LIPPMANN), 1889, A., 295.
  ammonia in (BATTUT), 1887, A., 71.
  coniferin in the woody structures of the (V. LIPPMANN), 1883, A., 611.
  glutamine in (SCHULZE and BOSSHARD), 1886, A., 105.
  gummy exudation from the (V. LIPPMANN), 1891, A., 284.
  distribution of sucrose in (MAREK), 1883, A., 124; 1884, A., 766.
  percentage of sucrose in (STAMMER and DEGENER), 1884, A., 133.
  estimation of sucrose in (STAMMER and SOSTMANN), 1884, A., 642; (STROHMER), 1884, A., 1219; (PELLET), 1885, A., 842, 1163; 1889, A., 314; (PETERMANN), 1888, A., 994; (BATTUT; CLERC; SIDERSKY; WEISBERG), 1889, A., 314.
  biological researches on (CORENWINDER), 1883, A., 613.
  destruction of the nematoids of (GIRARD), 1887, A., 617.
  diseases of (KÜHN and JOULIE), 1883, A., 111.
  preservation of topped and untopped (HANAMANN), 1885, A., 1009.
  absorption of water by, during preservation (BRIEM), 1885, A., 928.
  effect of drying, of frost and of winter storage on the constitution of (MAREK), 1884, A., 767.
  loss of sucrose in (MAREK), 1891, A., 103.
  loss of sucrose in, when stored (WIETERSHEIM), 1885, A., 102.
Beetroot diffusion residues. See under Feeding experiments.
Beet seed, peculiarities and cultivation of (KNAUER), 1885, A., 587.
  composition of (LIASKOWSKI), 1891, A., 764.
  large and small hulled, germination of (KUDELKA and HOLLRUNG), 1885, A., 832.

PLANTS—
Bracken (*Pteris aquilina*), composition of (PETERMANN), 1884, A., 207.
Broom (*Genista pilosa*), composition of (PETERMANN), 1884, A., 207.
Cabbage, composition of different varieties of (DUGAST), 1883, A., 373.
Cacao plant, cultivation of (BOUSSINGAULT), 1883, A., 933.
  and the composition of its fruit (BOUSSINGAULT), 1884, A., 202.
Calycanthus glaucus, composition of the seed of (WILEY), 1890, A., 403.
Camellia oleifera seeds (McCALLUM), 1883, A., 1166.
Canary seed, composition of (MAYER), 1889, A., 794.
Capsicum annuum, fruit of (PABST), 1892, A., 1263.
Carrot, white, composition of (KRECHEL), 1885, A., 292.
  cholesterol in the (ARNAUD), 1886, A., 830.
Cataputia minor, crystalline constituents of the seeds of (TAHARA), 1891, A., 238.
Cereals, cultivation of (STREBEL), 1883, A., 612; 1885, A., 833; (MÄRCKER), 1884, A., 482.
  Swedish and German, cultivation of (LIEBSCHER), 1885, A., 422.
  development of (HÉBERT), 1892, A., 1119.
  effect of deep or shallow sowing on (STÖSSNER), 1887, A., 747.
  levosin, a carbohydrate from (TANRET), 1891, A., 661.
  estimation of starch in (O'SULLIVAN), 1884, T., 4.
  sugars of (O'SULLIVAN), 1885, P., 120; 1886, T., 58; P., 142.
Cereal grains, chemistry of (BELL), 1883, A., 1160.
  specific gravity of (DRECHSLER), 1883, A., 111.
  changes of the albuminoids in, when heated under pressure (BEHREND), 1885, A., 618.
Cherries, ripening of (KEIM), 1891, A., 1539.
  ripe, composition of (AMTHOR), 1884, A., 766.
Cherry juice, fermentation of (KEIM), 1891, A., 1539.
Cherry laurel, mannitol and sorbitol in the fruit of the (VINCENT and DELACHANAL), 1892, A., 908.
Chrysanthemum cinerariaefolium, constituents of the buds of (THOMS), 1892, A., 349.

Plants—
Chrysanthemum cinerariaefolium, homologue of cholesterol from (Marino-Zuco), 1890, A., 757.
Citrus, crystalline substances from the fruit of various species of (Tilden and Beck), 1890, T., 323; P., 30.
Clover, American red (Harz), 1884, A., 920; (Nobbe), 1889, A., 299.
  American and German (Troschke), 1886, A., 646.
  Bokhara (*Melilotus leucantha*) (Munro), 1886, A., 828.
  Dutch, composition of (Wilson), 1886, A., 911; 1889, A., 1078.
  manuring of (Samek), 1888, A., 1223; (v. Knieriem), 1891, A., 492.
  red, yields and composition of a variety of (Baessler), 1890, A., 1183.
  examination of, at different stages of growth (Kallen and Stutzer), 1884, A., 100.
  red, insoluble carbohydrate in (Schulze and Steiger), 1889, A., 643.
  red, assimilation of free nitrogen by (Frank), 1892, A., 373.
Clover sickness, causes of (Kutzleb), 1883, A., 233.
Clovers, composition of (Wilson), 1886, A., 909; 1889, A., 1078.
Coca. See *Erythroxylon Coca.*
Cocoanuts, milk of ripe and unripe (van Slyke), 1891, A., 764.
Colchicum, estimation of colchicine in the seeds of (Kremel), 1891, A., 512.
Corncockle (*Agrostemma Githago*), poison of the seeds of (Lehmann and Mori), 1890, A., 1458.
  sapotoxin from (Kruskal; Kobert), 1892, A., 350.
Cotton plant, composition of the (McBryde), 1892, A., 1510.
  composition of the seeds of the (Sacc), 1885, A., 425.
Cotton seeds, composition of (König), 1885, A., 425.
  products of (Papasogli), 1892, A., 584.
  betaine in (Ritthausen and Weger), 1885, A., 50.
  raffinose from (Ritthausen), 1884, A., 1286; (Rischbieth and Tollens), 1886, A., 138.
Cratægus Oxyacantha, calcium oxalate in the leaves of (Wehmer), 1890, A. 191.

Plants—
Crops, cultivation of various (Fittbogen), 1883, A., 235.
  forage, growth of, at Grignon (Dehérain), 1889, A., 542.
  influence of nitrogenous manures on the yield of (Wagner), 1888, A., 525.
  yield of, under steam cultivation (Märcker), 1884, A., 359.
  influence of the weather on (Ferrari), 1885, A., 80.
  influence of, on the physical properties of a soil (Wollny), 1888, A., 1222.
  irrigation of, by waste water from beet sugar factories (Teuchert), 1883, A., 500.
  growth of, in soil destitute of nitrates (Pitsch), 1888, A., 84.
  rotation of (Dehérain), 1885, A., 185.
  rotation of, four year experiments on (Voelcker), 1884, A., 635; 1885, A., 78.
Cruciferæ, localisation of active principles in the seeds of (Guignard), 1891, A., 490.
  estimation of mustard oil in the seeds of (Dircks), 1883, A., 245; (Foerster), 1888, A., 1350.
Curcas purgans, oil from the seeds of (Horn), 1888, A., 674.
Currants, ripe, composition of (Amthor), 1884, A., 766.
  colouring matters of (Keim), 1891, A., 1539.
Cytisus Laburnum, nitrogen assimilation of (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
Dahlia tubers, asparagine and tyrosine in (Leitgeb), 1889, A., 433.
  crystalline deposits in (Leitgeb), 1887, A., 1136.
Danais fragrans, root of (Heckel and Schlagdenhauffen), 1886, A., 173.
Daphnidium Cubeba, fruit of (Braithwaite and Farr), 1886, A., 1064.
Earth-nut (*pea-nut*) (Brown), 1892, A., 1122.
  fat, alterability of (Reitmair), 1891, A., 770.
  composition of the inner brown skin of (König), 1887, A., 519.
Erica vulgaris, composition of (Petermann), 1884, A., 207.
Ericaceæ, andromedotoxin in (Plugge), 1889, A., 644.

Plants—
- **Ericaceæ**, presence of cinnamic acid in the (Eijkman), 1887, A., 517.
- *Erythroxylon Coca* grown in India (Warden), 1889, A., 297.
  - leaves of (Bignon), 1886, A., 388.
- **Eucalyptus manna**, raffinose from (Rischbieth and Tollens), 1886, A., 138; (Tollens), 1886, A., 527.
- *Faba vulgaris*, composition of the seeds of (Schulze, Steiger and Maxwell), 1891, A., 1543.
- **Flax**, constituents of (Cross and Bevan), 1889, P., 155; 1890, T., 196.
  - influence of germination and growth on the development of hydrocyanic acid in (Jorissen), 1885, A., 181.
  - bleaching of (anon.), 1884, A., 793.
  - winter, cultivation of (Leydhecker), 1884, A., 921.
- **Flax-fibre**, chemistry of (Cross and Bevan), 1889, A., 742.
  - discrimination of jute-fibre from (Lenz), 1890, A., 928.
- **Flowers**, constituents of (Urbain), 1884, A., 862.
  - withering of (Wiesner), 1884, A., 918.
- **Flower petals**, absorption of water by (Burgerstein), 1884, A., 1403.
- *Fraxinus excelsior*, constituents of the leaves of (Gintl and Reinitzer), 1883, A., 216.
- **Fruit**, stone, ratio of flesh to stone in (Wilhelm), 1884, A., 477.
  - constituents of (Urbain), 1884, A., 862.
  - from the Southern States (Parsons), 1889, A., 434.
- **Fungi**, respiration and transpiration of (Bonnier and Mangin), 1884, A., 628.
  - edible, nutritive value of (Mörner), 1886, A., 1053.
    - poisonous properties of (Dupetit), 1883, A., 611; 1884, A., 204.
- **Furze**, composition of (Troschke), 1885, A., 684.
- *Gleditschia triacanthos*, nitrogen assimilation of (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
- **Goat's rue** (*Galega officinalis*) (Munro), 1886, A., 829.
- **Gourds**, researches on (Ulbricht), 1886, A., 95.

Plants—
- **Grain**, manuring of (Emmerling), 1884, A., 1213.
  - spectroscopic notes on the carbohydrates and proteids from (Hartley), 1886, P., 247; 1887, T., 58.
  - estimation of starch in (Francke), 1883, A., 624; (Monheim), 1888, A., 1134; (v. Milkowski), 1890, A., 928.
  - sugars of (O'Sullivan), 1885, P., 120; 1886, T., 58; P., 142; (v. Asbóth), 1888, A., 1220.
  - chemical changes induced by the sprouting of (Märcker and Kobus), 1884, A., 200.
  - germinated, value of, for seed (Will), 1883, A., 490.
    - origin of the hydrolytic enzymes of (Brown and Morris), 1890, T., 511; P., 52.
- **Gramineæ**, germination of the (Brown and Morris), 1890, T., 458; P., 52.
- **Grapes**, ripe, studies on (Amthor), 1883, A., 881.
  - green, cause of the acidity of (Ordonneau), 1892, A., 589.
  - so-called sour-rot of (Portele), 1885, A., 1153.
  - from infected vines, composition of (Mach), 1884, A., 1406.
  - chlorophyllic substances of the pericarp of (Etard), 1892, A., 874.
  - organic and inorganic constituents of (List), 1887, A., 860.
  - glyoxylic acid in (Brunner and Chuard), 1886, A., 576.
  - formation of sugar in (Müller), 1887, A., 517.
  - detection and estimation of aluminium in (L'Hôte), 1887, A., 690.
  - See also Vines.
- **Grass**, composition of (Kinch), 1884, T., 124.
  - nitrogenous matters in (Kinch), 1884, T., 122.
  - gases evolved during the conversion of, into hay (Frankland and Jordan), 1883, T., 294.
  - decomposition of, under water (Frankland and Jordan), 1883, T., 298.
  - irrigation as a preventive of injury to, from frost (v. Neergard), 1884, A., 357.
  - Timothy, changes occurring in, during growth (Ladd), 1888, A., 1220.

Plants—

- **Grass**, changes which take place in the conversion of, into silage (Lloyd), 1884, A., 772.
- **Grasses**, composition, nutritive value and produce of (Wilson), 1886, A., 906; 1889, A., 1077.
  - composition and digestibility of the proteids of (Emmerling and Loges), 1890, A., 657.
  - existence of a cellulose-dissolving enzyme (*cytohydrolyst*) in the germinating seed of (Brown and Morris), 1890, T., 497; P., 52.
- *Gymnema sylvestre*, drug from, which destroys the sense of taste for sweets and bitters (Berthold), 1889, A., 182.
- **Hæmatococcus**, assimilation by (Engelmann), 1883, A., 611.
- **Hay**, yield of, from irrigated pastures (Nantier), 1888, A., 1127.
  - alpine and valley, composition of (Eugling), 1885, A., 929.
  - heated, composition of (Toms), 1884, A., 864; (Mach), 1886, A., 275.
  - inferior, composition of (Morgen), 1885, A., 292.
  - valuation of (Mayer), 1885, A., 699; (Schindler), 1885, A., 1154.
  - effect of rain on the quality of (Eugling), 1885, A., 1154.
  - and silage from a poor quality of grass (Sutton), 1883, A., 102.
  - gases evolved during the conversion of grass into (Frankland and Jordan), 1883, T., 294.
- *Holcus Sorghum*, grain of (Bordas), 1887, A., 519.
- **Hop-culture** in peat soils (Fleischer), 1885, A., 185.
- **Hop-mildew**, nature of, and means of counteracting it (Schwarz), 1884, A., 629.
- **Hops**, manuring of (Pott), 1884, A., 1422; (Kraus), 1888, A., 319.
- **Horse chestnuts**, composition of (Hanamann), 1885, A., 928.
- **Ipecacuanha root**, dextrose obtained from (Merck), 1891, A., 1133.
- **Lathyrus**, composition of various (Nilson), 1892, A., 522.
- *Lavatera arborea*, a fodder plant (v. T.), 1884, A., 100.
- **Leguminosæ**, cultivation of (Bréal), 1890, A., 660.
  - in acid soils (de Mondésir), 1889, A., 434.

Plants—

- **Leguminosæ**, composition of (Wilson), 1892, A., 521.
  - carbohydrates in (Maxwell), 1889, A., 644; 1890, A., 544, 917.
  - root tubercules of (Bréal), 1890, A., 660.
  - nitrogen, sources of the, of (Dietzell), 1885, A., 418; (Hellriegel and Wilfarth), 1889, A., 640; (Lawes and Gilbert), 1892, A., 367.
  - nitrogen, absorption of, by (Bouteleau), 1884, A., 1401; (Bréal), 1888, A., 1330; 1890, A., 79, 660; (Lawes and Gilbert), 1890, A., 814; 1892, A., 369; (Petermann), 1890, A., 816; (Atwater and Woods), 1891, A., 353, 491; (Schlœsing and Laurent), 1891, A., 353; 1892, A., 378, 523, 1021; (Prazmowski), 1891, A., 607; (Frank), 1891, A., 764; 1892, A., 371; (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533; (Immendorff), 1892, A., 374.
  - protein-compounds from, solubility of, in water containing hydrochloric acid (Ritthausen), 1884, A., 1390.
  - fungus-symbiosis of (Frank), 1890, A., 1020; 1891, A., 353.
- **Lemons**, Californian, composition of (Colby and Dyer), 1892, A., 1511.
- **Linseed**, germination of (Jorissen), 1885, A., 181.
- **Lucerne**, composition of (Wilson), 1889, A., 1078.
  - insoluble carbohydrate in (Schulze and Steiger), 1889, A., 643.
- **Lupines**, cultivation of (König), 1883, A., 114.
  - water culture of (Weiske), 1884, A., 1400; 1885, A., 420; (Troschke), 1885, A., 420.
  - composition of (Flechsig), 1884, A., 1405; (Troschke), 1887, A., 518; (Waage), 1887, A., 991.
  - composition of varieties of, grown under like conditions (Flechsig), 1886, A., 95.
  - percentage of alkaloids in different varieties of (Hiller), 1885, A., 832.
  - removal of the bitter principle from (Wildt), 1885, A., 184.
  - behaviour of conglutin from, towards saline solutions (Ritthausen), 1883, A., 360.

PLANTS—

Lupines, poisonous matter of (ARNOLD), 1883, A., 740; (ARNOLD and SCHNEIDEMÜHL), 1884, A., 915.
  fixation of free nitrogen by (LAWES and GILBERT; PETERMANN), 1890, A., 816.
  yellow, assimilation of free nitrogen by (FRANK), 1892, A., 371.
  seeds, composition of (FLECHSIG), 1884, A., 1406; (BAUMERT), 1888, A., 1221.
    fat from the (JACOBSON), 1889, A., 296.
  shoots, constituents of (SCHULZE and BARBIERI), 1883, A., 1122.
  straw, composition of (FLECHSIG), 1884, A., 1406.
Lupine sickness in sheep (HARMUTH), 1883, A., 228.
Lupinus luteus, composition of the seeds of (SCHULZE, STEIGER and MAXWELL), 1891, A., 1541.
Lycopersicum esculentum, composition of the fruit of (BRIOSI and GIGLI), 1891, A., 955; (PASSERINI), 1891, A., 956.
Mahwa flowers. See *Bassia latifolia.*
Maize in the experimental plots at Grignon (DEHÉRAIN), 1884, A., 204, 1070; 1890, A., 280.
  manuring of (NANTIER), 1884, A., 635; (ATWATER), 1884, A., 1401.
  manuring of, with phosphates (RAULIN), 1889, A., 435.
  the sum of mean temperatures in relation to the cultivation of (SESTINI and FUNARO), 1884, A., 672.
  function of silicic acid in the growth of (JODIN), 1884, A., 201, 669.
  growth of, in mineral and organic solutions (JODIN), 1884, A., 1208.
  growth of, in nutritive solutions (HEIDEN), 1888, A., 1328.
  composition of (RICHARDSON), 1885, T., 88; (SCHISCHOWSKI), 1885, A., 291; (PORTELE), 1886, A., 274.
  composition of varieties of, grown under like conditions (FLECHSIG), 1886, A., 95.
  composition of, as influenced by environment (RICHARDSON), 1885, A., 585.
  basic substance in (LUXARDO), 1883, A., 1156.
  cane-sugar from (WASHBURN and TOLLENS), 1889, A., 918.

PLANTS—

Maize, estimation of starch in (O'SULLIVAN), 1884, T., 8.
  proteids of (CHITTENDEN and OSBORNE), 1892, A., 379, 746, 749.
  amount of easily digestible proteids in germinated (STUTZER), 1884, A., 772.
Maize-plant, chemistry of (LEPLAY), 1883, A., 366, 747.
  development of the (HORNBERGER and V. RAUMER), 1883, A., 491; (V. SZILASSY and CSERHÁTI), 1891, A., 1395.
Mangel, experimental plots of, at Grignon (DEHÉRAIN), 1891, A., 493.
  feeding value of various (MAYER), 1885, A., 1259.
Millet, composition of (VOELCKER), 1884, A., 630.
Myristica surinamensis, aleurone grains in the seed of (TSCHIRCH), 1887, A., 1061.
  fat of the fruit of (REIMER and WILL), 1885, A., 1197.
Nicotiana longiflora, comparative effect of two metameric bodies on the growth of (REYNOLDS), 1883, A., 495.
  See also Tobacco.
Oats, experiments on, at Grignon (DEHÉRAIN), 1884, A., 204, 1069; 1889, A., 542; 1890, A., 820.
  cultivation of varieties of (BESELER and MÄRCKER), 1885, A., 1008.
  influence of thick and thin sowing, and of the manuring on the yield of (BESELER and MÄRCKER), 1884, A., 768.
  manuring of (ATWATER), 1884, A., 1401; (V. LIEBENBERG), 1888, A., 189; (MÜLLER), 1888, A., 525.
    with nitrogen and phosphates (MÄRCKER), 1884, A., 925.
    with basic slag (BIELER), 1886, A., 391; (EMMERLING), 1888, A., 1223.
    with basic slag on moorlands (BAESSLER), 1888, A., 189.
  importance of silicic acid in the culture of (KREUZHAGE and V. WOLFF), 1884, A., 1211.
  crops, failure of (SORAUER), 1889, A., 742.
  testing soil by the growth of (ATTERBERG), 1888, A., 317.
  composition and nutritive value of (MÄRCKER), 1889, A., 184.

Plants—

- **Oats**, American, composition and physical properties of (Richardson), 1887, A., 293.
  - proteids of (Osborne), 1891, A., 1285, 1390; 1892, A., 1120.
  - proteolytic and other ferments in (Ellenberger and Hofmeister), 1888, A., 867.
  - estimation of starch in (O'Sullivan), 1884, T., 8.
  - alimentary value of (Müntz and Girard), 1885, A., 281.
  - irritant properties of (Sanson), 1884, A., 914.
- **Oat-straw**, composition of (Hébert), 1890, A., 1461.
- **Onions**, composition of (Goessmann), 1887, A., 1137.
- **Oranges**, Californian, composition of (Colby and Dyer), 1892, A., 1511.
- **Palm-nuts**, fat in (v. Wilm), 1885, A., 290, 1164.
- **Peach kernels**, proteids in (Ritthausen), 1883, A., 360.
- **Pea mascate** (Riche and Rémont), 1884, A., 1068.
- **Pea-nut.** See Earth-nut.
- **Peas**, white, grey, and sand, cultivation of (Märcker), 1884, A., 770.
  - comparative growth of, in mineral and organic solutions (Jodin), 1884, A., 1208.
  - growth of, in nutritive solutions (Heiden), 1888, A., 1328.
  - assimilation of free nitrogen by (Lawes and Gilbert), 1890, A., 814; (Frank), 1892, A, 371; (Schlœsing and Laurent), 1892, A., 378.
  - composition of (Klien), 1887, A., 73.
  - fat from (Jacobson), 1889, A., 296.
  - root nodules of (Prazmowski), 1891, A., 607.
- *Peganum Harmala* seed (Fischer and Täuber), 1885, A., 821.
- *Phalaris canariensis*, composition of the seeds of (Mayer), 1889, A., 794.
- *Phaseolus vulgaris*, nitrogen assimilation of (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1538.
  - constituents of the seed pods of (Likiernik), 1891, A., 606.
  - carbohydrate in the seeds of (Maxwell), 1890, A., 917.

Plants—

- *Phleum pratense*, changes occurring in, during growth (Ladd), 1888, A., 1220.
- *Pisum arvense*, cultivation of (Märcker), 1884, A., 769.
  - composition of (Nilson), 1892, A., 522.
- *Pisum sativum*, composition of the seeds of (Schulze, Steiger and Maxwell), 1891, A., 1542.
  - constituents of the seed pods of (Likiernik), 1891, A., 606.
  - nitrogen assimilation of (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
- **Potatoes**, cultivation of (Leydhecker), 1883, A., 114; (Schulz), 1883, A., 680; (Märcker), 1884, A., 101; (Cimbal), 1884, A., 483; 1885 A., 587; (Timm), 1884, A., 1411; (Janowsky), 1886, A., 390, 577; (Girard), 1889, A., 647.
  - experiments on, at Grignon (Dehérain), 1890, A., 820.
  - experiments on, at Harelaw (Aitken), 1887, A., 992.
  - experiments on, at Rothamsted (Gilbert), 1890, A., 409.
  - effect of drying the seed tubers on the yield of (Wollny), 1884, A., 624.
  - influence of the position of the "set" on (Wollny), 1885, A., 586.
  - influence exerted by the weight of the "sets" (Tobisch), 1883, A., 236.
  - manuring of (Vibrans), 1883, A., 882; (Prevost and Swanwick), 1884, A., 101; (Märcker), 1884, A., 102, 865; (Nantier), 1884, A., 635; (Cameron), 1884, A., 866; (Atwater), 1884, A., 1401; (Schrewe), 1886, A., 578.
    - with bone-meal (Koch), 1884, A., 637.
    - with kainite (Fleischer), 1884, A., 108.
    - with krugite (Karbe), 1884, A., 926; (Kette), 1884, A., 1401.
    - with lime (Heiden), 1884, A., 1419.
    - with potassium and sodium nitrates (v. Edler), 1883, A., 117; (Dehérain), 1884, A., 361.
    - with fresh stable manure (Gagnaire), 1885, A., 189.

Plants—

- **Potatoes**, earthing up (Schleh), 1884, A., 772.
  - growth of (Kreusler), 1887, A., 71.
  - influence of electricity on the growth of roots and (Holdefleiss), 1885, A., 1152.
  - composition of (Sacc), 1884, A., 208; (Scovell and Menke), 1887, A., 747.
  - composition of unripe (Hungerbühler), 1886, A., 485.
  - change in the composition of, by ripening (Saare), 1884, A., 1400.
  - oxalic acid in (Siewert), 1883, A., 232.
  - changes in the proteids in, when heated under pressure (Behrend), 1885, A., 618.
  - estimation of starch in (Girard), 1887, A., 868.
  - conversion of starch into sugar during the freezing of (Müller), 1883, A., 497.
  - presence of sucrose in unripe (Schulze and Seliwanoff), 1888, A., 623.
  - preservation of (Märcker), 1884, A., 101.
  - dried, use of (Köhne), 1883, A., 614.
  - desiccation of seed (Andræ), 1885, A., 1155.
  - sprouts, etiolated, composition of (Seliwanoff), 1888, A., 624.
  - shoots, solanidine in (Jorissen and Grosjean), 1890, A., 1182; 1891, A., 473.
  - sweet (Sacc), 1884, A., 208.
    - carbohydrates from (Stone), 1890, A., 1022.
  - diseased, amount of solanine in (Kassner), 1887, A., 860.
  - "scab" in (Heiden), 1884, A., 1419.
- **Potato-disease**, protection against (Jensen), 1885, A., 1154; (Nobbe), 1886, A., 1067.
  - cure for (Jensen), 1883, A., 233.
- **Pumpkin sprouts**, nitrogenous constituents of (Schulze), 1886, A., 173.
- *Quercus rubra*, composition of white and green leaves of (Church), 1886, T., 839; P., 236.
- **Radish**, quantity of starch in the tubercles of the (Lesage), 1892, A., 92.
- **Ramie-plant**, composition of (Jaffa), 1892, A., 1511.

Plants—

- **Raspberries**, wine and brandy from (Rommier), 1887, A., 292.
- **Rhubarbs**, composition of (Elborne), 1885, A., 582.
- **Rice**, cultivation of, in Japan (Kellner and Sawano), 1884, A., 672.
  - manuring of (Georgeson), 1889, A., 646; (Kellner, Kozai, Mori and Nagaoka), 1891, A., 1547.
  - effect of excessive liming on the growth of (Kellner, Sakano, Sato and Shinjo), 1892, A., 94.
  - glutinous (Kreusler and Dafert), 1886, A., 390.
    - of Japan (Shimoyama), 1888, A., 1127.
  - Peruvian (*Chenopodium Quinoa*), cultivation of, in Austria (v. Rodiczky), 1884, A., 769.
  - estimation of starch in (O'Sullivan), 1884, T., 8.
- **Rice-meal**, detection of, in buckwheat flour (anon.), 1883, A., 885.
- *Robinia Pseudacacia*, nitrogen assimilation of (Frank), 1891, A., 764; (Nobbe, Schmid, Hiltner and Hotter), 1891, A., 1533.
- *Rosa centifolia*, composition of the flowers of (Niederstadt), 1884, A., 97.
- **Rose-trees**, experiments with ferrous sulphate on (Griffiths), 1886, T., 122.
- **Rye**, manuring of (Märcker), 1884, A., 103.
  - manuring of winter (v. Liebenberg), 1888, A., 189.
  - manuring of, with basic slag and other phosphates (Siewert), 1887, A., 294.
  - estimation of starch in (O'Sullivan), 1884, T., 8.
  - ungerminated, and the embryos of, composition of (Nachbaur), 1883, A., 107.
- **Rye grain** (Egger), 1884, A., 532.
- **Rye-bran**, arabinose from (Steiger and Schulze), 1891, A., 33.
- **Rye-meal** and -bran, detection of, in wheat-meal and -bran (Benecke), 1890, A., 302.
  - detection of the adulteration of, with flour (Wittmack), 1883, A., 392.
  - separation of wheat meal from (Kiœrskou), 1884, A., 376.
- **Sainfoin**, experiments with, at Grignon (Dehérain), 1884, A., 204, 1070.

Plants—

- *Sinapis alba*, composition of, during various stages of growth (Hornberger), 1885, A., 1087.
- **Soja bean**, composition of the (Meissl and Böcker), 1883, A., 1024; 1884, A., 918; (Schulze, Steiger and Maxwell), 1891, A., 1542.
  - nitrogenous constituents of (Schulze), 1888, A., 868.
  - white, composition of (Goessmann), 1890, A., 192.
  - composition of, and tables of the composition of various Japanese foods made from (Kinch), 1883, A., 235.
  - manuring of the (Levallois), 1888, A., 870.
  - fat of the (Morawski and Stingl), 1887, A., 687.
  - sugars of the (Morawski and Stingl), 1886, A., 829; 1887, A., 686.
- *Solanum Lycopersicum*, composition of the fruit of (Briosi and Gigli), 1891, A., 955; (Passerini), 1891, A., 956.
- **Sorghum**, cultivation of (Troschke), 1885, A., 1155.
  - cultivation of, in France (Minangoin), 1885, A., 79.
  - cultivation of two varieties of (v. Pfuel), 1885, A., 79.
- *Sorghum halepense*, cultivation of (v. Baratta), 1884, A., 921.
- *Sorghum saccharatum*, cultivation of (v. Széchényi), 1885, A., 833.
- **Spice**, champion (Lehmann), 1884, A., 473; (Harz), 1884, A., 865.
- **Spurrey** (*Spergula arvensis*) and spurrey seed, composition of (Munro), 1886, A., 173.
- **Star-anise** tree (*Illicium anisatum* (*religiosum*)), cultivation of, and the preparation of the oil in Annam (anon.), 1885, A., 1275.
  - composition of the fruit and seeds of (Oswald), 1891, A., 957.
  - products of the distillation of the leaves and fruits of the (Eijkman), 1886, A., 95; 1887, A., 497.
- **Straw**, composition of (Hébert), 1890, A., 1459.
  - effect of high farming on the amount of nutritious matter in (Märcker), 1884, A., 772.
  - aërobic nitrate-reducing ferment in (Bréal), 1892, A., 1259.
  - xylose from (Allen and Tollens), 1890, A., 472.

Plants—

- **Straw**, method for the analysis of (Hébert), 1890, A., 1460.
- **Strawberries**, composition of (Stone), 1890, A., 659.
  - ash of (Munro), 1885, A., 183.
  - wine and brandy from (Rommier), 1887, A., 292.
- **Strophanthus** seeds, constituents of (Elborne), 1887, A., 991.
- *Strychnos Nux vomica*, indigenous to Ceylon, chemistry and botany of (Dunstan and Short), 1885, A., 583.
- **Sugar-canes**, manuring of (Riffard), 1883, A., 506.
- *Symphonia fasciculata* (Clusiaceæ), oleaginous seeds of the (Regnauld and Villejean), 1885, A., 290.
- *Symphoricarpos racemosus*, calcium oxalate in the leaves of (Wehmer), 1890, A., 191.
- **Tea**, Chinese, composition of (Dvorkovitch), 1891, A., 1302.
  - Japanese, cultivation and preparation of (Takayama), 1885, A., 582; (Kozai), 1892, A., 1371.
    - composition of leaves of (Kellner), 1887, A., 73.
  - See also Main Index.
- **Tilias**, oil from the seeds of (Mueller), 1892, A., 92.
- **Tobacco**, cultivation of, in Japan (Takayama), 1885, A., 582; (Fesca and Imai), 1889, A., 69.
  - cultivation of, in Sumatra and Java (van Bemmelen), 1890, A., 1340.
  - cultivation of, in Switzerland (anon.), 1885, A., 79.
  - climatic conditions for the development of nicotine in (Mayer), 1891, A., 858.
  - manuring experiments on (Nessler), 1884, A., 362, 490; (Jenkins; Jordan), 1886, A., 177; (Harz), 1888, A., 990.
  - See also Main Index and *Nicotiana*.
- **Tomatoes**, composition and structure of the fruit of (Briosi and Gigli), 1891, A., 955; (Passerini), 1891, A., 956.
- **Trees**, forest, manuring of (Muel), 1883, A., 617.
  - reserve materials of (Hartig), 1889, A., 740.
  - calcium oxalate in the bark of (Kraus), 1892, A., 1370.
  - influence of solar rays on the temperature of (Ihne), 1884, A., 917.

PLANTS—
- **Trees**, with red leaves, chlorophyllic assimilation of (JUMELLE), 1891, A., 102.
  - distribution of ash in (WEBER), 1888, A., 742.
  - forest, ash of the seeds of (HORNBERGER), 1884, A., 353; 1885, A., 1255.
    - absence of nitrates in (EBERMAYER), 1889, A., 541.
  - fruit, nourishment of (TSCHAPLOWITZ), 1886, A., 390.
- **Trifolium**, composition of various (NILSON), 1892, A., 522.
- **Truffles**, chemistry of (CHATIN), 1890, A., 659, 821.
  - of Europe, relation between the terfâs or kamés of Africa and Western Asia and the (CHATIN), 1892, A., 654.
- **Turnips**, manuring of (DYER), 1885, A., 589; (WILSON), 1886, A., 913; (BROWN), 1886, A., 1068.
- *Ulex europaeus*, composition of (TROSCHKE), 1885, A., 684.
- *Vateria indica*, fat of the fruit of (V. HÖHNEL and WOLFBAUER), 1886, A., 223.
- **Vegetable kingdom**, correlative growth in the (V. SACHS), 1884, A., 626.
- **Vegetable substances**, detection of sucrose in (SCHULZE), 1888, A., 624.
- **Vegetables**, albuminoid and non-albuminoid nitrogen compounds of (BÖHMER), 1883, A., 236.
  - red colouring matter of (TERREIL), 1885, A., 1142.
  - estimation of pentoses in (DE CHALMOT and TOLLENS), 1891, A., 768; (STONE), 1892, A., 247; (GÜNTHER, DE CHALMOT and TOLLENS), 1892, A., 388.
  - used as food in Japan, and composition of (KELLNER), 1884, A., 674.
- **Vetches**, cultivation of some varieties of (DÖHN; NOBBE), 1883, A., 612.
  - fat from (JACOBSON), 1889, A., 296.
- **Vicia**, composition of various (NILSON), 1892, A., 522.
  - *Vicia Faba*, vicine in (RITTHAUSEN), 1884, A., 1405.
    - artificial infection of, with *Bacillus radicicola* (BEYERINCK), 1891, A., 1539.
  - *Vicia sativa*, composition of the seeds of (SCHULZE), 1889, A., 1029; (SCHULZE, STEIGER and MAXWELL), 1891, A., 1542.

PLANTS—
  - *Vicia villosa*, cultivation of (MÄRCKER), 1884, A., 769.
    - composition of (MÄRCKER), 1886, A., 645.
- **Vines**, vegetation of (ROOS and THOMAS), 1892, A., 908.
  - manuring of (STUTZER), 1884, A., 103, 1421; (NIPPGEN), 1884, A., 637; (MORITZ and SEUCKER), 1888, A., 190.
  - composition of (HILGER and GROSS), 1886, A., 1062.
  - boric acid in (BAUMERT), 1889, A., 295.
  - treated with copper sulphate and lime, copper in (MILLARDET and GAYON), 1886, A., 738.
  - origin of the colouring matter of (GAUTIER), 1892, A., 1242.
  - leaves of, physiological rôle of (MÜLLER), 1887, A., 685.
    - formation of starch in (CUBONI), 1885, A., 683, 1004.
  - diseases of, and their remedies (V. THÜMEN), 1883, A., 110; (MÜLLER; GIRARDIN), 1884, A., 481.
  - submersion of (DE GASPARIN), 1883, A., 1164.
  - sulphuring of (BASAROFF), 1883, A., 551; 1884, A., 629.
  - affected with mildew, composition of grapes from (MACH), 1884, A., 1406.
  - removal of mildew in (PICHARD), 1885, A., 590.
  - use of copper sulphate to destroy mildew in (PERREY), 1885, A., 77.
  - use of copper sulphate with lime as a preventive of mildew in (PRILLIEUX), 1886, A., 737.
  - treated with copper sulphate and lime, copper in (MILLARDET and GAYON), 1886, A., 738.
  - phylloxera, destruction of (DE LAFITTE), 1883, A., 233; (CARRIÈRE), 1883, A., 680; (HENNEGUY), 1884, A., 99; (TOZZETTI), 1884, A., 355; (GIRARDIN), 1884, A., 481; (BALBIANI), 1884, A., 920.
    - carbon *di*sulphide in aqueous solution as a remedy for (PELIGOT), 1885, A., 77.
    - preparation of thiocarbonates for the destruction of (SESTINI), 1883, A., 405.
  - See also Grapes.
- **Wheat**, experiments on, at Brie (LADUREAU and MOUSSEAUX), 1888, A., 383.

Plants—

Wheat, experiments on, at Grignon (Dehérain), 1884, A., 204, 1068; 1885, A., 928; 1889, A., 541; 1890, A., 820.
  experimental plots of, at La Somme (Nantier), 1888, A., 1127.
  continuous cultivation of, at Rothamsted during twenty years (Lawes and Gilbert), 1885, A., 583.
  continuous cultivation of, at Woburn (Voelcker), 1884, A., 482.
  cultivation of, in various latitudes (anon.), 1885, A., 78.
  cultivation of, in a sterile siliceous soil (Pagnoul), 1891, A., 104; 1892, A., 909.
  cultivation of, after sugar-beet and potatoes (Gatellier), 1886, A., 906.
  influence of rainfall on (anon.), 1884, A., 206.
  manuring of (Jordan), 1883, A., 681; (Märcker), 1884, A., 103.
  manuring of winter (v. Liebenberg), 1888, A., 189.
  manuring of, with phosphates (Raulin), 1889, A., 435, 1242.
  development of (Dehérain and Meyer), 1883, A., 493; (Hébert), 1891, A., 1285; 1892, A., 1119.
  influence of temperature on the development of (Risler), 1885, A., 422.
  spring, grown in 1887, composition of (Märcker), 1889, A., 183.
  American, composition of (Richardson), 1884, A., 1404.
  Bordeaux, composition of (Hébert), 1891, A., 1286.
  East Indian, composition of (Dietrich), 1889, A., 184.
  Indian, impurities in (Balland), 1884, A., 355.
  composition of, as influenced by environment (Richardson), 1885, A., 585.
  composition of the products of roller-milling of (Richardson), 1885, A., 1021.
  aluminium in (Allen), 1888, A., 631.
  gluten in (Stumpf), 1883, A., 236; (Johannsen), 1889, A., 296; (Gatellier and L'Hôte), 1889, A., 740, 919.
  proteids in (Hébert), 1892, A., 1119.
  estimation of starch in (O'Sullivan), 1884, T., 7.

Plants—

Wheat, germinated, chemical examination of (Balland), 1884, A., 1087.
Wheat-grain, ash of, grown at Rothamsted in different seasons and by different manures, composition of the (Lawes and Gilbert), 1884, T., 305.
  richness and density of (Pagnoul), 1888, A., 1128.
  loss occasioned by improper methods of pickling (Grassmann), 1887, A., 293.
  formation of starch in (Hébert), 1891, A., 1285.
Wheat-bran, carbohydrates from (Gans, Stone and Tollens), 1888, A., 1060.
  arabinose from (Steiger and Schulze), 1891, A., 33.
  detection of rye-meal and -bran in (Benecke), 1890, A., 302.
Flour obtained by various methods of grinding, quality of (Girard), 1884, A., 1447.
  old, alkaloids in (Balland), 1886, A., 164.
  aluminium as a natural constituent of (Young), 1888, A., 624.
  bacteria from (Boutroux), 1891, A., 1532.
  proteids of (Martin), 1886, A., 1065.
  action of sulphurous anhydride on (Balland), 1891, A., 95.
  alteration of (Balland), 1884, A., 236, 532.
  analysis of (Balland), 1884, A., 374; (Leeds), 1884, A., 1080.
  detection of alum in (Herz), 1887, A., 530.
  detection of ergot in (Palm), 1884, A., 376.
  estimation of gluten in (Reed), 1884, A., 122.
Wheat-meal, detection of rye-meal and -bran in (Benecke), 1890, A., 302.
  separation of, from rye-meal (Kiœrskou), 1884, A., 376.
Wheat-straw, composition of (Hébert), 1890, A., 1461.
  grown at Rothamsted under different seasons and manures, composition of the ash of (Lawes and Gilbert), 1884, T., 305.
Winter-bark, true (Arata and Canzoneri), 1890, A., 405.
Withania coagulans, "rennet" ferment from the seeds of (Lea), 1884, A., 535.

SOILS.

Soils—

Soils, chemical study of (Dugast), 1884, A., 677.
- chemical changes in (Hoppe-Seyler), 1884, A., 633.
- changes in, during the formation of a meadow (Lawes), 1889, A., 921.
- arable, formation of (Müntz), 1890, A., 1183.
- testing, by growth of oats (Atterberg), 1888, A., 317.
- physical properties of, influence of artificial manures on the (Wollny), 1884, A., 210.
- physical properties of, influence of the, on the amount of free carbonic anhydride present (Wollny), 1887, A., 521.
- physical properties of, influence of a crop or covering on the (Wollny), 1884, A., 922; 1888, A., 1222.
- thermal conductivity of (Wagner), 1884, A., 923.
- temperature of, in relation to the air temperature (Hossfeld), 1884, A., 357.
- temperature of, and moisture in, influence of the state of aggregation on (Wollny), 1883, A., 500.
- rise of temperature in, by the condensation of gaseous water and of gases (Stellwaag), 1883, A., 615.
- temperature of, influence of organic manures on the (Wagner), 1883, A., 821.
- temperatures in, influence of constant, on plants (Hellriegel), 1884, A., 916.
- odour of (Berthelot and André), 1891, A., 858.
- influence of physical and chemical properties of, on evaporation (Eser), 1885, A., 80.
- evaporation of water from (Masure), 1883, A., 615; 1885, A., 1260.
- and its cultivation, influence of, on the temperature of, and moisture in, the air (Wollny), 1885, A., 81.
- water in, influence of cultivation on the (Hensch), 1885, A., 588.
- water in, influence of vegetation on the amount of (Wollny), 1888, A., 1222.

Soils—

Soils, water in, influence of, on plant growth (Hellriegel), 1885, A., 421.
- water in, influence of, on vegetation (Wollny), 1888, A., 316.
- influence of, on vegetation (Raulin), 1892, A., 1121.
- influence of the amount of, on the development of roots (Hellriegel), 1884, A., 626.
- dependence of cultivation on the depth of (Heinrich), 1885, A., 80.
- influence of, on the physical properties of plants (Ville), 1890, A., 81.
- effect on the fertility of, by covering with farm-yard manure (Wollny), 1883, A., 237.
- fertility of, dependent on the action of worms (v. Hensen), 1883, A., 237.
- of the forest land of Deli (Sumatra) and Java, causes of the fertility of, for tobacco and of the decrease of fertility (van Bemmelen), 1890, A., 1340.
- fertility of, which had been removed from its original position and subsequently replaced (Märcker), 1884, A., 773.
- fertilising properties of the water of the Nile on (Müntz), 1889, A., 646.
- causes of the exhaustion of arable, by cropping without manures (Dehérain), 1890, A., 406.
- exhaustion of cultivated but unmanured (Dehérain), 1890, A., 1459.
- influence of the sterilisation of, on the growth of plants (Tschirch), 1888, A., 985.
- decomposition of organic manures in (Wollny), 1887, A., 523; (Müntz), 1890, A., 1183.
- retentive capacity for plant food possessed by (Dumas), 1883, A., 681.
- inoculation of, experiments on (Schmitter), 1892, A., 1512.
- absorptive power of (van Bemmelen), 1888, A., 985.
- absorption by (Kellner), 1887, A., 76.

Soils—
Soils, composition of (van Bemmelen), 1890, A., 1339.
  arsenic in, of cemeteries (Schlagdenhauffen and Garnier), 1885, A., 1009.
  atmosphere in (Schlœsing), 1890, A., 81.
  boric acid in the products of (Gassend), 1892, A., 93.
  calcium in (de Mondésir), 1889, A., 542.
  lime, action of, on (Kellner, Sakano, Sato and Shinjo), 1892, A., 94.
  lime, action of, on heavy loam (Johnstone), 1892, A., 523.
  lime as a constituent of, influence of, on plant development (Hilgard), 1888, A., 318.
  carbon in (Lawes and Gilbert), 1885, T., 419.
  organic carbon in, which absorb free nitrogen (Berthelot), 1886, A., 736.
  carbonic oxide, absorption of, by (Berthelot), 1891, A., 16.
  carbonic anhydride formed in manured and unmanured (Dehérain), 1890, A., 408.
  percentage of carbonic anhydride in the air of (Wollny), 1889, A., 1030.
  free carbonic anhydride, influence of the physical properties of soil on the amount of, in (Wollny), 1887, A., 521.
  humus compounds in (Eggertz), 1889, A., 543; (L'Hôte), 1891, A., 492.
  inorganic substances in acid (de Mondésir), 1892, A., 1513.
  ferrous oxide, action of, on (Kellner), 1886, A., 481.
  iron sulphate, action of, on (Marguerite-Delacharlonny and Destremx), 1889, A., 436.
  kaolin in arable (Sachsse and Becker), 1892, A., 1026.
  Leguminosæ in acid (de Mondésir), 1889, A., 434.
  organic matter of, assimilation of, by plants (Dehérain), 1884, A., 208.
  oxyhydrogen gas, absorption of, by (Immendorff), 1892, A., 377.
  phosphoric acid in (de Gasparin), 1885, A., 588; (Berthelot and André), 1888, A., 384; (Dehérain), 1892, A., 233; (Wiklund), 1892, A., 750.

Soils—
Soils, phosphoric acid, action of various forms of, in (Fittbogen), 1885, A., 1009; 1886, A., 1069.
  phosphoric acid, assimilability of, in (Lechartier), 1884, A., 868.
  phosphoric acid, exhaustion of, in, by continuous cropping (Dehérain), 1890, A., 407.
  superphosphates, action of, on (Wagner), 1884, A., 1071; (Voelcker), 1885, A., 82.
  superphosphates, absorption of, by sandy (Thomson), 1891, A., 105.
  potassium, condition of, in (Berthelot and André), 1888, A., 190.
  silicates, decomposition of, in, by lime and gypsum (de Marneffe), 1891, A., 1135.
  sodium chloride, effect of water containing, on (Krauch), 1883, A., 1027; (Storp), 1884, A., 856; (Stood), 1889, A., 795.
  sulphur in (Berthelot and André), 1888, A., 384.
  titanic oxide in (McCaleb), 1888, A., 745.
  urea, behaviour of, in (Kellner), 1887, A., 524.
  weeds in (Putensen), 1884, A., 211.
  zinc salts, behaviour of, in (Nobbe), 1884, A., 1407; (Baumann), 1884, A., 1408.
  zinc sulphate, effect of water containing, on (Krauch), 1883, A., 1027; (Storp), 1884, A., 856.
Soil of "fairy rings," composition of (Lawes, Gilbert and Warington), 1883, T., 215.
  humus obtained from peat, examination of (Sostegni), 1885, A., 1082.
  rich in humus and their behaviour with water (Emmerling and Loges), 1884, A., 632.
  of a meadow newly laid down to permanent grass, history of the (Lawes), 1889, A., 920.
  meadow, increase of nitrogen in (Dehérain), 1886, A., 276.
  moorland, examination of (Eggertz and Nilson), 1890, A., 192.
  peaty, examination of (Eggertz and Nilson), 1890, A., 192.
    influence of the percentage of moisture in, on vegetation (Heinrich), 1883, A., 681.
    action of sea-mud on (Fleischer), 1885, A., 929.

SOILS—
Soil, peaty, nitrogenous, experiments with (REDER), 1885, A., 188; (EUGLING), 1885, A., 929.
raw heavy, how to bring, into cultivation (HEIDEN), 1884, A., 1412.
sandy, action of kainite on (STEFFENS), 1884, A., 868.
action of sea-mud on (FLEISCHER), 1885, A., 929.
result of removing forest litter from the surface of (RAMANN), 1885, A., 81.
Algerian (LADUREAU), 1889, A., 436.
from the Andaman Islands, East Indies, containing iron and chromium (WARDEN), 1891, A., 958.
virgin, of Australia, exhaustion of (MACIVOR), 1888, A., 523.
sterile, from California (VOELCKER), 1884, A., 486.
volcanic, of Deli (Sumatra), and Malang (VAN BEMMELEN), 1890, A., 823.
Japanese, examination of (KELLNER and IMAI), 1884, A., 680.
black, from Manitoba (MUNRO), 1885, A., 834.
of Manitoba prairies, sources of the fertility of (LAWES and GILBERT), 1885, T., 408.
from Rembang (VAN BEMMELEN), 1890, A., 823.
at Rothamsted, nitric acid in (LAWES, GILBERT and WARINGTON), 1884, A., 357.
Tunisian (QUANTIN), 1885, A., 686; 1887, A., 860.
from Washington Territory, composition of (SCHNEIDER), 1889, A., 435.
from the new alluvia of the Zuiderzee (VAN BEMMELEN), 1890, A., 822.
Nitrification, nitrogen and **nitrogenous compounds** (WARINGTON), 1883, A., 115; 1884, T., 637; 1888, T., 751; 1891, T., 484; P., 92; (MARIÉ-DAVY), 1883, A., 116; (MÜNTZ and AUBIN), 1883, A., 233; (FRANKLAND), 1885, T., 181; (BAUMANN), 1887, A., 84; (CELLI and MARINO-ZUCO), 1887, A., 858; (BERTHELOT), 1889, A., 1238; (PICHARD), 1890, A., 545; (LEONE), 1891, A., 102.
is organic carbon essential to? (MUNRO), 1886, T., 651.
nitrification and denitrification, alternate (MUNRO), 1886, T., 669.

SOILS—
Nitrification, nitrogen and **nitrogenous compounds**—
in organic media of acid reaction (CHUARD), 1892, A., 906.
in soils of different degrees of fertility (DEHÉRAIN), 1889, A., 70.
by soils taken from different depths (WARINGTON), 1887, T., 125.
in Manitoba soil (LAWES and GILBERT), 1885, T., 410.
liberation of nitrogen during (KELLNER and YOSHII), 1888, A., 185; (IMMENDORFF), 1892, A., 374.
influence of gypsum on (WARINGTON), 1885, T., 758; (PICHARD), 1889, A., 1239.
influence of gypsum and clay on (PICHARD), 1890, A., 545.
influence of gypsum and iron sulphate on (PICHARD), 1891, A., 1543.
influence of organic nitrogen and clay in fallow soils on (PICHARD), 1892, A., 656.
influence of certain salts on (PICHARD), 1884, A., 924, 1417.
influence of organic matter on (MUNRO), 1886, T., 667.
of ammonia and its salts (MUNRO), 1886, T., 643, 654; (PLATH), 1888, A., 521; (LANDOLT), 1888, A., 1328; (SCHLŒSING), 1889, A., 1239; 1890, A., 282.
of ammoniacal solutions (MUNRO), 1888, A., 82; (WARINGTON), 1891, T., 485.
ammonia, formation of, in arable soils (HÉBERT), 1889, A., 1240.
ammonia, absorption of, by clay soils (WIPPRECHT), 1887, A., 1136.
ammonia, absorption of, from the air by soils (SCHLŒSING), 1890, A., 821, 822; (BERTHELOT), 1890, A., 822.
ammonia, evolution of, from vegetable soils (BERTHELOT and ANDRÉ), 1887, A., 860; (BERTHELOT), 1889, A., 1238.
of ethylamine by soil (MUNRO), 1886, T., 633.
of gelatin by soil (MUNRO), 1886, T., 641.
oxidation of iodides during (MÜNTZ), 1885, A., 870.
comparative, of humus and undecomposed organic matter (PICHARD), 1892, A., 906.

SOILS—
Nitrification, nitrogen and nitrogenous compounds—
nitrates, formation of, in (DEHÉRAIN), 1887, A., 993; 1890, A., 408; (WARINGTON), 1891, T., 514; (MÜNTZ), 1891, A., 1395.
distinction between the production of nitrites and nitrates in (WARINGTON), 1891, T., 485.
nitrates, percentage of, in unmanured soil (BAUMANN), 1887, A., 83.
nitrates, conversion of, in soil, into nitrogenous organic matter (BERTHELOT), 1888, A., 745.
nitrates, loss of, in soil, in drainage (DEHÉRAIN), 1891, A., 765, 859.
nitrates, reduction of, in (DEHÉRAIN and MAQUENNE), 1883, A., 229, 503.
nitrates, absence of, in soils of forests (EBERMAYER), 1889, A., 541.
nitrites, formation of, in (WINOGRADSKY), 1891, A., 1545.
nitrogen in various soils (LAWES and GILBERT), 1885, T., 419.
nitrogen in the soil in experimental fields at Rothamsted (LAWES and GILBERT), 1884, A., 682.
nitrogen, supply of, to soil, by the Lupitz method of cultivation (SCHULTZ), 1884, A., 105.
nitrogen, amount of assimilable, in uncultivated soil (BAUMANN), 1887, A., 82.
nitrogen, absorption of, by soil (JOULIE), 1886, A., 275; (BERTHELOT), 1887, A., 395, 617; 1888, A., 871, 1330; 1889, A., 743, 1238; 1890, A., 822; (GAUTIER and DROUIN), 1888, A., 746, 871, 1127; 1892, A., 522; (SCHLŒSING), 1888, A., 747, 870, 1330; 1889, A., 1237; 1890, A., 822.
nitrogen, absorption of, by clay soils (BERTHELOT), 1889, A., 1237.
nitrogen, absorption of, by argillaceous soils (BERTHELOT), 1886, A., 175.
nitrogen, absorption of, by soils, conditions favourable to the (BERTHELOT), 1888, A., 624.
nitrogen, absorption of, by soil, influence of electrification on the (BERTHELOT), 1889, A., 1237.
influence of, on the assimilation of nitrogen by plants (FRANK), 1892, A., 372.
nitrogen, maintenance and increase of the amount of, in (KÖNIG), 1888, A., 523.
nitrogen, increase of, in soil of grass land (DEHÉRAIN), 1886, A., 276.

SOILS—
Nitrification, nitrogen and nitrogenous compounds—
nitrogen, loss of, in the decomposition of nitrogenous matters in (IMMENDORFF), 1892, A., 374.
nitrogen, loss and gain of, by soil (FRANK), 1889, A., 71; (DEHÉRAIN), 1889, A., 745; (PAGNOUL), 1890, A., 1023.
nitrogen, loss and gain of, in arable soil under the influence of different systems of cultivation (DEHÉRAIN), 1883, A., 373, 749.
nitric nitrogen from soils and subsoils (WARINGTON), 1887, T., 128.
nitrogenous compounds, origin and transformation of, in (WARINGTON), 1884, A., 490.
nitrogenous compounds in arable soil (L'HÔTE), 1891, A., 492.
nitrogenous compounds in vegetable soil (BERTHELOT and ANDRÉ), 1887, A., 293; 1891, A., 610.
nitrogenous compounds, volatile, evolved from vegetable soil (BERTHELOT), 1889, A., 1238; 1891, A., 611.
nitrogenous organic compounds in soil (LOGES), 1886, A., 96; (WARINGTON), 1887, A., 523.
of organic nitrogen (LEONE and MAGNANIMI), 1892, A., 367.
nitrogen, liberation of, during (KELLNER and YOSHII), 1888, A., 185; (IMMENDORFF), 1892, A., 374.
of thiocyanates (MUNRO), 1886, T., 638.
of urea and urine (MUNRO), 1886, T., 639.
Butyric ferment in soils (DEHÉRAIN and MAQUENNE), 1883, A., 610; 1884, A., 1063.
Micro-organisms in soil (KOCH and MIQUEL), 1884, A., 486; (WOLLNY), 1885, A., 426, 683.
Microzymæ and vibrioles, origin of, in air, water, soil, etc. (BÉCHAMP), 1885, A., 417.
Nitrifying organisms (MILES), 1887, A., 1134; (WINOGRADSKY), 1890, A., 1180; (WARINGTON), 1891, T., 523; (P. and G. FRANKLAND), 1891, A., 352.
distribution of, in soils (WARINGTON), 1887, T., 118.
period of incubation of (MUNRO), 1886, T., 679.
Nitric organism, behaviour of, with ammonia (WARINGTON), 1891, T., 521.

Soils—

Nitrification, nitrogen and nitrogenous compounds—
- **Nitric organism** of nitrification, nutrition of the (Warington), 1891, T., 519.
- **Nitrous organism**, conditions which determine the formation or separation of a, in nitrification (Warington), 1891, T., 490.
- **Denitrification** (Dehérain and Maquenne), 1883, A., 229, 503; (Gayon and Dupetit), 1883, A., 609; 1886, A., 823; (Springer), 1884, A., 350; (Munro), 1886, T., 667, 681; (Warington), 1888, T., 742; (de Blasi and Travali), 1890, A., 1453; (Leone), 1891, A., 101; (Bréal), 1892, A., 1259.
- **Denitrifying ferment** in soils (Gayon), 1883, A., 679.
- **Fermentation** of cane sugar in contact with arable soil (Dehérain and Maquenne), 1884, A., 351.
- **Oxidation**, spontaneous, of humic acid and vegetable soil (Berthelot and André), 1892, A., 655.
  - of ammonia in soil (Uffelmann), 1886, A., 917.
  - of nitrites in soil (Winogradsky), 1891, A., 1545.
  - under the influence of microscopic organisms in the (Müntz), 1885, A., 1151.

Soils, analysis of (Lechartier), 1884, A., 921; (Knop), 1885, A., 193; (Mayer), 1891, A., 958.
- collection and preparation of samples for (Lawes), 1889, A., 921.
- chemical and mechanical (Orth), 1883, A., 621.
- dialysis of arable (Petermann), 1884, A., 113.
- detection of nitrates in (Kreusler), 1889, A., 547; (Frank), 1889, A., 649.
- estimation of aluminium in (van Bemmelen), 1890, A., 833.
- estimation of ammonia in (Berthelot and André), 1886, A., 739,

Soils—

Soils, analysis of—
- 740, 832; (Schlœsing), 1886, A., 740, 831; (Knop), 1887, A., 297; 1888, A., 533; (Baumann), 1888, A., 87, 1336.
- estimation of absorbed bases in (Kellner), 1887, A., 77.
- estimation of carbon in (Stachowsky), 1888, A., 534; (Schlœsing), 1888, A., 1335.
- estimation of carbon *di*oxide in (Wollny), 1887, A., 521.
- estimation of the fertility of (Vogel) 1883, A., 517.
- estimation of humus in (Loges), 1883, A., 247, 830; (Raulin), 1890, A., 668; (van Bemmelen), 1890, A., 832; (Paturel), 1891, A., 627.
- estimation of the inorganic constituents of (Berthelot and André), 1891, A., 622.
- estimation of kaolin in arable (Sachsse and Becker), 1892, A., 1026.
- estimation of nitrates in, source of error in the (Giunti), 1889, A., 438.
- estimation of ammoniacal nitrogen in (Guyard), 1884, A., 1423; (Baumann), 1887, A., 82.
- estimation of nitrogen in vegetable (Breal), 1887, A., 1138; 1888, A., 384; (Schlœsing), 1888, A., 1335; (Berthelot and André), 1888, A., 1335; 1889, A., 307.
- estimation of phosphoric acid in (de Gasparin), 1883, A., 619; 1884, A., 871; (Wiklund), 1892, A., 750.
- estimation of phosphoric acid, soluble, in (Stutzer), 1885, A., 439; (Thomson), 1886, A., 392.
- estimation of potassium in (Quantin), 1885, A., 1262; (Raulin), 1890, A., 668.
- estimation of sulphur in, and the forms in which it is present (Berthelot and André), 1892, A., 656.
- estimation of sulphur, water, etc., in (van Bemmelen), 1890, A., 832.

WATER.

Water—
- **Rain** as a source of nitrogen for vegetation (Tuxen), 1892, A., 233.
  - collected at Rothamsted, ammonia, chlorine and sulphuric acid in (Lawes, Gilbert and Warington), 1884, A., 209.
  - of tropical districts, nitrates in the (Müntz and Marcano), 1889, A., 923.
- **Rainfall**, variations in (Kremser), 1885, A., 425.
- **Waters, drainage** (Dehérain), 1890, A., 1459.

Water—
- **Waters, drainage**, composition of (Warington), 1887, T., 506; (Dehérain), 1891, A., 765.
  - chemical changes in (Hoppe-Seyler), 1884, A., 633.
  - from different crops, loss of nitric nitrogen in (Dehérain), 1891, A., 859.
  - from cropped land (Warington), 1887, T., 513.
  - from bare and cultivated soils (Dehérain), 1891, A., 859.

MANURES AND MANURING EXPERIMENTS.

Manures, various (Wagner), 1885, A., 1156.
- formation of, by putrefaction (Reiset), 1889, A., 739.
- selection of (de Gasparin), 1885, A., 930.
- supply of, at different periods of the growth of plants (Liebscher), 1888, A., 382.
- volume-weight of (Magerstein), 1884, A., 1213.
- action of solutions of, on germination (Jarius), 1886, A., 90.
- influence of the division of, on their action (Wagner), 1883, A., 117.
- composition of the ash of wheat-grain and wheat-straw grown at Rothamsted in different seasons and by different (Lawes and Gilbert), 1884, T., 305.
- influence of different systems of applying (v. Tautphoeus; Wollny), 1885, A., 1156.
- artificial, manner of applying (van der Berghe), 1886, A., 647.
  - influence of, on the physical properties of soil (Wollny), 1884, A., 210.
  - and farmyard manure, comparison of (Guillaume), 1883, A., 501.
  - and natural (Macadam), 1888, A., 625.
- inferior (Stutzer), 1884, A., 490.
- **Ammonium** salts as manures (Pagnoul), 1891, A., 1545.
  - sulphate, manuring with (Märcker), 1890, A., 287.

Manures—
- **Ammonium** sulphate, failure of, as manure (Brown), 1886, A., 646.
  - manuring sugar-beet with (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
  - and sodium nitrate, comparative manurial value of (Märcker), 1885, A., 1156; 1886, A., 646, 954; 1890, A., 287; (Magerstein), 1887, A., 77; (Klien), 1888, A., 872; (Baessler), 1889, A., 436; (Roland), 1889, A., 1085.
  - superphosphate and thiocyanates, manuring with (Wollny), 1884, A., 926.
- **Beech cupules**, manurial value of (Hornberger), 1890, A., 287.
- **Blood**, dried, manurial value of (Petermann), 1884, A., 211.
  - transformation of, into a solid and inodorous manure, by means of a new ferric sulphate (Marguerite-Delacharlonny), 1883, A., 239.
- **Bone-meal** as manure (Koch), 1884, A., 637; (Steffens), 1884, A., 868; (Petermann), 1888, A., 749.
  - as a manure, compared with basic slag and superphosphate (Heiden), 1889, A., 299.
  - manufacture of (König), 1884, A., 1419.

Manures—
Bone-meal, investigation of (König), 1885, A., 851.
  composition of (Stoklasa), 1891, A., 105.
  amount of fat in (Merz), 1891, A., 106.
  nitrogen in (Wagner), 1884, A., 359.
  manuring of potatoes with (Koch), 1884, A., 637.
Bone manure, weathering of (König), 1884, A., 360.
Bracken, manurial value of (Hornberger), 1886, A., 485.
Lime as a manure, with especial regard to paddy fields (Kellner, Sakano, Sato, and Shinjo), 1892, A., 93.
  waste from sugar factories as manure (Holdefleiss and Strohmer), 1886, A., 647.
  manuring of potatoes with (Heiden), 1884, A., 1419.
Gypsum as manure (Nessler), 1884, A., 637; (Pichard), 1884, A., 1418.
  superphosphatic, as an absorbent of ammonia (Heiden), 1885, A., 83.
Chili saltpetre. See Sodium nitrate.
Cider-marc, use of, as manure (Lechartier), 1885, A., 834.
Compost manure (Mayer), 1884, A., 360.
  composition of materials used in the preparation of (Petermann), 1883, A., 504.
  peat, and sea mud as manures (Enckhausen), 1884, A., 867.
    and sodium nitrate, parallel experiments on, as manures for sugar-beet (Kuntze), 1885, A., 429.
Farm-yard manure (Griffiths), 1884, A., 1070; (Dehérain), 1888, A., 748.
  preparation of (Dehérain), 1884, A., 1412.
  production of (Müntz and Girard), 1887, A., 175.
  production and cost of (Holdefleiss and Herter), 1884, A., 867.
  cost of production of (Dettweiler), 1884, A., 637.
  composition of (Audoynaud and Zacharewicz), 1885, A., 834, 1260; (Sestini), 1888, A., 1332; (König), 1890, A., 1478.

Manures—
Farm-yard manure, cause of the high temperatures observed in (Dehérain), 1884, A., 924.
  and artificial manures, comparison of (Guillaume), 1883, A., 501.
  effect on the fertility of soils by covering with (Wollny), 1883, A., 237.
  effects of, on potatoes (Gagnaire), 1885, A., 189.
  experiments with (Heiden), 1888, A., 872; 1890, A., 411.
  depreciation of, by exposure to wet and to fermentation (Roberts and Wing), 1891, A., 1396.
  aërobic fermentation of (Dehérain), 1884, A., 1412.
  fermentation of (Gayon), 1884, A., 773; (Dehérain), 1884, A., 1412; (Schlœsing), 1892, A., 1123.
  fermentation of, in absence of oxygen (Schlœsing), 1890, A. 282.
  loss of nitrogen during the fermentation of (Joulie), 1884, A., 1070, 1413; (Brame), 1884, A., 1416; (Vogel), 1891, A., 1547.
  loss of nitrogen in, prevention of (Dietzell), 1888, A., 873.
  loss of nitrogen in, calcium sulphite as a preventitive of (Jensch) 1889, A., 184.
  preservation of ammonia in (Troschke), 1885, A., 187.
  preservation of (Heiden), 1886, A., 277; (Hickethier and Holdefleiss), 1886, A., 390.
  See also Organic Manures.
Felspar, ground, as potash manure (Aitken), 1887, A., 996.
Green manures, best time for ploughing under (Baessler), 1888, A., 191.
  as suppliers of nitrogen (Müntz), 1890, A., 1184.
Guano, a new, from Australia, composition of (Griffiths), 1883, A., 375; 1884, A., 107.
  from Aves Island, examination of (Märcker; Güntz), 1884, A., 489.
  of Cape Verde Islands, composition of (Andouard), 1884, A., 359.
  from Sidney Island (Märcker), 1885, A., 429.
  coexistence of ammonium carbonate and potassium sulphate in (Chevreul), 1884, A., 359.

Manures—
- **Guano**, bat's, from Cuba (Petermann), 1889, A., 436.
  - Australian, and minerals therein (MacIvor), 1887, A., 708.
  - fish, manuring with (Petermann), 1889, A., 647.
- **Herring offal** and salt as manure (Hecquet d'Orval; Pagnoul), 1884, A., 866.
- **Humus** as manure (Dehérain), 1891, A., 859.
- **Iron sulphate**, agricultural experiments with (Griffiths), 1884, T., 71; 1885, T., 46; P., 130; 1886, T., 114; P., 260; 1887, T., 215.
  - influence of, on nitrification (Pichard), 1891, A., 1543.
- **Kainite** as manure for sandy soil (Steffens), 1884, A., 868.
  - improvement of sheep manure by (Ritter), 1885, A., 834.
  - as potato manure (Fleischer), 1884, A., 108.
- **Krugite** as manure for potatoes (Karbe), 1884, A., 926; (Kette), 1884, A., 1401.
- **Leaves**, freshly fallen, manurial value of (Emmerling), 1885, A., 686.
- **Litter**, peat as (Lenné), 1883, A., 238; (Sagnier), 1885, A., 429.
  - peat, composition of (Fleischer), 1884, A., 925.
  - peat and straw, comparison of (Fleischer), 1884, A., 1418.
  - sawdust and straw as (Sagnier), 1885, A., 429.
  - turf and moss, as manure (Fleischer), 1884, A., 105.
  - turf and straw, as manure (Fleischer), 1888, A., 319.
- **Litters**, various, absorptive and evaporative powers of (Wollny), 1885, A., 1008.
- **Marine products** as manures (Mayer), 1889, A., 1085.
- **Mineral manures**, deposits of (Grigorieff), 1883, A., 529.
- **Nitrates**, action of superphosphates on (Devarda), 1889, A., 72.
  - and superphosphates, incompatibility of, as manures (Andouard), 1887, A., 617.
- **Nitrogen** in bone-meal (Wagner), 1884, A., 359.
  - green manures as suppliers of (Müntz), 1890, A., 1184.
  - necessary for cultivated plants (Thaer), 1885, A., 75.

Manures—
- **Nitrogen**, manuring barley and oats with (Märcker), 1884, A., 925.
  - manurial value of, in sodium nitrate and ammonium sulphate (Klien), 1888, A., 872; (Baessler), 1889, A., 436.
  - loss of, during the fermentation of farmyard manure (Joulie), 1884, A., 1070, 1413; (Brame), 1884, A., 1416; (Vogel), 1891, A., 1547.
  - loss of, in farmyard manure, prevention of (Dietzell), 1888, A., 873.
  - loss of, in manure heaps, calcium sulphite as a preventitive of (Jensch), 1889, A., 184.
  - loss of, in the decomposition of organic matter (Schlœsing), 1889, A., 638.
  - estimation of the relative value of, in artificial manures (Ostersetzer), 1885, A., 436.
  - ammoniacal and nitric, as manure (Pagnoul), 1891, A., 1545.
  - organic, in chemical manures (Gassaud), 1887, A., 863.
- **Nitrogenous manures**, behaviour of various plants towards (v. Wolff and Kreuzhage), 1888, A., 320.
  - effect of, on tobacco (Harz), 1888, A., 990.
  - influence of, on yield of crops (Wagner), 1888, A., 525.
  - various, values of (Märcker), 1884, A., 488.
  - value of animal débris as (Müntz and Girard), 1892, A., 96.
- **Nitrogenous organic manures** (Petermann), 1888, A., 990.
  - preservatives for (Immendorff), 1892, A., 378.
  - decomposibility of (Stutzer and Klinkenberg), 1883, A., 615.
  - loss of nitrogen during the fermentation of (v. Krause), 1890, A., 1340; (Vogel), 1891, A., 1547.
- **Organic manures**, influence of, on soil temperature (Wagner), 1883, A., 821.
  - decomposition of, in soils (Wollny), 1887, A., 523; (Müntz), 1890, A., 1183.
  - loss of nitrogen in the decomposition of (Schlœsing), 1889, A., 638.
  - See also Farmyard Manure.
- **Peat** as litter (Lenné), 1883, A., 238; (Sagnier), 1885, A., 429.

Manures—
- **Peat** as manure (Schreiner), 1885, A., 428; (Wagner), 1885, A., 1009.
  - litter and straw litter, comparison of (Fleischer), 1884, A., 1418.
    - analysis of (Fleischer), 1884, A., 925.
  - waste, manurial value of (Märcker), 1885, A., 687.
- **Phosphates**, various, manuring experiments with (Roberts; Kremp), 1887, A., 1137; (Gatellier), 1888, A., 749.
  - manuring of barley and oats with (Märcker), 1884, A., 925.
  - manuring of cereals with (Raulin), 1889, A., 435, 1242.
  - manuring sugar-beet with (Ladureau), 1885, A., 1157.
  - and basic slag, manurial value of (Schönemark), 1886, A., 1069; (Siewert), 1887, A., 294; (Brinckmann; Fittbogen and Salfeld), 1887, A., 524.
  - dissolved and undissolved, comparison of (Dyer), 1884, A., 774.
  - insoluble (Lloyd), 1884, A., 213.
    - finely ground, as manures (Aitken), 1887, A., 995.
    - application of, to soils (Fleischer and Kissling), 1883, A., 822.
    - behaviour of, in peaty soils and in dilute solvents (König), 1883, A., 681.
    - action of (Voelcker), 1885, A., 82.
  - mineral, on arable land (Guillaume), 1883, A., 118.
  - precipitated, manuring with (Schönemark), 1886, A., 1069.
    - manuring experiments with (Löbbecke), 1885, A., 429.
  - retrograde, agricultural value of (Joffre), 1887, A., 861.
  - reversion of, in soils (Gladding), 1884, A., 1075, 1424.
  - See also Superphosphates.
- **Phosphoric acid** of mineral origin, differentiation of, from that of animal origin in manures (v. Lorenz), 1888, A., 1340.
  - manurial action of various forms of (Fittbogen), 1885, A., 1009; 1886, A., 1069.
  - in sodium nitrate (Ochsenius), 1887, A., 558.
  - value of, in basic slag (Märcker), 1887, A., 687.

Manures—
- **Phosphoric acid** of basic slag, assimilation of (Petermann), 1889, A., 647.
  - manuring sugar-beet with (Märcker), 1891, A., 612.
  - free, and superphosphates (Weilandt), 1887, A., 995.
- **Phosphorite** of Beauval, origin of (Nantier), 1889, A., 837.
  - of Capo di Leuca (Giglioli), 1888, A., 1259.
  - from the Rata Island, composition of (anon.), 1884, A., 360.
  - from Redonda, treatment of (Williams), 1885, A., 1018.
- **Pig's dung**, composition of (Lecouteux), 1883, A., 117.
- **Potash**, manuring with (Farský), 1884, A., 774.
  - manure, ground felspar as (Aitken), 1887, A., 996.
  - use of, in Brittany (Lechartier), 1885, A., 83.
  - as a manure for potatoes (Märcker), 1885, A., 83; (Boursier and Saint-André), 1885, A., 833.
- **Potassium chloride** as a manure (Zolla), 1885, A., 588.
  - manuring sugar-beet with, on heavy soil (Petermann), 1888, A., 1128.
- **Potassium nitrate** and sodium nitrate, manuring potatoes with (v. Edler), 1883, A., 117; (Dehérain), 1884, A., 361.
- "**Poudrette**," preparation of (Weigelt), 1884, A., 489.
- **Sawdust** as litter (Sagnier), 1885, A., 429.
- **Sea-mud** as a manure (Fleischer), 1885, A., 929.
  - and peat compost as manures (Enckhausen), 1884, A., 867.
- **Sewage**, manurial value of (Müller), 1884, A., 642; 1885, A., 1268; (Engler), 1884, A., 1418.
  - disinfected, injurious effects of (Kellner), 1884, A., 697.
- **Sewer mud**, manurial value of (Fleischer), 1884, A., 107.
- **Sheep manure**, improvement of, by kainite (Ritter), 1885, A., 834.
  - quantity of, supplied to soils by grazing sheep (Müntz and Girard), 1887, A., 175.
- **Silicic acid**, function of, in the growth of maize (Jodin), 1884, A., 201, 669.
  - importance of, in the culture of oats (Kreuzhage and v. Wolff), 1884, A., 1211.

Manures—

- **Slag, basic** (*basic converter; Thomas slag*) (Jensch), 1887, A., 216.
  - influence of the ferrous oxide in, on plant-growth (Munro), 1887, A., 178.
  - obtained in the dephosphorising process, utilisation of, for agricultural purposes (anon.), 1883, A., 133, 375.
  - use of, in agriculture (Fleischer), 1886, A., 277.
  - phosphatic, utilisation of (Scheibler), 1884, A., 783; (anon.), 1884, A., 1228.
  - preparation of manure from (Winkelhofer), 1884, A., 212.
  - and other phosphates, manurial value of (Schönemark), 1886, A., 1069; (Siewert), 1887, A., 294; (Brinckmann; Fittbogen and Salfeld), 1887, A., 524.
  - comparison of, with superphosphate (Meissl), 1889, A., 745.
  - manurial value of (Wrightson and Munro), 1887, A., 176; (Wagner), 1887, A., 525; (Aitken), 1887, A., 995.
  - as a manure compared with superphosphate and bone-meal (Heiden), 1889, A., 299.
  - as a manure for sugar-beet (v. Proskowitz), 1888, A., 319.
  - as manure for moorlands (Rimpau), 1887, A., 294.
  - as a manure for oats (Bieler), 1886, A., 391; (Emmerling), 1888, A., 1223.
  - comparative manuring of oats on moorlands with (Baessler), 1888, A., 189.
  - manurial action of the free lime in (Jensch), 1888, A., 525.
  - assimilation of phosphoric acid in (Petermann), 1889, A., 647.
  - value of the phosphoric acid in (Märcker), 1887, A., 687.
  - tetracalcium phosphate in (Otto), 1887, A., 445.
- **Sodium** chloride as a manure (anon.), 1884, A., 926.
  - nitrate (*Chili saltpetre*), manuring with (Koch), 1885, A., 187; (Stutzer), 1887, A., 77; (Magerstein), 1887, A., 78; (Fleischer), 1888, A., 1223.
    - and ammonium sulphate, comparative manurial value of (Märcker), 1885, A., 1156; 1886, A., 646, 954; 1890, A., 287; (Magerstein), 1887, A., 77; (Klien), 1888, A., 872; (Baessler), 1889, A., 436; (Roland), 1889, A., 1085.
- **Sodium** nitrate (*Chili saltpetre*), phosphoric acid in (Ochsenius), 1887, A., 558.
  - manuring of barley with (Klawitter; Wäterling), 1884, A., 1419; (Märcker), 1885, A., 1169.
  - and potassium nitrate, manuring potatoes with (v. Edler), 1883, A., 117; (Dehérain), 1884, A., 361.
  - manuring sugar-beet with (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
  - and peat compost, parallel experiments on, as manures for sugar-beet (Kuntze), 1885, A., 429.
- **Stable manure.** See Farmyard manure.
- *Stratiotes aloides*, constituents and properties of, and its use as a manure (Niederstadt), 1884, A., 108.
- **Straw**, fermentation, aërobic and anaërobic, of (Dehérain), 1884, A., 1412.
  - as litter (Sagnier), 1885, A., 429.
  - litter and peat litter, comparison of (Fleischer), 1884, A., 1418.
  - litter and turf litter as manure (Fleischer), 1888, A., 319.
- **Sulphuric acid** as manure (Märcker), 1883, A., 681; (Farský), 1884, A., 775; 1885, A., 83; 1886, A., 954; (Fresenius; Stocks), 1884, A., 926.
- **Superphosphates** as manures (Lloyd), 1884, A., 867.
  - comparison of, with basic slag (Meissl), 1889, A., 745.
  - as manures compared with basic slag and bone-meal (Heiden), 1889, A., 299.
  - use of (Dehérain), 1884, A., 925.
  - fine and coarse-grained (Farský), 1885, A., 82.
  - action of (Wagner), 1884, A., 1071; (Voelcker), 1885, A., 82.
  - action of, on carbonates (Weilandt), 1887, A., 995.
  - action of, on nitrates (Devarda), 1889, A., 72.

Manures—
- **Superphosphates,** behaviour of sandy soil towards (Thomson), 1891, A., 105.
  - influence of, on the quality of the yield (Farský), 1884, A., 360.
  - retrogression of (Knop), 1884, A., 1214.
  - alumina in (Yardley), 1886, A., 288.
  - soluble phosphates in (Otto), 1888, A., 553; (Stoklasa), 1891, A., 880.
  - changes of solubility in, when kept some time in bulk (Beyer), 1888, A., 223.
  - addition of wood ashes to (Magerstein), 1888, A., 749.
  - and nitrates, incompatibility of, as manures (Andouard), 1887, A., 617.
  - manuring sugar-beet with (Nantier), 1887, A., 295.
  - influence of, on the production of sugar (Nantier), 1886, A., 832.
  - See also Phosphates.
- **Thiocyanates,** manures containing, experiments with (Märcker), 1884, A., 768; (König; Klien), 1885, A., 76; (Meusel), 1887, A., 519.
  - and ammonium superphosphate, manuring with (Wollny), 1884, A., 926.
- **Tobacco stems,** manurial value of (Goessmann), 1885, A., 589.
- **Thomas slag.** See Basic slag.
- **Turf** litter and moss litter as manure (Fleischer), 1884, A., 105.
  - litter and straw litter as manure (Fleischer), 1888, A., 319.
  - See also Peat.
- **Waste products** as manure (Petermann), 1888, A., 749.
- **Waste-water** from beet-sugar factories, manurial value of (Teuchert), 1883, A., 500.
- "**Wool, dissolved,**" manurial value of (Petermann), 1883, A., 500.
- **Wool-dust,** solutions of (Märcker), 1885, A., 428.

Manuring experiments (Salfeld), 1883, A., 116; (Wagner), 1884, A., 486, 634; (v. Schwerin-Löwitz), 1884, A., 636; (Drechsler), 1885, A., 186, 187; (König), 1885, A., 1010.
- sources of error in (Raulin), 1888, A., 85.
- with artificial manures (d'Avène), 1884, A., 490.

Manuring experiments—
- by irrigation (König and Böhmer), 1886, A., 176.
- by irrigation by means of Danube water (Wolfbauer), 1884, A., 635.
- on heavy soil (Heiden), 1889, A., 300.
- at Grignon (Dehérain), 1884, A., 204, 1068; 1885, A., 423, 928; 1889, A., 541; 1890, A., 820; 1891, A., 493.
- in Holland (Reinders), 1883, A., 617.
- at Kiel (Emmerling), 1884, A., 211.
- at the agricultural station of La Somme (Nantier), 1888, A., 1127.
- at Reims (Manteau), 1884, A. 1419.
- at Peterhof (v. Knieriem), 1884, A., 636.
- in Posen in 1882 (Wildt), 1884, A., 361.
- on a Silesian farm without cattle (Fischer), 1884, A., 636.
- on barley (Klawitter; Wäterling), 1884, A., 1419; (v. Liebenberg), 1888, A., 189; (Krandauer), 1888, A., 870; (Hanamann), 1889, A., 743.
- on beans (Aitken), 1885, A., 1258.
- on clover (Samek), 1888, A., 1223.
- on clover land (v. Knieriem), 1891, A., 492.
- on forest trees (Muel), 1883, A., 617.
- on grain (Emmerling), 1884, A., 1213.
- on maize (Nantier), 1884, A., 635.
- on maize, potatoes and oats (Atwater), 1884, A., 1401.
- on marshy land (Carsten), 1884, A., 363.
- on Alpine meadows (Märcker), 1883, A., 238.
- on meadows (v. Knieriem), 1891, A., 492.
- on high lying moorlands (Fleischer), 1886, A., 578.
- on oats (Beseler and Märcker), 1884, A., 768; (Bieler), 1886, A., 391; (v. Liebenberg), 1888, A., 189; (Müller), 1888, A., 525.
- on potatoes (Vibrans), 1883, A., 882; (Prevost and Swanwick), 1884, A., 101; (Märcker), 1884, A., 102, 865; (Nantier), 1884, A., 635; (Cameron), 1884, A., 866; (Schrewe), 1886, A., 578.

- Manuring experiments—
  - on potatoes at Harelaw in 1886 (Aitken), 1887, A., 992.
  - on potatoes at Rothamsted (Gilbert), 1890, A., 409.
  - on rice (Georgeson), 1889, A., 646; (Kellner, Kozai, Mori and Nagaoka), 1891, A., 1547.
  - on rye (Märcker), 1884, A., 103.
  - on winter rye (v. Liebenberg), 1888, A., 189.
  - on soja (Levallois), 1888, A., 870.
  - on straw (Märcker), 1884, A., 772.
  - on sugar-beet (Beseler), 1883, A., 238; (Tschuschke), 1883, A., 823; (Holdefleiss), 1884, A., 103, 773; (Nantier), 1884, A., 635; (Dehérain), 1884, A., 773; (Nowoczek), 1884, A., 921; (Petermann), 1884, A., 1420; (Pagnoul), 1887, A., 748; (Kohlrausch and Strohmer), 1890, A., 1022.
  - on sugar-beet with ammonium sulphate (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
  - on sugar-beet with basic slag (v. Proskowitz), 1888, A., 319.
  - parallel, on sugar-beet with peat-compost and Chili saltpetre (Kuntze), 1885, A., 429.
  - on sugar-beet with phosphates (Ladureau), 1885, A., 1157; (Märcker), 1891, A., 612.
  - on sugar-beet with potassium chloride on heavy soil (Petermann), 1888, A., 1128.
  - on sugar-beet with sodium nitrate (Dehérain), 1884, A., 491; (anon.), 1884, A., 637; (Müller), 1884, A., 1418.
  - on sugar-beet with superphosphate (Nantier), 1887, A., 295.
  - on sugar-canes (Riffard), 1883, A., 506.
  - on tobacco (Nessler), 1884, A., 362, 490; (Jordan; Jenkins), 1886, A., 177.
  - on turnips (Dyer), 1885, A., 589; (Wilson), 1886, A., 913; (Brown), 1886, A., 1068.
  - on vines (Stutzer), 1884, A., 103, 1421; (Nippgen), 1884, A., 637; (Moritz and Seucker), 1888, A., 190.
  - on wheat (Jordan), 1883, A., 681; (Märcker), 1884, A., 103.
  - on winter wheat (v. Liebenberg), 1888, A., 189.
- Manuring experiments—
  - on wheat at Brie (Ladureau and Mousseaux), 1888, A., 383.
  - on wheat at Rothamsted during twenty years (Lawes and Gilbert), 1885, A., 583.
  - on wheat at Woburn (Voelcker), 1884, A., 482.
  - See also the individual Manures.
- Manures—
  - **Manures, analysis of—**
    - valuation of (Dehérain), 1887, A., 174.
    - unexhausted, valuation of (Lawes and Gilbert), 1886, A., 177.
    - estimation of ammonia ready formed in (Zecchini and Vigna), 1889, A., 649.
    - estimation of ammonia as nitrogen in (Massalski), 1884, A., 638.
    - estimation of ferric oxide and alumina in (Thomson), 1887, A., 302; (Glaser), 1890, A., 420; (Stutzer), 1891, A., 245.
    - estimation of moisture and free acid in (Ruffle), 1888, A., 87.
    - estimation of nitrogen in (Dreyfus), 1884, A., 639; (Aubin and Quenot), 1890, A., 921.
    - estimation of the relative value of nitrogen in artificial (Ostersetzer), 1885, A., 436.
    - estimation of nitrogen in guano (König), 1883, A., 1030.
    - estimation of nitrogen in nitrate-superphosphate and sodium nitrate (Zipperer), 1889, A., 185.
    - estimation of nitrogen in substances containing organic, ammoniacal and nitric nitrogen (Houzeau), 1885, A., 1011.
    - estimation of nitrogen in sodium nitrate, etc. (Grete), 1883, A., 1031; (Wagner), 1885, A., 435; (Foerster), 1891, A., 107.
    - estimation of insoluble phosphates in (Edwards), 1889, A., 747.
    - estimation of soluble phosphates in (Emmerling), 1886, A., 741.
    - estimation of reduced phosphates (Dircks and Werenskiold), 1888, A., 628.
    - estimation of reverted phosphates by Gladding's process (Millot), 1884, A., 639.
    - use of ammonium citrate in the analysis of precipitated phosphates (Shepherd), 1886, A., 579.
  - phosphatic, analysis of (Andouard), 1885, A., 838.

Manures—

- **Manures, analysis of—**
  - estimation of phosphoric acid in basic slag (Klein), 1886, A., 740, 835; (Brunnemann), 1887, A., 527; (Kennepohl), 1888, A., 321; (Vogel), 1888, A., 991; (v. Reis), 1889, A., 439.
  - estimation of phosphoric acid in (anon.), 1883, A., 620; 1885, A., 437; (Gassend and Campredon), 1884, A., 217; (Wells), 1885, T., 185; P., 20; (Spencer), 1885, A., 436; (Martinotti), 1891, A., 1397; (Burney), 1892, A., 1125.
  - estimation of phosphoric acid in, containing cotton-seed-meal (Dancy), 1892, A., 1029.
  - estimation of phosphoric acid in agricultural phosphates (Aubin), 1885, A., 1093.
  - estimation of phosphoric acid and reverted phosphoric acid in dicalcium phosphate (Mohr), 1885, A., 688.
  - estimation of reverted phosphoric acid (Gladding), 1884, A. 1075, 1424; (Petermann), 1885, A., 837; (Glaser), 1885, A., 837, 838; (Gibson), 1892, A., 1126.
  - examination of reverted phosphoric acid at various periods (Post), 1884, A., 774.
  - estimation of "half-soluble" phosphoric acid (Ollech), 1883, A., 508.

Manures—

- **Manures, analysis of—**
  - estimation of soluble phosphoric acid in superphosphates by the Belgian method (Crispo), 1891, A., 1289.
  - estimation of phosphoric acid in superphosphates (Aubin), 1884, A., 1424.
  - estimation of potash in (Lindo), 1888, A., 89.
  - estimation of potassium in (anon.), 1885, A., 440.
  - analysis of rubbish heaps as (Mayer), 1888, A., 191.
  - superphosphates, analysis of (Gladding), 1884, A., 1426; (Ruffle), 1888, A., 387; (Hughes), 1889, A., 1245; (Burney), 1892, A., 1125.
    - causes of discrepancy in (Märcker), 1884, A., 639; (Metger and Emmerling), 1886, A., 740.
    - estimation of free acid in (Ruffle), 1888, A., 87; (Mellon), 1888, A., 527.
    - estimation of phosphoric acid in (Aubin), 1884, A., 1424.
    - Belgian method of estimating the soluble phosphoric acid in (Crispo), 1891, A., 1289.
    - estimation of water in (Ruffle), 1888, A., 87; (Stoklasa), 1891, A., 110.
